

1870

Vernier Calipers from Carl Mahr - Made of steel and brass, produced in 1868

1900

Length Measuring Machine - Built in 1908. Reading on the vernier: 1/10,000 mm

1930

Millimetre Dial Comparator - Built in 1937. The first indicating unit for reliably recording dimensional differences down to 1/1000 mm

1960

Millitron - Built in 1964. It is a compact length measuring instrument that was given the nickname "The Miner's Lamp"

1980

MMQ 2 - Compact desktop form tester for evaluating roundness

ABOUT MAHR: HOW IT ALL STARTED

The measure of all things since 1861. The industrialization of the 19th century saw not only a rapid growth in productivity but also a need for precision in the manufacture of products and components. Carl Mahr recognized the demand this would create for precision length measuring instruments over 150 years ago. Founded in Esslingen on the River Neckar, the family business grew slowly but surely into a global enterprise with over 1,900 employees. We have grown up in the world of metrology and have amassed a wealth of expertise along the way. We draw on this knowledge to give you the best possible support

Mahr. Dimensional Metrology

1985

M4P - The first microprocessor-controlled roughness measuring instrument, with integrated printer for parameters and profiles

2010

MarSurf M400 - The best of the „portables“. Easy. Fast. Innovative. With Bluetooth technology, skidless tracing and automatic zero setting.

2012

MarSurf One - Roughness measurement with a smart phone. Mobile. Connected. Location-independent. Inexpensive.

2014

MarCal 16 EWRI, the world's first digital calipers with integrated Wireless data transmission system

2015

MarShaft SCOPE 250 plus, flexible shaft measuring machine for measuring small, rotationally symmetrical workpieces such as turned parts

in implementing your measurement solutions. Mahr products have long been at home in many sectors of industry. Our expertise creates customer benefits in the automotive industry, mechanical and electrical engineering, as well as in medical technology, optics and aerospace. Mahr products play their part in the most diverse measuring tasks, such as in fuel injection systems for engines, machine bearings, aspheres in optics, and in alternative energy sources such as wind power. Our solutions speak the language in many industries, the language of quality, safety and sustainability. Ever since 1861!

Superb quality with absolute precision

SAFETY

Results you can rely on

THE MAHR BRAND

Our precision speaks for itself! The brand is your guarantee of safety. Quality assurance is playing an increasingly critical role in the world of production. The more important repeatable precision becomes, the greater the contribution of metrology to the final result. We make it our job to ensure that the results are accurate. As one of the world's largest manufacturers of dimensional metrology equipment, our leadership in the field of innovation is unmatched. Mahr would like to talk to you: We will get to know your processes, understand them, and identify the most cost-effective metrology solution. From

you a broad choice for precision gages, surface metrology and form metrology, as well as for measuring shafts, gears and tools. A comprehensive global service network delivers everything from procurement of spare parts to gage management and calibrations, in accordance with DIN EN ISO 17025.

DYNAMIC PRECISION

WITH METROLOGY FROM MAHR

MEASURING SOLUTIONS FOR THE AUTOMOTIVE INDUSTRY

THE AUTOMOTIVE APPLICATION EXPERT

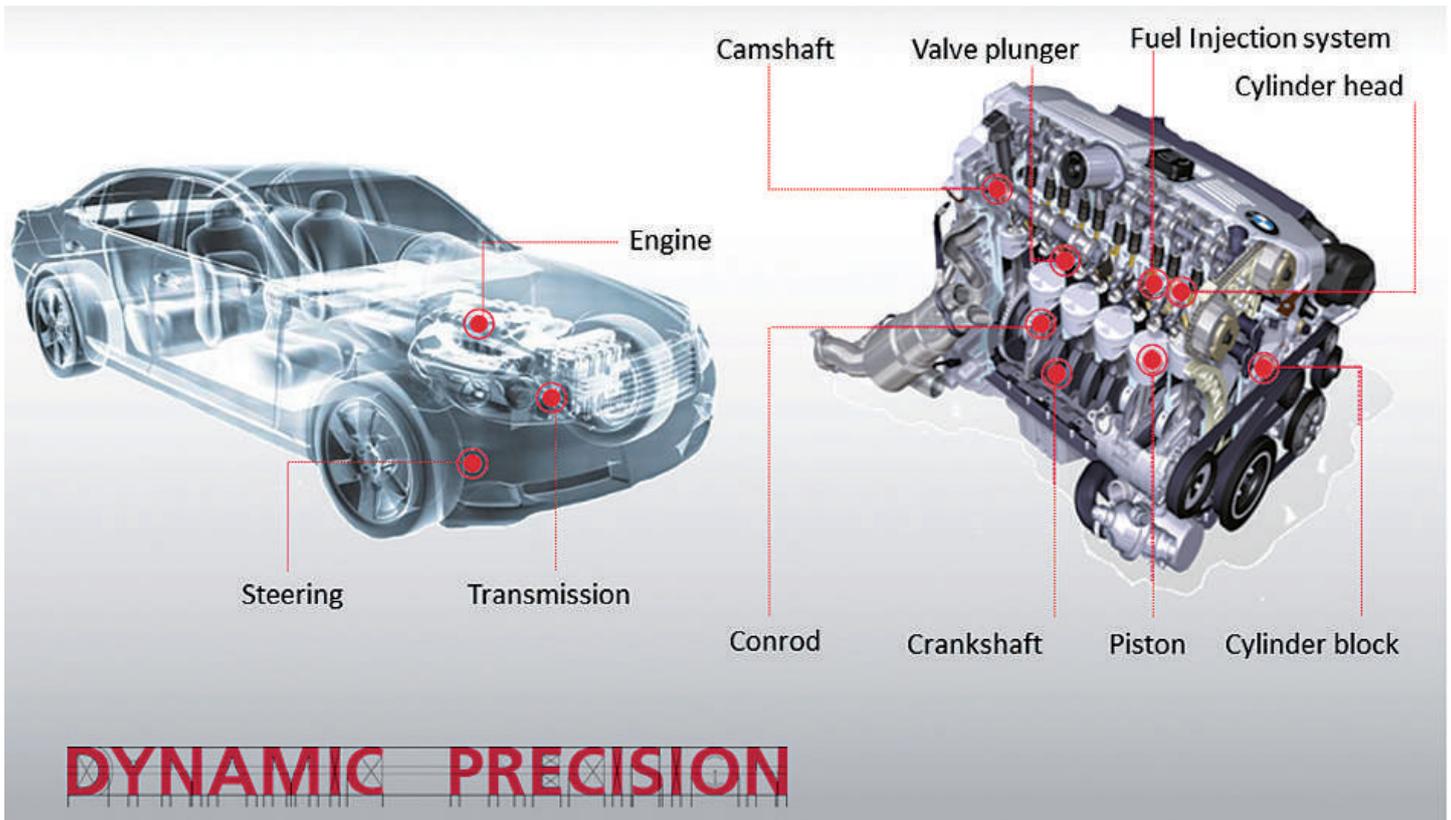

Precision and driving dynamics go hand in hand in automobiles. Drivability is dependent on precision-engineered and precision-measured components. In order to keep it this way, Mahr offers field-proven measurement technology that keeps pace with the major trends in the automotive industry.

For the foreseeable future, the internal combustion engine will remain the dominant drive system. For that reason, efforts are being made to significantly reduce the engine's fuel consumption and to meet stringent CO2 emissions targets.

An important element in the reduction of fuel consumption is downsizing. For example, the number of cylinders can be reduced from 4 to 3 or from 6 to 4. With turbocharging, a much higher performance per cylinder is possible nowadays. There are various options available here, including the conventional turbocharger, the twin-turbocharger or the sequential bi-turbocharger.

Another element in gasoline engines is direct fuel injection and active cylinder management. This refers to the activation or deactivation of cylinders. The camshaft is used to control these processes.

In addition to the design of new engine concepts, the focus is largely on the reduction of friction. Friction reduction affects the entire power train, from the engine and the transmission through to the tires. The aim is to make transmissions smaller, to increase the power transfer and to reduce noise. In addition, there are especially high demands on cylinder liners, bearings and gears, for example.

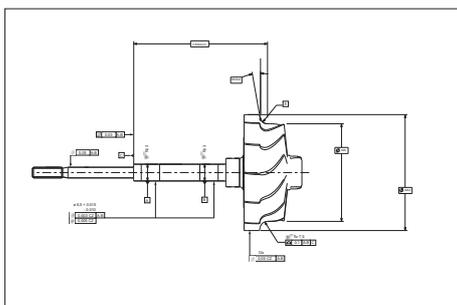

Alternative drives such as hybrid vehicles or electric vehicles with batteries or fuel cells are pushing forward the electronic power train. Currently, the automotive industry is taking on the challenge of manufacturing components such as batteries, fuel cells and electric motors to high quality standards and at a reasonable cost, in medium to high volumes.

Mahr offers metrology solutions for automotive parts. Whether it be axles, starters, brakes, seals, electric motors, gear parts, steering components, pulleys, wipers, seats, turbochargers or engines, Mahr has the solution to your metrology challenges. Mahr has a wide variety of solutions for engine parts such as injectors, engine blocks, camshafts, pistons, crankshafts, connecting rods, valves and cylinder heads.

Mahr metrology solutions range from standard measuring instruments for the inspection room through to fully automatic measurements on the production line. In addition, Mahr covers the full range of parameters, including length, form, contour, gear tooth geometry and roughness.

PRODUCTIVE PRECISION

WITH METROLOGY FROM MAHR

MEASURING SOLUTIONS FOR MECHANICAL ENGINEERING

THE APPLICATION EXPERT FOR MECHANICAL ENGINEERING

Precision and productivity go hand in hand in mechanical engineering. Proven Mahr metrology helps you to optimize production processes for precision parts in both low and high volumes. Mahr can provide the mechanical engineering industry with measurement solutions that are universal, convenient and cost-effective.

With innovative new techniques emerging in manufacturing processes such as turning, grinding, milling, drilling, honing, laser cutting and electrical discharge machining, the demands placed on dimensional metrology are growing all the time. Precision metrology from Mahr supports these developments with customized and application-specific solutions. From automated measuring systems with 100% inspection through to random individual testing, Mahr has the right solution for your production needs. These solutions offer budget-oriented quality assurance which delivers valuable competitive advantages, since quality is continuously improved as a result and production costs reduced.

Individual customer solutions from Mahr include important factors such as life cycle cost (LCC), return on investment (ROI) and longer service intervals.

Mahr, the Application Expert, offers metrology solutions for parts used in mechanical engineering. Representative of this wide range of parts are bolts, seals, cans, transmissions, hydraulic components, bearings, pumps, compressors, pipes, shaving cutters, worm gears, cutters, hobs, shafts, gearing and gear wheels.

PRECISION HEALING

WITH METROLOGY FROM MAHR

MEASURING SOLUTIONS FOR MEDICAL TECHNOLOGY

THE APPLICATION EXPERT FOR THE MEDICAL INDUSTRY

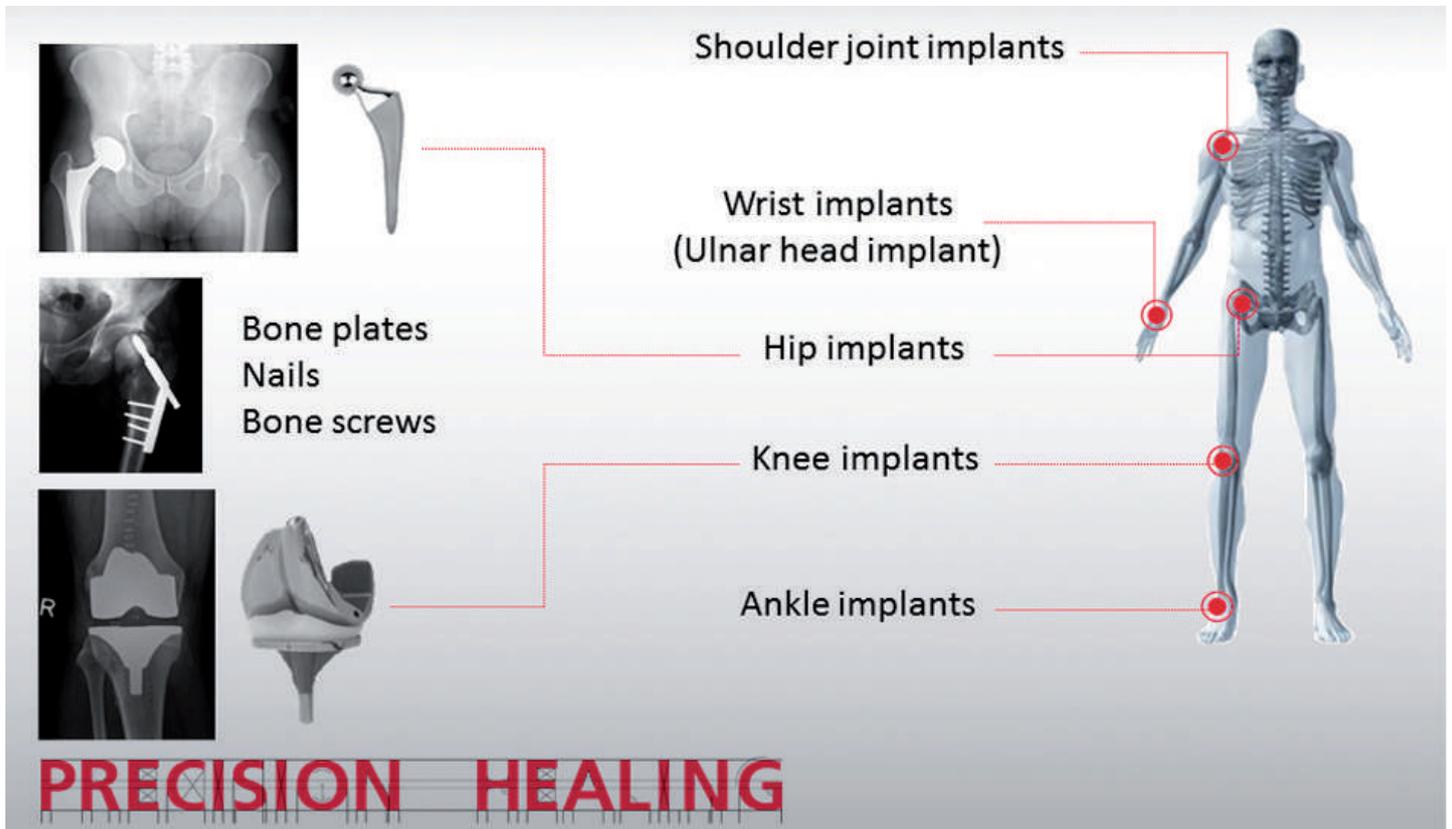

Precision promotes health. Precision-manufactured implants are easier to fit, cause fewer painful side-effects such as metal abrasion in day-to-day use, and have a longer service life. Mahr offers proven metrology to extend the quality assurance of medical parts.

Medical technology and metrology are two terms that are continually gaining in prominence, making an important contribution to improving healing outcomes and the recovery process. The use of alloplastic implants in surgical disciplines is on the rise. The essential objective is to give the patient freedom from pain and the most natural function possible. Directly associated with this is the need for biocompatibility and long-term functionality (high breaking resistance, low abrasion). New materials and material combinations help to improve these implant qualities, allowing optimized design and increased production efficiency.

For the patient, this continual improvement in quality means that further interventions, known as revision surgery, are only needed after many years and the implant can be retained for longer

To safeguard the characteristics that affect the quality of a product, the use of modern, innovative but also proven metrology is absolutely essential.

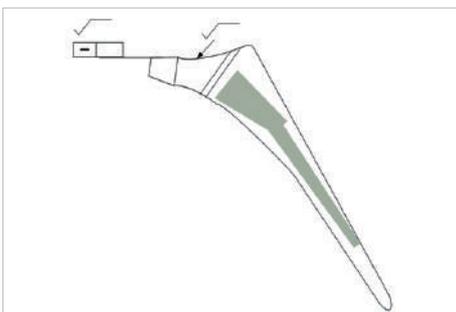

European standard EN ISO 21534 describes among other things the design review (part 7) and design features (part 5).

Follow the lead of many other implant manufacturers and use high-precision metrology from Mahr in your R&D department as well as in production monitoring to ensure the quality of your implants. Mahr metrology gives you detailed information for product optimization and allows you to document your quality control procedures, to 100% inspection.

You can also avoid expensive and unnecessary claims, right from the start. Mahr, the Application Expert, offers metrology solutions for parts used in medical technology, including medical screws, individual components of hip and knee joint implants, dental implants, pumps for precision metering, and thin cannulas.

PRECISION VISION

WITH METROLOGY FROM MAHR

MEASURING SOLUTIONS FOR THE OPTICS INDUSTRY

THE APPLICATION EXPERT FOR OPTICS

Precision for the correct beam path through lenses and lens systems is essential in order to focus the light and to achieve the desired luminous intensity.

The constant development of optical components in conjunction with modern light sources such as lasers and LEDs, high-performance image processing software and the huge increase in computer storage capacity have opened the way for cost-effective technical solutions that just a few years ago would have been unthinkable.

Accompanying this development is the growing demand on metrology. Often the first quality testing of optical components such as lenses, diaphragms, prisms, mirrors, optical fibers or light sources occurs at an early stage of production.

Mahr has been working on the measurement of optical components for many years now. Lens measurement is a particular area of interest. Mahr, as a complete supplier of dimensional metrology, provides both the manufacturers of machining tools for lenses and the lens manufacturers themselves with customized solutions, from hand measuring tools for use directly on the machine to the inline measuring system MarSurf LD 130 Aspheric.

With optical systems such as zoom lenses, DVD drive lenses and mobile phone camera lenses, the aim is to design ever more compact systems that cost less to produce. So in addition to manufacturing conventional spherical lenses, the optical industry is increasingly moving towards aspherical lens shapes. The latest production techniques allow for all sorts of design possibilities as well as supporting the trend towards free-form surfaces and diffractive elements in optical components.

High-precision lenses are made by glass abrasion processes such as grinding, polishing or finishing. The optimiza-

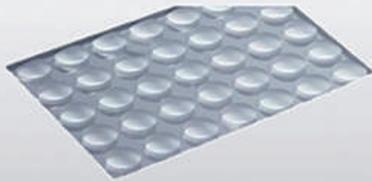

• Aspheric lenses

• Mirrors

• Fiber optics

• Lens arrays

• Prisms

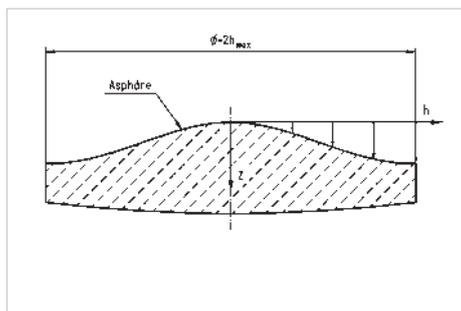

PRECISION VISION

tion of this manufacturing process, with inline measurements, is an important starting point for reducing costs. Processes such as precision molding for producing high quality at relatively low cost or injection molding for manufacturing low-cost plastic lenses are used in the mass production of lenses. The quality of the tools used to make the lenses is the foundation for the quality of the products themselves. New geometries and increasing demands on the product quality also require new measurement techniques and measurement strategies.

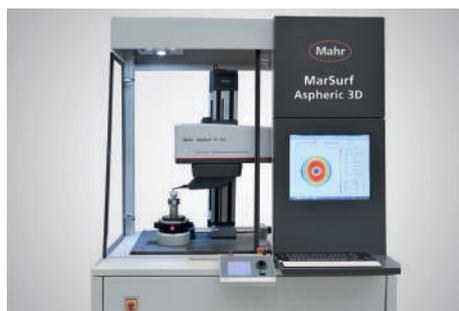

Non-contact surface measuring systems that can detect any shape with a high degree of accuracy and evaluate it by metrological means provide the answer to the quality assurance problems of tomorrow. Intensive research and decades of experience in industrial metrology combined with close collaboration with partners from science and industry provide the necessary foundation to support you with innovative products in the manufacture of optical components. Mahr metrology is ready for the challenges of the future.

Mahr, the Application Expert, offers metrology solutions for optical components such as spheres, aspheres, freeforms, mirrors, cylinder lenses, lens arrays and fiber optics.

THE APPLICATION EXPERT FOR THE AEROSPACE INDUSTRY

Precision makes flying safe. Engines, wings, rudders, flaps, control systems, chassis, etc., must be in perfect working order during the flight so as to guarantee the safe transport of passengers. Only precision-crafted components function reliably for hours and in the most diverse environmental conditions.

Global air traffic is rapidly increasing. This means that the requirements for lower exhaust emissions and hence lower fuel consumption are rising all the time. In addition, people in built-up areas are becoming increasingly vocal in their demand for lower aircraft noise, and this in turn is having an impact on the noise emission of engines. In addition, suppliers are increasingly feeling the pressure of costs from major aircraft manufacturers.

In this trade-off between innovation and cost pressure, and given the high demands for reliability, metrology from Mahr provides solutions for R&D, measuring rooms and 100% inspection in manufacturing. During development, new lighter materials are increasingly being tested and implemented. Surface structures are carefully examined in order to minimize frictional resistance.

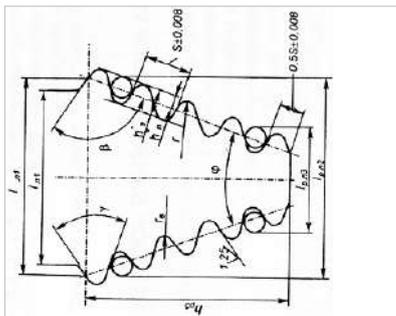

In manufacturing, the challenge is to deliver the high-quality components error-free to the subsequent processing or assembly step and to avoid costly rework. In addition to checking dimensional parameters, inspection for cracks and breakages is also vital. Optical measuring techniques and inspection methods can speed up quality assurance and make it independent of subjective assessments.

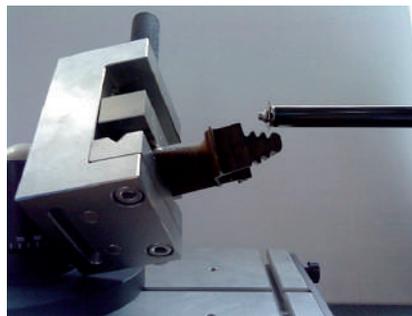

When the aircraft components are in use, the question of timely and reliable service quickly arises. Once again, Mahr offers appropriate measurement solutions to check parts for wear or damage and to establish whether they can remain in use.

Mahr, the Application Expert, offers metrology solutions for airplane components, including blisks, seals, disks, transmissions, hydraulic components, bearings, turbine blades, shafts and gear wheels.

ELECTRIC PRECISION

WITH METROLOGY FROM MAHR

MEASURING SOLUTIONS FOR THE ELECTRICAL ENGINEERING INDUSTRY

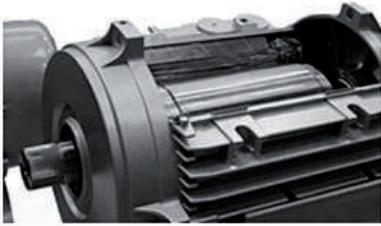

THE APPLICATION EXPERT FOR ELECTRICAL ENGINEERING

Precision ensures that electricity can flow and power devices. Precision in the nanometer range, as in semiconductors, and in the micrometer range, as in printed circuit boards, ensures the integrity of their electrical wiring and the implementation of their electrical function.

The electrical engineering industry is heavily influenced by the demand for energy efficiency. Reducing energy consumption is a major concern in all types of appliances and devices, including washing machines, dryers, refrigerators, dishwashers, consumer electronics and mobile phones. To reduce energy consumption, new materials are used, friction in mechanical components is reduced and controls are optimized. The optimization of energy efficiency, low noise and service life is the aim in electric motors. In addition to electronic commutation, this leads to the reduction of imbalance in electric motor parts.

Another trend is the miniaturization of devices and components. Examples are thinner laptops or mobile phones. This, in turn, requires smaller dimensions for electronic components and thinner multi-layered printed circuit boards. Specifically, the reduction of conductor widths and thicknesses as well as reliable production are becoming ever more challenging. In the field of electronic components, Moore's law has already resulted in 16 nm manufacturing processes, with 10 nm processes coming soon. These very small structural sizes present a challenge not only in terms of technical processes but also for metrology. Even the counter-movement "More with Moore" with process modules such as MEMS, high voltage, image sensors and integrated memory has already arrived at structural sizes of up to 55 nm.

Novel energy storage systems such as fuel cells or lithium-ion batteries also place new demands on dimensional metrology.

• Electric motors

• Batteries

• Wafer

• Printed circuit board

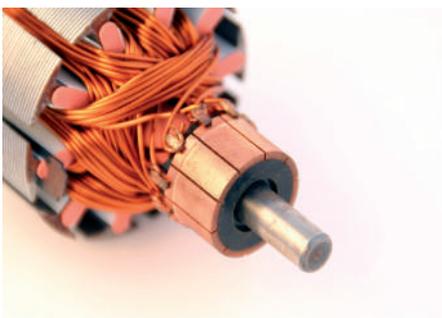

- Fuel cells
- Turbines
- Stirling engines
- Semiconductor

ELECTRIC PRECISION

The manufacturing processes in electrical engineering are often high-volume processes. For quality assurance in manufacturing, 100% measurements or inspections are performed in many process steps. Process development and the development of components also require the use of dimensional metrology. Mahr offers proven measurement solutions for these requirements.

Mahr, the Application Expert, offers metrology techniques for the electrical engineering industry. Proven measurement solutions are available for the measurement and inspection of semiconductor structures on wafers and of printed circuit boards, electric motors, connectors, contacts, batteries and fuel cells.

**FOR SIMPLE MEASUREMENT THE RULE OF THUMB IS SUFFICIENT.
FOR THE REST THERE IS MARCAL.**

High-quality calipers are some of the most important measuring instruments in dimensional metrology because they are both versatile and easy to use. The MarCal series from Mahr is no exception. Simple to operate, with a large, high-contrast display and fast and uncomplicated data transmission, the ER digital caliper series meets all the requirements of modern metrology. The latest generation of waterproof digital calipers is the MarCal 16 EWRi, which can be used in even the most difficult workshop conditions. Integrated Wireless, the built-in, energy-efficient wireless system, is the ideal solution for transmitting measured values. In addition, all Mahr calipers have a high-precision slide movement and both slide and rail are made of hardened stainless steel.

MarCal - The innovative Reference-System

Just set once to zero

All Mahr digital calipers with this **REFERENCE** logo are equipped with the innovative Reference System. The zero position just has to be set once: after setting the zero position, the zero remains stored for all further measurements. Therefore, once the caliper is switched ON or the slide is moved the caliper is immediately ready for measurement. Once the caliper is initially set to zero, there is no need to reset to zero each time the caliper is turned on.

Conventional

- ① Switch ON
- ② Close the measuring jaws
- ③ Set to zero
- ④ Results of measurement

REFERENCE - System

- ① Switch ON
- ② Results of measurement

Press the  or  move the slide ON key

IP-Protection classes

First digit is the degree of protection according to IEC 60529

Protection against particles, contaminants and dust

- 0 Not protected
- 1 Particles > 50,0 mm
- 2 Particles > 12,5 mm
- 3 Particles > 2,5 mm
- 4 Particles > 1,0 mm
- 5 Dust protected
- 6 Dust tight

Second digit is the degree of protection according to IEC 60529 (approximate)

Protection against wet conditions (fluids)

- 0 Not protected
- 1 Falling water drops - vertical
- 2 Falling water drops - tilted < 15°
- 3 Spray water < 60°
- 4 Water splashing from all directions
- 5 Water jets from all directions
- 6 Powerful water jets
- 7 Temporary immersion in water
- 8 Continuous immersion in water

Example:
IP67 means that the product is dust tight and is protected against temporary immersion in water.

MarCal. The new Generation

WATERPROOF DIGITAL CALIPERS WITH THE REFERENCE SYSTEM AND INTEGRATED WIRELESS

Security due to the Reference-Lock function

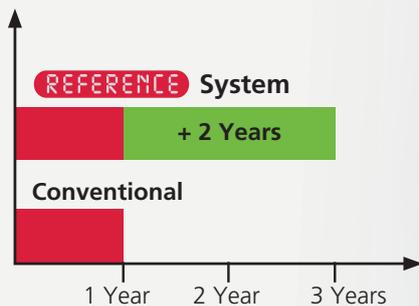

- Zero-position is secured
- Operating error is not possible

The digital caliper MarCal 16 EWRi Reference is equipped with a LOCK function. With this key lock, the zero position is secured and operating error is avoided.

Battery service life is 3 years

The new Reference System is extremely energy efficient because of its standby mode feature; almost no power is required, thus **extending the life of the battery up to 3 years***.

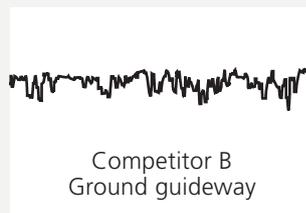

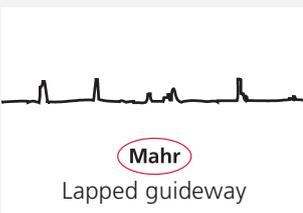

* When Integrated Wireless is deactivated

Superior quality of the guideways

Only MarCal calipers have lapped guideway surfaces, that guarantee an even and sensitive run of the slide. Additionally, the service life of the caliper increases, compared to a ground guideway due to the greater contact area on the guideway surface.

Surface of the guideway

MarConnect Integrated Wireless

Wireless data transmission for the price of a data cable. With Mahr's Integrated Wireless, users have a new Integrated Wireless data transmission system for the price of a data cable. Data acquisition with digital calipers is now even simpler: simply transmit your measured data directly into Microsoft Office Excel® or any Windows program with a keyboard code.

Secure data transmission

With Integrated Wireless, your data will be transferred to the digital indicator, which is confirmed with a message in the digital indicator's display. The message will show whether the sent data has been transferred correctly, and/or whether you are in the reception range of the i-Stick.

Ergonomic Design

The handy non-slip thumb support of the MarCal 16 EWRi ensures, even in contaminated working conditions, trouble-free handling and therefore reliable measuring results.

The high-contrast display with 11 mm sized digits enables accurate, fatigue-free reading of the measurement results.

Excellent resistance against dust, coolant and lubricants

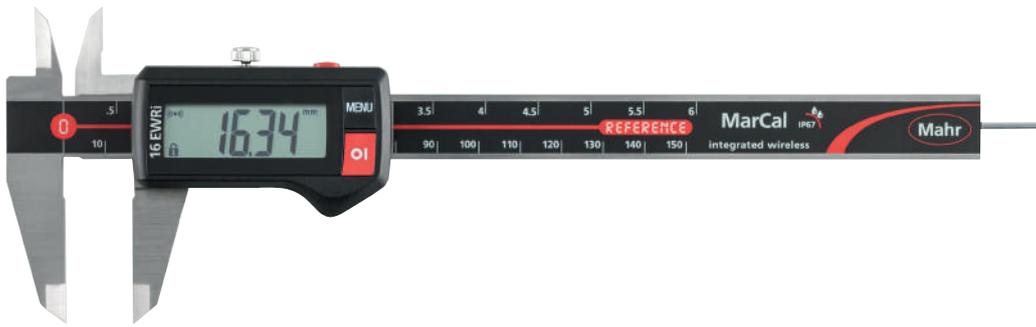

Due to the outstanding protection against dust and water, the digital caliper MarCal 16 EWRi Reference delivers precise and secure results, even in the most difficult workshop conditions. The finished plastic components have an outstanding chemical resistance.

| | | |
|---------------|-----------|--|
| Code Initials | IP | International Protection |
| First digit | 6 | Dust-tight |
| Second digit | 7 | Protected against temporary immersion in water |

Digital Caliper MarCal 16 EWR

REFERENCE

DIN 862

Functions:

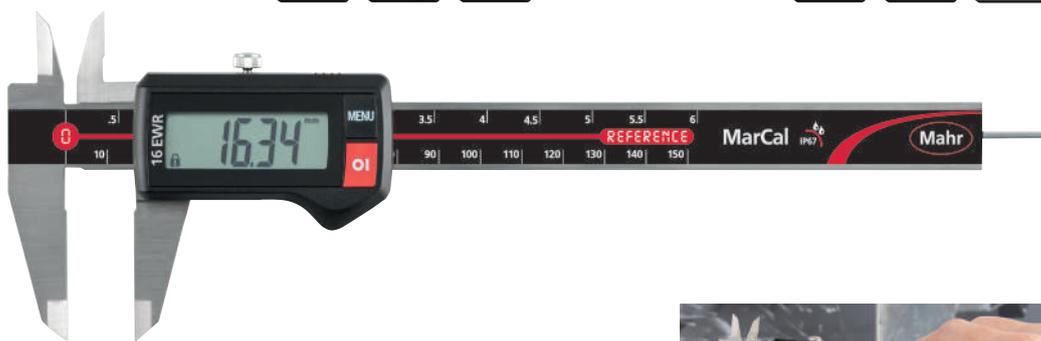

- ON/OFF
- AUTO-ON / OFF
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- Reversal of counting direction
- mm/inch
- LOCK function (key lock)

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Step measuring function
- Immediate measurements due to the Reference System

- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide

- **Digit height:** 11 mm
- **Energy supply:** Battery life approx. 3 years
- **IP protection category:** IP 67

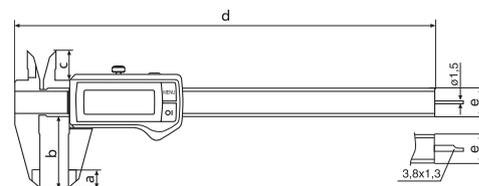

- **Scope of delivery:** Battery, Instruction manual, Case

Functions:

- AUTO-ON / OFF
- ON/OFF
- DATA (Data transmission via connection cable)
- HOLD (storage of measured values)
- PRESET (for entering a numerical value)
- RESET (set display to zero)
- mm/inch
- LOCK function (key lock)
- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Step measuring function
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 11 mm
- **Data interface:** Integrated wireless
- **Energy supply:** Battery life approx. 3 years (approx. 0,5 in wireless mode)

• **IP protection category:** IP 67

• **Scope of delivery:** Battery, Instruction manual, Case, Setting gage for inside measurement 16 Eel, Measuring force device 16 Ec, Depth Measuring Bridge 16 Em, Anvils for outside measurement 16 Eea 1-3, Anvils for inside measurement 16 Eei 1-3

• **Software:** MarCom Professional free download:

www.mahr.com/marcom

(only for Mahr data cables and wireless systems with USB and RS232 interface)

• **Digit height:** 8.5 mm

• **Data interface:** USB, Opto RS232C, Digimatic, Wireless

• **Energy supply:** Battery life approx. 3 years

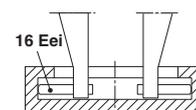

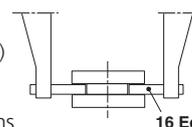

• **IP protection category:** IP 67

• **Scope of delivery:** Battery, Instruction manual, Case, Setting gage for inside measurement 16 Eel, Measuring force device 16 Ec, Depth Measuring Bridge 16 Em, Anvils for outside measurement 16 Eei 1-3, Anvils for inside measurement 16 Eei 1-3, 4118808 without measuring anvils, adjustment bridge and measuring force equipment

Application:

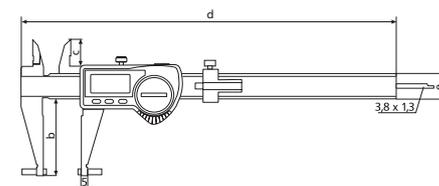

- Can be used as a standard caliper (four types of measurements)
- With standard accessories to measure recesses, grooves, etc.
- With additional accessories to measure threads, bores, serrations

Functions:

- ON/OFF
- AUTO-ON / OFF
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- mm/inch
- LOCK function (key lock)
- DATA (Data transmission via connection cable)

- High contrast analog display
- Locking screw above
- Immediate measurements due to the Reference System
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide
- Slide and beam made of hardened stainless steel
- Measuring faces for outside measurement
- Thread M2.5 measuring jaws to accommodate measuring anvils for internal and external measurements
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 10 mm (300 mm), 12,5 mm (500mm)
- **Data interface:** USB, Opto RS232C, Digimatic, Wireless
- **Energy supply:** Battery life approx. 3 years
- **IP protection category:** IP 65
- **Scope of delivery:** Battery, Case, Instruction manual, Avils

Digital Caliper for special applications MarCal 16 EWri-C / 16 EWR-C

Functions 16 EWri-C:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- DATA (Data transmission)
- HOLD (storage of measured values)

Functions 16 EWR-C:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- DATA (Data transmission via connection cable)

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Step measuring function
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide

Features 16 EWri-C:

- **Height of digits:** 11 mm
- **Data interface:** Integrated wireless
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

Features 16 EWR-C:

- **Height of digits:** 8,5 mm
- **Data interface:** USB, Opto RS232C, Digimatic
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

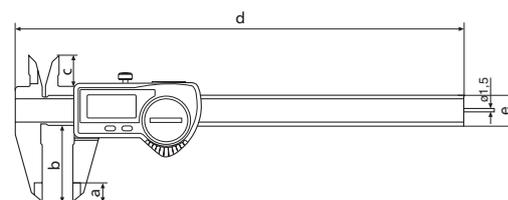

Application:

Outer measuring surfaces made of ceramic, for measuring hard materials

Digital Caliper for special applications MarCal 16 EWri-S / 16 EWR-S

REFERENCE

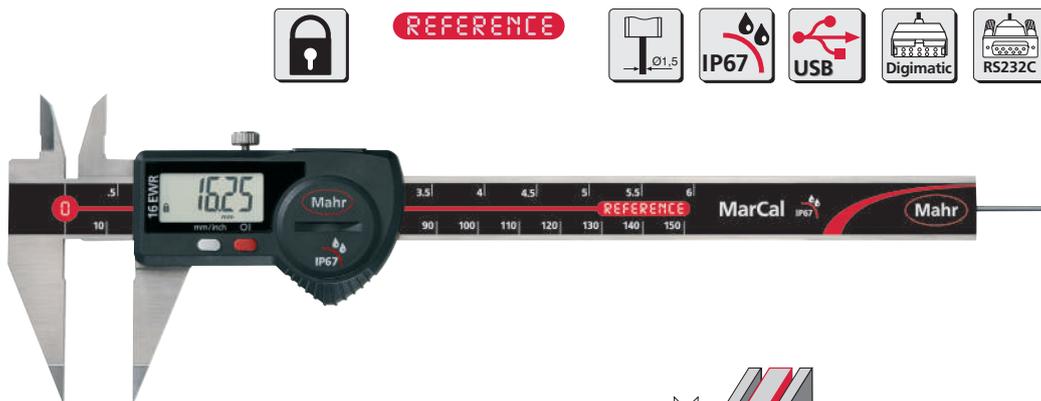

Functions 16 EWri-S:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- DATA (Data transmission)
- HOLD (storage of measured values)

Functions 16 EWR-S:

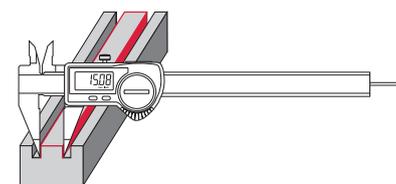

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- DATA (Data transmission via connection cable)

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Step measuring function
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide

Application:

With pointed jaws e.g. for measuring distances between grooves

|-----------|--------------------------|------------------------------------|--------------|
| 4102220 | 16 EWri-SM | Receiver | i-Stick |
| 4102357 | 16 EWR-SM | Data Connection Cable USB (2 m) | 16 EXu |
| 4102410 | 16 EWR-SM | Data Connection Cable RS232C (2 m) | 16 EXr |
| 4102520 | 16 EWR-SM, 16 EWri-SM | Battery 3 V, CR 2032 | |
| 4102915 | 16 EWR-SM | Digimatic data cable (2 m) | 16 EWd |

i-Stick

Functions 16 EWri-SM:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- DATA (Data transmission)
- HOLD (storage of measured values)

Functions 16 EWR-SM:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- DATA (Data transmission via connection cable)

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Step measuring function
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide

Features 16 EWri-SM:

- **Height of digits:** 11 mm
- **Data interface:** Integrated wireless
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

Features 16 EWR-SM:

- **Height of digits:** 8,5 mm
- **Data interface:** USB, Opto RS232C, Digimatic
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

Digital Caliper for special applications MarCal 16 EWRI-VS / 16 EWR-VS

REFERENCE

Functions 16 EWRI-VS:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- DATA (Data transmission)
- HOLD (storage of measured values)

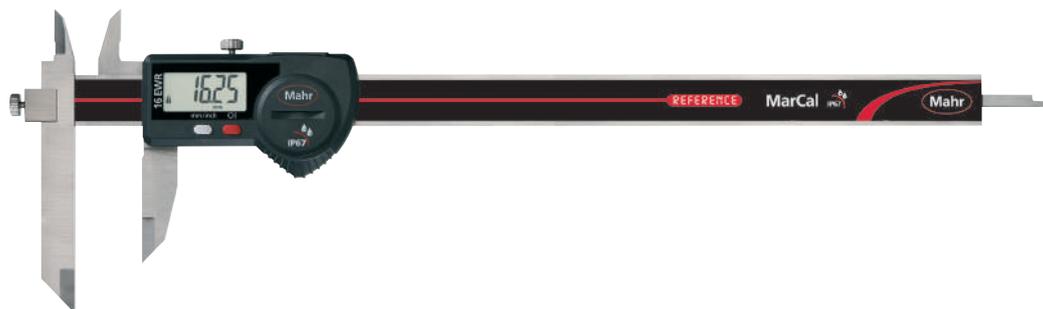

Functions 16 EWR-VS:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- DATA (Data transmission via connection cable)

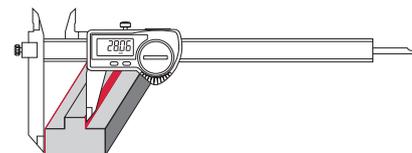

REFERENCE

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring blade for inside measurements
- Slide and beam made of hardened stainless steel
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide

Application:

With moving jaws for measuring stepped workpieces

- **Data interface:** Integrated wireless
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

Features 16 EWR-LI:

- **Height of digits:** 8,5 mm
- **Data interface:** USB, Opto RS232C, Digimatic
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

Digital workshop caliper MarCal 18 EWR

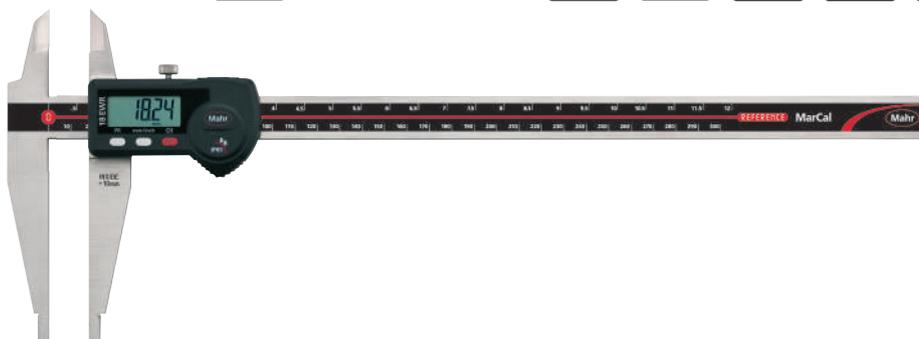

REFERENCE

Functions:

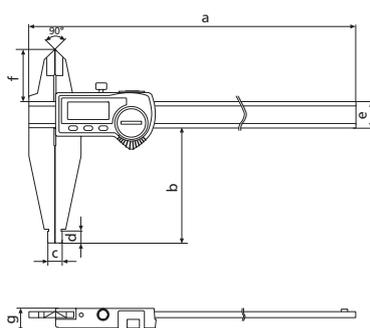

- AUTO-ON / OFF
- DATA (Data transmission via connection cable)
- ON/OFF
- PRESET (for entering a numerical value)
- RESET (set display to zero)
- mm/inch
- LOCK function (key lock)
- Measuring blades for outside measurements
- High contrast analog display
- Locking screw above
- Rounded measuring blades for inside measurements
- Slide and beam made of hardened stainless steel
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide
- **Software:** MarCom Professional free download:
www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 10 mm (300mm), 12,5 mm
- **Data interface:** USB, Opto RS232C, Digimatic, Wireless
- **Energy supply:** Battery life approx. 3 years
- **IP protection category:** IP 65
- **Scope of delivery:** Battery, Instruction manual, Case

Digital workshop caliper MarCal 18 ESA

Functions:

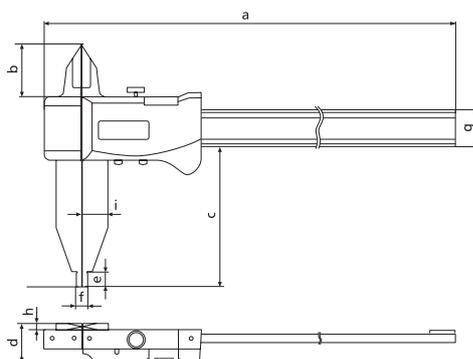

- ON/OFF
- RESET (set display to zero)
- mm/inch
- HOLD (storage of measured values)
- PRESET (enter a numerical value) from range 500 mm
- High contrast analog display
- Locking screw above
- Rounded measuring blades for inside measurements
- Prisma guide ways for a more smooth and even movement
- Measuring surfaces made of steel
- Measuring blades for outside measurements
- To reduce the overall weight the slide and beam are made from aluminum and are coated with a hard anodized surface coating (1100 HV)
- Dirt wipers are integrated in the slide
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 6 mm (300mm), 10,5 mm
- **Data interface:** Opto RS232C (only 300 mm version)
- **Energy supply:** Battery life approx. 2 years
- **IP protection category:** none
- **Scope of delivery:** Battery, Instruction manual, Case

Digital Depth Gage MarCal 30 EWRI

REFERENCE

Functions:

- ON/OFF
- AUTO-ON / OFF
- RESET (set display to zero)
- mm/inch
- PRESET (for entering a numerical value)
- LOCK function (key lock)
- HOLD (storage of measured values)
- Reversal of counting direction
- DATA (data transmission)

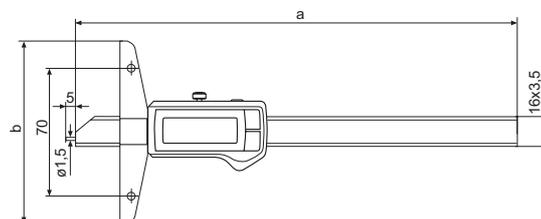

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring surfaces made of steel
- Slide and beam made of hardened stainless steel
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide
- **Digit height:** 11 mm
- **Data interface:** Integrated wireless
- **Energy supply:** Battery life approx. 3 years (approx. 0,5 in wireless mode)
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring surfaces made of steel
- Slide and beam made of hardened stainless steel
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide
- **Digit height:** 8,5 mm
- **Data interface:** USB, Opto RS232C, Digimatic
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Case

Digital Depth Gage MarCal 30 EWri-N / 30 EWR-N

Functions 30 EWri-N:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- DATA (Data transmission)
- HOLD (storage of measured values)

Functions 30 EWR-N:

- ON/OFF
- AUTO-ON / OFF
- mm/inch
- LOCK function (key lock)
- RESET (set display to zero)
- PRESET (for entering a numerical value)
- DATA (Data transmission via connection cable)

- High contrast analog display
- Locking screw above
- Lapped guideway
- Measuring surfaces made of steel
- Slide and beam made of hardened stainless steel
- Immediate measurements due to the Reference System
- Raised guideways for the protection of the scale
- Excellent resistance against dust, coolants and lubricants
- Dirt wipers are integrated in the slide

Features 30 EWri-N:

- **Height of digits:** 11mm
- **Data interface:** Integrated wireless
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Anvils 30 Ent (1mm), 902 (4mm) and 903 (4mm), Case

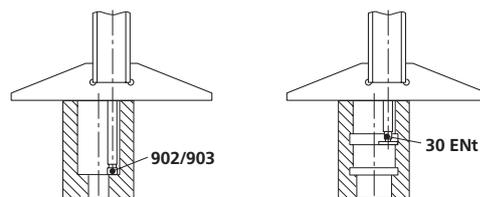

Features 30 EWR-N:

- **Height of digits:** 8,5mm
- **Data interface:** USB, RS232C, Digimatic
- **Energy supply:** Battery, life span ca. 3 years
- **IP protection category:** IP 67
- **Scope of delivery:** Battery, Instruction manual, Anvils 30 Ent (1mm), 902 (4mm) and 903 (4mm), Case

Digital linear machine scale MarCal 31 EW

REFERENCE

Functions:

- ON/OFF
 - RESET (set display to zero)
 - mm/inch
 - PRESET (for entering a numerical value)
 - DATA (Data transmission via connection cable)
 - AUTO-ON / OFF
- Control panel and display unit can be rotated for horizontal or vertical installation
 - High contrast analog display
 - Slide and beam made of hardened stainless steel
 - Raised guideways for the protection of the scale
 - Dirt wipers are integrated in the slide
 - **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
 - **Digit height:** 6 mm
 - **Data interface:** USB, Opto RS232C
 - **Energy supply:** Battery life approx. 3 years
 - **IP protection category:** IP 54
 - **Scope of delivery:** Drive-type device, Instruction manual, Battery

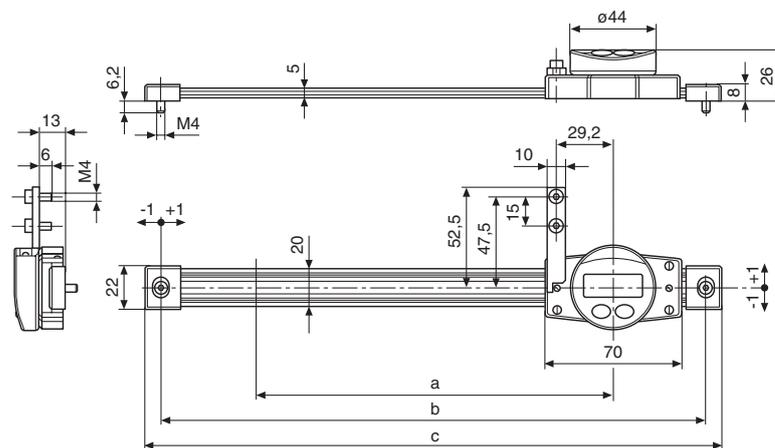

Application:

For measuring travel on a machine (e.g. on an upright drilling machine, milling machine)

**DO YOU WANT TO AIM EVEN HIGHER?
FOR THIS, THERE IS DIGIMAR.**

Mahr offers you a complete range of products in order for you to obtain the most reliable solution for all your measuring tasks. Whether it's simply scribing a work piece or completing complex measurements in two dimensions – Digimar Height Measuring Instruments guarantee a maximum of both flexibility and quality. Our motorized Height Measuring Instruments Digimar 817 CLM and 816 CL exceed all customer requirements: they are simple to operate, all the basic functions can be executed with a single key and they offer maximum ease and accuracy.

Digimar. Height Measuring Instruments

Height Measuring and Scribing Instrument

Digimar 817 CLM Quick Height

The new Height Measuring Instrument **Digimar** 817 CLM with the innovative Quick Mode. Highly accurate rapid measurements, a wide range of measuring and evaluation options and excellent operator comfort.

The best solution for all measuring tasks

Fast measurement per hand
Easy to operate due to the "Quick Mode"; an innovative solution from Mahr (patented).

Ill. 1. Move the measuring carriage by hand in the direction of the object to be measured.

Ill. 2. The motor starts, the measurement procedure will automatically be performed.

Measurement using the keypad (speed keys) on the base

Ideal in conjunction with the air bearings for large work pieces.

By using the keys that are integrated into the base, the operator can comfortably move the measuring carriage into the desired position and start a measurement. This eases measurement, particularly when measuring large workpieces as these do not have to be moved into position. The operator can keep both hands on the measuring instrument (one hand on the key for the air bearing and other on the high-speed keys) and measure the workpiece in one run.

Highest accuracy and reliability

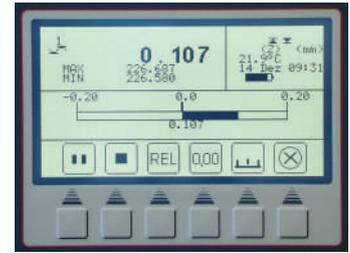

- Extremely accurate incremental measuring system with double reader head system, insensitive to the contamination of dirt
- Robust guide column, made from stainless steel
- Measuring head in precision ball bearings guide
- Temperature compensation with an integrated temperature sensor

Ergonomic operating and display unit

- The display unit can be positioned freely with the swivel arm

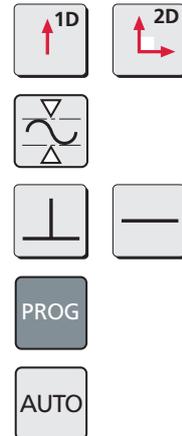

- Large, back-lit display
- Self-explanatory guided operation with icons

Easy to operate all measurement functions with the function keys due to the clearly defined symbols.

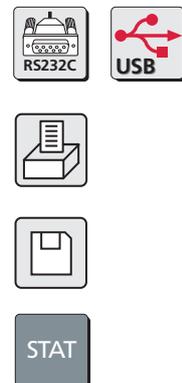

Universal measurement possibilities

- Wide range of measurement functions in 1D or 2D
- Dynamic measurement functions with the analog display
- Automatic perpendicularity and straightness measurements (in conjunction with accessories)
- Automated measuring procedures (measurement programs)
- Auto function for chain measurements and distance measurements

Extensive evaluation possibilities

- Transmit data to a PC via RS232 or USB (with an adapter) for example, into MS Excel via the MarCom Software
- Print measured values, statistics, etc. via a USB printer
- Save measured values in the integrated USB memory (will be recognized by a PC as an interchangeable disc drive) or on a USB dangle
- Broad range of statistical evaluations are available

Height Measuring Instrument Digimar 817 CLM

- Top or bottom contacting
- Web width or distances between grooves, including center of web or groove
- Bore or shaft diameter, including center of bore or shaft
- Bore reversing point (up or down)
- Shaft reversing point (up or down)
- Calculating distances or symmetry
- Dynamic measuring functions
- Perpendicularity measurement
- Straightness measurement
- Measurement in 2D mode
- Measuring programs
- Statistical evaluation
- Measuring data processing
- Large and clearly defined function keys
- Easy to read background lit graphic LCD-Display
- Operator guidance with self-explanatory icons / pictograms
- Operator prompts and menus are available in several languages
- Possible to set additional zero points on a work piece
- Additional measurement instruments with Opto RS232-interface can be connected
- Secure the future due to software update potential
- Automatic Stand-by switch mode
- Selectable Auto-off function, without loss of measured values
- Excellent accuracy and reliability due to the optical incremental measurement system with the double reader head
- Dynamic probing system enabling high repeatability
- Air bearings system for light and smooth movement
- Precise measuring head on stainless steel guideways
- Motorized measuring carriage simplifies measurement runs
- Probe constant remains after the instrument is switched off
- Integrated rechargeable battery with a long operating time span for power source independent measurement
- Temperature compensation with an integrated temperature sensor
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Scope of delivery:** Height Measuring Instrument incl. Operating and display unit, Carrier 817h1, Probe K6/51, Setting block 817 eb, Instruction manual, Power source, USB cable, Protection cover, Calibration certificate

Probe set Digimar 817 ts 1

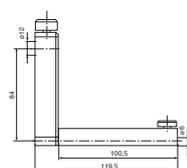

- Large accessory kit
- Packaged in a practical plastic case
- Consisting of:
 - Depth probe
 - Carrier with extended holder
 - Disc measuring probe for grooves, etc.
 - Conical measuring probe
 - Cylindrical measuring probe
 - Holder for test indicator styli with M2 thread
 - Carrier including 4 spherical probes with shaft diameter 8 mm
- **Scope of delivery:** Case

Accessory kit for small parts and delicate grooves, recesses and bores

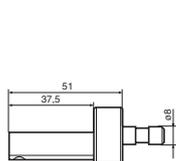

- Packaged in a practical wooden case
- Suitable for 817 h4 carriers with 8 mm mounting bore (4429220)
- Consisting of:
 - Base with 8 mm holding shaft
 - Depth probe
 - Probe shoe for grooves and recesses
 - Spherical measuring probe
 - Conical measuring probe
 - Extension
 - Adapter for M2.5 measuring anvils
- **Scope of delivery:** Case

Height Measuring and Scribing Instrument Digimar 814 N

Functions:

- ON/OFF
 - RESET (set display to zero)
 - mm/inch
 - PRESET (for entering a numerical value)
 - MAX/MIN memory for searching the reversal point
 - TIR (MAX-MIN) for testing flatness and concentricity
 - TOL (enter tolerance limit values)
 - Switch resolution
 - DATA (Data transmission)
- Large, easy to read digital display
 - Measuring and display unit are incorporated in the measuring head
 - Data transmission via Opto RS232 C interface
 - Digital Preset
 - Zero setting in any position
 - MAX, MIN and MAX-MIN functions
 - Enter tolerance limit for 1 characteristic
 - Switch between mm/inch
 - High accuracy
 - Incremental inductive measuring system
 - Measuring head with an ball bush guide
 - Resistance free measuring system
 - Easy to operate due to the hand crank on the side of the measuring head
 - Constant measuring force; acting upwards or downwards as required
 - Measuring head can be locked in position, ideal for scribing tasks
 - With fine adjustment
 - Mains independent due to being battery operated
 - Universal application due to broad range of accessories
 - **Scope of delivery:** Height Measuring Instrument incl. Operating and display unit, Caliper arm 814t, Spherical probe 814 m, 8 mm, Battery, Instruction manual, Protection cover, Calibration certificate

Application:

- For measuring heights and center distances between bores and surfaces, widths of ledges
- For marking and scribing of workpieces

Height Measuring and Scribing Instrument Digimar 814 SR

REFERENCE

Functions:

- RESET (set display to zero)
- mm/inch
- ABS (Switch between Relative and Absolute measurement)
- Lock/Unlock
- PRESET (for entering a numerical value)
- DATA (Data transmission via connection cable)
- AUTO-ON / OFF
- Battery life up to 3 years
- Max. measuring speed 1,5 m/s (60"/s)
- MarConnect Data output: choose either
 - USB
 - OPTO RS232C
 - Digimatic
- High contrast Liquid Crystal Display with 12 mm sized digits
- Sturdy heavy-duty base, easy to handle
- Hardened and lapped contact surface which produce both a smooth and even movement
- Slide and beam made of hardened stainless steel
- Hand crank for positioning and measuring
- Fine adjustment
- Locking screw
- Interchangeable scriber point, carbide tipped
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Scope of delivery:** Scriber, Battery, Carton, Instruction manual

Application:

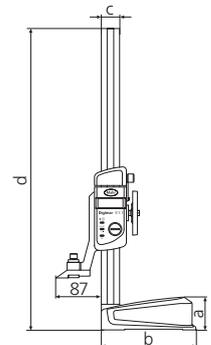

- Scribing and marking of work pieces
- Measuring Heights and distances

DOES EVERYTHING ROTATE AROUND PRECISION? NO PROBLEM WITH MICROMAR.

Micrometers fall alongside calipers with regards to the most frequently used hand measuring instruments. With their precision ground spindle, carbide tipped measuring faces and robust frame construction the modern micrometer from the Micromar series ensures maximum precision and a long working life. Our mechanical micrometers are extremely reliable and easy to read due to the scales having a satin chrome finish, thus ensuring accuracy and user comfort. Our digital micrometers unite the highly renowned mechanical precision from Mahr with most modern electronics. These digital micrometers offer simple operation with an error free reading, as well as problem-free data of the determined parameters to an external evaluation instrument. Micromar 40 EWR, the newest generation of waterproof digital micrometers, ensures that even in the most difficult workshop conditions precise and reliable results are obtained. A speciality of Mahr is the micrometer with a dial comparator, with its built-in dial comparator, stationary anvil and constant measuring force they are particularly well suited for rapid measurements and highly precise serial measurements.

Micromar. Micrometer

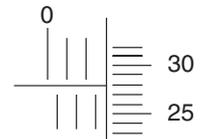

OVERVIEW

Micromar - Design Features

Reading example:

Micrometer with 0,01 mm-divisions

| | |
|------------------|---------|
| Sleeve | 2,5 |
| Thimble | 0,28 |
| <hr/> | |
| Measuring result | 2,78 mm |

Micromar - Types of Micrometers

Mahr - Micrometers are available with the following means of indication:

a) Digital Micrometer with digital display

b) Mechanical Micrometer with scale and dial

c) Mechanical Micrometer with scale

Error limits *G* according to DIN 863-1

Micromar. Digital Micrometer Micromar 40 EWri

Micrometers with Integrated Wireless

With the digital waterproof Micrometer **Micromar** 40 EWri, precise and reliable results are obtained even in the most difficult conditions.

Integrated wireless offers you much more free workzone. Whether at the measuring workplace, for inspections inside or on the machine, in the case of large workpieces, you get fully autonomous measuring without limits by a cable.

The high-contrast display with 10 mm high digits enables accurate, fatigue free reading of the measurement results.

The Reference-Lock-Function

prevents operating error caused by accidental usage of the operating buttons.

Stainless steel, hardened spindle

Sturdy hard lacquered steel frame

Absolute-Function:

Micrometer can be set in any position to 0.000 mm / .0000" without the reference to the Preset value being lost

The **ergonomically formed** and **thermally insulated handle** as well as the integrated ratchet in the thimble ensures both trouble free handling and accurate measurement results.

Protection class **IP65** in accordance to IEC 60529, the water proof measuring system **FPS** (Fluid Protected measuring System) with a sealed housing.

Tolerance function with warning limits:

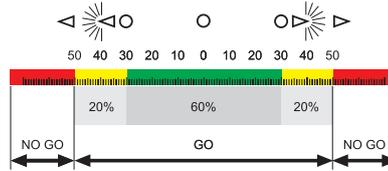

Hold:

Freezes the measured value after the measurement. Practical function for measuring tasks, where the display is not visible, i.e. measurements in the machine.

Micromar 40 EWRI. Digital Micrometer

REFERENCE

Functions:

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to ORIGIN)
- mm/inch
- ORIGIN (for entering a numerical value)
- LOCK function (key lock)
- TOL (Tolerance and warning limits)
- DATA (Data transmission)
- HOLD (storage of measured values)

- High contrast analog display
- Spindle is hardened throughout and ground, stainless
- Spindle and anvil are carbide tipped
- Rapid drive
- Ratchet is integrated in the thimble
- Lacquered steel frame, heat insulated

- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)

- **Digit height:** 10 mm

- **Data interface:** Integrated wireless

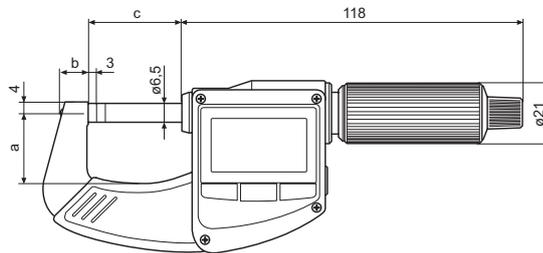

- **IP protection category:** IP 65

- **Scope of delivery:** Instruction manual, Battery, Setting standard (from measuring range 25–50 mm), Case

Micrometer with integrated Dial Comparator Micromar 40 F / 40 FC

- Operating and display units antiglare with satin chrome finish
- Dial Comparator is integrated in frame
- Adjustable tolerance markers
- Chrome plated steel frame, heat insulated
- Retraction of the movable anvil ensures maximum wear resistance
- Spindle and anvil are carbide tipped
- Stainless spindle is hardened throughout and ground
- Locking device
- Constant measuring force
- **Scope of delivery:** Instruction manual, Case

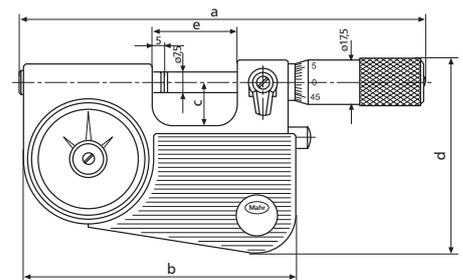

Application:

- For rapid measurements of diameters of cylindrical parts (shafts, bolts and shanks)
- Measurement of thickness and length
- Recommended for standard precision parts

Precision Bench Micrometer Micromar 40 TS

DIN 863-3

Application:

- For rapid measurements of diameters of cylindrical parts (shafts, bolts and shanks)
- Measurement of thickness and length
- Recommended for standard precision parts

- Operating and display units antiglare with satin chrome finish
- Rugged steel frame, can be inclined up to 45° from the sturdy base
- Retraction of the movable anvil ensures maximum wear resistance
- Height adjustable stop
- Constant measuring force
- Stainless spindle is hardened throughout and ground
- Spindle and anvil are carbide tipped
- Locking device
- **Scope of delivery:** Instruction manual

Functions:

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to ORIGIN)
- mm/inch
- ORIGIN (for entering a numerical value)
- LOCK function (key lock)
- TOL (Tolerance and warning limits)
- DATA (data transmission)
- HOLD (storage of measured values)
- Reduced measuring surfaces \varnothing 3 mm
- High contrast analog display
- Stainless spindle is hardened throughout and ground
- Spindle and anvil are carbide tipped
- Rapid drive
- Ratchet is integrated in the thimble
- Lacquered steel frame, heat insulated
- **Digit height:** 8.5 mm
- **Data interface:** USB, Digimatic, Opto RS232C
- **Energy supply:** Battery life approx. 2 years
- **IP protection category:** IP 65
- **Scope of delivery:** Instruction manual, Battery, Setting standard (from measuring range 25–50 mm), Case

Functions:

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to ORIGIN)
- mm/inch
- ORIGIN (for entering a numerical value)
- LOCK function (key lock)
- TOL (Tolerance and warning limits)
- DATA (data transmission)
- HOLD (storage of measured values)
- With blade-type measuring surfaces
- Sliding spindle
- High contrast analog display
- Stainless spindle is hardened throughout and ground
- Rapid drive
- Lacquered steel frame, heat insulated
- **Digit height:** 8.5 mm
- **Data interface:** USB, Digimatic, Opto RS232C
- **Energy supply:** Battery life approx. 2 years
- **IP protection category:** IP 54
- **Scope of delivery:** Instruction manual, Battery, Setting standard (from measuring range 25–50 mm), Case

Micrometer Micromar 40 AS

- With blade-type measuring surfaces
- Operating and display units antiglare with satin chrome finish
- Hard lacquered steel frame
- Spindle and anvil made of hardened steel, carbide tipped
- Heat insulators
- Rapid drive with integrated ratchet
- Locking device
- Sliding spindle
- **Scope of delivery:** Instruction manual, Setting standard (from measuring range 25–50 mm), Case

Application:

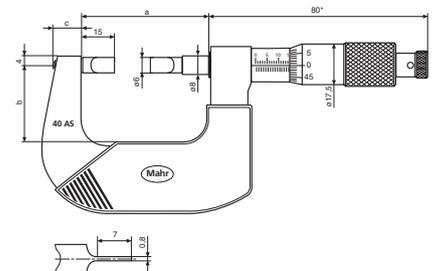

For measuring recesses, grooves, etc.

Micrometer Micromar 40 SM

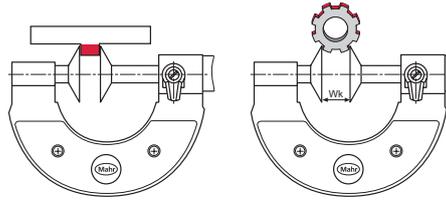

DIN 863-3

Application:

For measurements of

- Tooth spans W_k as of module 0.8 as indirect determination of tooth thickness on spur gears with straight and helical teeth
- Shoulders on shafts
- Undercut dimensions
- Registers
- Soft materials such as rubber, cardboard, felt etc.

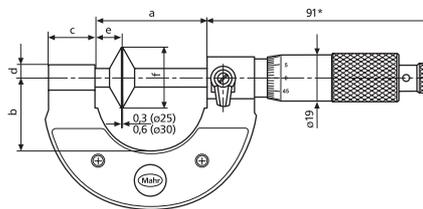

- Operating and display units antiglare with satin chrome finish
- Maximum stability
- Stainless spindle is hardened throughout and ground
- Disc-type anvils are hardened and lapped
- Chrome plated steel frame, heat insulated
- Rapid drive with integrated ratchet
- Locking device
- **Scope of delivery:** Instruction manual, Case

Thread Micrometer Micromar 40 Z

DIN
863-3

- Scales have a satin-chrome finish
- Rugged steel frame, heat insulated
- Spindle is hardened throughout, ground and is also provided with a locking device
- Adjustable anvil
- Spindle and anvil both have a mounting bore to accommodate interchangeable anvils
- Flat end surface of the anvil shank rests on a hardened steel ball which is at the bottom of the mounting bore
- **Scope of delivery:** Case

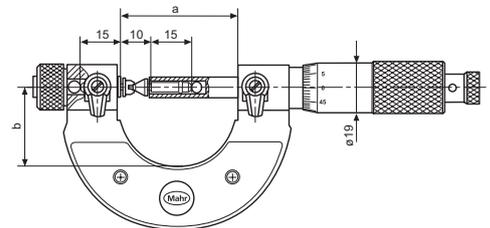

Application:

For measuring pitch and outside diameters of external threads

Micromar Thread anvils

DIN 863-3

- Wear-resistant special steel, hardened. With cylindrical mounting shank and retainer ring for rotatable mounting in the bore of the measuring spindle and anvil.
- Pair comprises V-anvil and cone.
- With a pitch of 0.2 – 0.45 mm, the V-anvil bridges 3 turns. It should therefore be set with 715 E thread adjustment pins, otherwise with 43 Z setting standards.

Digital Micrometer Micromar 40 EWR-K

REFERENCE

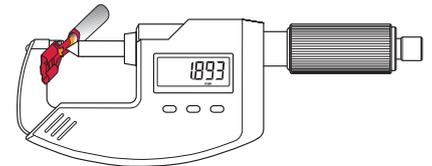

Functions:

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to ORIGIN)
- mm/inch
- ORIGIN (for entering a numerical value)
- LOCK function (key lock)
- TOL (Tolerance and warning limits)
- DATA (data transmission)
- HOLD (storage of measured values)

Application:

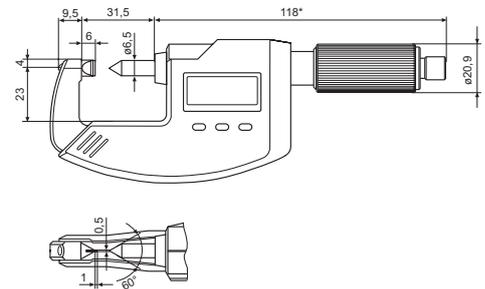

For measuring crimp heights

- Measuring surfaces: Anvil with narrow web, pointed spindle
- High contrast analog display
- Stainless spindle is hardened throughout and ground
- Rapid drive
- Lacquered steel frame, heat insulated
- **Digit height:** 8.5 mm
- **Data interface:** USB, Digimatic, Opto RS232C
- **Energy supply:** Battery life approx. 2 years
- **IP protection category:** IP 65
- **Scope of delivery:** Battery, Instruction manual, Case

Micrometer Micromar 40 AW

- Operating and display units antiglare with satin chrome finish
- Hard lacquered steel frame
- Spindle and anvil made of hardened steel, carbide tipped
- Heat insulators
- Rapid drive with integrated ratchet
- Locking device
- Sliding spindle

Features 40 AW:

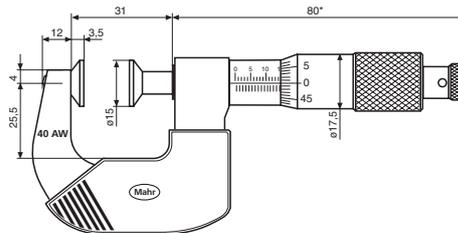

- **Scope of delivery:** Instruction manual, Setting standard, Case

Application:

For measuring soft materials such as felt, rubber, cardboard, etc.

Measuring head Micromar 44 Cm / 44 Cms 1 / 44 Cms 2 / 44 Cms 3 / 44 Cms 4

Application:

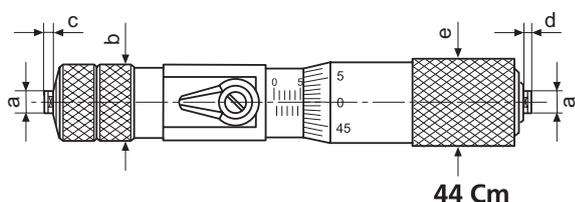

For measuring large inside diameters

- Operating and display units antiglare with satin chrome finish
- Rigid, lightweight tubular construction
- Stainless spindle is hardened throughout and ground
- Locking device
- Carbide tipped spherical measuring faces
- Interchangeable extensions 44 Cv with cylindrical gage rods that are spring-mounted in protective sleeves; for the extension of the measuring range
- Protection sleeves have a satin chrome finish
- **Scope of delivery:** Measuring Head 44 Cm, from measuring range 100–150 mm with extensions 44 Cv, Case

Digital Self-Centering Inside Micrometer Micromar 44 EWR

REFERENCE

Functions:

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to preset)
- mm/inch
- PRESET (for entering a numerical value)
- DATA (Data transmission via connection cable)
- LOCK function (key lock)

- Threaded connection for changing the measuring head
- Self-centering measuring head consists of 3 laterally positioned anvils, each are offset at intervals of 120°
- Anvils from 12 mm are carbide tipped
- From 12 mm the anvils can be used to measure the bottom of a bore
- From 40 mm all measuring heads are made from aluminium to reduce weight

Application:

- For measuring:
- through holes
 - blind holes
 - centering shoulders

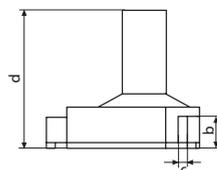

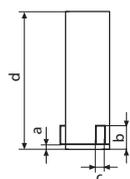

- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 8.5 mm
- **Data interface:** Digimatic, Opto RS232C, USB
- **Energy supply:** Battery life approx. 2 years
- **IP protection category:** IP 52
- **Scope of delivery:** Basic Units 44 EWg, Measuring head 44 Ak, Instruction manual, Battery, Case

Self-Centering Measuring Pistol Micromar 844 AS

Application:

For measuring:

- through holes
- blind holes
- centering shoulders

- Threaded connection for changing the measuring head
- Self-centering measuring head consists of 3 laterally positioned anvils, each are offset at intervals of 120°
- Anvils from 12 mm are carbide tipped
- From 12 mm the anvils can be used to measure the bottom of a bore
- From 40 mm all measuring heads are made from aluminium to reduce weight
- **Scope of delivery:** Instruction manual, Setting rings, Key for replacing measuring heads (from 30 mm), Case

Basic Unit Micromar 44 EWg

Functions:

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to preset)
- PRESET (for entering a numerical value)
- mm/inch
- LOCK function (key lock)
- DATA (Data transmission via connection cable)

Threaded connection for changing the measuring head

- **Software:** MarCom Professional free download:

www.mahr.com/marcom
(only for Mahr data cables and wireless systems with USB and RS232 interface)

- **Data interface:** Digimatic, Opto RS232C, USB
- **Energy supply:** Battery life approx. 2 years
- **IP protection category:** IP 52
- **Scope of delivery:** Instruction manual, Battery, Case

Basic Instrument Measuring Pistol Micromar 844 Ag

- Threaded connection for changing the measuring head
- Any indicating instrument with an 8 mm mounting shank can be used
- **Scope of delivery:** Model 6–100 mm: includes adapter for 6–20 mm, Instruction manual, Case

Measuring head Micromar 44 Ak

- Self-centering measuring head consists of 3 laterally positioned anvils, each are offset at intervals of 120°
- Anvils from 12 mm are carbide tipped
- From 12 mm the anvils can be used to measure the bottom of a bore
- From 40 mm all measuring heads are made from aluminium to reduce weight

Depth Micrometer Micromar 45 T

- Operating and display units antiglare with satin chrome finish
- Stainless spindle is hardened throughout and ground
- Rapid drive with integrated ratchet
- **Scope of delivery:** Extensions 25 mm and 50 mm, Case

Application:

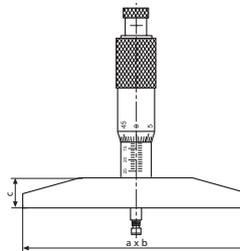

- Depth measurement
- Measuring the space between grooves and groove widths (in conjunction with a disc anvil 45 Tm)

Digital Micrometer Head Micromar 46 EWR

REFERENCE

Functions:

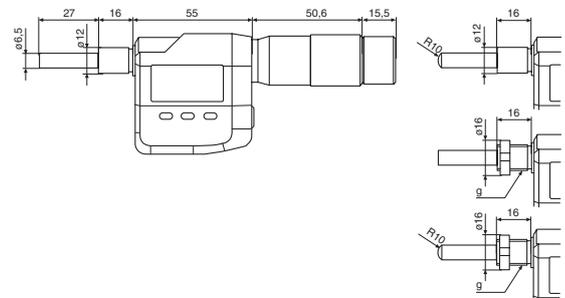

- RESET (set display to zero)
- ABS (display can be set to zero without losing reference to preset)
- PRESET (for entering a numerical value)
- LOCK function (key lock)
- mm/inch
- Reversal of counting direction
- DATA (Data transmission via connection cable)
- High contrast analog display
- Rapid drive with integrated ratchet
- Immediate measurements due to the Reference System
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 8.5 mm
- **Data interface:** Digimatic, Opto RS232C, USB
- **Energy supply:** Battery life approx. 2 years
- **IP protection category:** IP 52
- **Scope of delivery:** End cap (in case the rapid drive is not required), Instruction manual, Battery, Case

**YOUR MEASURING TASKS ARE SENSITIVE.
MARTEST IS HIGHLY SENSITIVE.**

Since 1936, Mahr has been one of the world's leading suppliers of dial test indicator measuring devices. Our company's success has been built on the continuous advancement of our products. Because of our unrelenting commitment to innovation, we can meet and exceed market expectations. Our core philosophy is to offer our customers a highly accurate and simple solution for wide variety of measuring tasks. Our extensive product range and a wide variety of accessories are at your disposal. The sensitive computer-optimized mechanism ensures maximum security and precision. A hardened mineral glass panel effectively protects the dial against scratching and cracks when used in harsh workshop conditions, and a seal prevents liquids from penetrating.

MarTest. Test Indicators and Touch Probes

Mechanical Dial Test Indicators Overview 150

MarTest 800 SA / 800 SGA / 800 S / 800 SG / 800 SR 152
Metric, Standard version

MarTest 800 SL / 800 SGL / 800 SGB 153
Metric, with a long styli

MarTest 800 SGM / 800 SM / 800 SRM / 800 SGE 154
Metric, with a higher resolution

MarTest 801 SM / 801 SGM / 801 SRM / 801 SGE 156
Inch, with a higher resolution

MarTest 801 SGI / 801 S / 801 S1 / 801 SG 157
Inch, Standard version

MarTest 801 SR 157
With a larger measuring range

MarTest 801 SL / 801 SGL 158
Inch, with a longer styli

MarTest 800 V / 800 VGM / 801 V / 801 VGM 159
Vertical version

MarTest 800 H / 801 H 163
Horizontal version

Digital Test Indicators

MarTest 800 EW 165
Standard version

MarTest 800 EWL 165
With a longer styli

3D-Touch Probes

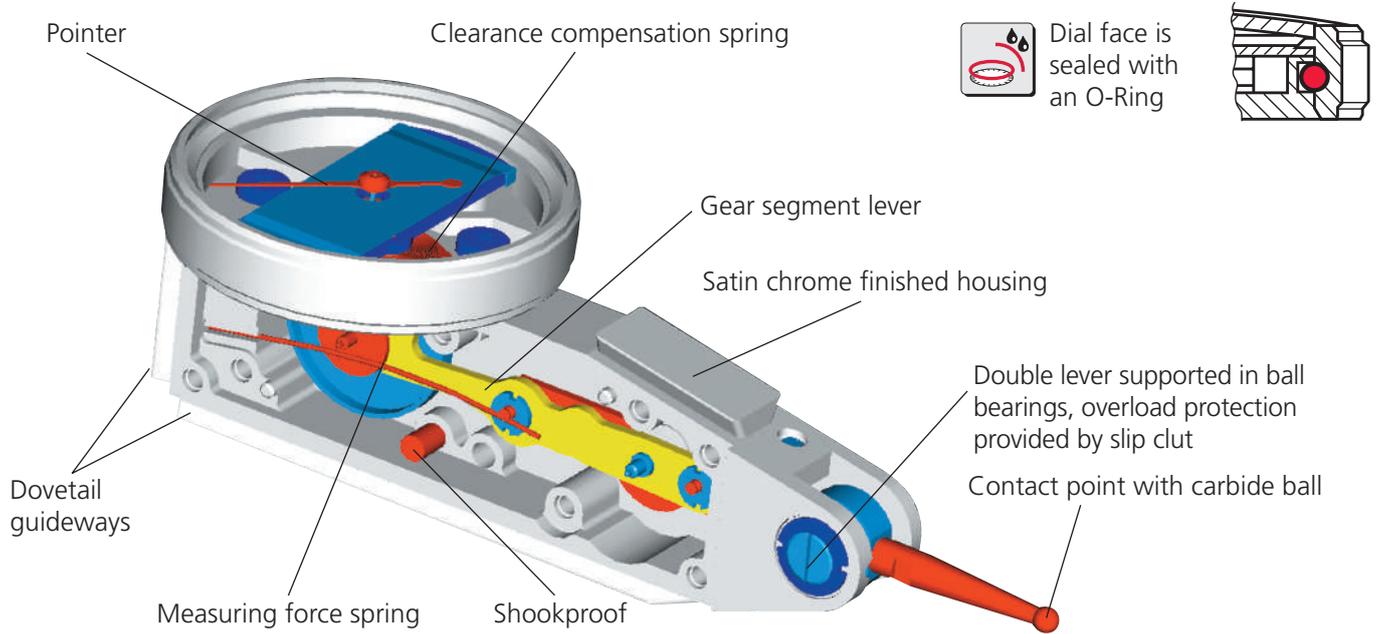

MarTest 802 EW 172
Water proof, with a Digital display

MarTest 802 NW 173
Water proof, with a Analog display

MarTest. Test Indicators and Touch Probes

OVERVIEW

MarTest – Design

Mechanism

- Shockproof
- Anti magnetic
- Movement bearings are jeweled with 8 precious stones

Styli with carbide contact points

Styli with ruby contact points

MarTest – Applications

Concentricity of a shaft

Concentricity of a sleeve

Centering of a bore

Aligning a surface

Testing parallelism

MarTest – Angle of stylus

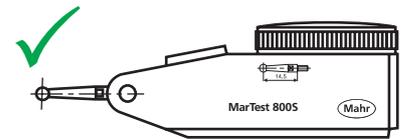

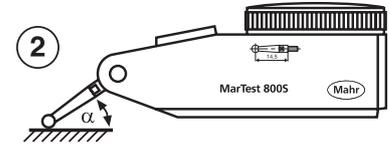

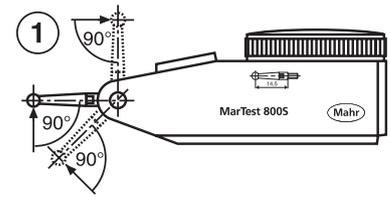

For accurate measurements the axis of the contact point must be perpendicular to the measuring direction (fig. 1). If this is not possible, it is necessary to multiply the reading on the dial with a correction factor, which depends on angle α (fig. 2). The correction factor is negligible for angles below 15° .

| Angle α | 15° | 30° | 45° | 60° |
|----------------|------------|------------|------------|------------|
| Corr. factor | 0,96 | 0,87 | 0,70 | 0,50 |

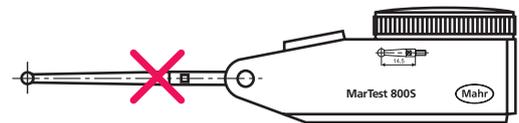

Example:

Angle α : 30° (estimated)
 Reading on dial: 0,38 mm
 Meas. values: $0,38 \times 0,87 = 0,33$ mm

Note: Please use only the provided measuring insert length for the type of device (e.g. 800 S)

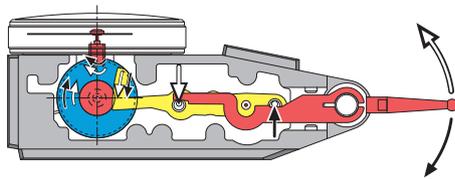

$l = 14,5$

$l = 41,2$

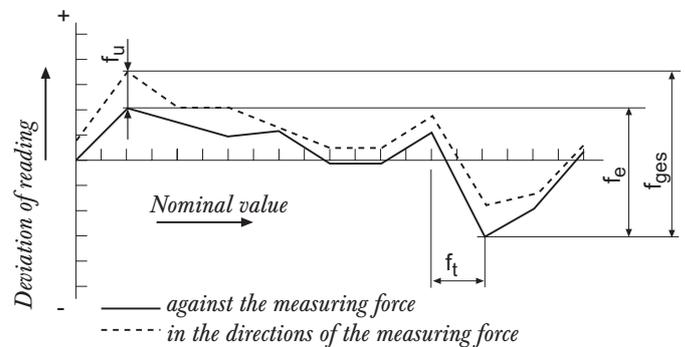

MarTest – Automatic switch of measuring direction

Measurement in both directions is possible without switch. The pointer moves clockwise. This guarantees clear and errorless reading.

Test Indicator MarTest 800 SL / 800 SGL / 800 SGB

With long stylus, for measurements at poorly accessible measuring points

- High-contrast dial face, sealed with O-ring
- Mineral glass viewing panel for best protection against cracking, scratching, hot shavings and optimal resistance to solvents
- Matt chrome plated protective casing with three integrated dovetail guide rails
- Shockproof measuring mechanism
- Anti-magnetic model
- Automatic adjustment to the contacting direction ensures infallible readings
- Ball bearing mounted double lever
- Friction clutch overload protection
- Stylus with carbide ball
- **Scope of delivery:** Case, Instruction manual, Spanner for changing the styli, Stylus dia. \varnothing 2 mm, Mounting shaft 800a8, Holding bar HB-2157, Clamp CP-2199

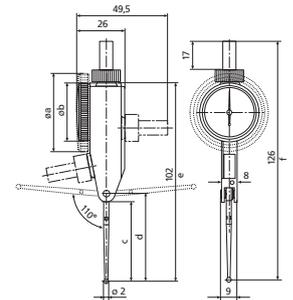

Application:

- Measurement of concentricity, alignment, parallelism and flatness
- Centering of bores and shafts
- Parallel or perpendicular alignment of work pieces

For high-precision measurements

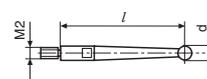

- High-contrast dial face, **sealed with O-ring**
- **Mineral glass viewing panel** for best protection against cracking, scratching, hot shavings and optimal resistance to solvents
- Matt chrome plated protective casing with three integrated dovetail guide rails
- Shockproof measuring mechanism
- Anti-magnetic model
- Automatic adjustment to the contacting direction ensures infallible readings
- Ball bearing mounted double lever
- Friction clutch overload protection
- Stylus with carbide ball
- **Scope of delivery:** Case, Instruction manual, Spanner for changing the styli, Stylus dia. \varnothing 2 mm, Mounting shaft 800a8, Holding bar HB–2157, Clamp CP–2199

800 t

Digital Test Indicator MarTest 800 EW / 800 EWL

Functions:

- ON/OFF
- RESET (set display to zero)
- mm/inch
- MAX/MIN memory for searching the reversal point
- TIR (MAX-MIN) for testing flatness and concentricity

- Inductive measuring system
- Battery life approx. 2 years
- Operating unit is protected against coolants and lubricants, protection class IP65
- Combined analog and digital display
- Operating and display unit (bezel) can be rotated through 360°
- Satin chrome finished housing with 3 dovetail guideways
- Shockproof
- Movement bearings are jeweled
- Automatic matching to sensing direction
- Anti-magnetic
- Double lever supported in ball bearings
- Overload protection provided by slip clutch
- **Data interface:** Opto RS232C, USB
- **IP protection category:** IP 65
- **Scope of delivery:** Mounting shaft 800a8, Spanner for changing the styli, Stylus dia. \varnothing 2 mm, Case

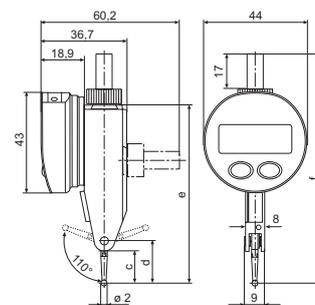

Application:

- Measurement of concentricity, alignment, parallelism and flatness
- Centering of bores and shafts
- Parallel or perpendicular alignment of work pieces

Digital 3D-Touch Probe MarTest 802 EW

Application:

Can be used on milling and CNC machines to

- determine the zero position on a work piece
- determine the center of a bore
- determine and correct the position of a work piece
- and for measurement of
 - lengths
 - depths

Functions:

- ON/OFF
- Auto OFF after 2 h

Excellent readability thanks to combined display:

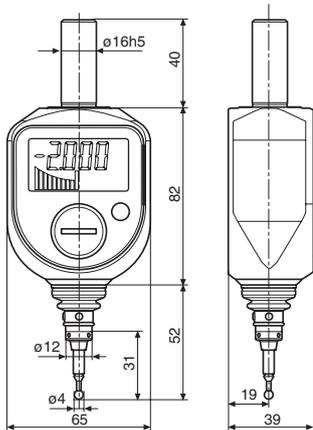

- bar graph for dynamic path information
- digital display for exact readings
- Can be controlled independently of a machine tool

- Large working range in all axes (X, Y, Z) prevents damage to the stylus by contacting errors
- Compact metal housing and long probe arm
- Shockproof movement
- **IP protection category:** IP 65
- **Scope of delivery:** Battery, Instruction manual, Stylus 802 EWt

THEY POINT YOU IN THE RIGHT DIRECTION. MARCATOR DIAL INDICATORS.

Due to their versatility, dial indicators rank as some of the most commonly used transducers. That is certainly the case with our MarCator series. Our mechanical dial indicators have precision gears and pinions for maximum accuracy. They are also available in shockproof and waterproof versions. Our MarCator digital indicator range contains high-precision electronic measuring systems, which allow for additional measuring functions without sacrificing the proven benefits of an analog display. With the simple operating system, the large, easy-to-read display and the option of fast and easy transmission of all your measuring results, they satisfy all the requirements of a modern measuring instrument.

MarCator. Dial and Digital Indicators

DIGITAL INDICATORS WITH REFERENCE SYSTEM

Mahr sets a very high standard in the Digital Indicator product segment with Digital Indicators MarCator 1086 Ri / 1087 Ri. With the Reference System the MarCator Digital Indicators can be applied immediately; the zero-position only has to be set once for all further measurements. Also, if you need to document your data, we have integrated wireless indicators; that offer consumers an energy efficient wireless data transmission system. This is an optimal solution for transmitting your measured values to a PC.

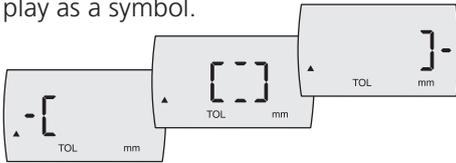

Clear Display

Tolerance indication with the displayed value

Displayed is the actual measured value and the tolerance zone position

Tolerance indication without the value in the display. In and out of tolerance will be indicated in the display as a symbol.

Error free operation

Lock function:

This prevents unintentional activation of an operating button. Either all the operating buttons or certain individual buttons can be locked. If a locked operating button is pressed, the "LOC" symbol will appear in the display.

Protection class IP54 (optional)

- Protection cap is sealed
- Rubber bellows for the measuring spindle
- Sealed battery compartment

| Code Initials | IP | International Protection |
|---------------|----|---|
| First digit | 5 | Dust protected |
| Second digit | 4 | Protection against splash water in all directions |

Universal Data-Interface

- **Integrated Wireless**
The wireless interface for the price of a cable

- **USB**
No interface box is required! Simple and inexpensive way to set up a multiple measuring instruments via a USB hub

- **Digimatic**
To connect a Digimatic compatible evaluation instrument

- **Mahr Opto RS232C**
For direct connection to a COM port on a PC

Absolute-Function:

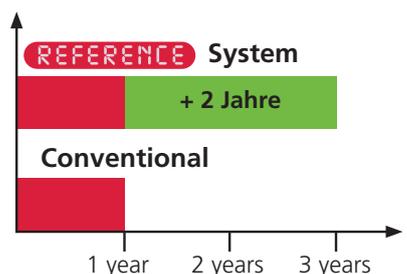

- **ABS**
Micrometer can be set in any position to 0,000 mm / .0000" without losing reference to the preset value.

Battery service life is 3 years

The new Reference System is extremely energy efficient because of its standby mode; almost no power is required, thus **extending the life of the battery up to 3 years***.

* When Integrated Wireless is deactivated

Just set once to zero

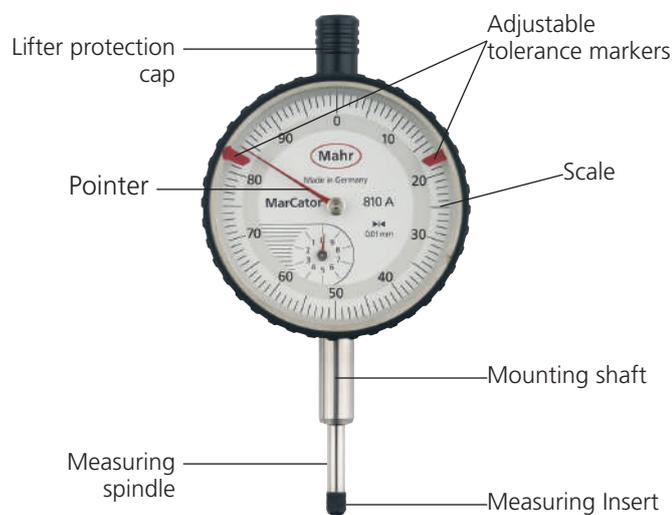

REFERENCE All Mahr digital indicators with this logo are equipped with the innovative Reference System. The zero position just has to be set once: after setting the zero position, the zero remains stored for all further measurements. Therefore, once the indicator is switched ON or the contact point is moved the indicator is immediately ready for measurement. Once the digital indicator is initially set to zero, there is no need to reset to zero each time the indicator is turned on.

MarConnect Integrated Wireless – For the price of a data cable

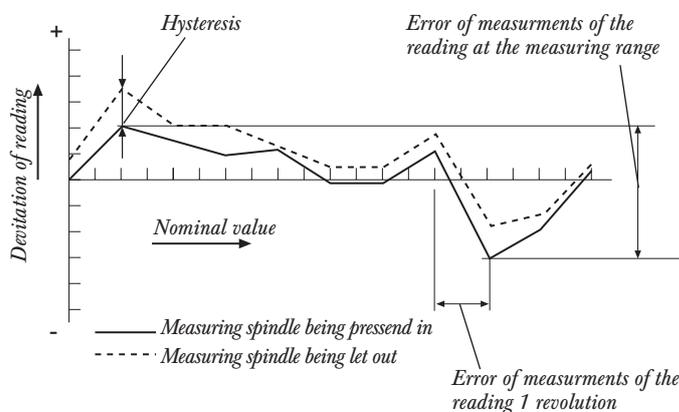

Wireless data transmission for the price of a data cable. With Integrated Wireless, you have a new Integrated Wireless data transmission system from Mahr **for the price of a data cable**. Data acquisition with digital Indicators is now even simpler: Simply transmit your measured data without being caught up between cables directly into Microsoft Office Excel® or via a keyboard code into any Windows program.

Digital Indicator MarCator 1086 R

REFERENCE

Functions:

- ON/OFF
- RESET (set display to zero)
- mm/inch
- Reversal of counting direction
- PRESET (for entering a numerical value)
- TOL (enter tolerance limit values)
- <0> (tolerance GO / NO GO display mode)
- ABS (display can be set to zero without losing reference to preset)
- DATA (Data transmission via connection cable)
- Factor (adjustable)
- LOCK (individual button lock)

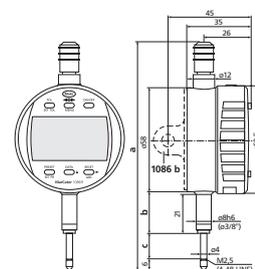

- High contrast LCD
- Operating and display unit (bezel) can be rotated through 280°
- Lifter protection cap on the measuring spindle
- Mounting shank and measuring spindle are both made of hardened stainless steel
- Immediate measurements due to the Reference System
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 11 mm
- **Data interface:** Digimatic, Opto RS232C, USB
- **Energy supply:** Battery life approx. 3 years
- **IP protection category:** IP 42
- **Scope of delivery:** Instruction manual, Battery

Digital Indicator MarCator 1087 Ri

REFERENCE

Functions:

- 0 (set the analog display to zero)
- ABS (display can be set to zero without losing reference to preset)
- AUTO-ON / OFF
- DATA (Data transmission via connection cable)
- Factor (adjustable)
- LOCK (individual button lock)
- MAX/MIN memory for searching the reversal point
- ON/OFF
- PRESET (for entering a numerical value)
- RANGE (switch the measuring range and resolution)
- RESET (set display to zero)
- TIR (MAX-MIN) for testing flatness and concentricity
- TOL (enter tolerance limit values)
- Reversal of counting direction
- mm/inch

- Integrated wireless transmitter
- High-contrast LCD display
- Operating and display unit (bezel) can be rotated through 280°
- Lift-off cap on end of measuring pin
- Clamping shaft and measuring pin in hardened stainless steel
- Immediate measurements due to the Reference System
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 8.5 mm
- **Data interface:** Digimatic, Opto RS232C, USB, Integrated wireless
- **Energy supply:** Battery operation
- **IP protection category:** IP 42
- **Scope of delivery:** Instruction manual, Battery

Digital Indicator MarCator 1087 BR

REFERENCE

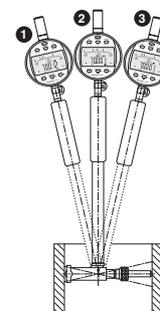

Functions:

- ON/OFF
- RESET (set display to zero)
- mm/inch
- PRESET (for entering a numerical value)
- Reversal of counting direction
- TOL (enter tolerance limit values)
- START/STOP search for reversal point
- MAX/MIN memory for searching the reversal point
- ABS (display can be set to zero without losing reference to preset)
- 0 (set the analog display to zero)
- DATA (Data transmission via connection cable)
- Factor (adjustable)

- High contrast LCD
- Operating and display unit (bezel) can be rotated through 280°
- Immediate measurements due to the Reference System
- Mounting shank and measuring spindle are both made of hardened stainless steel
- Hermetically sealed protective measuring cap
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 8.5 mm
- **Data interface:** Opto RS232C, Digimatic, USB
- **Energy supply:** Battery life approx. 3 years
- **IP protection category:** IP 42
- **Scope of delivery:** Instruction manual, Battery

Application:

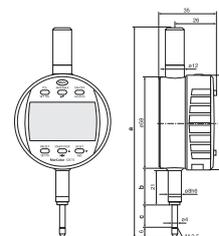

In measurements with a 2-point bore gage the reversing point can be calculated automatically during oscillation. Then a PRESET value can be assigned. The ACTUAL value measured is saved by the MIN or MAX function and is shown on the display. The 1087 BR model can process 64 measured values per second, for fast measuring movements combined with measuring certainty.

Digital Indicator MarCator 1087 BRi

Application:

In measurements with a 2-point bore gage the reversing point can be calculated automatically during oscillation. Then a PRESET value can be assigned. The ACTUAL value measured is saved by the MIN or MAX function and is shown on the display. The 1087 BRi model can process 64 measured values per second, for fast measuring movements combined with measuring certainty.

Functions:

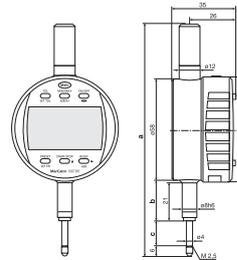

- ON/OFF
- RESET (set display to zero)
- mm/inch
- PRESET (for entering a numerical value) from range 500 mm
- Reversal of counting direction
- TOL (enter tolerance limit values)
- START/STOP search for reversal point
- MAX/MIN memory for searching the reversal point
- ABS (display can be set to zero without losing reference to preset)
- 0 (set the analog display to zero)
- DATA (Data transmission via connection cable)
- Factor (adjustable)
- LOCK (individual button lock)

Small Precision Dial Indicators MarCator 803 S / 803 A / 805 A

DIN 878

- Shockproof movement
- High contrast dial face
- Adjustable tolerance markers
- Chrome plated housing
- Lifter protection cap on the measuring spindle
- Precision gears and pinions
- **Scope of delivery:** Case

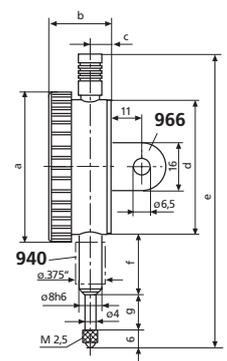

Application:

To be used on all smaller indicating measuring instruments, or due to a confined space a smaller indicating instrument is required

Precision dial indicator MarCator 810 SW / 803 SW

- High contrast dial face
- Adjustable tolerance markers
- Chrome plated housing
- Precision gears and pinions
- Hermetically sealed upper protective measuring spindle cap, bezel and transparent dial cover; sealed with O-rings
- Measuring spindle sealed with rubber sleeve, thus preventing contamination by liquids and impurities
- **IP protection category:** IP 54
- **Scope of delivery:** Case

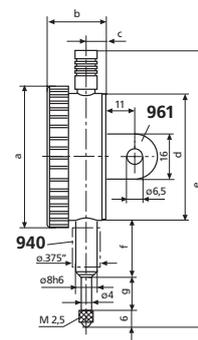

Application:

At the place of measurement where the dial indicator is exposed to extreme contamination or moisture

Large dial indicator MarCator 810 AG

- Large, high contrast dial face
- Adjustable tolerance markers
- Chrome plated housing
- Lifter protection cap on the measuring spindle
- Precision gears and pinions

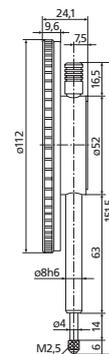

Application:

Ideal for long reading distance and in poorly lit conditions

Sensor level MarCator 943

- Integrated lifting device
- Interchangeable contact point
- **Scope of delivery:** Contact point 901

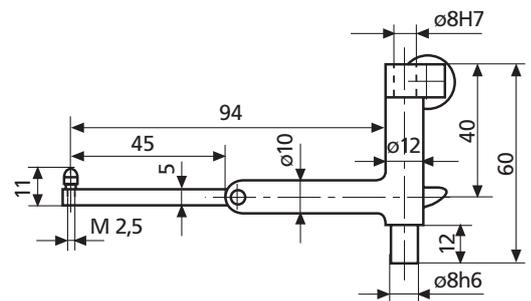

Application:

- For testing concentricity in bore holes as well as difficult to reach outside diameters
- To be inserted in a measuring stand with a lifting device

Technical Data

| Order no. | Transmission | Product type |
|-----------|--------------|--------------|
| 4367000 | +/- 1mm | 943 |

Dial Indicators per ANSI/AGD

You get more with Mahr Dial Indicators

- Proven for the most demanding applications
- Superior design and serviceability
- Unmatched customer and technical support
- Catalog and customized styles
- Full range of accessories to suit virtually every need
- Unit construction and removable movement save repair/cleaning time and maintenance costs
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminate slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pull back spring requires less maintenance
- Compliance with ANSI/AGD dimensional and accuracy specifications
- Many models employ stainless steel stem for added durability

How to order

How to order your dial indicator and accessories

1. Select the type of Indicator you require. Check the specialized types as well as regular ANSI/AGD models.
2. Choose the model best suited to the magnification, range and viewing needs of your job.
3. Accessories are important because they greatly increase the speed, efficiency and convenience of obtaining desired results. Mahr's wide selection of dial indicator accessories are shown in this catalog.
4. Our customers have many options; they are not restricted to the normally furnished equipment mentioned above. A wide choice of optionally available points, backs or dial arrangements can be specified at little or no extra cost. We maintain the most extensive stock of indicators and gages for dimensional measurement available anywhere. Items which are in stock are normally shipped within five working days. If you need them sooner, inquire when ordering. We can often make next-day deliveries. Understandably, some of the items in this catalog are not always in stock or are special order items, which take a little longer to ship.

If you need help in determining what Indicators right for your application, just ask us. Contact Mahr:

1-800-333-4243

One of our experienced professionals will give you courteous, professional advice that can save you time and money.

Replacement indicators

Although Mahr dial indicators are known for their lifetime service, it is not uncommon to change an indicator back, contact point, dial or to even add an accessory to suit your latest application.

When ordering a replacement dial indicator for a specific application, always verify the configuration of the indicator.

Ordering a replacement using the standard model number shown on your indicator may not provide you with the configuration or accessories you desire.

Dial Indicators per ANSI/AGD

Selecting a Dial Indicator

Since modern manufacturing involves a wide range of tolerances, choosing a dial indicator might be difficult, especially since the number of indicators available is so vast. The following guidelines were prepared to assist you in selecting the right model for your application.

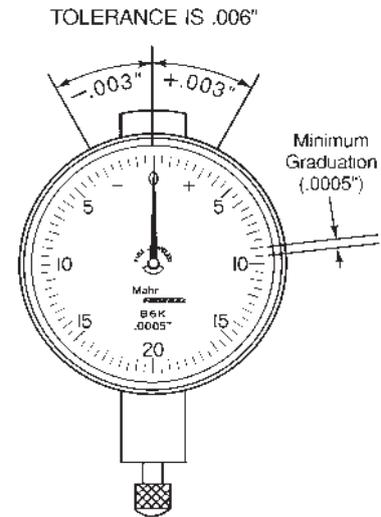

Consider four characteristics when selecting a dial indicator:

- **Minimum Graduation Value** — value of the smallest graduations marked on the dial. From several different values available from Mahr, select the one which is closest to 10% of the tolerance spread of the work you are measuring. This assures that the tolerance will span about ten divisions of the dial.
- **Size** — represents the bezel diameter. Make your selection on the basis of space available for the indicator and the distance from which it will be viewed. The Indicator photograph shown on the first page of each ANSI/AGD Group is full scale. Simply place the page which illustrates the Indicator at the expected viewing distance, and choose the size that offers you the best readability and is the proper size for your fixture. Mahr's "C" size bezels (ANSI/AGD Group 2), which have a diameter of 2-1/4", are the most popular.
- **Range per Revolution** — represents the distance the spindle travels with one complete revolution of the dial hand. From the dials available in the size and minimum graduation value you choose, select the range per revolution which allows the tolerance spread to occupy 1/10 to 1/4 of the dial.
- **Total Range** — the maximum distance over which the indicator spindle can travel. Usually, this represents 2-1/2 revolutions of the hand, which is adequate for most needs. Sometimes, however, this may not be adequate for your application and a special total range may be necessary.

Copies of the current ANSI Standard for Dial Indicators (ANSI B89.1.1 0-1987) are available from:

The American Society of Mechanical Engineers
ASME Order Desk
22 Law Drive
Fairfield, NJ 07007
(973)882-1167

If your tolerance spread is .006" (±.003"), then, the most suitable minimum graduation value is .0005".

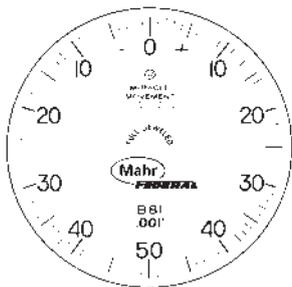

Your tolerance spread is .006". You have chosen an ANSI/AGD Group 2 (Mahr "C" Size) dial with a minimum graduation value of .0005". Mahr offers four indicator types in this size and minimum graduation value. Of these, type C5M has a range per revolution of .030" which is about midway between your tolerance extremes.

You selected a C5M indicator. Your total range, however, needs to be at least .200" so the spindle can clear the lip of your part. But, the longest range available in the C5M indicator you need is only .075".

Special ranges up to .400" are available for this indicator type. Select the closest range for your application (for Model C5M, you would select .250").

If the range you need is not listed under the "Special Ranges" category, contact Mahr. Chances are we can supply the range you need.

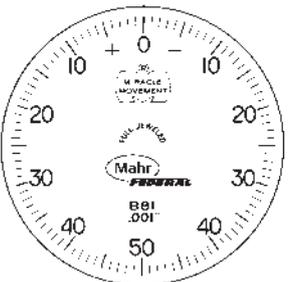

Dial Types

1. Balanced (+) on right.

Normally furnished on all Group 0, 1, 3 and 4 ANSI/AGD indicators only, unless otherwise specified. Indicates an increasing value when contact is depressed as in comparison type OD, snap and bench thickness gages.

Note: If Revolution Counter models are ordered, counter dial numbered counterclockwise.

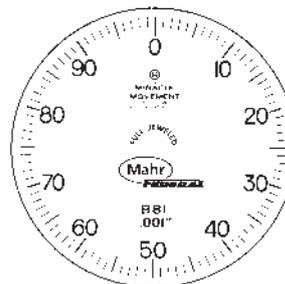

2. Balanced (+) on left.

Indicates decreasing values when contact is depressed as in comparison bore* and depth gages.

Note: With Revolution Counter models, counter dial numbered clockwise.

* Will vary as dictated by motion transfer design.

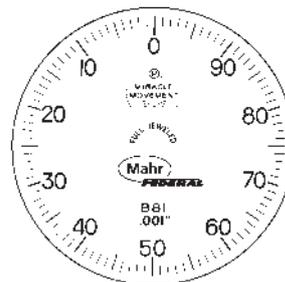

3. Continuous clockwise.

Normally furnished on Long and Extra Long Range Indicators, unless otherwise specified.

Indicates an increasing value when contact is depressed as in direct-reading thickness gages.

Note: With Revolution Counter models, counter dial numbered counterclockwise.

4. Continuous counterclockwise.

Indicates a decreasing value when contact is depressed as in direct reading slot, recess or hole depth measurements.

Note: If Revolution Counter models are ordered, counter dial numbered clockwise

Dial Indicator per ANSI/AGD Group 0 – Mahr Series A

Application:

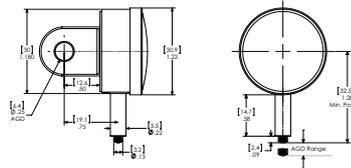

Where available space prohibits the use of longer dial indicators

- Unit construction and removable movement save repair/cleaning time and maintenance
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminates slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pullback spring requires less maintenance
- Compliance with ANSI/AGD dimensional and accuracy specifications
- Normally furnished: balanced dial with + on right; centered vertical lug back; regular contact point PT-43, .093" radiused, .093" long
- Optional dials: balanced with + on left; continuous clockwise; continuous counterclockwise
- Order by part number and specify dial style desired. For other dial styles or special requirements, call Mahr

Dial Indicator per ANSI/AGD Group 0 – Mahr Series N

- Unit construction and removable movement save repair/cleaning time and maintenance
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminates slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pullback spring requires less maintenance
- Compliance with ANSI/AGD dimensional and accuracy specifications
- Normally furnished: balanced dial with + on right; centered vertical lug back; regular contact point PT-43, .09" radiused, .093" long
- Optional dials: balanced with + on left; continuous clockwise; continuous counterclockwise
- Order by part number and specify dial style desired. For other dial styles or special requirements, call Mahr

Application:

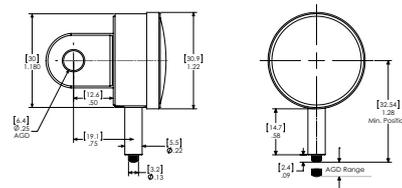

Where available space prohibits the use of longer dial indicators

Dial Indicator per ANSI/AGD Group 2 – Mahr Series P

- Unit construction and removable movement save repair/cleaning time and maintenance
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminates slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pullback spring requires less maintenance
- Compliance with ANSI/AGD dimensional and accuracy specifications
- These indicators are normally furnished with continuous dial (with R.C.) or + on right balance dial (w/o R.C.), lug back and .18" by .250" long contact
- Optional Dials: balanced dial with + on left; continuous clockwise; continuous counterclockwise. (Order by part number and specify dial style desired)
- For other dial styles or special requirements - call Mahr

Dial Indicator MarCator

- Outstanding quality due to a well thought out design, use of high quality materials, and the precision engineered mechanism's guarantee
- The concentric "Speed Read" pointer (on 1.0" and .500" models) allows easy and safe reading of this Dial Indicator
- Spindle and stem are made of resistant stainless steel
- Supplied with: Lug Back and Tolerance Hands

Dial Indicator per ANSI/AGD Group 3 – Mahr Series Q

- Unit construction and removable movement save repair/cleaning time and maintenance
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminates slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pullback spring requires less maintenance
- Compliance with ANSI/AGD dimensional and accuracy specifications
- These indicators are normally furnished with continuous dial (with R.C.) or + on right balance dial (w/o R.C.), lug back and .18" by .250" long contact
- Optional Dials: balanced dial with + on left; continuous clockwise; continuous counterclockwise. (Order by part number and specify dial style desired)
- For other dial styles or special requirements - call Mahr

Lang Range and Extra Long Range Indicators

- Unit construction and removable movement save repair/cleaning time and maintenance
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminates slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pullback spring requires less maintenance
- Normally furnished: continuous clockwise dial; centered vertical lug back; regular contact point, .18" radiused, .250" long
- Long Range Models: include (1) revolution counter (except C9I without revolution counter). Extra Long Range Models: include (2) revolution counters.
- For other dial styles or special requirements - call Mahr.

Dial Indicator MarCator C1RN-80 / C1RN-40

A practical solution for inspectors and machine operators who need to eliminate the potential for indicator misreadings. No matter how far out of tolerance a part may be, the needle of a one revolution indicator will always stay in the red, non-read zone — no passing zero again — no reading errors.

- No limited contact travel
- Shockproof "Following Movement" always keeps the hand within a single revolution
- Alternate contact points, backs and other accessories are optionally available
- Metric dials are yellow
- One piece case design
- Inserted precision bearings
- Available in ANSI/AGD Group 2 size
- Flat back

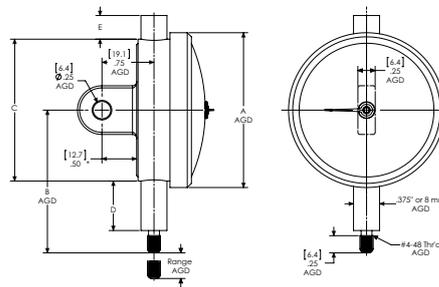

Technical Data

Series WC Wetproof Dial Indicators

Application:

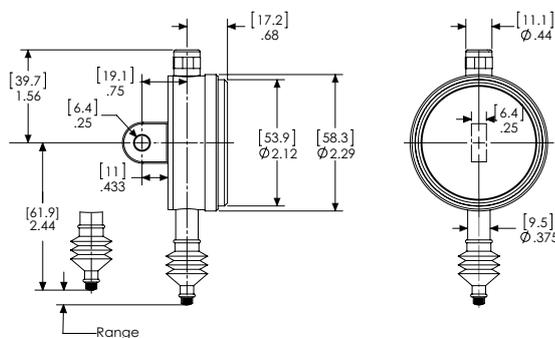

Splashproof protection from coolant, oil, or other contaminant's

- Unit construction and removable movement save repair/cleaning time and maintenance
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminates slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pullback spring requires less maintenance
- Normally furnished: continuous clockwise dial with revolution counter; BK-63 centered vertical lug back; regular contact point, .18" radius, .625" long
- Optional Dials: continuous counterclockwise with revolution counter; balanced outer dial with + on right or left. Order by dial type and specify dial style desired
- For other dial styles or special requirements - call Mahr

Perpendicular Dial Indicators

Application:

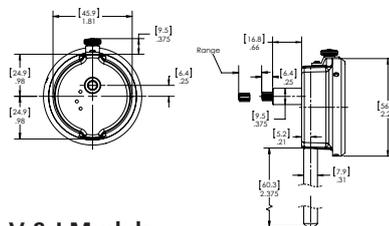

Provides improved readability where other style indicators cannot be used

- Unit construction and removable movement save repair/cleaning time and maintenance
- Hardened gears and stainless steel racks provide lasting protection against indicator failure due to shock or wear
- Jeweled bearings resist friction, add to longer indicator life
- Skeletonized, hobbled gears for more sensitive response, superior indicator accuracy with minimal hysteresis error
- Soft tinted dials (green - inch / yellow - metric) minimize eye strain
- Special steel alloy, balanced dial hand affords no shift, precise reading
- Controlled rack and pinion mesh eliminates slope for precise response and reading
- Smooth adjusting bezels for easy setup
- Positive pressure pullback spring requires less maintenance
- Normally furnished: balanced dial with + on right; mounting rod (see dimension drawings); regular contact point, .18" radius, .250" long
- Threaded stem versions available as an option; AD-59 (.5622 long x .500" OD. for "J & W" styles), 3/8-32 internally threaded bushings and AD-60 (.687" long x .500" OD. for "G & F" Models) purchased separately. Bushings also available separately.
- For other dial styles or special requirements - call Mahr

MarCator 400B-3 / 400B-4

- For checking and calibrating dial indicators, test indicators, digital indicators, and LVDT inductive probes
- Large micrometer style wheel has widely spaced graduations for easy setting and viewing
- Adjustable crosshair provides exact on-the-mark setting
- Anvil uses Tungsten Carbide for maximum wear resistance
- Indicator clamped in line with micrometer spindle for direct contact measurement
- **Data interface:** none
- **Scope of delivery:** Adaptor bushing AD-58, Split bushing BU-112, Split bushing BU-197

Application:

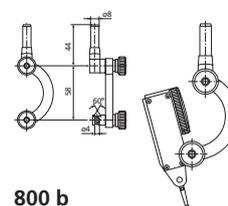

Portable Dial Calibrator

For the regular testing / calibration of your MarCator dial gages, please see chapter 14, Precimar, for the suitable testing device.

SIMPLE, ACCURATE AND INEXPENSIVE MEASUREMENT. MILLIMESS DIAL COMPARATORS.

Millimess is the "classic" amongst all measuring instrument. For over 60 years, the Millimess series of dial comparators has been synonymous with both high precision and extreme robustness. Both maximum accuracy and a minimal reversal span error are obtained through the levers, gears and pinions being supported with jeweled bearings and the measuring spindle running in a ball bush guide. Millimess is therefore particularly suitable for measuring tasks where the accuracy and the reversal span of a conventional dial indicator are not sufficient. Further advantages of Millimess are the simple handling, the easy reading as well as the movement being absolute shockproof. Our digital comparator with an inductive measuring system is equipped with highest precise technology - readings as small as $0.2 \mu\text{m}$ / $10 \mu\text{inch}$ are realized. The practical control functions (for example: tolerance monitoring or the storage of measuring values for dynamic measurements), the combined analog and digital display and the easy to use data transmission rounds off the complete Millimess spectrum.

Millimess. Digital and Dial Comparators

OVERVIEW

The Inductive Digital Comparator Millimess 2001: tolerance monitoring is simplified with the color change in the background lit display.

Dynamic measuring functions:

- MAX / MIN finding the reversal point
- MAX - MIN storing values when testing concentricity and flatness

Control output can be connected to a SPS

Universal SPS Interface

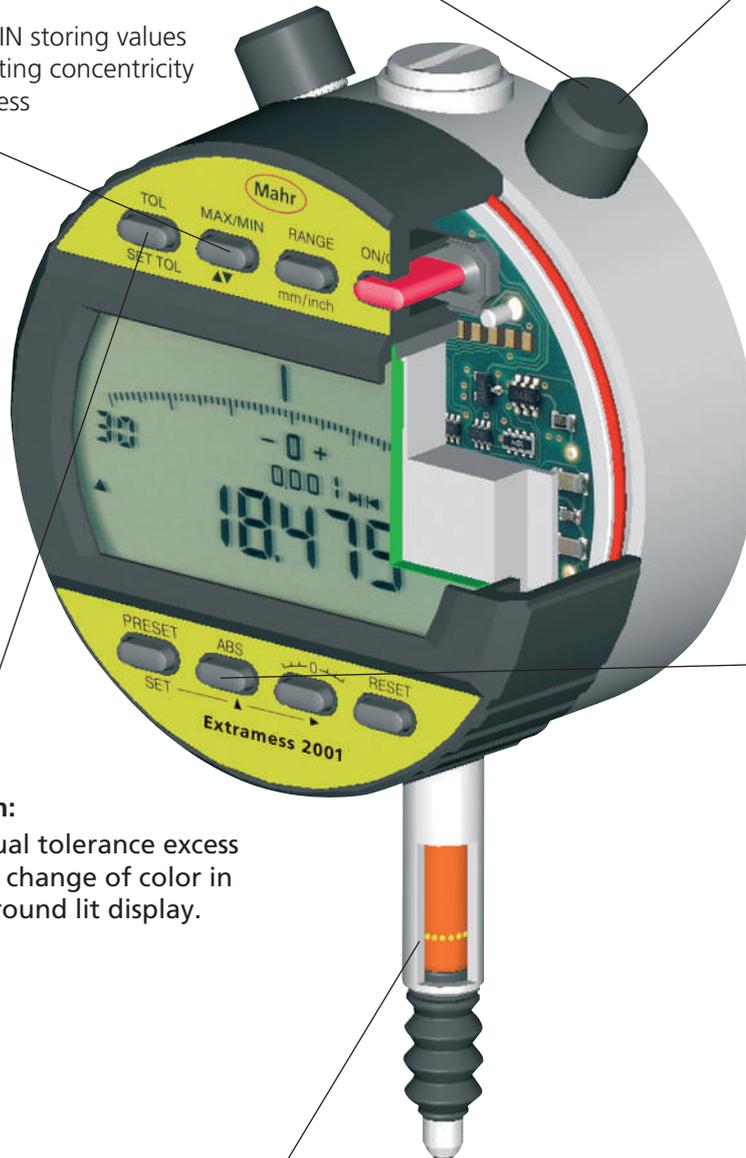

The choice is yours:
MarConnect Data output, choose between USB, Digimatic or RS232C

• **Digimatic**
To connect a Digimatic compatible evaluation instrument

• **Mahr Opto RS232C**
for direct connection to a COM port on a pc

Tolerance function:

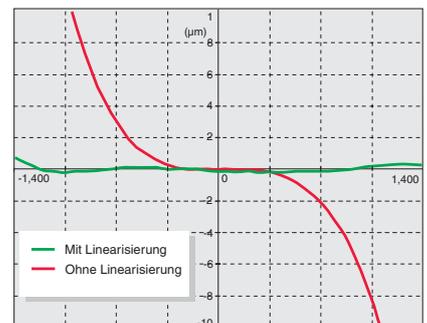

Clearly visual tolerance excess due to the change of color in the background lit display.

Absolute measuring system:

Linearized, inductive **absolute measuring system**. Reference point is not lost when the instrument is switched off

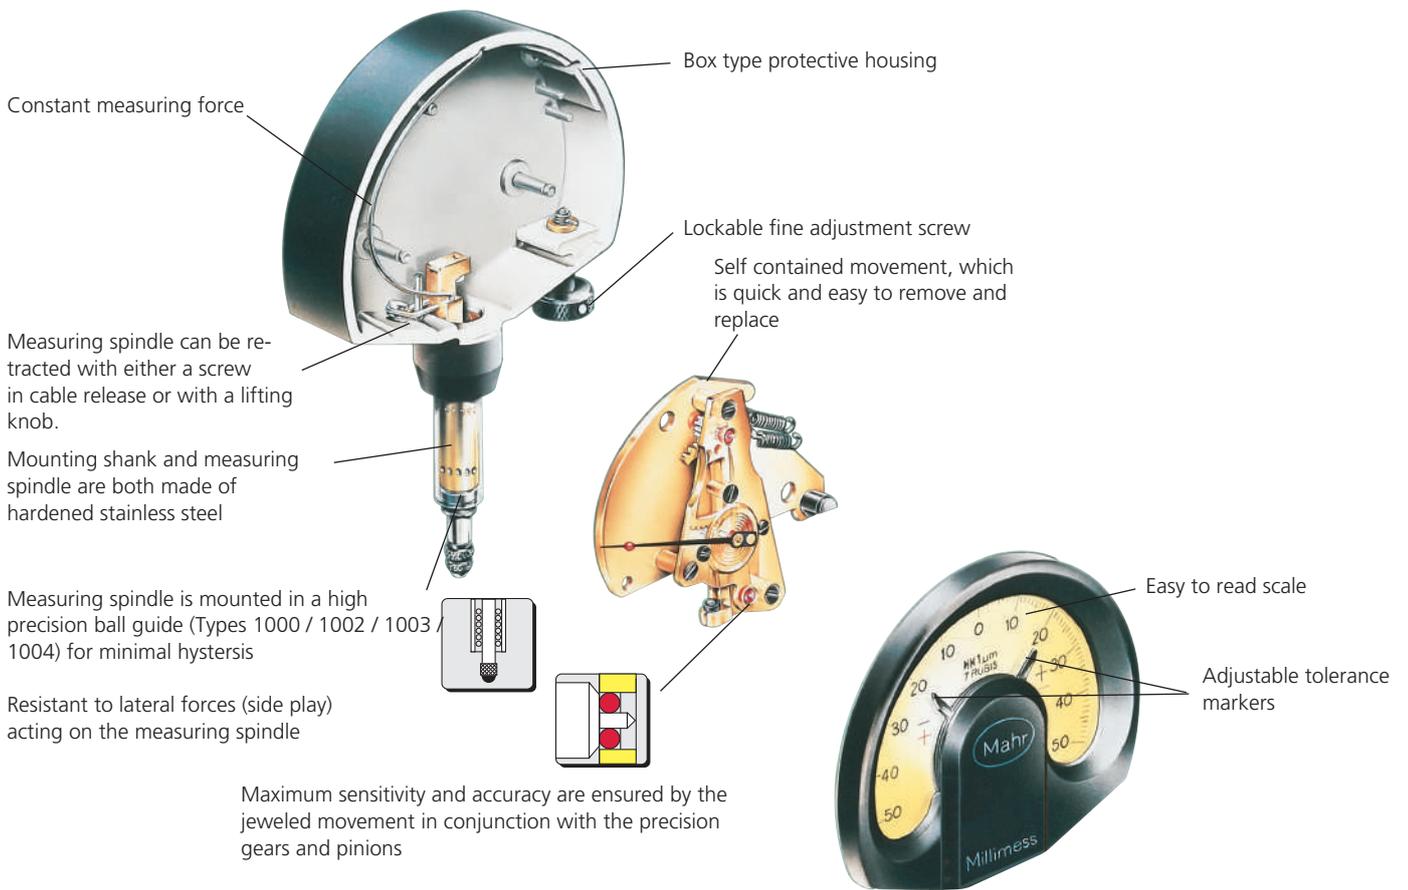

High precision rotary stroke bearings for a longer service life and higher capacity

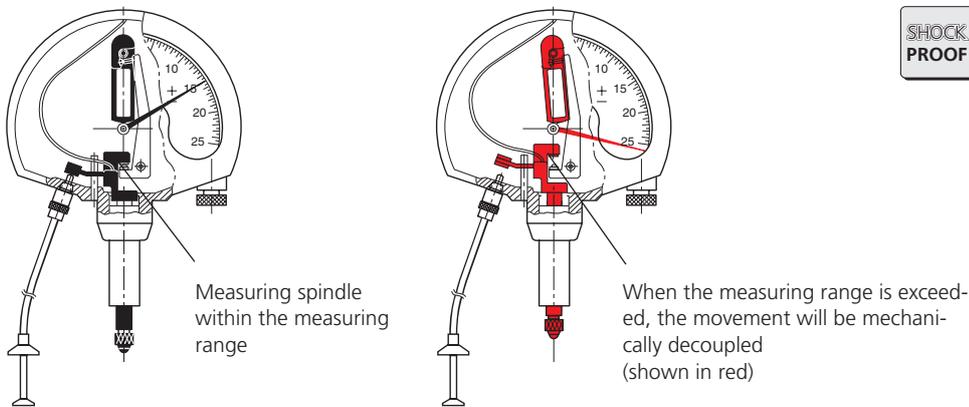

Especially suited for use in a manufacturing environment. **Waterproof: protection class IP54** in accordance to IEC 60529

| 4346911 | 8 |

Functions:

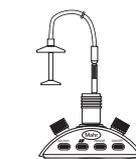

- ON/OFF
- RESET (set display to zero)
- 0 (set the analog display to zero)
- PRESET (for entering a numerical value)
- mm/inch
- Reversal of counting direction
- RANGE (switch the measuring range and resolution)
- ABS (reference to the electrical zero point)
- MAX/MIN memory for searching the reversal point
- TIR (MAX-MIN) for testing flatness and concentricity
- TOL (enter tolerance limit values)
- Factor (adjustable)
- Remote-controlled via interface (optoRS232/USB)

- High contrast LCD
- Analog display with 4 mm pointer ensures better visual recognition, ideal when checking concentricity or flatness as well as searching for the reversal point when measuring bores
- Operating and display unit (bezel) can be rotated through 280°
- Mounting shank and measuring spindle are both made of hardened stainless steel
- Measuring spindle is mounted in a high precision ball guide for minimal hysteresis
- Linearized inductive absolute measuring system
- Measuring force spring is interchangeable
- Lower stop is adjustable
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Digit height:** 6.5 mm
- **Data interface:** Digimatic, Opto RS232C, USB, Control output
- **Energy supply:** Integrated rechargeable batteries (max. 40 hrs.) or via the power source
- **Scope of delivery:** Instruction manual, Rubber bellows, Spanner for preliminary stroke setting, Power source, Case

Inductive digital comparator Millimess Maxµm III

Functions:

- RESET (set display to zero)
- mm/inch
- Reversal of counting direction
- RANGE (switch the measuring range and resolution)
- ABS (reference to the electrical zero point)
- TOL (enter tolerance limit values)
- MAX/MIN memory for searching the reversal point
- TIR (MAX-MIN) for testing flatness and concentricity
- HOLD (storage of measured values)

- Large, high contrast digital, analog and fan display for better readability while testing flatness and concentricity as well as for searching the reversal point in bores

Mechanical Dial Comparator Millimess 1002 / 1002 T / 1003 / 1003 T / 1003 XL / 1003 XLT / 1004 / 1004 T

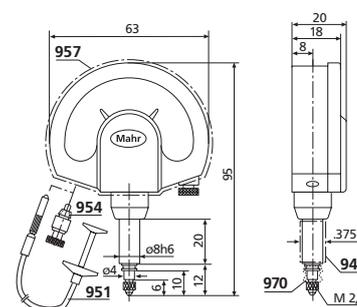

- Large, high contrast dial face
 - Adjustable tolerance markers
 - Lockable fine adjustment screw
 - Shockproof movement
 - Mounting shank and measuring spindle are both made of hardened stainless steel
 - Measuring spindle is mounted in a high precision ball guide for minimal hysteresis
 - Insensitive to lateral forces (side play) acting on the measuring spindle
 - Maximum sensitivity and accuracy are ensured by the jeweled movement and in conjunction with the precision gears and pinions
 - Box type protective housing
 - Constant measuring force
 - Measuring spindle can be retracted with either a screw in cable release or with a lifting knob
- **Scope of delivery:** Case

Mechanical Dial Comparator Millimess 1003

DIN 879-1

Application:

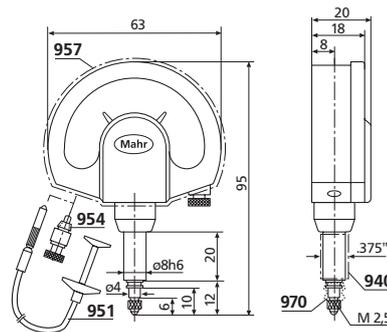

- Models with reduced / increased measuring force
- for measurements on thin-walled or soft materials, or delicate surfaces

- Large, high contrast dial face
- Adjustable tolerance markers
- Lockable fine adjustment screw
- Shockproof movement
- Mounting shank and measuring spindle are both made of hardened stainless steel
- Measuring spindle is mounted in a high precision ball guide for minimal hysteresis
- Insensitive to lateral forces (side play) acting on the measuring spindle
- Maximum sensitivity and accuracy are ensured by the jeweled movement and in conjunction with the precision gears and pinions
- Box type protective housing
- Constant measuring force
- Measuring spindle can be retracted with either a screw in cable release or with a lifting knob

Mechanical Dial Comparator Millimes 1000 A / 1000 B

- Large, high contrast dial face
 - Adjustable tolerance markers
 - Lockable fine adjustment screw
 - Shockproof movement
 - Mounting shank and measuring spindle are both made of hardened stainless steel
 - Measuring spindle is mounted in a high precision ball guide for minimal hysteresis
 - Insensitive to lateral forces (side play) acting on the measuring spindle
 - Maximum sensitivity and accuracy are ensured by the jeweled movement and in conjunction with the precision gears and pinions
 - Box type protective housing
 - Constant measuring force
 - Measuring spindle can be retracted with either a screw in cable release or with a lifting knob
- **Scope of delivery:** Cable release, Case

Application:

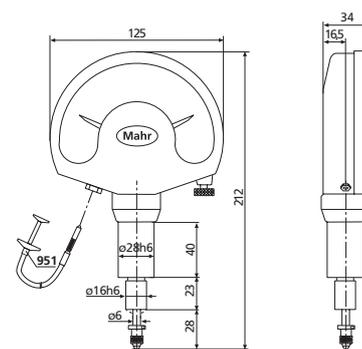

Very clear, reliable and fatigue-free readings due to extra-large housing. Ideal for test stations at which large numbers of serial parts are measured or can only be read at large intervals.

COMPLEX MEASURING TASKS BROUGHT STRAIGHT TO THE POINT. MILLIMAR

The requirements for electrical length measuring instruments are almost as broad as their scope of application. Reliability, precision as well as simple operation are the major demands, Millimar compact and column measuring instruments fulfill all these demands and requirements. Millimar probes are the most influential components of a measurement chain. Their characteristics determine the quality of the entire measurement; depending upon the type of application we have the corresponding probe for your requirements. For example; a Millimar Inductive Probe: robust, versatile and has an attractive price.

Millimar. Electrical Length Measuring Instruments

OVERVIEW

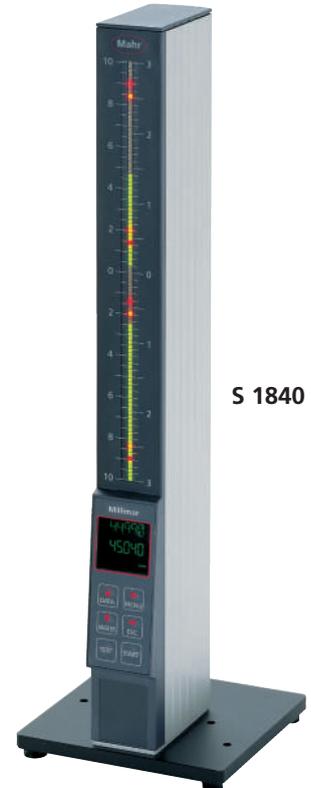

Evaluation Instruments

C 1200

C 1245

S 1840

- Compact, handy and simple to operate
- Extremely precise and easy-to-read due to the large, clearly defined analog or digital display
- Single, sum and differential measurement; limit switches and extreme value memories
- Highly accurate, long term stability and insensitive to environmental influences
- Good zero stability even when changing the measuring range
- Short response time ideal for assessment of fast processes
- Analog or digital display
- Connect to a controller or a computer via the digital output
- Analog output (optional)

Inductive Probes

- Large linearity range, strong output signal and insensitive to interference
- Precise measuring spindle and lever, frictionless ball or spring bearing for the highest resolution with the lowest hysteresis
- Cable is plugged into the probe allowing quick and simple maintenance (P1300)
- Robust construction for use on the shop floor; a variety of probes are available for all types of applications.

P1300 M

P2004 M

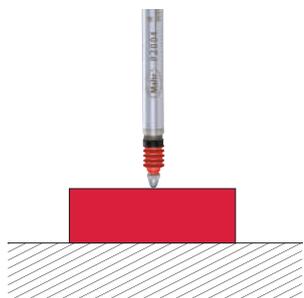

Millimar. Electrical Length Measuring Instruments

APPLICATIONS WITH INDUCTIVE PROBES

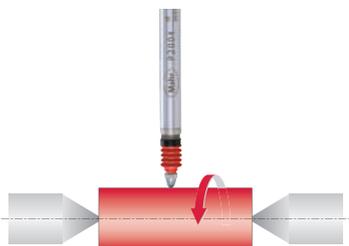

Single measurement with one probe

- Indicating instrument instantly displays the measured value.
- Used for all kinds of direct measurements on cylindrical and flat workpieces
- Applied in the same way as with digital / dial indicators, digital / dial comparators or test indicators

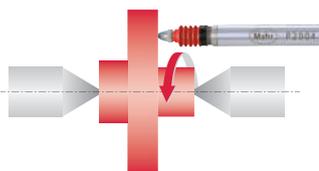

Thickness measurement

Radial run-out

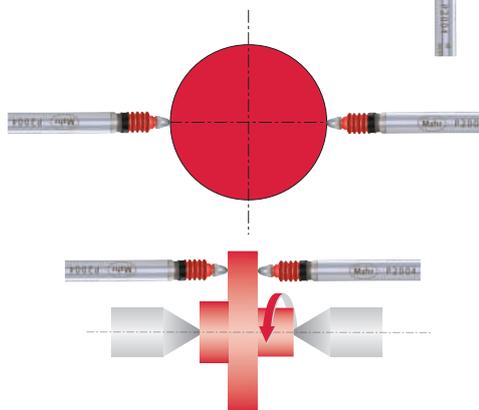

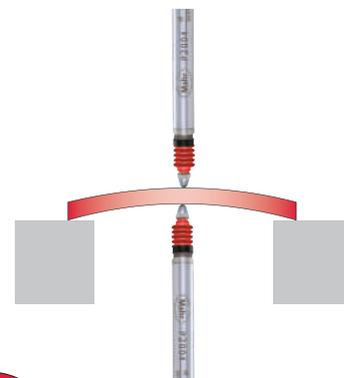

Axial run-out

Sum measurement with 2 probes

Indicates the sum of deviation (total composite error) acquired from 2 probes irrespective of the form, support and concentricity deviation.

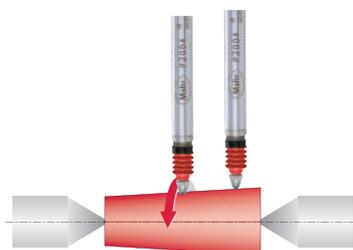

Thickness measurement

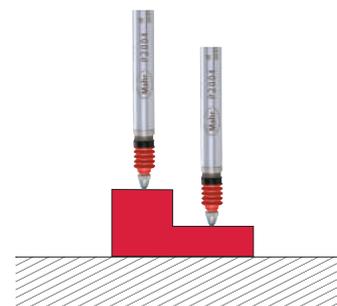

Difference measurement with 2 probes

Shows the difference between the measured values acquired by 2 probes irrespective of the absolute dimension of the test piece. This is particularly suitable for dimensional comparison of two test points.

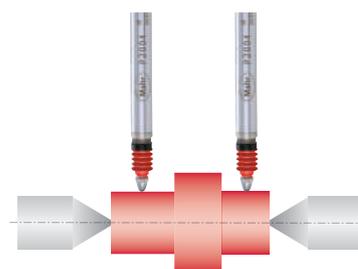

Form measurement of wedges, cones

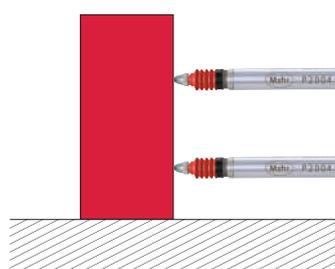

Height difference between 2 steps

Perpendicularity measurement

Concentricity measurement on 2 shaft diameters

Millimar. Electrical Length Measuring Instruments

INDUCTIVE PROBE PROGRAM

P1300-Series (Mahr half-bridge)

P1300 A

P1300 B

- Available in Mahr and Tesa compatibilities
- Well-proven and established Mahr half-bridge technology
- Easy to service: cable and probe can be separated via the plug-in connector
- Simple to change to pneumatic lifting
- Measuring spindle runs in rotary stroke bearings

Page 304

P2000-Series

P2001

P2004

P2010 A

P2104 A

- Available in all prominent compatibilities (Available in various type compatibilities)
- Wide product spectrum measuring ranges from 1 to 10 mm plus models with a compressed air (pneumatic) lifter or vacuum retraction
- With rotary stroke bearings (except P2001)
- High linearity over the total measuring range
- Excellent electromagnetic shielding (EMC)
- All probes (except P2001) can be easily converted from axial to radial by mounting a slip-on cap, included in the scope of supply

Page 288

1301 / 1303 / 1304 K / 1318 (Mahr LVDT) / EHE-Series (Federal-LVDT)

1301

1303

1304 K

1318

EHE-2056

- Extremely robust in all operating conditions; measuring system is offset to guide and mounting shank
- Excellent clamping characteristics
- Measuring spindle runs in rotary stroke bearings (except 1318)
- Measuring spindle can be lifted with a cable release (1301/1303)
- Gaging pressure is less than 4g / .14 oz in either direction, with a change of less than 0.1 g per 25 μm / .0001" of contact travel and linearity of 0.1% over the full range $\pm 0.250 \text{ mm} \pm .010$ ", also clutch-mounted contact swivels through 280° arc for easy positioning (EHE-Series)

Page 308

1340 Mahr High Precision Probe

1340

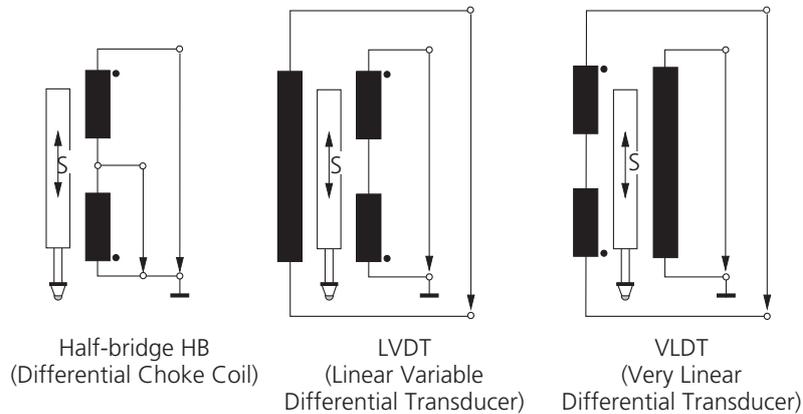

- To obtain the best results, use in conjunction with Millitron C1240M
- Unprecedented measuring accuracy and minimum linearity error < 0.01 %, i.e. 0.4 μm over the total measuring range

Page 311

General Technical Data of Inductive Probes

The measuring principle of inductive probes is based on the change of position of the magnet's conductive core moving within a coil system. Generally, this is distinguished between a half-bridge and LVDT's.

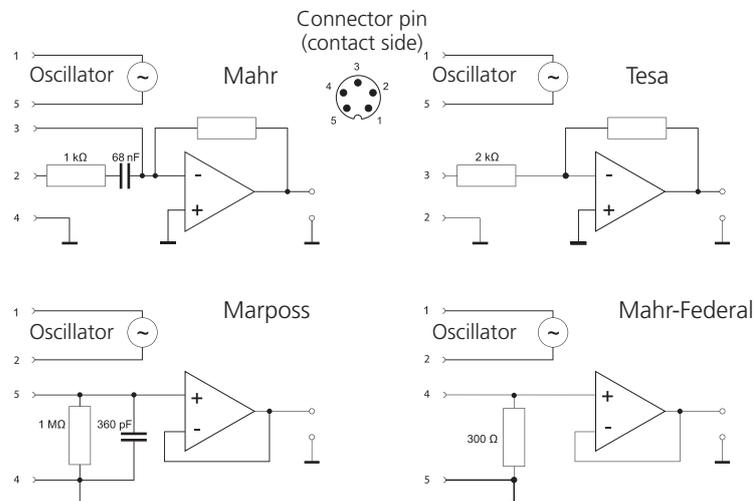

The Mahr P2000 series of probes applies a high linear, patented VLDT transducer which is similar to an LVDT transducer. This also operates according to a differential transformer principle.

Electrical specification of various compatibilities

| | | Type | Mahr | Tesa | Marposs | Mahr-Federal | | |
|--------------------------|---------|--------------------------------|------|-------|---------|--------------|-----|---|
| Carrier frequency | KHz | | 19.4 | 13 | 7.5 | 5 | | |
| Sensitivity | mV/V/mm | P2001 P2004 P2104 | 192 | 73.75 | 115 | 78.74 | | |
| | | P1300 | 192 | 73.75 | — | — | | |
| | | 1301 1303 1304 K 1318 | 192 | — | — | — | | |
| | | P2010 | 19.2 | 29.5 | 11.5 | 7.874 | | |
| | | Amplitude | Veff | | 5 | 3 | 3.5 | 2 |

Schematic drawings of Mahr input amplifiers according to the various compatibilities

Compact Amplifier Millimar 830M

- Battery operates more than 8 hours under full load
- Choice of Power Modules for 120 or 240 VAC operation
- ± 2 volt analog output
- Conforms to CE Standards
- Dual input - for single or differential modes
- Normal/Reverse transducer setting
- Selectable ranges in either Inch or Metric units
- Calibration adjustments for each input
- Convenient, front-mounted controls
- Tilt base provides stable support and easy adjustment for best viewing angle
- **Scope of delivery:** Instruction manual, Power source

Compact Amplifier Millimar C1200

- **Functions:**
- ON/OFF
- mm/inch
- Reversal of counting direction
- Selectable measuring ranges
- MAX/MIN memory for searching the reversal point
- TIR (MAX-MIN) for testing flatness and concentricity
- TOL (enter tolerance limit values)
- PRESET (for entering a numerical value)
- Switch resolution
- Factor (adjustable)
- DATA (data transmission)
- Menu interlock

- High-resolution, high-contrast color display
- Fully adjustable display for ideal viewing angle
- Extremely easy to operate
- Suitable for mains or battery operation

- Suitable for mobile use with battery operation
- Compact housing
- Suitable for wall mounting

- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)

- **Scope of delivery:** Power source, Instruction manual

Compact Amplifier Millimar 832 M

- Dynamics – simultaneously computes the minimum, maximum, TIR, nominal and actual gage-head signal for dynamic measurement capability
- Multi-Range – three selectable ranges in inch or metric units
- Message Center – display provides a simple “menu driven” setup procedure in English, French or Spanish
- RS-232 Output – for communicating with Data Collection Devices
- Two Gage Head Input, independent reading for providing the capability of summing diameter reading, matching clearances, runout and parallelism
- Angular units — selectable arc seconds or millirads for angular measurement applications (see Electronic Levels)
- User selectable password for full lockout capability or individual key lockout in both setup and gaging modes
- **Scope of delivery:** Instruction manual, Power source

Compact Amplifier Millimar C 1208 M / C 1208 F / C 1216 M / C 1216 F / C1240 M

- Favorites: the SELECT button allows you to access frequently used settings directly
- Static measurements $\pm A$, $\pm B$ and all combinations
- Dynamic measurements: Max, Min, Max-Min, Max+Min, Average
- Auto-detect mode. Up to 2 gages can be connected (inductive probe)
- Programmable via built-in keyboard or RS232 interface using MS Windows configuration software
- Backlit LCD for analog display and two-line digital display
- 5 three-color status lamps for warning and tolerance limits
- Up to 2 features can be displayed simultaneously
- extra resolution of 0,01 μm for a measuring range of $\pm 200 \mu\text{m}$ (C1216, C1240 only)
- 2 inputs for inductive probes (compatible with either Mahr/ Mahr-Federal probes)
- RS232 interface
- 3 digital inputs for measuring start, master measurement, send measurement value, etc.
- 3 digital outputs for good, reject, rework, measuring time, etc.
- Analog output (C1216, C1240 only)
- programmable analog output voltage (max. $\pm 5 \text{ V}$) (C1216, C1240 only)
- Also compatible with Millimar 1340 high-precision probe (C1240 only)
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Scope of delivery:** Instruction manual, Power source

- 16 characteristics can be defined
- With the formula editor (80 characters) the input channels C1 to C8 are mathematically linked with 4 basic arithmetical functions with factors and brackets
- Static measurements: current value, square root, arc tangent
- Dynamic measurements: Max, Min, Max-Min, Max+Min, mean
- Statistical **Functions:** n, x-bar, S, Xmax, Xmin, R
- Programmable via the integrated keypad or with MS-Windows configuration software via the RS232 interface
- Memory can store up to 500 measurements
- Measurement Start / Stop
- Analog indicator instrument for display of measurement values
- Two-line LCD for measuring values and help texts
- 5 three color status lamps for warning and tolerance limits
- Up to 3 features can be simultaneously displayed
- 2 input modules can be inserted into base unit
- Following modules are available:
 - -4 or 8 inputs for Inductive Probes (Mahr, Mahr-Federal, Tesa compatibility)
 - -2 inputs for Incremental Probes
- RS232 interface
- 1 Analog output
- 3 digital inputs for measurement start, master measurement / zero, send data
- 6 digital outputs for GO, NO GO, rework, ALL GO, measuring time, 4 classes
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Scope of delivery:** Instruction manual, Power source

Measurement Interface Millimar X 1715

Application:

Millimar X 1715 is a smart and universal measurement interface system for complex measuring tasks on the production floor. It is ideal as a signal transformer between sensors and the electronic measured data processing.

- Static and dynamic measurements
- Equation editor
- Definition of 16 features are possible
- One or two point master measurement
- 1 to 8 measuring device inputs
- RS-232 interface
- Analog output
- 3 digital inputs and 6 digital outputs
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Scope of delivery:** Power source, RS232C null modem cable, Instruction manual

Measurement Interface Millimar X 1741

- Static and dynamic measurements
- Equation editor
- Definition of 16 features are possible
- One or two point master measurement
- **Software:** MarCom Professional free download:
www.mahr.com/marcom
(only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Scope of delivery:** Power source, RS232C null modem cable, Instruction manual

Application:

The Millimar X 1741 allows for easy and fast recording of measured values and calculating directly into the interface. Transfer only a few calculated features, thus increasing the reliability of your automated application.

Amplifier with analog output Millimar 1901 TA

- Output voltage: ± 10 V (optional: ± 5 V / 0 V to 10 V) at end of measuring range. Output voltage can be set using jumpers.
- There is also an output signal available in the form of a current of ± 5 mA at the end of the measuring range
- Supply voltage 24 V, DC
- The housing of the 1901 TA is designed to fit inside the machine room
- Connection - One input for Mahr-compatible inductive probes
- **Scope of delivery:** 3 pin socket plug for analog output, 3 pin coupling bushing for power supply, Instruction manual

Application:

- The measuring amplifier 1901 TA is to be used in connection with an inductive probe for measurement control processes
- Provides the inductive probe with an AC voltage and converts the carrier frequency signal into output voltage

- Easy-to-read 3-color analog display
- Measurement in conjunction with inductive probes (e. g. Mahr P2004) or electronic plug gages, etc.
- 2 inputs for inductive probes (compatible with probes from Mahr, Mahr-Federal, Tesa)
- Extensive calculation of input signals - ±A, ±B and all combinations
- Dynamic measurements - Max, Min, Max-Min, Average
- Programmable either via the integrated keypad or the RS232 interface by means of MS-Windows® configuration software
- Programmable warning and tolerance limits, exceeding the limit causes the color to change from yellow to red
- Backlit, two-line LCD for displaying measured values, help texts and units of measurement
- 1 analog output
- 3 digital inputs (e.g. measurement start, master measurement)
- 3 digital outputs for good – reject – rework, measuring time
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Scope of delivery:** Instruction manual, Power source

Inductive Probe Millimar P2001

- Compact design
- Plain bearing guide
- High linearity over the entire measuring range
- Excellent electromagnetic shielding (EMC)
- Chemical resistance data: resistant to oil, gasoline, water and aliphatics. Moderately resistant to acids, bases, solvents and ozone

Inductive Probe Millimar P2004

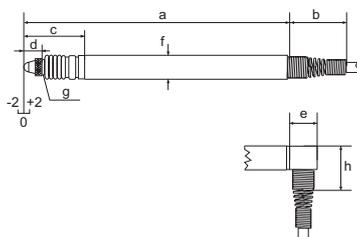

- Models with or without compressed-air (pneumatic) lifter or vacuum retraction
- Measuring pin mounted in ball-bearing guide
- High linearity over the entire measuring range
- Excellent electromagnetic shielding (EMC)
- All probes can be easily converted from axial to radial by mounting a slip-on cap (included in the scope of supply)
- Chemical resistance data: resistant to oil, gasoline, water and aliphatics. Moderately resistant to acids, bases, solvents and ozone
- **Scope of delivery:** Instruction manual, cap for radial cable output, Spanner for preliminary stroke setting

- High linearity over the entire measuring range
- Excellent electromagnetic shielding (EMC)
- All probes can be easily converted from axial to radial by mounting a slip on cap, included in the scope of supply
- Chemical resistance data: resistant to oil, gasoline, water and aliphatics. Moderately resistant to acids, bases, solvents and ozone
- **Scope of delivery:** Instruction manual, cap for radial cable output, Spanner for preliminary stroke setting

Inductive Probe Millimar P1300 MA / P1300 MA without cable

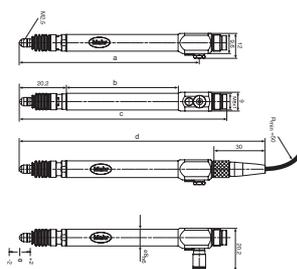

- Mahr compatibility
- Well-proven and established Mahr half-bridge technology
- Very easy to service: cables and probes can be separated via the plug-in connector
- Easy to convert to pneumatic lifting
- Measuring pin mounted in ball-bearing guide
- Chemical resistance data: resistant to oil, gasoline, water and aliphatics. Moderately resistant to acids, bases, solvents and ozone
- **Scope of delivery:** Instruction manual, Spanner for preliminary stroke setting, Hose connector for compressed air

Inductive Probe Millimar P1300 TB / P1300 TB without cable

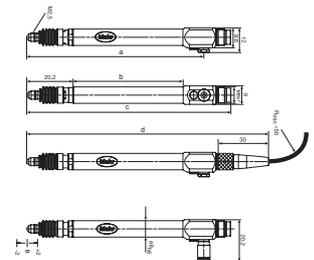

- Tesa compatibility
- Tesa half-bridge technology
- Compressed Air Retraction
- Easy to service: cable and probe can be separated via the plug in connector
- Measuring pin mounted in ball-bearing guide
- Chemical resistance data: resistant to oil, gasoline, water and aliphatics. Moderately resistant to acids, bases, solvents and ozone
- **Scope of delivery:** Instruction manual, Spanner for preliminary stroke setting, Hose connector for compressed air

Inductive Probe Millimar 1301 / 1303

- Highly robust as the measuring system is offset from the guide and mounting shaft
- Outstanding clamping properties
- Measuring pin mounted in ball-bearing guide
- Measuring pin can be lifted using wire lifter
- Chemical resistance data: resistant to oil, gasoline, water and aliphatics. Moderately resistant to acids, bases, solvents and ozone
- **Scope of delivery:** Spanner for preliminary stroke setting

Inductive Probe Millimar 1340

- Only for use in conjunction with the Millimar C 1240 M compact length measuring instrument
- Maximum measuring accuracy and minimum linearity deviation < 0.01 %, i.e. 0.4 µm over the entire measuring range
- Probe protected against dirt and moisture, can therefore be used close to production
- Chemical resistance data: resistant to oil, gasoline, water and aliphatics. Moderately resistant to acids, bases, solvents and ozone

| Compatibility | | Federal | |

- Show any change in this comparison over time
- Compare the orientation attitude of separate or adjacent horizontal surfaces
- Level systems are angular-linear compatible
- Sensing heads are interchangeable with Federal electrical spec.'s to accommodate linear measurements
- Fast Response: quick response to slight angular changes permit taking fast and accurate measurements at various sensing head positions or taking dynamic position readings

- Resolution/Repeatability: Mahr Federal's Electronic Levels far exceed the sensitivity and accuracy of precision spirit levels with a resolution to 6 µm per foot (.1 arc second), compared to the spirit level's resolution of .0001" per foot. With repeatability at ±.1 arc second, Electronic Levels are ideal for ultra-high resolution profiling.

- Direct Dimensional Readout: multiplier feature permits operator to view displacement caused by the angular measurement of the level head; this is displayed as an inches per foot readout rather than arc seconds; eliminates readout confusion when switching from spirit levels to electronic levels

- Angular-Linear Compatible: sensing heads are easily interchangeable with Federal electrical spec.'s to accommodate linear measurements

- Electronic levels are much easier to use with an autocollimator or a laser based calibration system

- Performance is comparable and results are obtained without time consuming sight path alignments, cleaning of sensitive optical surfaces or hard to control environmental conditions

- The differential level system operates simultaneously with a single amplifier, permitting an immediate comparison between two surfaces

- Adjustable bases permit setup on surfaces that are out-of-level or square by as much as ± 1.5°

- **Scope of delivery:** Indicating instrument 832 F, 2 electronic level heads EGH-2103-W2 with 6m/20ft cable, 2 adjustable mounts EAT-1029, Remote data entry handswitch with 6m/20ft cable, Power source, Instruction manual, Case

Electronic Levels - Automatic Profiling System

- Includes laptop computer and printer for automated surface plate profiling
- Surface plate profiling software provides automated collection of data and plotting of profile results
- Profiling software allows user to select surface plate size, number of runs to make and provided isometric or numeric graph with plate grade
- All features as standard differential level system
- Electronic levels are much easier to use with an autocollimator or a laser based calibration system
- Performance is comparable and results are obtained without time consuming sight path alignments, cleaning of sensitive optical surfaces or hard to control environmental conditions
- **Scope of delivery:** Indicating instrument 832 F, 2 electronic level heads EGH-2103-W2 with 6m/20ft cable, 2 adjustable mounts EAT-1029, Remote data entry handswitch with 6m/20ft cable, Notebook (EAS2836) with printer (ERO-1063) and cable (ECB-1775), Mahr Federal software (EDD-1035) for flatness measurement, Power source, Instruction manual, Case

Application:

Ideally suited for highly precise profiles of surface plates and large machine surfaces. Accurate and timely data collection for profiles and Moody method plot.

Millimar Standard Elements

Modular

The use of Millimar standard elements allows multi-gage measuring devices to be designed and implemented for the widest possible range of workpieces, e.g. rotationally symmetrical and non-rotationally symmetrical parts.

Rotationally symmetrical workpieces can be mounted between centers or on prismatic supports, whereas non-rotationally symmetrical workpieces often require a special holder.

Versatile

The versatility of the Millimar standard elements means that the right solution can be provided, regardless of the measurement task at hand.

Whether it's a question of external, internal or length measurements, the Millimar standard elements will be able to meet your requirements, even in the case of complex workpiece geometries. Thanks to the space saving design of the styli, a high number of measuring points can be inspected within a small area of the testpiece.

The pneumatic lifting mechanisms integrated into the measuring elements simplify the job of moving the testpiece into the measuring position and reduce the amount of wear on the styli.

Flexible

The modular concept using Millimar standard elements is continued throughout the construction of the whole system. A generous amount of travel in the stylus (up to 20 mm / 0.79") allows a high degree of flexibility in terms of the variety of testpieces that can be accommodated.

Precise

The Millimar standard elements are specially designed for use in the workshop and are manufactured using a rigorous process. This guarantees that the measuring devices give stable and reliable measurements.

For example, using styli fitted with two ball-bearing guides for supporting the moving part, it is possible to achieve measurement accuracy at the μm scale, if this is required due to the tolerances of the feature being measured.

Reliable

All components are long lasting and low maintenance thanks to the use of rust proof materials, the selection of appropriate heat treatments, and the use of a lifting mechanism to minimize the effects of friction acting on the styli when the workpiece is inserted.

Economical

Our systems can either be constructed by the customer from standard elements obtained from the catalog, or alternatively we can provide ready-built devices as turn-key solutions. Whichever option you choose, you can be sure that you are purchasing a system that is tailored to your specific requirements on the most favorable of terms.

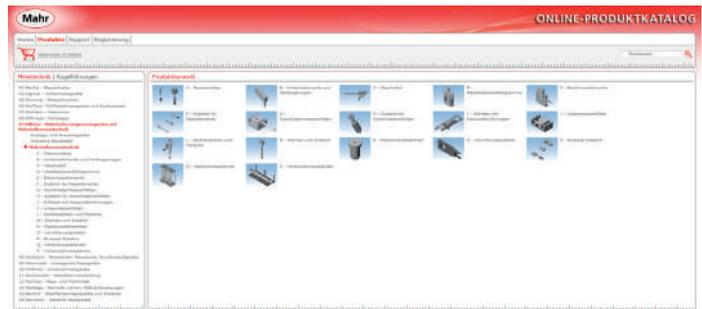

Below are just a few examples of the many factors that contribute to the cost effectiveness of the Millimar standard elements:

- Reusability of standard elements: Once manufacture of a particular type of workpiece has ceased, all standard elements used in the test equipment can be reused for a different type of workpiece.
- A choice of different mechanisms for guiding the moving part of the stylus, according to the accuracy requirements of the measuring task (optimal price-performance ratio).
- Reduction in development and implementation time.
- Availability of the equipment: Our standard elements are manufactured under standard production conditions and are always available off the shelf and ready to use.

Detailed information can be found in the catalog – **Components for Length Metrology**

Millimar. Air Gages

PRECISION BEGINS AT THE START OF THE MEASURING PROCESS

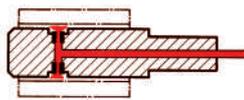

Air gages use the measuring effect of the change in pressure when a workpiece approaches a measuring jet. As the distance between jets and work surface decreases, the pressure increases while the velocity of flow and the respective volume flow decrease. The air measuring procedure has a relatively short but very linear measuring range.

1.

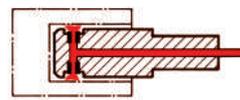

Thickness or wall thickness measurements with jet air gage.

2.

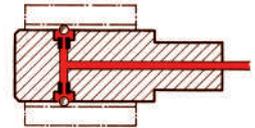

Diameter measurement of cylindrical through bores with jet air plug gage.

3.

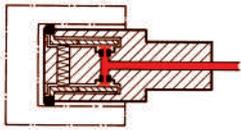

Diameter measurement of cylindrical blind bores with jet air plug gage.

4.

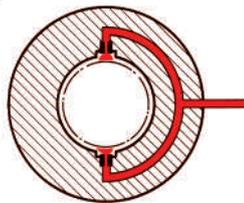

Diameter measurement of cylindrical through bores with ball contact plug gage.

5.

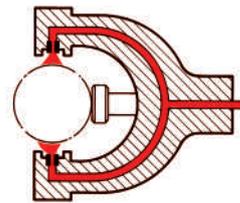

Diameter measurement of cylindrical blind bores with lever contact plug gage.

6.

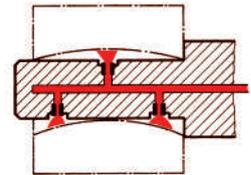

Diameter of thickness measurement with adjustable jet air caliper gage.

7.

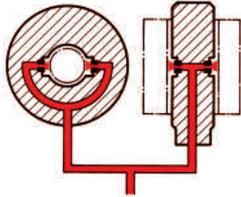

Diameter measurement of cylindrical shafts with jet air ring gage.

8.

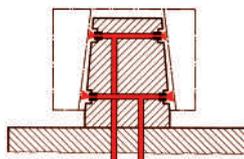

Straightness measurement of a cylindrical bore with special jet air plug gage.

9.

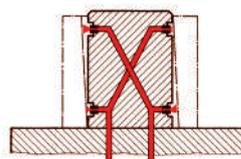

Mating measurement between bore and shaft with jet air plug gage and jet air ring gage.

10.

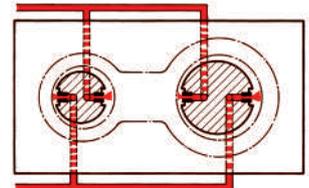

Taper pitch measurement of an inside taper with taper jet air plug gage measurement as per the differential measuring method.

11.

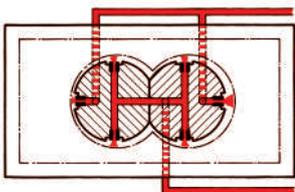

Measurement of a perpendicular position of a cylindrical bore to the front face with a special jet air plug gage measurement as per the differential measuring method.

12.

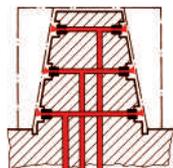

Measurement of hole distances of separated cylindrical bores with jet air plug gage measurement as per the differential measuring method.

13.

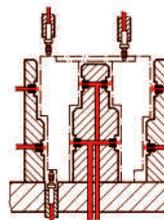

Measurement of hole distances of truncated cylindrical bores with jet air plug gages measurement as per the differential measuring method.

14.

Taper pitch measurement as well as form and diameter measurement of an inside taper with taper jet air plug gage.

15.

Multiple inside and outside measurements with measuring jet air gages and contact probes in connection with a seven-column unit.

Millimar. Air Gage Metrology

Metrology

Millimar evaluation units work according to the principle of determination of changes in air pressure; the pressure differential between two chambers is measured. While one of the two chambers provides a constant reference pressure, the pressure of the other chamber (measuring chamber) is determined by the distance of the measuring jet of an air measuring value recorder to the test specimen.

Millimar evaluation units have two connection points that are each directly connected to one of the two pressure chambers. Thus, the measuring value is measured directly, without any conversion via a Piezo pressure sensor, and is then digitalized.

Magnifications from 2500:1 to 10000:1 are realized with exchangeable instrument jets.

Millimar measuring units must be supplied with constant air pressure through a pressure reducing valve. Measuring units with pressure reducing valves can be connected to all compressed air lines from 3.5 bar to 10 bar overpressure, whereby an air filter should be interconnected.

The air must be dry and oil free.

Metrological

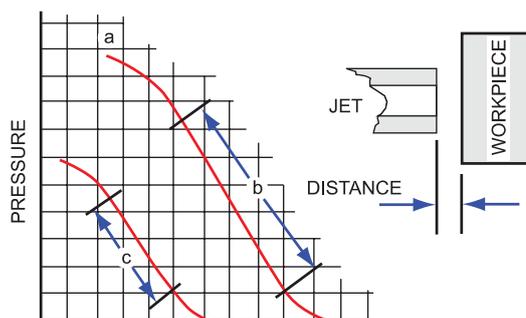

- Universal, reliable, proven, especially high-performing
- All measuring methods: individual, total and differential measurements
- High accuracy, long-term stability, insensitive to environmental influences
- Up to 10000x magnification of the measuring values, large measuring ranges
- High measuring accuracy and reproducibility for the measuring results: depending upon the magnification 0.5 μm to 20 μm
- Contact free measurements with measuring jets, no damage to the workpieces
- Reliable measurements of even uncleaned, oiled and lubricated workpieces, or workpieces with lapping paste. Measuring points are cleaned by the measuring air
- Linear display of the measuring values on a clear, large or long scale, easy and error-free reading of measuring results
- Measurement of diameters, distance between holes, tapers, eccentricities, alignment of bores, mating measurements, etc.
- Various measuring possibilities due to the corresponding

- adaption to existing measuring problems
- Airgage display unit for all applications
- Small, handy and easy to use
- Fully automatic working electrical units for measuring, control and sorting processes
- Measurement control unit for production machines
- **Millimar** single and multi-column units to set-up complete testing control units
- Due to their modularity and ability to be mounted close to each other, as well as their long-range scale readings, Millimar single and multi-column units can be set up as complete testing control systems
- Versatile measuring elements: jet air probes, jet air plugs gage, jet air ring gages, air caliper gages, angularity plug gages, angularity measuring rings, taper jet plug gages, taper jet ring gages and measuring units for mating parts for contact-free measurement
- Unusually long lifetime of the air measuring elements
- Robust model for the shop floor. Models for all applications.
- Special models for special tasks

General Technical Data of Air Gages

Air gaging is a measuring system that uses air pressure to determine the size of the measured part. The relationship between air pressure and distance of a restriction (workpiece) to the air escape (jets) can be plotted on a graph (line a).

As the distance between jets and work surface increases, the pressure decreases and the ratio becomes linear as represented by the straight section "B". This straight portion of the curve can be accurately calibrated, and represents the scale of the Dimensionair®. Compare its length with "C" on the other curve, which is the usable portion of other air gage scales. This longer linear scale gives the Dimensionair® its longer usable measuring range.

Dimensionair® Air Gages

- Operated with regular workshop compressed air (40–125 psi).
- An internal pressure regulator keeps the measuring pressure within the calibrated range.
- Zero offset of the instrument with just one setting standard and the zero adjuster.
- Clear display with fine dial graduation and needle thin pointer gives an accurate, reliable readout. An integrated air filter removes dust and dirt particles from the air supply.
- Equipment connection on the front of the device; hand tightening is sufficient for tight connections
- No recalibration required after changing the measuring equipment; measurement can be resumed immediately after setting the instrument to zero
- 4 models available, choice of mm or inches
- **Scope of delivery:** Adapter for pneumatic plug gages, Mahr Federal compatible, Air filter, Supply hose AHO-2

Dimensionair® Air Gages (single or dual master system)

Application:

Use in basic dual master air gage applications.

- The center is operated with regular workshop compressed air (3–10 bar).
- Internal pressure regulators and differential pressure gages guarantee optimum stability over the entire operating range.
- Measuring span and zero point can be set to adjust the measuring range to the interchangeable dial plates.
- Interchangeable dial plates for easy, cost effective coverage of different measuring ranges.
- Clear display with fine dial graduation and needle thin pointer gives an accurate, reliable readout.
- An integrated air filter removes dust and dirt particles from the air supply.
- Equipment connection on the front of the device. Adapters are available for virtually any equipment configuration.
- **Scope of delivery:** Dial face (order no.: 2242662), Adapter for pneumatic plug gages, Mahr Federal compatible, Air filter, Supply hose AHO–2

Compact length measuring instrument Millimar 832 PE/F1 / 832 PE/F2

- Digital and analog display in one unit.
- Large, high contrast digital display of the exact deviation from zero
- Analog display of measurement related information
- With its fixed ratio and controlled compressed air supply, the digital Dimensionair® is a sturdy, reliable system for manufacturing environments.
- Only one standard needed for zero offset; the instrument is precalibrated for the correct ratio
- Measuring ranges and resolutions for almost all measuring applications (including measuring equipment with 2, 3, 4 and 6 nozzles, air sensors and nozzle measuring probes, etc.)
- Suitable for dynamic measurement
- RS-232 output for communication with a data storage device, computer or printer, for statistical process control
- Master deviation – improved measurement with even more accurate automatic zero offset.
- **Scope of delivery:** Power source, Supply hose AHO-2, Adapter for pneumatic plug gages, Mahr Federal compatible

Compact length measuring instrument Millimar C1208 PE/F

- When using pneumatic compact length measuring instruments we recommend using a supply filter (see accessories) at all times
- Favorites: the „SELECT“ button allows you to access frequently used settings directly
- Static measurements $\pm A$
- Dynamic measurements: Max, Min, Max-Min, Max+Min, Average
- 1-point or 2-point master measurement
- Programmable via the integrated keypad or the RS-232 interface with MS Windows D1000S configuration software

When using pneumatic compact length measuring instruments we recommend using a supply filter (see accessories)

Favorites: the "SELECT" button allows you to access frequently used settings

- Static measurements $\pm A$

- Dynamic measurements: Max, Min, Max-Min, Max+Min, Average

Auto-detect mode (automatic detection).

- A pneumatic measuring instrument can be connected (nozzle plug gage or nozzle ring gage) – the instrument in use is automatically switched to the display

- 1-point or 2-point master measurement

- Programmable via the integrated keypad or the RS-232 interface with MS Windows® D1000S configuration software

- Backlit LCD for scale display and two-line digital display

- 5 three-color status lamps for warning and tolerance limits

- 1 input for pneumatic measuring equipment (compatible with Mahr / Federal electrical spec.)

- RS-232 interface

- 3 digital inputs for measurement start, master measurement, measured value transfer, ...

- 3 digital outputs for good, reject, rework, measuring time, ...

- **Software:** MarCom Professional free download:

www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)

- **Scope of delivery:** Instruction manual, Power source

Compact column measuring instrument Millimar S1840 PE/F

- With the Millimar S 1840 column measuring instrument, measuring results can be determined and assessed at a glance. Suitable for measurements with pneumatic measuring equipment. The Millimar S 1840 column measuring instrument offers a wide range of functions for the combined evaluation of signals from static and dynamic measurements. The measuring results are displayed with 101 three-color LEDs. If the programmable warning and tolerance limits are exceeded, the LED segments on the easy-to-read display change color accordingly from green to yellow or red.

- When using pneumatic compact amplifiers, it is recommended at all times to use both a pressure regulator and a supply filter (see accessories)

- Clear, three-color analog light bar display of warning and tolerance limits

- Backlit, two-line LCD for displaying measured values, help texts and units of measurement

- 1 channel

- RS-232 interface

- Analog output

- 3 digital inputs for measurement start, master measurement, etc.

- 3 digital outputs for good, reject, rework classification, measuring time, etc.

- Dynamic measurements: Max, Min, Max-Min, Max+Min, Average

- Can either be programmed via the integrated membrane keypad using the menu driven interface or via the configuration software for MS Windows®

- 1-point or 2-point master measurement

- Password block in setup mode

- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)

- **Scope of delivery:** Instruction manual, Power source

Mobile pneumatic length measuring instrument Millimar μ Dimensionair® II

Application:

Air Gaging Applications where a portable measurement and readout are needed

Technical Data

| Order no. | | 2103200 |
|--|---------------|--|
| Product type | | μ Dimensionair® II |
| Magnification | | 5000:1, 2500:1, 1260:1 |
| Inputs for pneumatic measuring equipment | | 1 |
| Digital display | | rotates through 270° |
| Storage temperature MAX | °C | 60 |
| Graduation value | μm | 0,5, 1, 2 |
| Graduation value | inch | .00002", .00005", .0001" |
| Display | | Analog display with one-line digital display |
| Tolerance display | | Two - over / under (3 class) |
| Compatibility | | Federal |
| Features | | 1 |
| Programs | | 1 |
| Test steps | | 1 |
| Dynamic functions | | MAX, MIN, MAX-MIN |
| Statistical functions | | Difference, Nominal Average |
| Response time (Air) | | approx. 1 s |
| Error limit | | $\pm 1\%$ of the total range |
| Air pressure | | 2.10 \pm .01 bar |
| Repeatability [μm] | | ± 1 numerical increment |
| Data interface | | Digimatic, Opto RS232C, USB, Wireless |
| Energy supply | | Battery operation, approx. 3000 h |
| IP protection category | | IP 54 |

- Affordable
- Versatile
- Innovative
- Robust
- No other pneumatic measuring system is as versatile as the μ Dimensionair®, which can be used as a hand-held device, as a stationary table-top device or even directly on the machine tool. With its IP54 protection rating it is suitable for use in harsh workshop environments. The compressed air flowing out of the measuring equipment removes any contamination from the testpiece to ensure reliable measuring results.
- Direct and clear measuring results.
- Ideal for use in manufacturing environments
- The μ Dimensionair® II offers:
 - Choice of setup with one standard or with Min/Max standards
 - All other functions of the μ Max μ m® II digital dial comparator:
 - Dynamic measurement: Min, Max, measuring span
 - Multiplication factor and hold function („freeze“)
 - Choice of data transfer with serial number
 - MarConnect data output: USB, Opto RS-232C and Digimatic
- **Scope of delivery:** Instruction manual, Supply hose AHO-2

Dimensionair® Air Gages — Air Plugs

- Calibrated ID tooling for the Dimensionair® Air Gaging Systems
- Tooling is interchangeable without adjusting system magnification.
- Federal Air Plugs have large

clearance (see table below), allowing easy entrance into the hole being measured and a greater measuring range.

- Long life - wide clearance and

- hard chrome (optional) body extends life of the Air Plug.
- Deep, recessed jets - Air jets are recessed into the plug body, protecting them from damage.
- Large jet size eliminates clogging from dirt and oils.

Plug identification

Air Plugs are marked with an identification number which identifies its size, number of jets, plug style, and the Dimensionair® Model the plug should be used with.

| Identification | Nominal Size from | | To & include | | Clearance from Nominal Size | |
|----------------|-------------------|--------|--------------|--------|-----------------------------|---------|
| | mm | inch | mm | inch | mm | inch |
| DP20 | 3 | .123" | 3.5 | .140" | 0.009 | .00035" |

| | above 127 | 5.000" | | | 0.107 | .0042" |

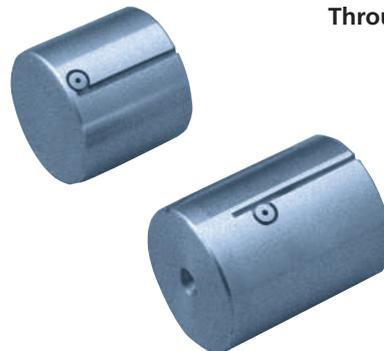

For example: DP50-T2-1.000 is the identification number of an Air Plug for a 2095184 or a standard magnification 832 Dimensionair® (DP50), through-hole style with two jets (-T2), and 25 mm/1.000" nominal size (-1.000).

The number (50) which identifies the Dimensionair® intended is marked on the plug and also appears on the dial of the Dimensionair® to help in matching the tooling to its corresponding Dimensionair® Model.

Ordering Information

When ordering Air Plugs please specify:

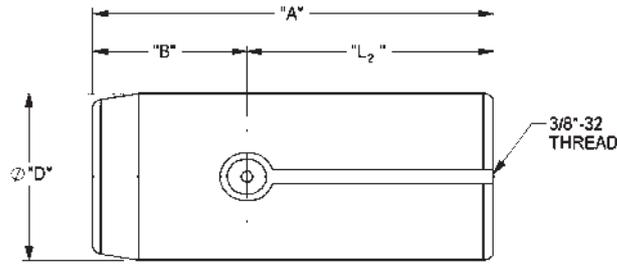

1. Nominal ID Size and Tolerance.
2. Dimensionair® Model to be used.
3. Air Plug style (Through Hole, Blind Hole, or Counterbore).
4. Air Plug finish (Chrome-plated or Hardened Steel).
5. Please order Master Setting Ring at same time. Unless otherwise specified, Mahr will furnish a 2-jet, Through Hole, High Chrome Air Plug for a 2500:1 Dimensionair®.

Through Hole and Blind Hole Air Plugs

Through and Blind Holes

For air gages, an appropriate setting master according to accuracy grade XX, can be ordered separately.

Setting Standards for indicating measuring instruments

AGD Masters

Master Rings

- Traceable certification and calibration available on request.
- Polished and lapped to size
- Non-gaging areas black oxidized — ring faces ground.
- Meet all requirements of ANSI Specification B47.1-1988
- Manufactured in accordance with ANSI Specification B89.1.6-1984.

Master Discs AGD Style 3

- Traceable certification and calibration available on request.
- Polished and lapped to size
- Non-gaging areas black oxidized — ring faces ground.
- Meet all requirements of ANSI Specification B47.1-1988

Master Plugs

- Traceable certification and calibration available on request.
- Stabilized and hardened.
- 100 % usable gaging surface.
- Ends ground square
- Lapped finish.

- Manufactured in accordance with ANSI Specification B89.1.5.
- Furnished with clear insulators.
- All dimensions are AGD style 3.

Accessories Air Gaging Instruments

Handles and Extensions

When an Air Plug is used with a hose, it should be equipped with a Handle to avoid excessive strain on the air connection and corrosion on the polished plug body. Handles may be combined for gaging deep holes.

Selection of a handle or extension is determined by the bore itself and whether or not it is preceded by a larger C-bored diameter. Corresponding thread sizes of the handle or extension must also be considered.

If no portion of the handle or extension enters the part, only thread sizes must be considered. If the plug does enter the part, then both O.D. and thread size must be considered.

2202010 and 2202011 Extensions — accepts Hose 2202074 on one end and the following plug sizes on the opposite end: all 8000:1 plugs up to 76.3 mm / 3.004”.

2202012 Handle — accepts Hose 2202074 on one end and the following plug sizes on the opposite end: all 8000:1 plugs up to 76.3 mm / 3.004”.

Has Bakelite insulating cover. Recommended for 37.7 mm / 1.484” up to 76.3 mm / 3.004” diameters.

2237666 — High impact and coolant resistant, lightweight composite handle — normally furnished with μ Dimensionair® and air snaps

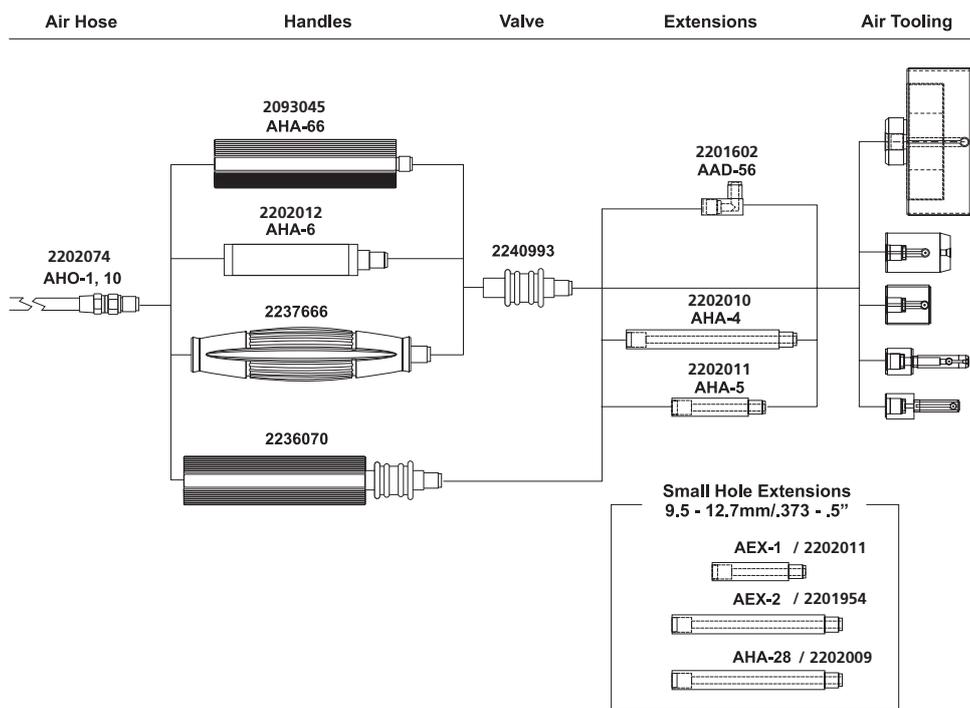

2093045 — lightweight aluminum handles with or without air shutoff valve.

2202003 Handle — used and furnished with 1250:1 thru 8000:1 through or blind hole plugs over 76.3 mm / 3.004”.

2202009 Handle — Used with 2500:1 thru 8000:1 blind hole plugs in the 9.47 mm / .3735” to 11.8 mm / .467” range, using an Adaptor 2201588.

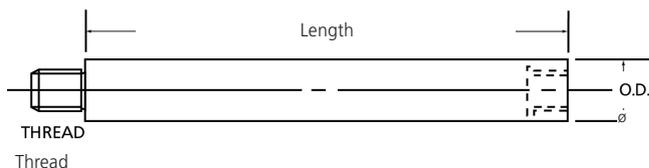

2201954 and 2201963 Extensions — used with 2500:1 thru 8000:1 through hole air plugs in the 9.47 mm / .3735” to 14.93 mm / .588” range and with 11.8 mm / .467” to 14.93 mm / .588” range blind hole plugs, using an Adaptor 2201601.

2201975 — extension used with an Adjustable Base 2204599. Provides easily configured base for bench mounted air tooling fixturing

Single Jet Probe Millimar AAT-19 / AAT-20

- JetProbes and provide modular, convenient gage heads for use in hand-held gages and for designing into fixture gages
- 9.5 mm / .375" bodies provide standardized mounting configurations
- Compact size allows easy access to hard-to-reach dimensions
- JetProbes and are calibrated for instant use with Dimensionair® systems - just set zero and measure!
- Available in single-probe and matched-probe configurations
- JetProbes are similar to AirProbes, except they have an open jet at the end, instead of a contacting spindle.
- JetProbes are ideal for measuring flatness of surfaces which cannot be touched, or for building into fixture designs where air gaging is called for.
- JetProbes can be used with 2500:1, 5000:1 Dimensionair®, and are supplied singly or in matched pairs. Order no. AAT-19 for single JetProbe or AAT-20 for a matched pair.
- JetProbes are supplied with AHO-1 Air Hose, a zero setting valve, and hardware for mounting to the Dimensionair®.

Application:

- For use on measuring and control plates

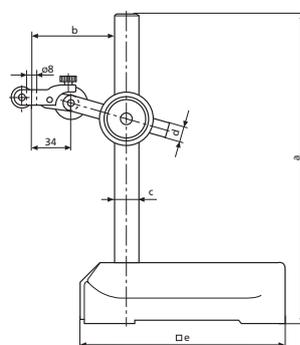

Indicator Stand with Base

- Sturdy base for stability and strength
- Convenient hand grip at the top of the base
- Structurally stable three-point support
- Stainless steel column and support arm
- Fine adjustment at support arm
- Display unit can be swiveled by $\pm 90^\circ$
- Easy to move, without vibration
- Front of the base is ground to allow movement along edges and rulers
- **Scope of delivery:** excludes indicator

Indicator Stand with Delta Base MarStand 2400

Indicator Stand with Base

- A stable Height Stand for electronic measurement
- Fine adjustment in the base allows easy operator set up, even at high magnification
- Up to 3.8 mm / .150" adjustment when arms fully extended
- Collar has Teflon bearings and metal to metal clamping
- Post is thermally heatisolated from the base
- Arm lock is independent of the pivot lock
- Uses vertical lug mounting
- EHE-2056 Lever gagehead mounts directly to arm (as shown)
- EHE-2048 Lever gagehead requires an EAM-1071 adapter
- CP-83 Extra arm and swivel clamp assembly (allows mounting two lever gage heads on one stand)

Indicator Stand with Magnetic Base MarStand 1492B-5 / 1492B-10 / 1492B-15

Indicator Stand with Magnetic Base

- Use with any MarTest indicator
- Support arms stepped at one end (.218" Dia.) for supplied swivel clamp (CP-2199)
- Accommodates Vertical and Horizontal lug back mounts for AGD type Indicators
- Bases have powerful "ON/OFF" permanent magnets capable of attaching on any of four faces (three sides or bottom)
- **Scope of delivery:** Clamp CP-2199, excludes indicator

Indicator Stand with Magnetic Base MarStand 815 MG

Indicator Stand with Magnetic Base

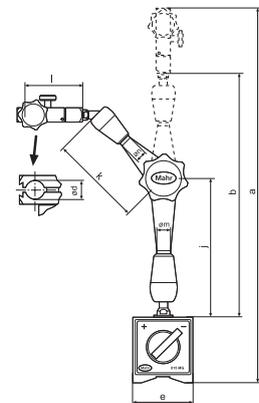

- 3D measuring stand, any position within the operating range can be reached
- Easy positioning of all three joints with a securely fixed handle
- Maintenance-free mechanical clamping system
- Black anodized arm components made from high quality light alloy
- Dial indicator holder with 8 mm receptacle bore and dovetail for dial test indicator measuring devices
- Fitted with zero play micro-precision adjuster
- Powerful magnet can be switched on and off
- **Scope of delivery:** excludes indicator

Radial run-out gage with center supports MarStand 818

Radial run-out gage with center supports

Unit composed of:

Bench:

- Flatness of the surface is in accordance to DIN 876/1
- Two T-slots for Tailstock and / or Support Arm

Support Arm 818 XNB:

- Support arm with one joint
- with fine adjustment

Tailstocks:

- Both Tailstocks can be relocated (slide into position)
- The Tailstock on the right side has a retractable (spring actuated) precision aligned center
- The Tailstocks have a peak height of 75 mm with a 90° prism for workpieces without a center, to a diameter of 20 mm (0.79")
- **Scope of delivery:** Measuring bench, Measuring arm 818 XNB, Center supports, excludes indicator

Application:

- Ideal for quick and accurate concentricity / run-out checks

THE BENCHMARK OF INDICATING MEASURING INSTRUMENTS. MARAMETER.

MaraMeter is the ideal measuring instrument for highly precise measurements of internal and external diameters on either an individual part or on serial components. Our indicating measuring instruments obtain the best results due to their constant measuring force, their exact transmission lever system, as well as their high parallelism on the measuring faces. For special measuring tasks such as threads, teeth, grooves or precision mechanical parts MaraMeter offers the right solution.

MaraMeter. Indicating Measuring Instruments

Indicating Measuring Instruments for Outside Dimensions, Indicating Snap Gages

MaraMeter 1000P / 300P 374
Indicating Snap Gage

**MaraMeter 840 F / 840 FC / 840 FH / 840 FG /
840 FM / 840 FS** 388
Indicating Snap Gage

MaraMeter 840 E 397
Indicating Snap Gage

MaraMeter 852 / 852 TS / 853 399
Indicating Snap Gage

Portable Thickness Gages

MaraMeter 22 P / 26 P / 838 A / 838 B / 838 AB / 57 B 409
With digital and/or analog display

Caliper Gages

MaraMeter 49 P / 838 TA / 838 EA / 838 TI / 838 EI 418
With digital and/or analog display

Depth Gages

MaraMeter 837 / 65 P-40 / 75 P-30 / 75 B-1 425

Indicating Measuring Instruments for Inside Dimensions

Dimentron Plug Inside Diameter Gages 436
Designed for high production ID gaging

MaraMeter 844 D 444
Indicating Plug Gage for rapid testing of serial components

MaraMeter 844 K 452
Self-centering Dial bore Gage

MaraMeter 1280 P Adjustable Bore Gages 459
Superior accuracy for production and inspection

MaraMeter 844 N / NH / NR / NB 462
Self-centering Dial Bore Gage

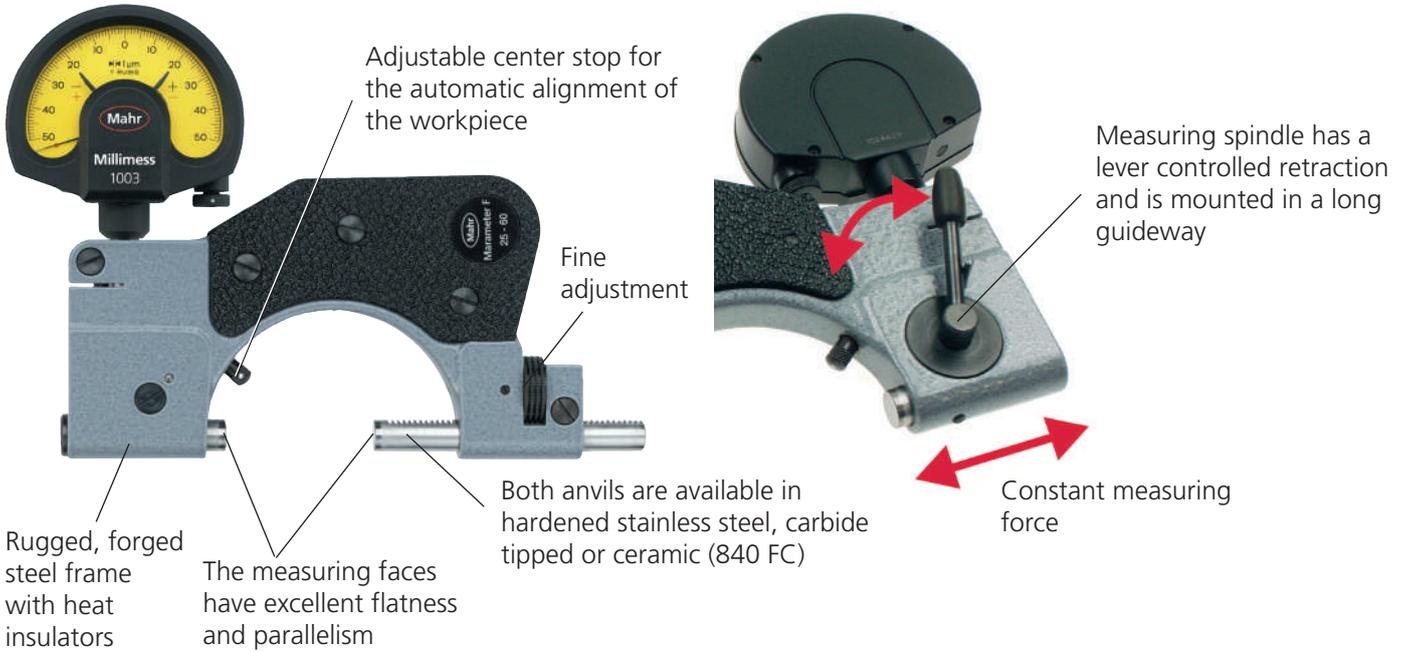

MaraMeter 844 Z 468
Dial Bore Gages for internal serrations

MaraMeter. Indicating Snap Gages

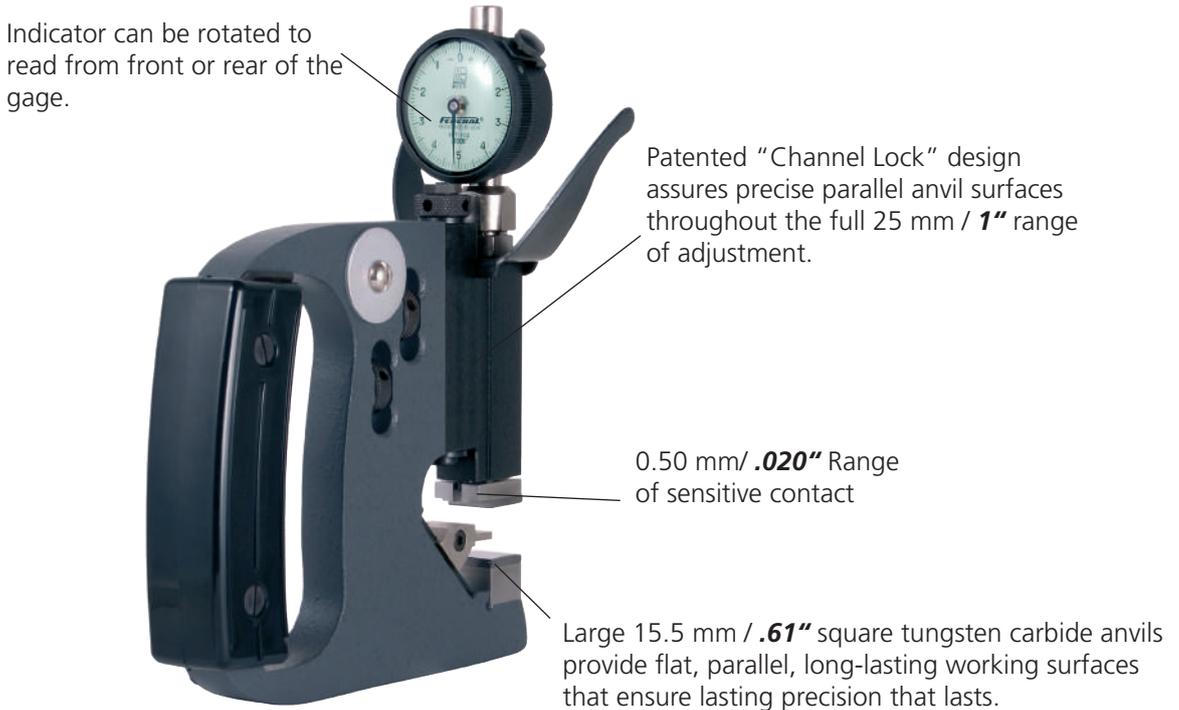

OVERVIEW

The Indicating Snap Gages **MaraMeter** 840 F / 300 P-1 are ideal for highly accurate and reliable results on cylindrical workpieces with a narrow tolerance.

MaraMeter 840 F

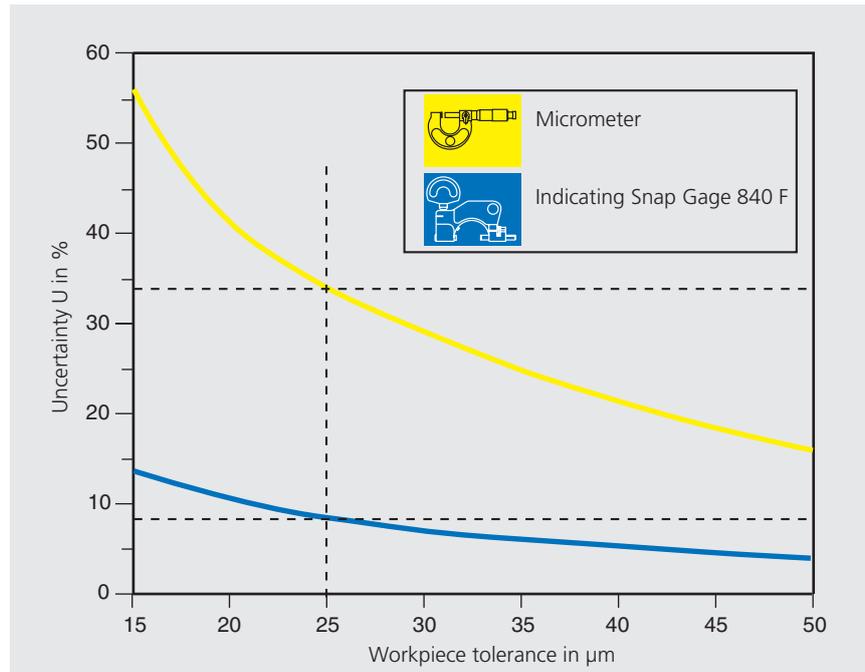

MaraMeter 300 P-1

Advantages of the Snap Gage 840 F compared to a Micrometer

• Reduced Measuring Uncertainty

The MaraMeter Indicating Snap Gages have a notably reduced measuring uncertainty in comparison to a Micrometer.

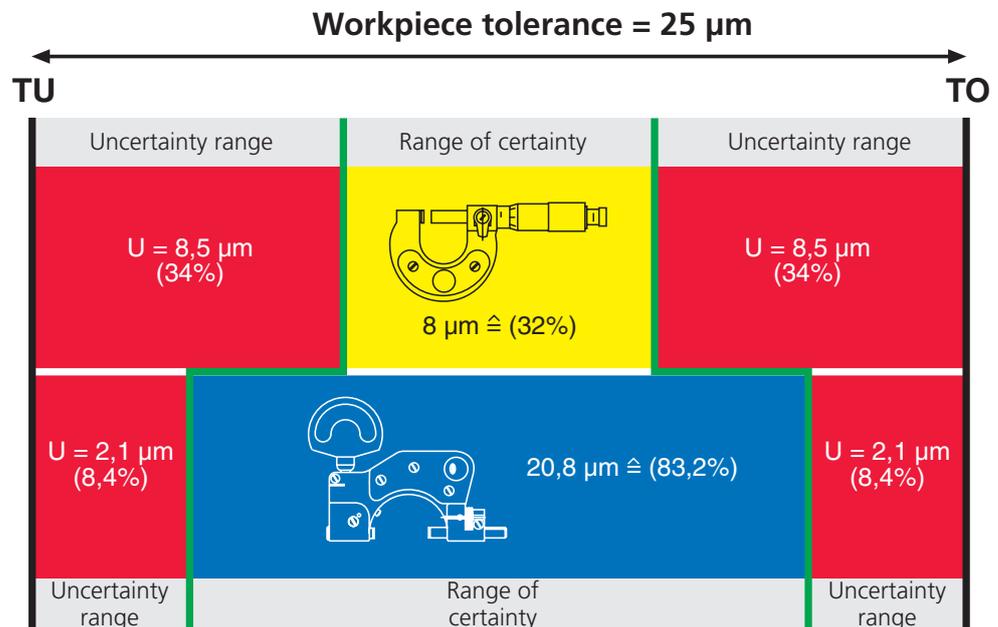

Measuring Uncertainty U is dependent upon the tolerance of the workpiece

• Better utilization of the tolerance zone

Example:
Workpiece tolerance 25 µm

The measured value in the uncertainty range can lie outside of the tolerance range, therefore the utilized tolerance of the Micrometer is reduced to only 32% (8 µm).

With a MaraMeter Indicating Snap Gage 840 F, 83% (20.8 µm) of the workpiece tolerance can be utilized.

Advantage:

With the Indicating Snap Gage the tolerance zone can be used to far greater extent, thus reducing the production costs.

Indicating Snap Gage MaraMeter 1000P

- Flat lower anvil (reference) adjustable over a broad range
- Radiused upper anvil (sensitive) spring loaded to counter balance the weight of the gage
- Indicator can be rotated to read from front or rear of the gage
- Anvils are tungsten carbide for long life
- **Scope of delivery:** Indicator, Insulating grip for ranges 44 –82 mm/ 1.75 –3.25" and above

Application:

The economical way to check outside diameters on the shop floor

Indicating Snap Gage MaraMeter EDI / EMD – 300P

Application:

- For rapid measurements of cylindrical parts such as shafts, bolts and spindles for thickness and length measurements

- Patented "Channel Lock" design assures precise parallel anvil surfaces throughout the full 25 mm / 1" range of adjustment.
- All Series 300P Snap Gages are fully adjustable with positive position locking at any point within the range.
- 0.50 mm / .020" movement of sensitive contact
- Snap Gages available over a wide range of sizes, styles, and readout configurations.
- Large 15.5 mm / .61" square tungsten carbide anvils provide flat, parallel working surfaces ensuring precision that lasts.
- Indicator can be rotated to read from front or rear of the gage.
- All adjustments accomplished using a single hex wrench (furnished).

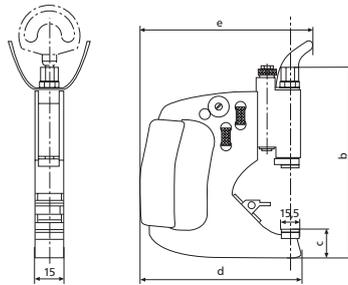

• **Scope of delivery:** Allen key

Indicating Snap Gage MaraMeter M – 300P / 301P, 300P – xM / 301P – xM

Application:

- For rapid measurements of cylindrical parts such as shafts, bolts and spindles for thickness and length measurements

- Patented “Channel Lock” design assures precise parallel anvil surfaces throughout the full 25 mm / 1” range of adjustment.
- All Series 300P Snap Gages are fully adjustable with positive position locking at any point within the range.
- 0.50 mm / .020” Movement of sensitive contact.
- Snap Gages available over a wide range of sizes, styles, and readout configurations.
- Large 15.5 mm / .61” square tungsten carbide anvils provide flat, parallel, working surfaces ensuring precision.
- Indicator can be rotated to read from front or rear of the gage.
- All adjustments accomplished using a single hex wrench (furnished).

- Patented "Channel Lock" design assures precise parallel anvil surfaces throughout the full 25 mm / 1" range of adjustment.
- All Series 300P Snap Gages are fully adjustable with positive position locking at any point within the range.
- 0.50 mm / .020" Movement of sensitive contact.
- Snap Gages available over a wide range of sizes, styles, and readout configurations.
- Large 15.5 mm / .61" square tungsten carbide anvils provide flat, parallel, working surfaces that ensure lasting precision that lasts.
- Indicator can be rotated to read from front or rear of the gage.
- All adjustments accomplished using a single hex wrench (furnished).
- **Scope of delivery:** Allen key

Indicating Snap Gage MaraMeter M 300P – 3x / M 301P – 3x

Application:

- For rapid measurements of cylindrical parts such as shafts, bolts and spindles for thickness and length measurements

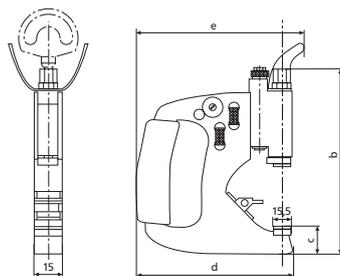

- Patented "Channel Lock" design assures precise parallel anvil surfaces throughout the full 25 mm / 1" range of adjustment.
- All Series 300P Snap Gages are fully adjustable with positive position locking at any point within the range.
- 0.50 mm / .020" Movement of sensitive contact.
- Snap Gages available over a wide range of sizes, styles, and readout configurations.
- Hardened Steel blade anvils AL-110 with 2,13 mm / .08"
- Indicator can be rotated to read from front or rear of the gage.
- All adjustments accomplished using a single hex wrench (furnished).
- **Scope of delivery:** Allen key (package excludes indicator)

- Rugged, forged steel frame with heat insulators
- Measuring spindle is mounted in long guideway with lever controlled retraction
- Measuring spindle and anvil spindle are made of hardened stainless steel, carbide tipped measuring faces
- Adjustable centering stop for surface centering
- Anvil spindle can easily be fine adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Maximum wear resistance due to non-contact positioning in conjunction with carbide tipped measuring faces
- **Scope of delivery:** Flat contact point 903 (steel), Instruction manual, Wooden case (package excludes indicator)

- Rugged, forged steel frame with heat insulators
- Measuring spindle is mounted in long guideway with lever controlled retraction
- Measuring and anvil spindle have precision tapered bores for mounting interchangeable anvils 40 He
- Anvil spindle can easily be fine adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Maximum wear resistance due to non-contact positioning in conjunction with carbide tipped measuring faces
- **Scope of delivery:** Flat contact point 903 (steel), Spanner DIN 902–3,5, Wooden case (package excludes indicator)

- Rugged, forged steel frame with heat insulators
- Measuring spindle is mounted in long guideway with lever controlled retraction
- Measuring spindle and anvil spindle have a M 2.5 connection thread, thus enabling the use of interchangeable anvils that are also used in dial indicators and dial comparators
- Anvil spindle can easily be fine adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Maximum wear resistance due to non-contact positioning in conjunction with carbide tipped measuring faces
- **Scope of delivery:** Flat contact point 903 (steel), Wooden case (package excludes indicator)

Indicating Snap Gage MaraMeter 840 FM

Application:

- For diameters of small hubs, registers, shoulders on shafts and groove widths
- For inspection for tooth span W_k as indirect, reference-free determination of tooth thickness on spur gears with straight and helical teeth
- Universally applicable and extremely versatile, each instrument spans a broad measuring range, within this range any dimension and fit can be very quickly and easily adjusted

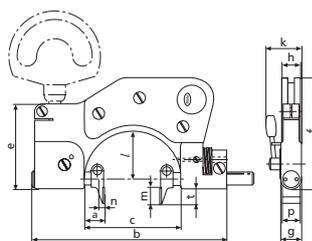

- Rugged, forged steel frame with heat insulators
- Measuring spindle is mounted in long guideway with lever controlled retraction
- Measuring spindle and anvil spindle made of hardened stainless steel; with extending carbide-tipped measuring jaws
- Anvil spindle can easily be fine adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Maximum wear resistance due to non-contact positioning in conjunction with carbide tipped measuring faces in conjunction with carbide-tipped measuring faces
- **Scope of delivery:** Flat contact point 903 (steel), Instruction manual, Wooden case (package excludes indicator)

Indicating Snap Gage MaraMeter 840 FS

- Rigid frame; convenient handle with heat insulators open on one end to eliminate heat transfer from user's hand
- Both spindles are made of hardened stainless steel and mounted in long guideways
- Carbide tipped measuring faces slightly chamfered at the front to facilitate positioning
- Projects over width of frame for measurement of narrow registers or when measuring directly at shoulders
- Adjustable centering stop for surface centering
- Maximum accuracy. Straight transfer of spindle movement to indicator. During the measurement, the weight of the gage rests on the anvil spindle
- Direct indication and evaluation of measurement results
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- **Scope of delivery:** Wooden case, Allen key, excludes indicator

Application:

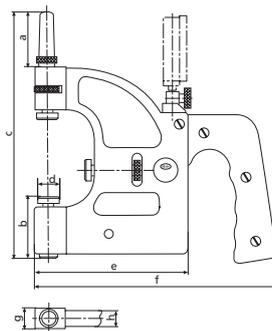

- For all kinds of cylindrical workpieces, whether directly on a machine tool or production control
- Universally applicable and extremely versatile, each instrument spans a broad measuring range, within this range any dimension and fit can be very quickly and easily adjusted

Indicating Snap Gage MaraMeter 840 E

- Extremely accurate due to the straight transfer of spindle movement to the inductive measuring system according to the Abbe principle
- Universally applicable and extremely versatile, each instrument spans a broad measuring range, within this range any dimension and fit can be very quickly and easily adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Maximum wear resistance due to non-contact positioning in conjunction with carbide tipped measuring faces
- **Scope of delivery:** Wooden case, excludes indicator

Indicating Bench Snap Gage MaraMeter 852 TS / 852 TSZ

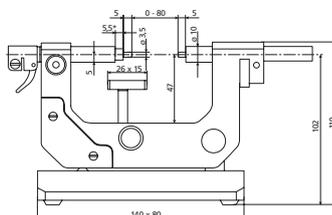

Application:

- For rapid measurements of diameters of cylindrical parts (shafts, bolts and shanks)
- For measuring pitch, root and outside diameters of all kinds of external threads as well as serrations
- For thickness and length measurement
- Particularly suited for batch produced parts

- Rugged steel frame, can be inclined up to 45° from the sturdy base
- Measuring spindle and anvil spindle are made of hardened stainless steel, with mounting bore for insertion of interchangeable anvils
- Height adjustable stop
- Anvil spindle can easily be fine adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- **Scope of delivery:** plan carbide anvils Dia. 3,5 mm

- Rugged, forged steel frame with heat insulators
- Measuring spindle is mounted in long guide way with lever controlled retraction
- Measuring spindle and anvil spindle are both made of hardened stainless steel, with mounting bore for insertion of interchangeable anvils
- Adjustable center stop for automatic alignment
- Anvil spindle can easily be fine adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Maximum wear resistance due to non-contact positioning in conjunction with carbide tipped measuring faces
- **Scope of delivery:** Flat contact point 903 (steel), Wooden case (package excludes indicator)

Application:

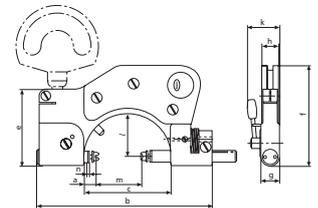

- For measuring pitch, root and outside diameters of all kinds of external threads as well as serrations
- Universally applicable and extremely versatile. Each instrument spans a broad measuring range

MaraMeter Thread anvils

- For pitch diameters
- Wear-resistant special steel, hardened
- With cylindrical mounting shank and retainer ring for rotatable mounting in the bore of dial comparator snap gage
- Pair comprises V-anvil and cone
- **With a pitch of 0.2 – 0.45 mm, the V-anvil bridges 3 turns;** It should therefore be set with 715 E thread adjustment pins, otherwise with 43 Z setting standards.

Indicating thread snap gage MaraMeter 853

- Rugged, forged steel frame with heat insulators
- Measuring spindle is mounted in long guideway with lever controlled retraction
- Anvil spindle adjustable with thumbscrew via worm and rack, for mounting interchangeable support yokes
- Measuring spindle and anvil spindle are both made of hardened stainless steel, with mounting bore for insertion of interchangeable anvils
- Anvil spindle can easily be fine adjusted
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Maximum wear resistance due to non-contact positioning
- **Scope of delivery:** Flat contact point 903 (steel), Wooden case, excludes indicator

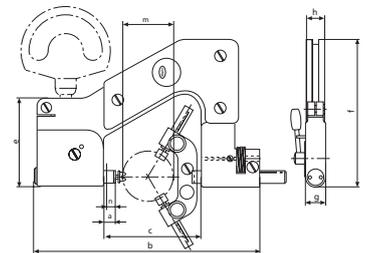

Application:

- For pitch, root and outside diameters on taps in conjunction with interchangeable anvils
- Universally applicable and extremely versatile. Each instrument spans a broad measuring range

Portable Thickness Gages MaraMeter 838 A

- Rugged, sturdy frame made from hard aluminum
- Built-in Digital or Dial Indicator
- With a lifting lever for the movable upper measuring spindle
- Convenient heat insulated handle, open at one end
- Versions with a throat depth of 200 mm have a removable stand
- **Scope of delivery:** Includes Indicator

Application:

- With flat measuring faces
- For measuring soft materials like foil, felt, rubber, paper and cardboard

Portable Thickness Gages MaraMeter 838 B

- Rugged, sturdy frame made from hard aluminum
- Built-in Digital or Dial Indicator
- With a lifting lever for the movable upper measuring spindle
- Convenient heat insulated handle, open at one end
- Versions with a throat depth of 200 mm have a removable stand
- **Scope of delivery:** Includes Indicator

Application:

- With spherical measuring faces
- For measuring hard materials like sheet metal, hardboard, wooden panels and panes of glass

Portable Thickness Gages MaraMeter XLI-22P-20

- Indicator built into gage frame for maximum ruggedness
- Lift-lever for one-hand operation
- Continuous reading dials with revolution counter for absolute measurement of thin materials, plastic films and small parts
- 6.3 mm / .25" diameter, flat steel contacts
- **Data interface:** Digimatic, RS232C, USB
- **Energy supply:** Battery operation
- **Scope of delivery:** Includes Indicator

Application:

Thickness Measurement of small parts from 0 to 1.0 inch

Portable Thickness Gages MaraMeter XLI-57B-15

Application:

Precision Thickness Measurement requiring dead weight load force

- Solid casting with ribbed frame provides strength and rigidity for accurate measurements
- 0.003 mm / .0001" parallelism with tables up to 19 mm / .75" diameter
- 283 g / 10 oz. dead load weight for constant gaging pressure
- 10 mm / .407" diameter flat upper 54.0 mm / 2.125" lower contacts
- Indicator mounts with adjustable back for quick positioning for each gaging requirement
- Gage is supplied with a lift lever so work can be easily placed between the table and contact
- Four-inch throat depth for part clearance
- **Data interface:** Digimatic, RS232C, USB, Integrated wireless
- **Energy supply:** Battery operation
- **Scope of delivery:** Includes Indicator

Portable Thickness Gages MaraMeter XLI-57B-13

Application:

For checking wall thickness of wire insulation and other small-diameter tubular parts

- Using the basic design of the Model 57B-13 (Model 57B-13M — Metric) Gage, the lower contact is PT-103, 1.10 mm / .043" diameter rod, mounted horizontally
- The upper contact is a flat chisel contact, in line with the rod
- By slipping tubular parts onto the lower contact, the gage can measure the thickness of the wall of the tube
- An auxiliary weight on the Indicator provides a total dead-load weight of 25 grams
- (Replacement lower rod: PS-43)
- **Data interface:** Digimatic, Opto RS232C, USB, Integrated wireless
- **Energy supply:** Battery operation
- **Scope of delivery:** Includes Indicator

Portable Thickness Gages MaraMeter EMD-57B-11 / EMD-57B-11D / XLI-57B-11 / XLI-57B-12

Application:

Precision Thickness Measurement

- Solid casting with ribbed frame provides strength and rigidity for accurate measurements
- Gage is furnished with a lift lever so work can be easily placed between the contacts
- Large 54 mm/ 2.125" diameter lower anvil provides convenient stage for small parts or flat materials
- 4.75 mm/ .187" diameter radiused upper contact normally provided
- 102 mm/ 4" throat depth for part clearance
- Indicator mounts with adjustable back for quick positioning for each gaging requirement
- Available with Dial Indicator or Digital Electronic Indicator
- **Data interface:** none
- **Energy supply:** Battery operation
- **Scope of delivery:** Includes Indicator

Gage for external measurement MaraMeter 49P-17M / 49P-19M / 49P-1M / 49P-2M

Application:

The most widely used gages for checking medium tolerance dimensions on patterns, castings, forgings, dies, sheet metal

- Generous clearance on jaws reaches over non-measured part protrusions for easy access to areas where thickness must meet critical dimensional specs
 - Retraction lever is conveniently located for one-hand operation
 - 0.02 mm or 0.1 mm / .01", .001", or 1/64" grads. available
 - Continuous reading dials with revolution counters normally provided
 - Cylindrical radius steel contact tips normally furnished
- Data interface:** none
- Scope of delivery:** Includes Indicator

Gege for External Measurement MaraMeter 838 TA

- Contact points are made of carbide
- Absolute measuring instrument
- Easy to read tolerance markers
- **IP protection category:** IP 65
- **Scope of delivery:** Test certificate

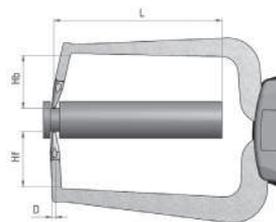

Application:

- For measuring thicknesses and wall thicknesses
- Easy to operate

Gege for External Measurement MaraMeter 838 TAZ

- Contact points are made of carbide
- Absolute measuring instrument
- Easy to read tolerance markers
- **IP protection category:** IP 65
- **Scope of delivery:** Test certificate

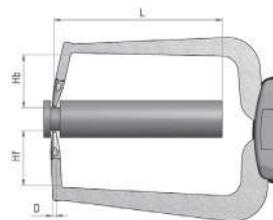

Application:

- For measuring thicknesses and wall thicknesses
- Easy to operate

Electronic Gage for External Measurement MaraMeter 838 EA

Functions:

- ON/OFF
- mm/inch
- TOL (enter tolerance limit values)
- ABS (display can be set to zero without losing reference to preset)
- DATA (Data transmission via connection cable)
- High contrast analog and digital LCD
- Tolerance is displayed with 2 LEDs
- **Data interface:** Digimatic, USB
- **Energy supply:** Battery operation (2x 1.5V AAA)
- **IP protection category:** IP 67
- **Scope of delivery:** Instruction manual, Battery, Test certificate

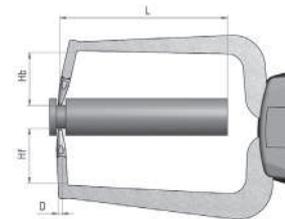

Application:

- Specified measuring programs according to application
- Absolute/Relative measuring program

Indicating depth gage with needle contact and V-shaped base MaraMeter 65P-40

- V-shaped base and needle contact
- Movement is Push-Down style
- **Data interface:** none
- **Scope of delivery:** Includes Indicator

Application:

Ideal for measuring etch depth, pits, or small, shallow recesses

Technical Data

| Order no. | 2051075 | |
|---|---------|----------------------------|
| Product type | | 65P-40 |
| Length of base | inch | 2.5" |
| Measuring range | inch | 0 – .075" |
| Graduation value | inch | .0005" |
| Indicating instrument (included in package) | | IDS-163 Indicator (25M-RC) |

Technical Data

| Order no. | 2051076 | |

| Product type | | 65P-40M |
| Length of base | mm | 64 |
| Measuring range | mm | 0 – 2 |
| Resolution | mm | 0.01 |
| Graduation value | mm | 0.01 |
| Indicating instrument (included in package) | | IDS-319 Indicator (26I-RC) |

Indicating Depth Gage MaraMeter 75P-30

- Rectangular, flat base and radiused contact point
- Supplied with contact point for measuring depths from the base as a reference
- Contact points for other depths are available upon request
- **Data interface:** none
- **Scope of delivery:** Indicator, Spherical measuring anvil (3 mm/0.13")

Application:

Shallow Depth Measurement

Technical Data

| Measuring range | mm | 0 – 4 |
| Resolution | mm | 0.01 |
| Graduation value | mm | 0.01 |
| Indicating instrument (included in package) | | Special Indicator (26I-RC dial) |

MaraMeter 75P-35M

Application:

Deep Depth Measurement

- Depth Gages have three interchangeable contact points, allowing inspection of depths to 76 mm / 3"
- Check depths against a setting
- **Data interface:** none
- **Scope of delivery:** Indicator, Spherical measuring anvils (3 / 28 / 54 mm; 0.13" / 1.13" / 2.13")

MaraMeter 75P-50 / 75P-51 / 75P-52 / 75P-53 / 75P-54 / 75P-55 / 75P-56

- Single and multi-purpose bases with choice of comparative or direct measurement indicators
- Collet mounting allows for interchanging indicators and bases to meet a wide range of requirements
- Wide range of contact points available to cover any depth measurement
- Setting masters available with anvil ground to specified depth (accuracy $\pm 2.5\mu\text{m}/\pm .0001''$)

Application:

Modular Depth Gauge for all applications

MaraMeter EMD-75B-1 / EMD-75B-1D / 2057552 (XLI-75B-1) / 2057553 (XLI-75B-2)

- Available with Dial Indicator (75B-1 Models) or Maxµm®III and µMaxµm®II Digital Electronic Indicators (EMD-75B and XLI-75B Models)
- 89 x 102 mm / 3.50 x 4" hardened, ground work surface provides excellent reference surface
- Four #10-32 tapped holes provided for mounting part location fixturing
- Indicator vertically adjustable over 32 mm / 1.25"
- Two contact points provided, 6 mm / .25" and 32 mm / 1.25" to check features up to 50 mm / 2" deep
- **Data interface:** none
- **Energy supply:** Battery operation

Application:

Depth Measurement Inspection of small to medium parts

Dimentron® Plug Gages

The Dimentron® System - Built for Performance

Dimentron® Plug Assembly — shown with Maxum® III Indicator, Housing and Handle

The Dimentron plug gage, which makes up the plug body, the panto-assembly, its contacts and transfer rod, is the measuring system comprising the Dimentron plug. It can be interchanged by simply unscrewing it from the display assembly.

The **plug body** is made of tough hardened 440 stainless steel, tempered and ground. Introduction into the bore is facilitated with 52-56 HRC hardness guide.

Standard **contacts** are made of tungsten carbide and based on the bore diameter range, come in two possible radii. Other contact materials are available based on the part being measured. Diamond, Ruby or hard-chrome-covered contacts are also available. Diamond or ruby contacts are suggested for soft aluminum or highly wearing applications; hard chromed ones (1000 HV) for aluminum and relevant alloys. Also based on the thickness of the surface, cylindrical contacts options are available.

Either 2 or 4 steel spring assemblies **form panto-spring assemblies**. The design of the transfer assembly is determined by the diameter of the plug. This panto-design produces true straight-line transfer to the V-rod.

A **transfer rod**, with spherical tungsten carbide tip, slides on a tempered steel V-shaped guide and inclined plane, transferring the measurement to the display device. This unique floating system has been designed and tested to resist for over 10,000,000 measuring cycles.

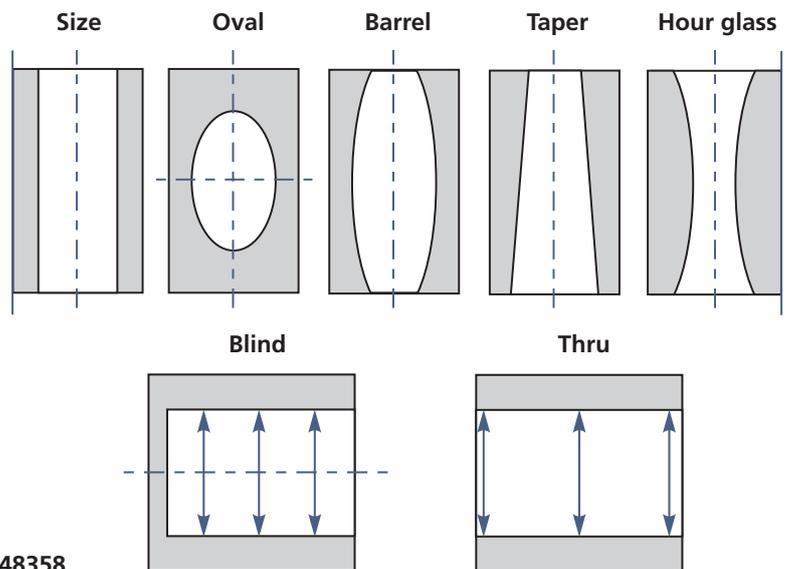

Though designed for the toughest shop conditions, wear items do occasionally need replacement. Because of the individual components **service is fast and easy**. All parts are available separately from Mahr and with standard tools, can be replaced in minutes to help maintain up time on the floor.

Special depth gaging applications

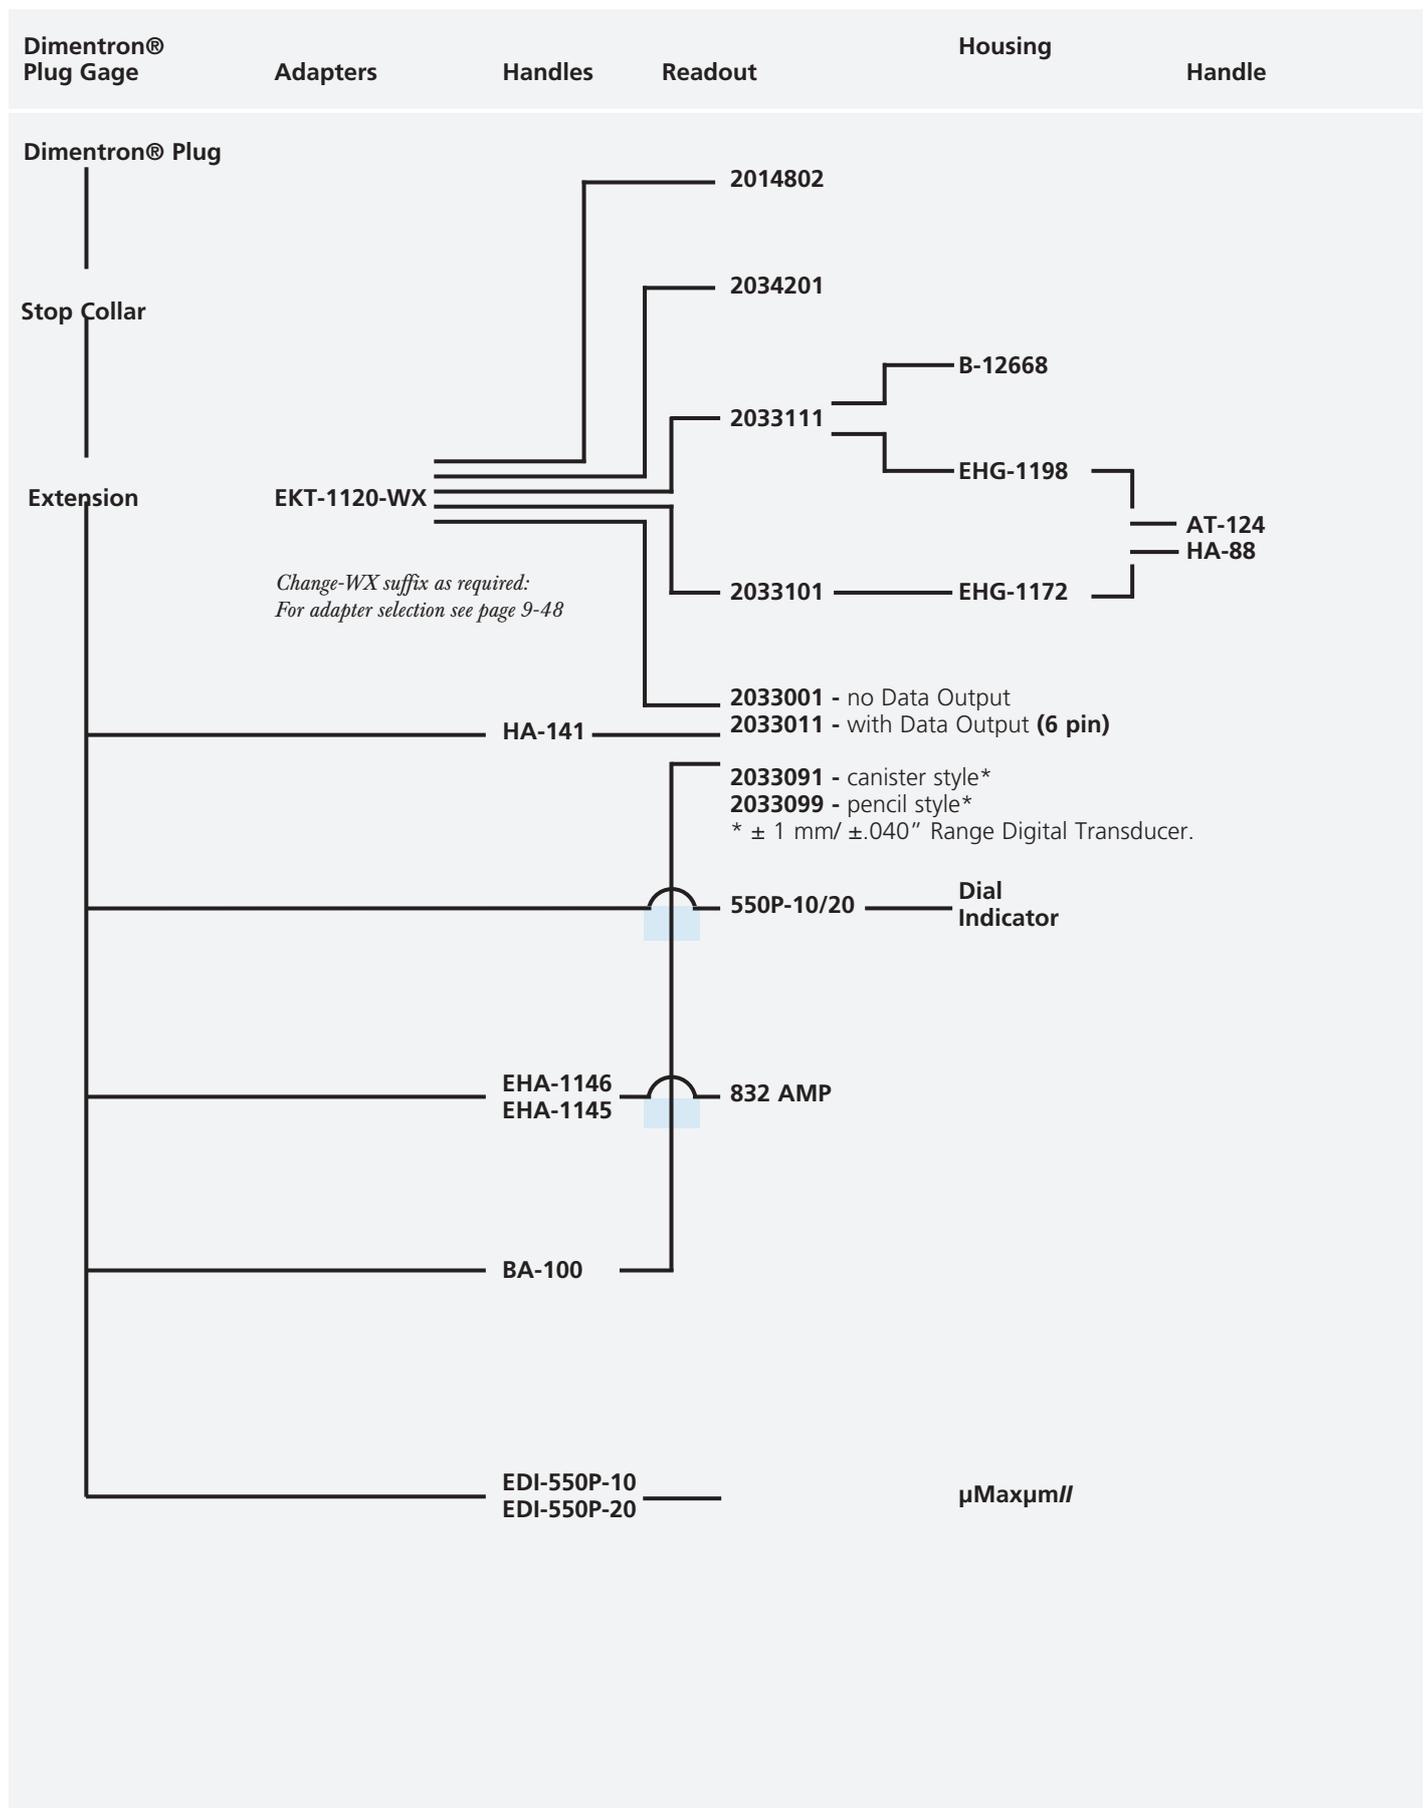

Shown with bench stand 2239307 & plug holder 2248358

Dimetron® Plug Inside Diameter Gages

The following table depicts available readouts for Dimetron® Plug Inside Diameter Gages. After making a Plug selection, follow the chart for all the components needed to compose a gaging system suited to your application.

Indicating plug gage for through hole MaraMeter Dimentron

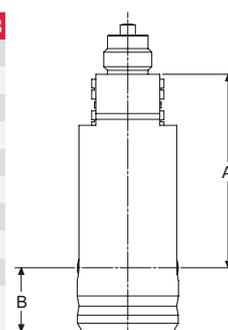

- Designed for high production ID gaging.
- High chrome content; hardened stainless steel bodies ground precisely for specified size measurement.
- Plug tooling interchangeable for quick changeover
- Easy measurement - insert plug into diameter and read (no rocking needed)
- Set to nominal dimension with a single master ring.
- Long Life Tungsten carbide contacts and V-Rod ensure durable motion transfer. Open design is conducive to easy rinse cleaning.
- Explore bores for taper, barrel shape, bell-mouth and 2-point out-of-round.
- Stop Collars available for all standard sizes.
- Captive V-Rod design.

Indicating plug gage for super blind hole MaraMeter Dimentron

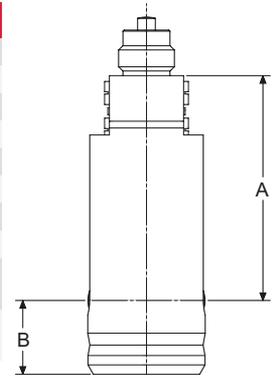

- Designed for high production ID gaging.
- High chrome content; hardened stainless steel bodies ground precisely for specified size measurement.
- Plug tooling interchangeable for quick changeover
- Easy measurement - insert plug into diameter and read (no rocking needed)
- Set to nominal dimension with a single master ring.
- Long life: Tungsten carbide contacts and V-Rod ensure durable motion transfer. Open design rinses clean easily.
- Explore bores for taper, barrel shape, bell-mouth and 2-point out-of-round.
- Stop Collars available for all standard sizes.
- Captive V-Rod design.

Indicating plug gage for super super blind hole MaraMeter Dimentron

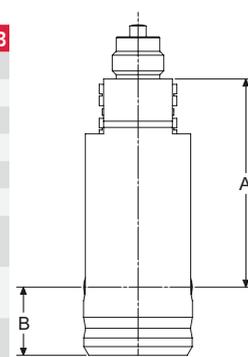

- Designed for high production ID gaging.
- High chrome content; hardened stainless steel bodies ground precisely for specified size measurement.
- Plug tooling interchangeable for quick changeover
- Easy measurement - insert plug into diameter and read (no rocking needed)
- Set to nominal dimension with a single master ring.
- Long life: Tungsten carbide contacts and V-Rod ensure durable motion transfer. Open design rinses clean easily.
- Explore bores for taper, barrel shape, bell-mouth and 2-point out-of-round.
- Stop Collars available for all standard sizes.
- Captive V-Rod design.

Indicating plug gage MaraMeter 844 Dk

Application:

Standard model

- For rapid testing of diameter, roundness and conicity of bores
- Especially suitable for testing batches with tight tolerances (**for tolerances <10µm on request**)
- Rocking in the bore is unnecessary to determine the reversal point
- Ideal for use in conjunction with digital display units and for subsequent processing of measured values

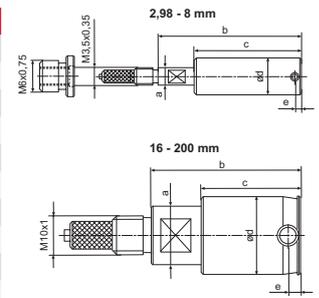

- Measuring head has a hardened chromium plated guide cylinder and carbide tipped anvils
- The carbide expanding pin transfers radial movement to indicating instrument
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Extensive modular system is composed of measuring head, holder, depth extension, right angle attachments and depth stops

Application:

Model for through holes

- With extended guide cylinder for measuring through holes from the edge of the hole
- For the rapid testing of diameter, roundness and conicity of bores
- Especially suitable for testing batches with tight tolerances (**for tolerances <10µm on request**)
- Rocking in the bore is unnecessary to determine the reversal point
- Ideal for use in conjunction with digital display units and for subsequent processing of measured values

- Measuring head has a hardened chromium plated guide cylinder and carbide tipped anvils
- The carbide expanding pin transfers radial movement to indicating instrument
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Extensive modular system is composed of measuring head, holder, depth extension, right angle attachments and depth stops

Indicating plug gage MaraMeter 844 Dks

Application:

Model for blind holes

- For measurements close to the base of the hole
- For the rapid testing of diameter, roundness and conicity of bores
- Especially suitable for testing batches with tight tolerances **(for tolerances <math><10\mu\text{m}</math> on request)**
- Rocking in the bore is unnecessary to determine the reversal point
- Ideal for use in conjunction with digital display units and for subsequent processing of measured values

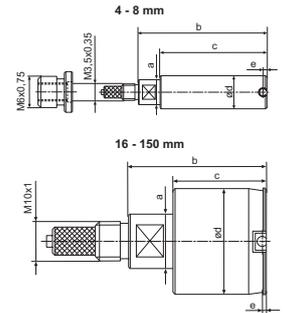

- Measuring head has a hardened chromium plated guide cylinder and carbide tipped anvils
- The carbide expanding pin transfers radial movement to indicating instrument
- Constant measuring force as a result of built-in spring, thus eliminating user influence
- Extensive modular system is composed of measuring head, holder, depth extension, right angle attachments and depth stops

Extension MaraMeter 844 Dv / 844 Kv

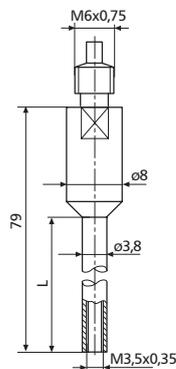

- For very deep bores
- Screws in between holder and measuring heads 844 Dk, 844 Dkr or 844 Dks
- Several extensions can be screwed together as of 8 mm
- Models 844 Dv and 844 Dvk made of Invar steel

Self centring dial bore gage MaraMeter 844 K

Application:

- Measuring the diameter, roundness and conicity of bores
- Spring loaded halves of measuring probe are split via expanding pin with precision lapped taper. This movement is transferred to indicating instrument

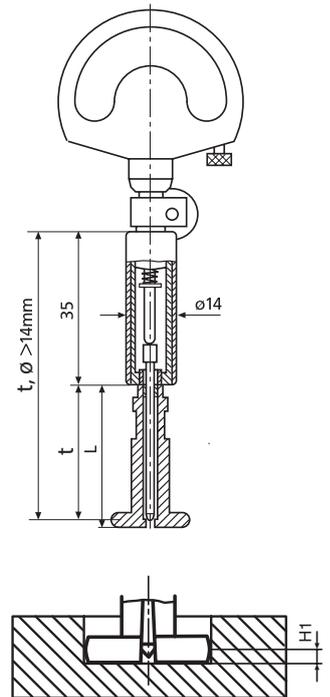

- Maximum wear resistance due to **hard chrome plating**
- Constant measuring force as a result of built-in spring, eliminating user influence
- Highly versatile, each gage covers a large range. Within the respective limits, quickly and easily adjustable to any size and any type of measuring application
- Extensive modular system is composed of measuring probe, holder, depth extensions, right angle attachments and depth stops
- **Scope of delivery:** Measuring holder, Probe, Expanding pin, Wooden case, excludes indicator

Self centring dial bore gage MaraMeter 844 KH

- Maximum wear-resistance due to **carbide tipped** faces
- Constant measuring force as a result of built-in spring thus eliminating user influence
- Highly versatile, each gage covers a large range. Within the respective limits, quickly and easily adjustable to any size and any type of measuring application
- Extensive modular system is composed of measuring probe, holder, depth extensions, right angle attachments and depth stops
- **Scope of delivery:** Measuring holder, Probe, Expanding pin, Wooden case, excludes indicator

Application:

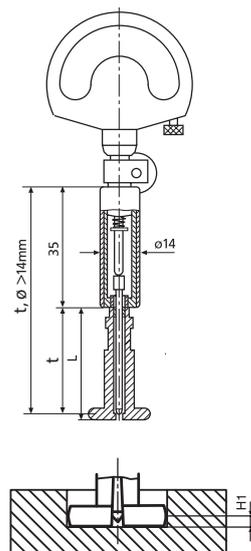

- Measuring the diameter, roundness and conicity of bores
- Spring loaded halves of measuring probe are split via expanding pin with precision lapped taper. This movement is transferred to indicating instrument

Adjustable Bore Gage MaraMeter 1280P

- Rugged construction for long life and low maintenance: Stainless steel gaging head, one piece centralizing yoke with replaceable tungsten carbide balls
- Heavy duty indicator for housing projects
- Flow-through design makes Series 1280P Bore Gages rinse clean, no disassembly required
- Outstanding stability: Holds mastered value
- All 1280P gages have a removable handle as a part of the Indicator Housing

Application:

Internal Diameter Bore Measurement

| 2218623 | Extension set for 152–178 mm/ 6–7" (use with EX-223) and for 178–200mm/ 7–8" (use with EX-225) for 128XP-3XXX | EX-228 |

Adjustable Bore Gage MaraMeter 1282P

- Rugged construction for long life and low maintenance: Stainless steel gaging head, one piece centralizing yoke with replaceable tungsten carbide balls
- Heavy duty Indicator for housing protects
- Flow-through design makes Series 1280P Bore Gages rinse clean, no disassembly required
- Outstanding stability: Holds mastered value
- If gage capacity is 25 mm / 1" or greater, the Maxµm®III Indicator is covered with a cast aluminum protective housing
- **Data interface:** Digimatic, RS232C, USB
- **Energy supply:** Battery operation

Application:

Internal Diameter Bore Measurement

| 4474005 | 844 N | 250 – 800 | 10 – 32" | 2.6 | 366 | 3 | 1.5 |

- Measuring head consists of a carbide tipped moving anvil and an interchangeable stationary anvil with a hardened steel ball
- Transmission lever system transfers movement of the movable anvil to indicating instrument
- The broad centering bridge ensures automatic centering in the bore
- Resistant to temperature because the shank and transfer rod are made of heat resistant Invar steel
- Highly resistant to wear and tear because of carbide tipped moving anvil
- Constant measuring force due to built-in spring, eliminating user influence
- Universally applicable and extremely versatile as every instrument spans a broad measuring range, within this range it is quick and easy to adjust to any size
- Extensive modular system is composed of measuring head, holder, extensions, right angle attachments and depth stops
- **Invar steel** has a particularly low expansion coefficient and thus makes the instrument totally insensitive to any kind of heat. Body heat from the user, increases in ambient temperature have no influence on the measuring results
- **Scope of delivery:** Measuring holder, Measuring Head, Anvil spindle, Wooden case, excludes indicator

- Measuring head consists of a carbide tipped moving anvil and an interchangeable stationary anvil with a **carbide ball**
- Transmission lever system transfers movement of the movable anvil to indicating instrument
- The broad centering bridge ensures automatic centering in the bore
- Resistant to temperature because the shank and transfer rod are made of **heat resistant Invar steel**
- Highly resistant to wear and tear due to the carbide tipped moving anvil
- Constant measuring force due to built-in spring, eliminating user influence
- Universally applicable and extremely versatile as every instrument spans a broad measuring range, within this range it is quick and easy to adjust to any size
- Extensive modular system is composed of measuring head, holder, extensions, right angle attachments and depth stops
- **Invar steel** has a particularly low expansion coefficient and thus makes the instrument totally insensitive to any kind of heat. Body heat from the user, increases in ambient temperature have no influence on the measuring results
- **Scope of delivery:** Measuring holder, Measuring Head, Anvil spindle, Wooden case, excludes indicator

- Measuring head consists of a carbide tipped, movable measuring bolt and an opposing interchangeable stationary anvil with **carbide ball**
- Stationary measuring bolt can pivot through 180°, giving rise to a very long return travel path of up to 40% of the measured bore
- Movements of the measuring bolt are transmitted to the indicating instrument via the ring segment
- The broad centering bridge ensures automatic centering in the bore
- Resistant to temperature because the shaft and the transfer rod are made of **heat resistant Invar steel**
- Carbide tipped measuring contacts for high wear resistance
- Constant measuring force thanks to built-in and independent measuring force spring preventing external interference
- Universally applicable. Every instrument spans a broad measuring range. Within this range it is quick and easy to adjust to any size
- **Invar steel** makes the inside measuring device insensitive to temperature influences of any kind. Body heat from the user or a rise in ambient temperature in the workplace have virtually no influence on measuring results.
- **Scope of delivery:** Measuring holder, Measuring Head, Anvil spindle, Wooden case, excludes indicator

Anvil for internal serration MaraMeter 844 Zk

- FunctionsMaximum wear resistance due to carbide ball anvils
- Constant measuring force due to built-in spring thus eliminating user influence
- Anvils, measuring heads, holder, spacer (intermediate piece) and depth extensions form a very comprehensive modular system which can rapidly be converted to measure further gear sizes
- **When ordering please state the required ball diameter**

Application:

- For diametrical two ball measurement MdK, to obtain the pitch diameter and conical form of internal gears in any position and at any depth

Measuring Head MaraMeter 844 z1 / 844 z2

Application:

- For diametrical two ball measurement M_{dk} , to obtain the pitch diameter and conical form of internal gears in any position and at any depth

- Maximum wear resistance due to carbide ball anvils
- Constant measuring force due to built-in spring thus eliminating user influence
- Anvils, measuring heads, holder, spacer (intermediate piece) and depth extensions form a very comprehensive modular system which can rapidly be converted to measure further gear sizes
- **When ordering please state the required ball diameter**

844 Tw

Functions:

- ON/OFF
- AUTO-ON / OFF
- RESET (set display to zero)
- mm/inch
- PRESET (for entering a numerical value)
- LOCK function (key lock)
- DATA (Data transmission via connection cable)
- Interchangeable measuring arms, contact blocks and stop elements (optional accessories) for easy adaptation to individual measuring tasks
- The digital display is always in the operator's line of vision due to the patented mounting fixture of the measuring elements provided on the upper and lower longitudinal face of the arm holders
- Application range can be extended by turning the measuring arms
- The two arm holders can be moved along the rail, providing a well-balanced weight distribution, even with small dimensions
- Slide and rail are made of hardened stainless steel
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)
- **Data interface:** USB, Digimatic, Opto RS232C, Wireless
- **Energy supply:** Battery life approx. 3 years
- **IP protection category:** IP 65
- **Scope of delivery:** Battery, Instruction manual, Mounting and resting blocks, Wooden case, without arms/attachments and anvils

Multimar. Universal Gage 844 T for external and internal dimensions

OVERVIEW

The Universal Gage **Multimar** 844 T is easy to use and versatile; ideal for all your measuring requirements in dimensional metrology.

Applications

- For measuring:
 - External and internal dimensions
 - External and internal threads
 - Centering shoulders, narrow collars, recesses and grooves
 - External and internal tapers, external and internal tooth profiles/gears, etc.

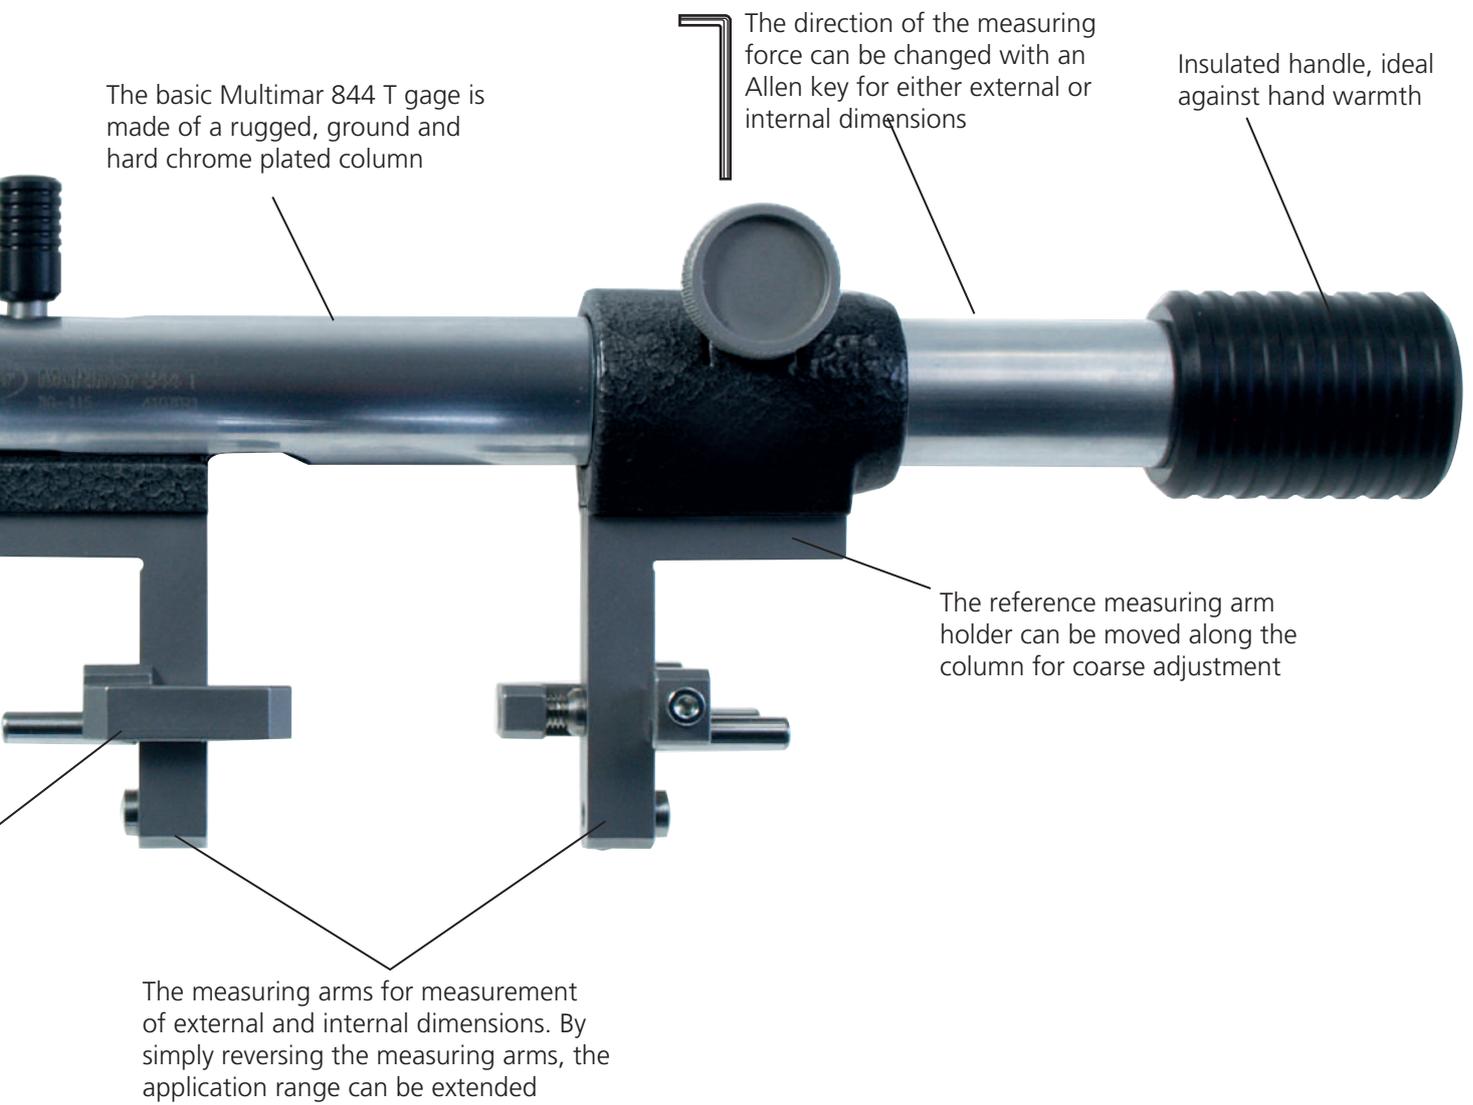

Constant measuring force due to built-in measuring force spring

All indicating instruments with an 8 mm mounting shank are applicable

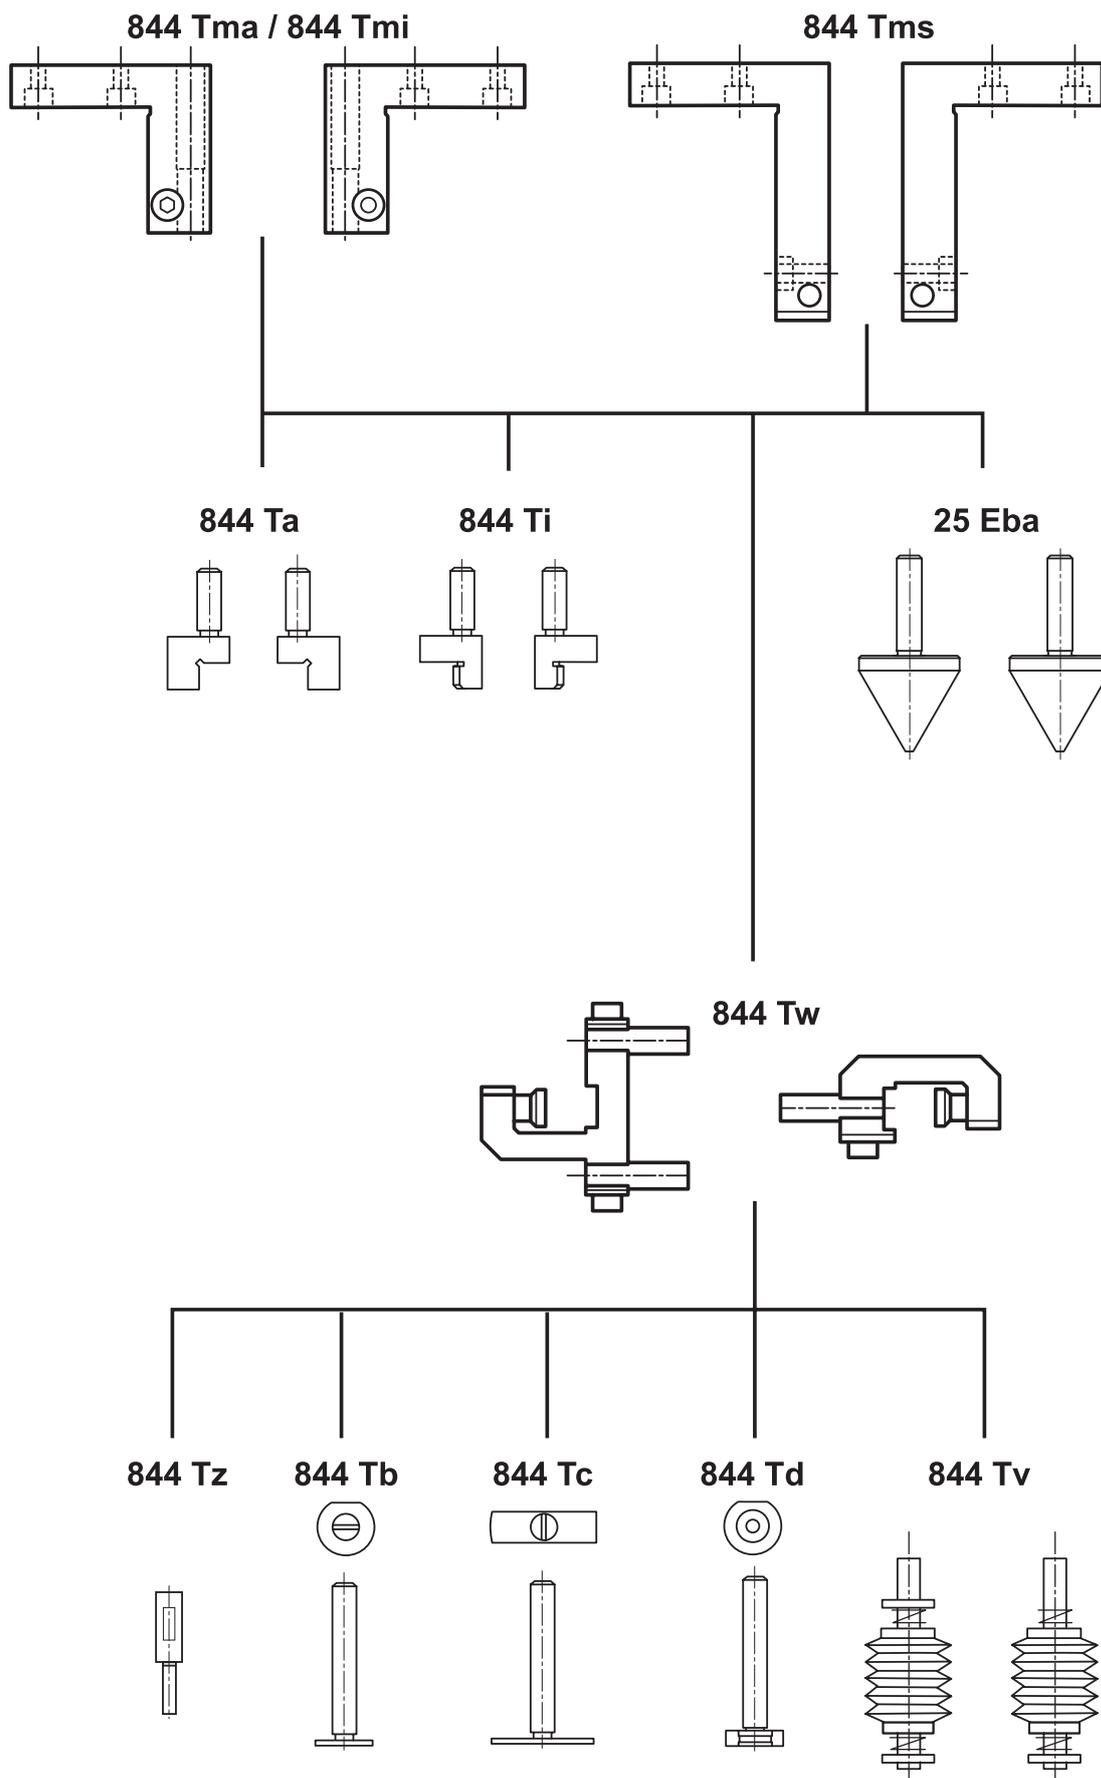

The movable measuring arm holder is mounted on a high precision ball guide to eliminate both play and friction; it also has extreme measuring sensitivity and accuracy due to optimal stability and ease of movement

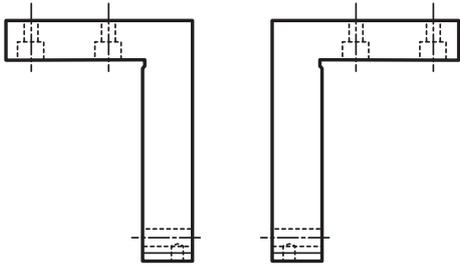

Stop with non-tilting 3-point support for adjusting the measuring depth

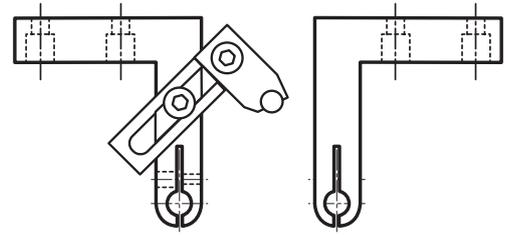

Universal Measuring Instrument Multimar 844 T

Application:

- External and internal dimensions
- External and internal threads
- Centering shoulders, narrow collars, recesses and grooves
- External and internal tapers, external and internal tooth profiles / gears, etc.

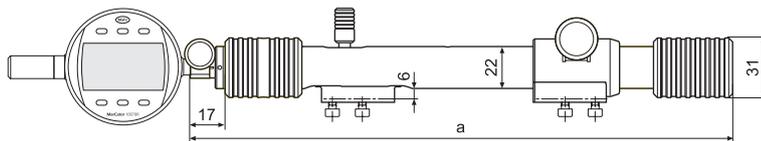

- Interchangeable measuring arms, contact blocks and stop elements (optional accessories) for easy adaptation to individual measuring tasks
- The movable measuring arm carrier is mounted on a high precision ball bearing guide for reduced play and friction
- Results in high measuring sensitivity, accuracy and free movement
- Stable support elements for repeatable measurements
- Constant measuring force with integrated measuring force spring
- Reversible measuring force direction for outside and inside measurement
- Highly stable, precision ground, hard chrome plated guide tube
- Lightweight construction with core made from carbon fiber reinforced plastic (CRP) tube, for measuring range 1000–1500 mm
- The stationary measuring arm holder can be moved along the guide tube and clamped for coarse adjustment
- **Scope of delivery:** Instruction manual, Mounting and resting blocks, Wooden case, excludes indicator, without arms/attachments and anvils

Depth stops for 844 Tma, 844 Tmi, 844 Te Multimar 844 Tw

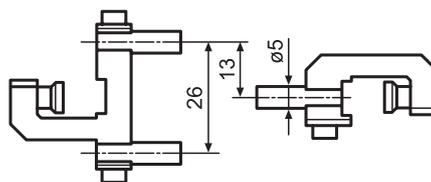

- Stops with stall protected 3-point support
- Hardened stop pins
- Interchangeable and adjustable

Application:

- For adjustment of the measuring depth in horizontal measuring position
- Precise stops in one plane for repeatable measurements
- To be mounted on 844 Tma, 844 Tmi, 844 Te
- For easy setting of the measuring depth, a mm scale is engraved on the measuring arms 844 Tma, 844 Tmi and 844 Te
- For precise setting of the measuring depth (i.e. for taper measurements) gage blocks can be used

Shoulder Anvils Multimar 844 Ta

- With cylindrical mounting shaft to attach into the mounting attachments 844 Tma / 844 Tmi
- Flat; for external diameters
- Made of hardened steel

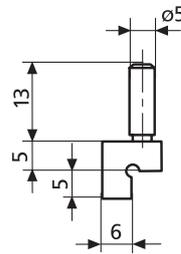

Application:

- For measuring narrow collars such as centering shoulders and other similar measuring tasks

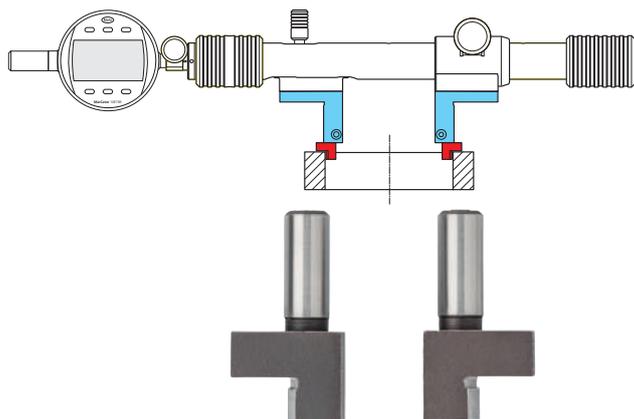

Technical Data

| Order no. | Mounting shaft diameter | Quantity unit | Product type |

Multimar 844 Tv. Interchangeable measuring rollers

- With cylindrical holding shaft for fixing in 844 Tma / 844 Tmi mounting attachments
- Made of hardened steel
- Each with two springs to aid insertion in correct thread turn
- Contact rollers for other thread pitches (metric 60°) as well as for Whitworth and UST thread on request

Application:

Determining the pitch diameter of outer and inner threads

Technical Data

Ball Anvils Multimar

- Measuring ball made of carbide. With cylindrical mounting shank and retainer ring which allows free rotation inside the bore of Measuring Arms 844 Te.

- manufacturing tolerance ball $\pm 2 \mu\text{m}$

Multimar 844 S. Setting device

- Simple handling via clamping element
- Accurate setting of nominal value using gage block combinations
- Instrument setting in horizontal or vertical position (using base 844 Sf)
- Rigid base made of anodized aluminum, for mobile or stationary use in the production or in the inspection room
- **Scope of delivery:** Basic unit 844 S, Instruction manual

Application:

For setting indicating instruments for internal and external dimensions i. e. Multimar 844 T and Marameter 844 N at any dimension by using gage block combinations.

Indicator Gage Multimar EDI-36B / EMD-36B

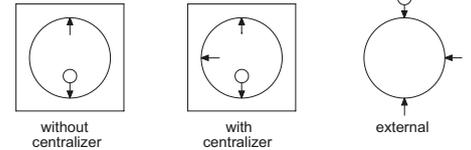

- Excellent accuracy due to the parallel springs in the probe being frictionless and free of play.
- User friendly: the surface can be inclined between 0° and 90° with respect to the base.
- Adjustable measuring force
- **Data interface:** Digimatic, RS232C, USB
- **Energy supply:** Battery operation
- **Scope of delivery:** Set of jaws JW-9, Instruction manual

Application:

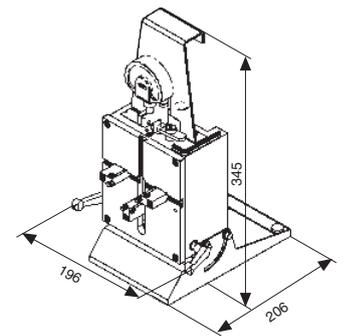

- For measuring internal and external diameters, centering edges, narrow shoulders and recesses.

**ARE YOU SEARCHING FOR THE RIGHT CONNECTIONS?
THEY ARE RIGHT HERE AT MARCONNECT.**

The screenshot shows a Microsoft Excel spreadsheet with a MarCom professional software window overlaid. The software window displays a table of USB devices and their measurements. The table has the following data:

| USB-Port | Beschreibung | Messwert | Anforderung Ziel |
|--------------|------------------------------------|----------|--|
| 4 USB-Geräte | Gerät, Anschlusskabel | Status | Messung Nr.: 0/1 |
| USB1 | Fußschalter Schalter MCI | --- | Schalter: Fußschalter |
| USB2 | Durchmesser 1 1087 16E <u>u</u> | +015.17 | Excel: Default.xlt/Tabelle1/1 |
| USB3 | Durchmesser 2 1087 16E <u>u</u> | +025.35 | Schalter: Fußschalter Excel: Default.xlt/Tabelle1/2 |
| USB4 | Durchmesser 3 1087 16E <u>u</u> | +014.99 | Schalter: Fußschalter Excel: Default.xlt/Tabelle1/3 |

Our new digital hand-held measuring instruments are equipped with MarConnect interface capability. Regardless of which interface standard you use, whether USB, Opto R S232 or Digimatic; MarConnect will always provide you with the optimal connection.

MarConnect MarCom Prof. 5.2. Software interface

- Directly transfer measured values into MS Excel®, SPC Software using virtual interface box (MUX50 format), a text file or key code
- The measured values for each connected measuring instrument can be copied into a separate column, table or folder in MS Excel®
- USB hubs can also be connected as a measuring instrument interface
- Clear depiction of the selected measuring devices by means of icons
- Freely definable and configurable measurement cycles
- Flexible, user-friendly data transmission via the „Data“ button on the measuring device or data cable or via a PC keyboard, timer, remote control or foot switch connected to a USB interface
- **Scope of delivery:** Driver, Instruction manual
- **Software:** MarCom Professional free download:
www.mahr.com/marcom(only for Mahr data cables and wireless systems with USB and RS232

MarConnect i-Stick. Receiver

- **Measurement without the nuisance of additional modules:** Unlike conventional wireless solutions, which have a large external transmitter with separate battery, the transmitter in Integrated Wireless is fully integrated.
- **Highly mobile:** Integrated Wireless gives you much more mobility. There is no cable to get in the way, either at the measuring station or when measuring on or at the machine or at large workpieces
- **Easy data transfer:** With Integrated Wireless you can transfer your measured values to the PC simply using the iStick. As with a data cable, the measured values are accepted via the MarCom software directly into MS Excel® or via a keyboard code into any Windows application
- **Reliable transfer:** With Integrated Wireless you can be sure that your data will arrive safely. Measuring instruments with Integrated Wireless display messages to confirm whether the transmitted data has been correctly transferred or whether you are within receiving range of the iStick receiver
- **Long battery life:** The integrated wireless interface makes the measuring instrument exceptionally energy-efficient. And unlike conventional wireless systems, no additional battery is required
- **Affordable:** With Integrated Wireless you can connect up to 8 measuring instruments per iStick receiver. Expensive interface boxes are no longer necessary. With even one connected measuring instrument you get a wireless connection for the price of a cable
- **Scope of delivery:** i-stick wireless receiver, Driver
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232)

MarConnect FM 2. Funkempfänger

- Secure data transmission due to the acknowledgement dialog of the received data from the PC to the measuring instrument
- Optical confirmation of received data on the transmitter
- TWIN receiver for USB and RS232C interfaces
- Compact transmitter without an external antenna
- Theoretically unlimited amount of measuring instruments can be connected to a receiver
- Distance of radio wave up to 100 m (depending on the working environment)
- Radio frequency is 433 MHz (further frequencies are available upon request)
- Up to 69 channels are available per receiver, several receivers can be used at any one time
- Bi-directional radio link (remote control from measuring instruments)
- Triggering data via a hand switch is possible
- **Scope of delivery:** FM2 wireless receiver, Driver, USB cable
- **Software:** MarCom Professional free download:
www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232C)

THE COMPLETE SUPPORT FOR YOUR INSPECTION. MARTOOL

MarTool measuring and inspection devices are indispensable aids for production metrology. Their easy handling makes them one of the most versatile tools for everyday testing. Whether measuring an angle on a workpiece or looking for a suitable surface plate for a precision height gage, with the outstanding quality of MarTool you cannot go wrong.

MarTool 107 MH / 107 V

Magnetic V-block

528

Digital Universal Bevel Protractor MarTool 106 ES

Technical Data

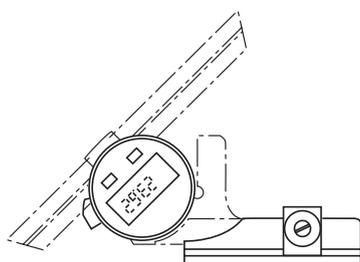

| | | |
|----------------------|-----------------------------|------------------------------------|
| Order no. | 4214600 | |
| Product type | 106 ES | |
| Rail length | mm | 300 |
| Measuring range in ° | ° | 1x360° / 2x180° / 4x90° switchable |
| Resolution | 1 minute / 0.01° switchable | |
| Error limit | 2' | |
| Standard | Factory standard | |

Functions:

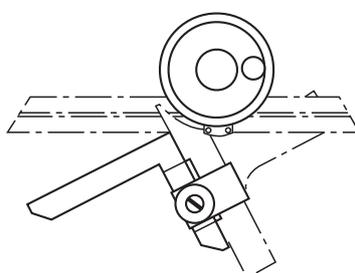

- ON/OFF
 - RESET (set display to zero)
 - Reversal of counting direction
 - Switch resolution
 - Selectable measuring ranges
-
- High contrast analog display
 - Automatic clamping of beam, moved at the touch of a button
 - Precision adjuster for easy adjustment to the desired angle
 - Clamping device with a push button, to prevent accidental adjustment of the set angle
 - Base plate and beam made of stainless steel, with case-hardened measuring edges
- **Digit height:** 8.5 mm
 - **Data interface:** Opto RS232C
 - **IP protection category:** IP 51
 - **Scope of delivery:** Beam, Battery, Instruction manual, Case

Accessories

| 4214062 | Acute Angle Attachment | 106 Ufw |
| 4102510 | Data Connection Cable RS232C (2 m) | 16 ESv |
| 4102520 | Battery 3 V, CR 2032 | |
| 4102330 | Adapter Cable RS232-USB (1 m) | Opto usb |

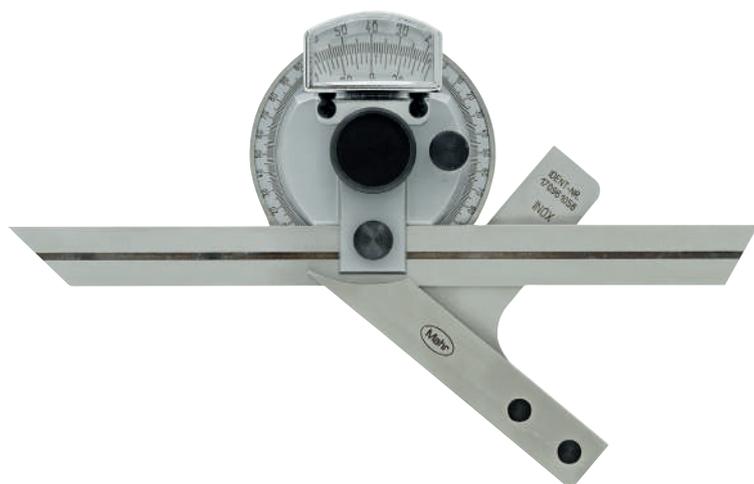

106 ESv

106 Ufw

Universal Bevel Protractor MarTool 106 UF

- Vernier scale and main scale designed for parallax-free reading
- Anti-glare readout with satin chrome finish
- Knurled thumb screw for clamping the interchangeable rail
- Precision adjuster for easy adjustment to the desired angle
- Clamping device to prevent accidental adjustment of the set angle
- Base plate and beam made of stainless steel, with case-hardened measuring edges
- **Scope of delivery:** Magnifying reading lens, Beam, Case

Surface Plate made from granite MarTool 107 G

- Made of choice fine grain black granite (Diabas)
- High density structure thus extremely homogeneous
- Hardness 6–7 on the Mohs' hardness scale
- Surface plate is lapped and has a satin matt finish to prevent glare
- 100 % corrosion proof
- Non-magnetic and non-conductive
- Measuring instruments and test equipment are easy to slide over surface

Application:

- For measuring tasks, layout work, touching up and lapping precision parts
- Recommended assembly (with optional accessories):
 - Up to 400 mm to be used on a workbench with adjustable plate supports 107 Asa
 - From 630 mm to be used with a Stand 107 Us or Cabinet 107 Ug

Magnetic V-block MarTool 107 MH

Application:

- To be used in an inspection room and workshop for both measuring and scribing
- To clamp workpieces during drilling, grinding and light milling work

- Integrated magnetic system
- When activating the switch, the upper, lower and opposite face are all simultaneously magnetized
- Protected against ingress of moisture
- 90° prismatic indentations on top and bottom
- Flat support surfaces top and bottom and on the end face opposite the switch
- Support and measuring surfaces hardened and ground
- Available individually or as a matched pair

**MADE TO MEASURE.
MARGAGE**

Back in 1871, when the metric system was introduced into the then German Empire, Mahr was already supplying dimensional standards to the weights and measures offices of several German states. Today, measurement standards such as parallel gage blocks still form the basis of dimensional metrology. Their applications range from setting gages for indicating measuring instruments to reference standards in calibration laboratories. Thanks to our accreditation from the PTB (the National Metrology Institute of Germany) and the careful selection of the materials we use, we can guarantee the highest possible quality.

Rectangular Gage Block Set made of Steel MarGage 402

- Vertical arrangement to save space

Calibration class K

As primary factory standard, particularly for the calibration of subsidiary test laboratories, e.g. for gage blocks of lower Tolerance class. Supplied on request with DKD calibration certificate, indicating the deviation from the nominal size for each gage block.

Tolerance class 0

For maximum accuracy requirements. To be used as basic standards in test laboratories and precision inspection rooms, where other gage blocks and high accuracy measuring instruments are calibrated.

Tolerance class 1

For high standards of accuracy. As reference gage block for the inspection room. Designed to perform particularly accurate measurements. For setting indicating measuring instruments and for checking precision gages.

Tolerance class 2

For checking production gages of quality IT 6 and IT 7. For setting indicating measuring instruments and for checking accurate dimensions in the jig and tool industry.

- **Scope of delivery:** wooden case with clear labeling strips, Mahr calibration certificate

- **Coefficient of linear expansion:** $11,5 \times 10^{-6} \text{ K}^{-1}$

Rectangular Gage Block Set made of Steel MarGage 406

- Vertical arrangement to save space

Calibration class K

As primary factory standard, particularly for the calibration of subsidiary test laboratories, e.g. for gage blocks of lower Tolerance class. Supplied on request with DKD calibration certificate, indicating the deviation from the nominal size for each gage block.

Tolerance class 0

For maximum accuracy requirements. To be used as basic standards in test laboratories and precision inspection rooms, where other gage blocks and high accuracy measuring instruments are calibrated.

Tolerance class 1

For high standards of accuracy. As reference gage block for the inspection room. Designed to perform particularly accurate measurements. For setting indicating measuring instruments and for checking precision gages.

Tolerance class 2

For checking production gages of quality IT 6 and IT 7. For setting indicating measuring instruments and for checking accurate dimensions in the jig and tool industry.

- **Scope of delivery:** wooden case with clear labeling strips, Mahr calibration certificate

- **Coefficient of linear expansion:** $11,5 \times 10^{-6} \text{ K}^{-1}$

Rectangular Gage Block Set made of Ceramic MarGage 402 C

Resistant to both impact and breakage. Virtually no warping of material if surfaces become scratched or edges damaged. Longer retention of wringing ability

- Extremely durable, thus providing a long service life as well being highly robust compared to all other materials currently be used in metrology. Therefore the interval between inspections are distinctly greater
- The corrosion-resistant Circonimar is extremely resistant to alkalis, acids, oil, grinding fluid and other aggressive media even without protective measures
- Similar coefficient of expansion to steel, allowing unrestricted use even at unfavorable temperatures
- Non-magnetic Circonimar is anti-static, anti-magnetic and non-conductive; it does not attract dust or dirt

Calibration class K

As primary factory standard, particularly for the calibration of subsidiary test laboratories, e.g. for gage blocks of lower Tolerance class. Supplied on request with DKD calibration certificate, indicating the deviation from the nominal size for each gage block.

Tolerance class 0

Accessories

| Order no. | Product name | Product type |
|-----------|-------------------------------------|--------------|
| 4800140 | Optical flat, Ø = 45 mm | 421 |
| 4800170 | Contact thermometer, Readings 0.2°C | 422 |
| 4800142 | Wooden tongs | 423 |
| 4800130 | Maintenance accessories | 424 |

Rectangular Gage Block Set made of Ceramic MarGage 406 C

Resistant to both impact and breakage. Virtually no warping of material if surfaces become scratched or edges damaged. Longer retention of wringing ability

- Extremely durable, thus providing a long service life as well being highly robust compared to all other materials currently be used in metrology. Therefore the interval between inspections are distinctly greater
- The corrosion-resistant Circonimar is extremely resistant to alkalis, acids, oil, grinding fluid and other aggressive media even without protective measures
- Similar coefficient of expansion to steel, allowing unrestricted use even at unfavorable temperatures
- Non-magnetic Circonimar is anti-static, anti-magnetic and non-conductive; it does not attract dust or dirt

Calibration class K

As primary factory standard, particularly for the calibration of subsidiary test laboratories, e.g. for gage blocks of lower Tolerance class. Supplied on request with DKD calibration certificate, indicating the deviation from the nominal size for each gage block.

Tolerance class 0

For maximum accuracy requirements. To be used as basic standards in test laboratories and precision inspection rooms, where other gage blocks and high accuracy measuring instruments are calibrated.

Tolerance class 1

For high standards of accuracy. As reference gage block for the inspection room. Designed to perform particularly accurate measurements. For setting indicating measuring instruments and for checking precision gages.

Tolerance class 2

For checking production gages of quality IT 6 and IT 7. For setting indicating measuring instruments and for checking accurate dimensions in the jig and tool industry.

- **Scope of delivery:** wooden case with clear labeling strips, Mahr calibration certificate
- **Coefficient of linear expansion:** $9,5 \times 10^{-6} \text{ K}^{-1}$

Rectangular Gage Block Set made of Steel MarGage

- Long used as the practical standards of dimensional measurement in precision manufacturing. With accuracies, materials and manufacturing methods greatly refined, gage blocks are now of highest quality and precision
- Used as comparison reference and utilization standards in the field of length measurement
- For checking gages and measuring instruments
- Used individually or in combinations by wringing several blocks together
- Mahr gage blocks are available from stock individually and as full sets in inches (rectangular only)
- Sets are manufactured to Grade 0 only, which meet or exceed ASME B89.1.9–2002 specifications
- Offered in steel to suit a wide range of service conditions. Steel blocks are extremely stable, hardened to Rc 62 minimum, and processed through a thorough seasoning cycle to relieve internal stresses before finish lapping
- All block sets are serialized and supplied in a fitted storage case (certification priced separately)
- **Scope of delivery:** Wooden case with clear labeling strips

From nominal size 125 mm on, also supplied with wooden case

- Special sizes are available upon request

Tolerance class 0

For maximum accuracy requirements. To be used as basic standards in test laboratories and precision inspection rooms, where other gage blocks and high accuracy measuring instruments are calibrated.

- **Scope of delivery:** Wooden case (gage blocks >125 mm)

- **Coefficient of linear expansion:** $11,5 \times 10^{-6} \text{ K}^{-1}$

Rectangular Gage Blocks made of Steel MarGage 417/1

From nominal size 125 mm on, also supplied with wooden case

- Special sizes are available upon request

Tolerance class 1

For high standards of accuracy. As reference gage block for the inspection room. Designed to perform particularly accurate measurements. For setting indicating measuring instruments and for checking precision gages.

- **Scope of delivery:** Wooden case (gage blocks >125 mm)

- **Coefficient of linear expansion:** $11,5 \times 10^{-6} \text{ K}^{-1}$

| 1000 | 4801553 |

From nominal size 125 mm on, also supplied with wooden case

- Special sizes are available upon request

Tolerance class 2

For checking production gages of quality IT 6 and IT 7. For setting indicating measuring instruments and for checking accurate dimensions in the jig and tool industry.

- **Scope of delivery:** Wooden case (gage blocks >125 mm)

- **Coefficient of linear expansion:** $11,5 \times 10^{-6} \text{ K}^{-1}$

Rectangular Gage Blocks made of Ceramic MarGage 417 C/K

- Ideal for all applications
- The outstanding features of all ceramic gage blocks from Mahr provide unrivalled flexibility in practical use
- Circonimar is equally well suited to inspection-room conditions and the rigors of workshop applications
- No material is easier to handle than Circonimar; it has excellent wringing properties, no corrosion, no need for lubrication, low weight and scratch resistant

Calibration class K

As primary factory standard, particularly for the calibration of subsidiary test laboratories, e.g. for gage blocks of lower Tolerance class. Supplied on request with DKD calibration certificate, indicating the deviation from the nominal size for each gage block.

- **Scope of delivery:** Wooden case (gage blocks >125 mm)
- **Coefficient of linear expansion:** $9,5 \times 10^{-6} \text{ K}^{-1}$

- Ideal for all applications
- The outstanding features of all ceramic gage blocks from Mahr provide unrivalled flexibility in practical use
- Circonimar is equally well suited to inspection-room conditions and the rigors of workshop applications
- No material is easier to handle than Circonimar; it has excellent wringing properties, no corrosion, no need for lubrication, low weight and scratch resistant

Tolerance class 0

For maximum accuracy requirements. To be used as basic standards in test laboratories and precision inspection rooms, where other gage blocks and high accuracy measuring instruments are calibrated.

- **Scope of delivery:** Wooden case (gage blocks >125 mm)
- **Coefficient of linear expansion:** $9,5 \times 10^{-6} \text{ K}^{-1}$

Rectangular Gage Blocks made of Ceramic MarGage 417 C/1

- Ideal for all applications
- The outstanding features of all ceramic gage blocks from Mahr provide unrivalled flexibility in practical use
- Circonimar is equally well suited to inspection-room conditions and the rigors of workshop applications
- No material is easier to handle than Circonimar; it has excellent wringing properties, no corrosion, no need for lubrication, low weight and scratch resistant

Tolerance class 1

For high standards of accuracy. As reference gage block for the inspection room. Designed to perform particularly accurate measurements. For setting indicating measuring instruments and for checking precision gages.

• **Scope of delivery:** Wooden case (gage blocks >125 mm)

• **Coefficient of linear expansion:** $9,5 \times 10^{-6} \text{ K}^{-1}$

- Ideal for all applications
- The outstanding features of all ceramic gage blocks from Mahr provide unrivalled flexibility in practical use
- Circonimar is equally well suited to inspection-room conditions and the rigors of workshop applications
- No material is easier to handle than Circonimar; it has excellent wringing properties, no corrosion, no need for lubrication, low weight and scratch resistant

• Tolerance class 2

For checking production gages of quality IT 6 and IT 7. For setting indicating measuring instruments and for checking accurate dimensions in the jig and tool industry.

• **Scope of delivery:** Wooden case (gage blocks >125 mm)

• **Coefficient of linear expansion:** $9,5 \times 10^{-6} \text{ K}^{-1}$

Gage block holder and measuring jaws accessory set MarGage 420

To be used in conjunction with Gage Blocks for gaging both workpieces and fixtures

- To check, set and adjust setting gages and measuring instruments
- For scribing and marking
- **Scope of delivery:** wooden case

Technical Data

| Order no. | Product type |
|-----------|--------------|
| 4800100 | 420 |

Accessories

| Order no. | Product name | Set consists of | Product type |
|-----------|--|-----------------|--------------|
| 4800110 | Measuring jaws, Thickness 2 x 2 mm = 4mm | • | 420 m |
| 4800111 | Measuring jaws, Thickness 2 x 5 mm = 10 mm | • | 420 m |
| 4800112 | Scriber tip | • | 420 a |
| 4800113 | Centering point | • | 420 z |
| 4800120 | Holder, Measuring span 0 –70mm | • | 420 h |
| 4800121 | Holder, Measuring span 0 –120mm | • | 420 h |
| 4800122 | Holder, Measuring span 100 –220mm | • | 420 h |
| 4800123 | Holder, Measuring span 100 –420mm | | 420 h |
| 4800124 | Holder, Measuring span 400 –820mm | | 420 h |
| 4800114 | Stand | • | 420 f |

Optical flat MarGage 421

Used to test the surface flatness on precision components or measuring instruments according to the interference principle

• **Scope of delivery:** Case

Technical Data

| Order no. | Product type | Diameter | Thickness | Flatness deviation |
|-----------|--------------|----------|-----------|--------------------|
| | | mm | mm | µm |
| 4800140 | 421 | 45 | 11 | 0.1 |
| 4800135 | 421 | 100 | 20 | 0.1 |
| 4800136 | 421 | 150 | 30 | 0.1 |
| 4800137 | 421 | 300 | 50 | 0.4 |

Optical parallel MarGage 421 P

For simultaneous testing of parallelism and flatness, e.g. of plane measuring surfaces of outside micrometers by the interference method

- **Scope of delivery:** Case

Technical Data

| Order no. | Product type | Diameter | Thickness | Flatness deviation | Parallelism deviation |
|-----------|--------------|----------|-----------|--------------------|-----------------------|
| 4800180 | 421 P | 30 mm | 12 mm | 0.15 μm | 0.4 μm |

Maintenance accessories MarGage 424

The main tools for testing and repairing parallel gage blocks

Set contains:

Optical flat 421

- For checking the flatness of the measuring surface by the interference method, Ø 45 mm

Wooden tongs 423

- For heat-insulation when holding parallel gage blocks

Granite lapping plate

- For removing ridges and damage from gage block surfaces. High-precision model

Special Vaseline tin

- For anti-corrosive protection of parallel steel gage blocks

Brush and suede cloth

- For cleaning the parallel gage blocks

- **Scope of delivery:** Case

Technical Data

| Order no. | Product type |
|-----------|--------------|
| 4800130 | 424 |

Pin Gage with a handle MarGage 426 G

- For use as setting standards for indicating measuring instruments
 - For checking the parallelism and straightness of rulers on measuring and control plates
 - For testing the distances between axes, tapers and other work-pieces in conjunction with parallel gage blocks
 - For determining the pitch diameter of threads or pitch circle diameter on gears.
 - etc.
- Wear-resistant gage steel, hardened, multi-aged, ground and lapped
 - Grade 0
 - DIN 2269
 - Manufacturing tolerance $\pm 0.5 \mu\text{m}$

Pin Gage sets without handle MarGage 426 S

- To be used as setting standards for indicating measuring instruments, testing the distances between axes, tapers and other work pieces in conjunction with gage blocks
- Can also be used for determining pitch diameter of threads or pitch circle diameter on gears and serrations
- Gage steel, hardened, multi-aged, ground (grade 2) and lapped (grade 0 and 1)

Individual Plug Gages with handle MarGage 426 D

- Unbreakable plastic handle inscribed with the diameter
- Gage is made of wear-resistant, hardened, multi-aged, ground and lapped steel
- For testing diameters of small bores
- To be used as setting standards for indicating measuring instruments and testing the distances between axes, grooves and slots on workpieces in conjunction with gage blocks

Plug Gage Sets MarGage 426 DS

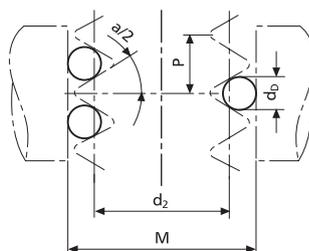

- Unbreakable plastic handle inscribed with the diameter
- Set with pin gages in diameter increments of 0.01 mm
- Wear-resistant gage steel. hardened. multi-aged, ground and lapped plastic handle inscribed with the diameter
- For testing diameters of small bores
- To be used as setting standards for indicating measuring instruments, testing the distances between axes, grooves and slots on work pieces in conjunction with gage blocks

Thread Pin Gage MarGage 426 A

Designed to be suspended over a test specimen

Set consists of 3 Pin Gages

- Manufacturing tolerance $\pm 0.5 \mu\text{m}$
- Pin gage length: 32 mm
- For determining pitch diameter of external threads according to the three wire method

Thread Pin Gages, holder pair MarGage

For determining pitch diameter of external threads according to the three wire method

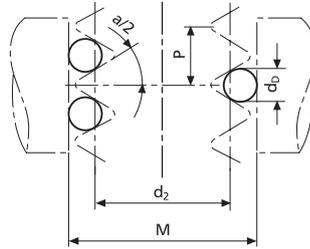

- In conjunction with micrometers, indicating measuring instruments or measuring machines
- Each pair consists of: 1 holder with 1 pin gage and 1 holder with 2 pin gages
- Holder has a satin chrome finish, the retainer ring can be locked yet the measuring spindle can still rotate
- Pin gages are hardened and lapped. Freely floating in holder to allow proper positioning and contact with thread flanks
- Manufacturing tol. $\pm 0.5 \mu\text{m}$
- (Mounting hole $6.35 \text{ mm} = 1/4"$, 6.5 mm and 8 mm on request)
- For threads with outside diameter up to 95 mm

Technical Data

Thread Pin Gages Set MarGage 426 MS

Set of thread Pin Gages in Holder consists of: 18 Holder Pairs 426 M

- Diameter 0.17 –3.2 mm
- For threads with outside diameter up to 95 mm
- **Scope of delivery:** wooden case

Technical Data

Setting Standards for indicating measuring instruments

AGD Masters

Master Rings

- Traceable certification and calibration available on request.
- Polished and lapped to size
- Non-gaging areas black oxidized — ring faces ground.
- Meet all requirements of ANSI Specification B47.1-1988
- Manufactured in accordance with ANSI Specification B89.1.6-1984.

Master Discs AGD Style 3

- Traceable certification and calibration available on request.
- Polished and lapped to size
- Non-gaging areas black oxidized — ring faces ground.
- Meet all requirements of ANSI Specification B47.1-1988

Master Plugs

- Traceable certification and calibration available on request.
- Stabilized and hardened.
- 100 % usable gaging surface.
- Ends ground square
- Lapped finish.

- Manufactured in accordance with ANSI Specification B89.1.5.
- Furnished with clear insulators.
- All dimensions are AGD style 3.

Calibration Services

International Standards require complete documentation and calibration of all gaging instruments. Mahr Federal Inc., as well as being a manufacturer of quality dimensional measuring instruments, is an established primary source or high accuracy dimensional measurement services.

Mahr Federal offers an inspection and recalibration program for dimensional standards including:

- gage blocks / master rings / master discs and plugs / masterballs (roundness)
- cylindrical form and precision reference specimens surface roughness standards.

For these services, we have created an ideal environment - a metrology laboratory in Providence, Rhode Island that is ranked as one of the world's finest.:

- High quality measurements - 0.06 micron / 2.3 microinch uncertainty of measurement on gage blocks (up to 50 mm / 2" long).
- All measurements traceable to the Standards of the United States.
- Grand Masters/Primary standards used in our Measurement Center have been certified by NIST.
- Calibration system is certified to ISO-9001:2008 by NQA, USA and accredited to ISO 17025 NVLAP Lab Code 200605-0.
- We offer Fast turnaround and competitive prices.

Mahr Federal also specializes in the calibration and certification of the following gages including:

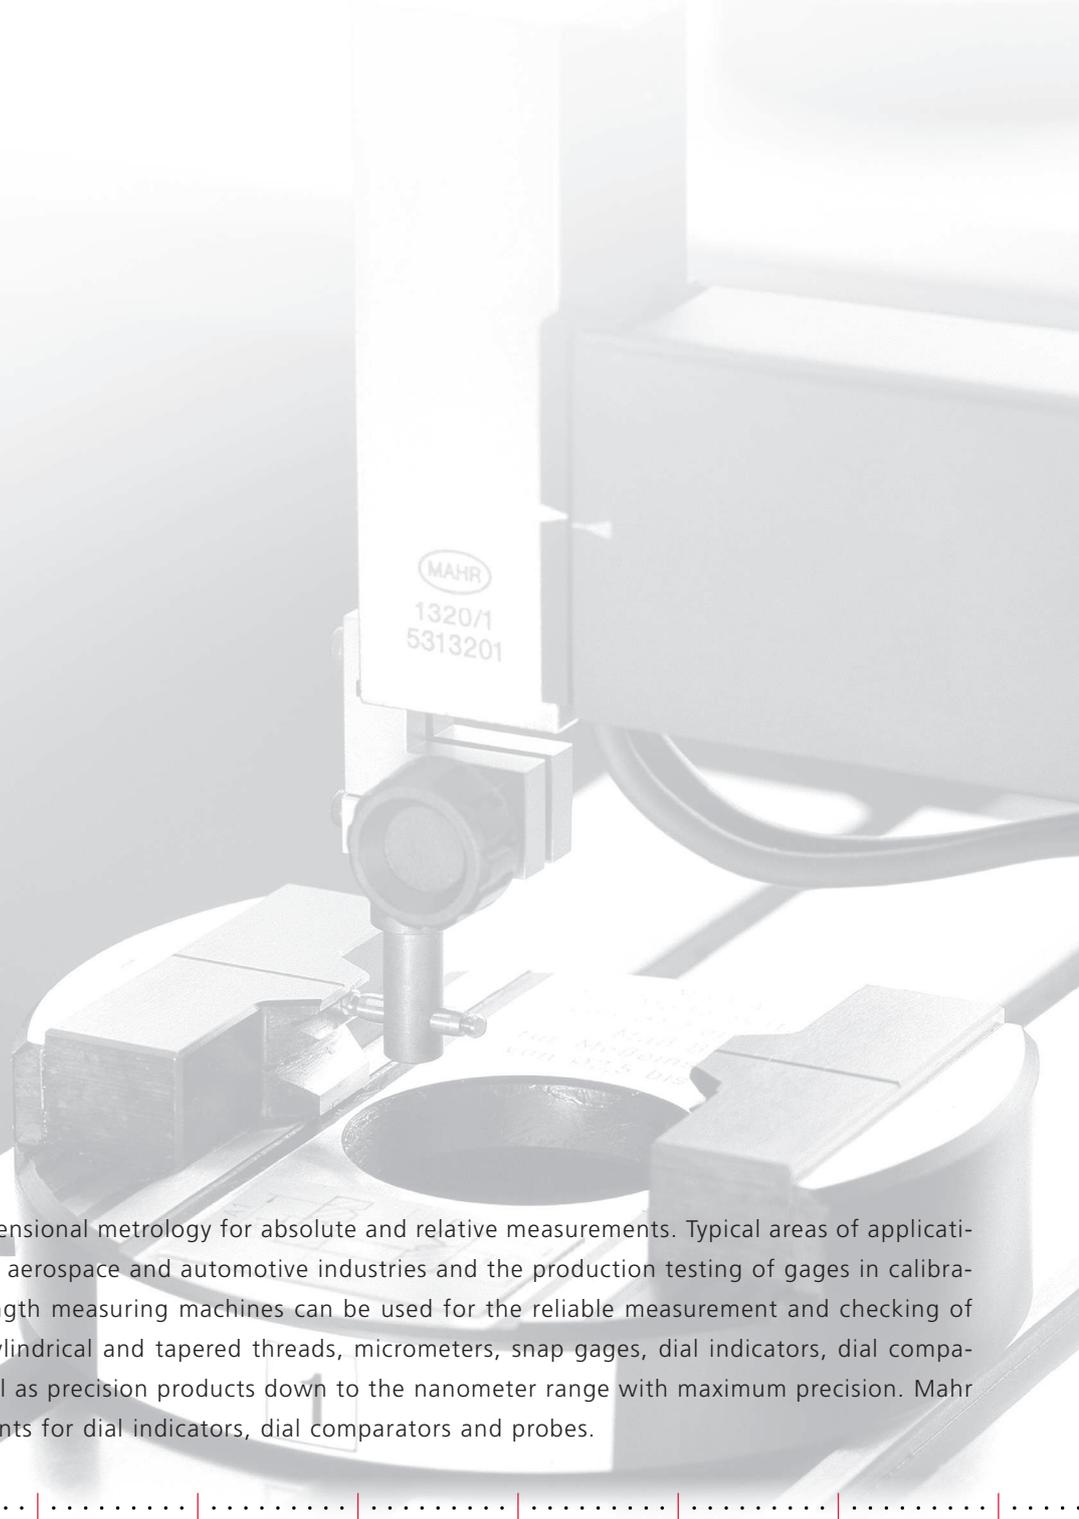

- Dial, Digital & Test Indicators
- Mikrokators®
- Micrometers
- Dial & Vernier Calipers
- Pin & Radius Gages
- Snaps, I.D. / O.D. & Bore Gages
- Dimentron® Plugs
- Plug & Ring Gages
- Groove, Caliper, Thickness
- Air Gages & Magnification Kits
- Electronic Amplifiers & Gage Heads
- Surface Finish Gages
- Level Systems

YESTERDAY, NANOMETRIC PRECISION WAS JUST A DREAM. TODAY IT'S CALLED PRECIMAR.

The latest information about Precimar precision length measuring systems is available on our website:
www.mahr.com, web code 20581, 20584, 20587

Precimar stands for high precision dimensional metrology for absolute and relative measurements. Typical areas of application include products and gages for the aerospace and automotive industries and the production testing of gages in calibration laboratories. Various universal length measuring machines can be used for the reliable measurement and checking of lengths, outer and inner diameters, cylindrical and tapered threads, micrometers, snap gages, dial indicators, dial comparators, probes and gage blocks, as well as precision products down to the nanometer range with maximum precision. Mahr also offers special measuring instruments for dial indicators, dial comparators and probes.

Precimar 826 PC. Gage Block Measuring Instrument

The 826 PC gage block measuring instrument is quick, reliable and highly accurate. An open and extremely rigid L-shaped stand forms the base for the two counteracting precision measuring probes and the absolutely level measuring table.

- Rigid cast stand for temperature stability and heat resistance
- Fast adjustment of vertical slide with top probe
- Highly ergonomic, user friendly one-handed operation to position the gage blocks under the measuring probe
- Precision adjustment via torsionally rigid parallelogram springs
- Electropneumatic lifting of measuring probes
- Precision ball bearing guides for smooth manipulator actuation
- No influence on measurement from hand force
- Round carbide precision support pins make it easy to move the gage blocks on the measuring table
- Set value linked to the stored actual deviation of the reference gage block, avoiding the need for zero point setting
- Flattening correction
- Correction of differing coefficients of expansion
- Mean value generation

Technical Data

| | 826 PC |
|---------------------------------|------------|
| Application range [mm] | 0.5 to 170 |
| Direct measuring range [mm] | 0,2 |
| Repeatability [μm] | $\pm 0,01$ |
| Mass [kg] | 37 |

Accessories

- QMSOFT® / QM-Block 32 calibration software for the calibration and data management of gage blocks and gage block sets
- The evaluation program runs under WIN 7 Ultimate
- Excellent thermal insulation with wraparound acrylic glass screen
- 826 Va HS lifting device for fast and quiet pneumatic lifting of inductive probes via foot switch
- Temperature compensation
- Wooden pincers, gage block suction lifter, optical flat, lay-on thermometer

Applications

- Quick and easy high precision testing of European and US gage blocks up to 170 mm in length, as per ISO 3650

For more information, please visit our website: www.mahr.com

Precimar 130B. Gage Block Measuring Instrument

The 130B-24 and 130B-16 gage block measuring instruments from Mahr are the first choice for many large calibration laboratories. They are designed for comparative measurements of gage blocks.

- A unique floating measuring frame ensures exact point-to-point measurement
- Single sensor design for minimal electronic noise
- Precision balanced system for optimum adjustment of measuring forces
- Integrated measuring software and user interface
- Built-in positioning device for reproducible measuring positions

Technical Data

| 130B-24 / 130B-16 | |
|---------------------------------|--|
| Application range [mm] | 0.25 to 100 (130B-24) / 2.5 to 600 (130B-16) |
| Direct measuring range [mm] | $\pm 0,01$ |
| Repeatability [μm] | $6 \sigma < 0,025$ |
| Mass [kg] | 100 (130B-24) / 140 (130B-16) |

Accessories

For further information please see our separate brochure.

Applications

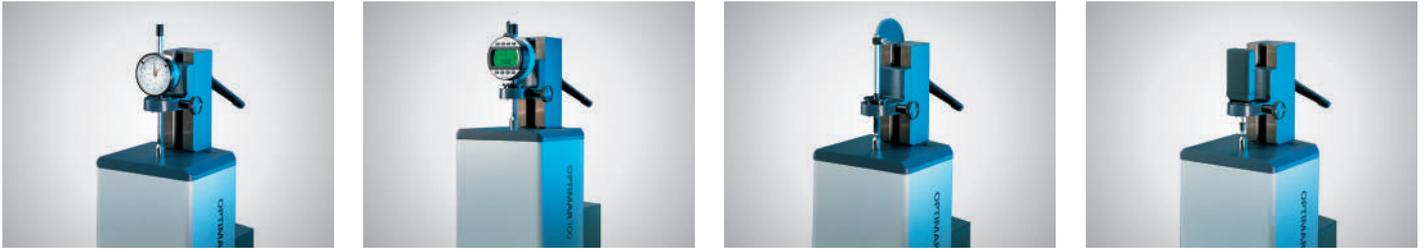

- Quick and easy high precision testing of European and US gage blocks

For more information, please visit our website: www.mahr.com

Precimar. Dial Indicator Testing

Partially And Fully Automated Testing Of Indicating Measuring Equipment

Dial indicator test devices from Mahr stand for accurate and efficient measurement. These devices are designed for absolute measurement of dial indicators, dial comparators, dial test indicator measuring devices and 2 point bore gages, as well as inductive and incremental measuring probes. Typical areas of use include dial indicator testing in all sectors of industry, measuring rooms and calibration laboratories, as well as production testing by dial indicator manufacturers. The Optimar 100 from Mahr is a practical solution for both the cost effective, semi-automatic testing of analog dial indicators and the efficient, fully automatic testing of digital measuring equipment.

Precimar OPTIMAR 100. Dial Indicator Test Device

The OPTIMAR 100 is the most cost effective test station for the partially or fully automated testing of dial indicators, dial comparators, dial test indicator measuring devices and 2 point bore gages as well as inductive and incremental measuring probes.

- Automated sub-processes with motorized measuring spindle drive
- Fully automatic measuring procedure with digital measuring equipment
- Suitable for horizontal use
- Testpiece help by a vertical guide
- Fast height adjustment to adapt measuring objects to different measuring ranges
- Rigid, box-shaped device housing
- For measuring objects with 8 mm, 28 mm, 3/8" shaft diameter
- Electronic handwheel for manual control of spindle movement. The sensitivity of the electronic handwheel adjusts automatically to the testpiece resolution
- All control elements are ergonomically arranged
- Complies with Ernst Abbe's comparator principle for maximum measuring accuracies
- LIF 101 measuring system with computer-aided deviation correction
- Checking of 2 point bore gages with no loss of accuracy
- Pre-positioning: automatic
- Fine positioning: electronic rotary knob

Technical Data

| OPTIMAR 100 | |
|---|----------------------------|
| Measuring range | 100 mm, 4 inch (101,66 mm) |
| Measuring uncertainty MPE_{E1} (L in mm) [μm] | $\leq (0,2 + L/250)$ |
| Digital numerical increment [μm] | 0,02 |
| Device dimensions | 235 x 216 x 480 |

Accessories

- Holder for dial test indicator measuring devices
- Wide choice of adapters for digital dial indicators and for inductive and incremental measuring probes
- Contact Mahr for the specific adapter
- Inductive probes from various manufacturers can be connected to via the probe box
- Holding device and software for testing 2 point bore gages with a moving measuring pin (test in accordance with VDI / VDE / DGQ 2618, Part 13.2, 2005)
- Device for force sensor upon request
- Calibration set for user calibration
- Factory calibration or DAkkS/DKD calibration can be additionally offered for this measuring station.

Applications

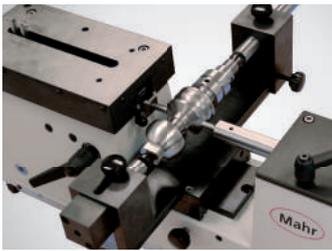

For testing of:

- Analog dial indicators
- Dial comparators
- Dial test indicator measuring devices
- Digital dial indicators
- Inductive and incremental probes
- 2 point bore gages

For more information, please visit our website: www.mahr.com

Precimar. Length Measurement For All Areas Of Use

Length measurement is used today in all sorts of different sectors. LINEAR length measuring instruments are setting and measuring instruments designed for general workshop use. The well established universal length measuring instruments (ULM) are standard instruments for quality assurance in calibration measurement. They are also used for highly accurate length measurements on precision parts. Motorized PLM and CiM instruments offer fast, reliable and user friendly measurement with the lowest possible uncertainty. With products ranging from the simple LINEAR length measuring instrument and the ULM devices through to the ultra accurate, partially automated CiM Universal measuring machine, Mahr has practical solutions for manufacturing, measuring rooms and calibration laboratories. Precimar offers maximum precision combined with extremely efficient measuring processes.

Precimar LINEAR 100. Length Measuring Instrument

The LINEAR 100 is a universal, easy to operate length measuring instrument for quick and precise outside and inside measurements up to 100 mm, directly on the production line. The simple design of the instrument speeds up the measurement process and makes it quick and easy to adapt to new measuring tasks.

- Cushioned measuring spindle with 2 preselectable measuring forces
- Constant measuring force over the entire measuring range
- Complies with Ernst Abbe's comparator principle for outer measurements
- Infinitely adjustable measuring table height for accurate adjustment of measuring positions
- Combined outer/inner measurement possible without the need for recalibration
- Easy change measuring anvils can be selected to match specific measuring tasks
- Sturdy cast body to eliminate stresses and bending errors
- Height adjustable support tables for inner and outer measurements
- MarCheck measurement display (with optional stand): including 2 channels, USB connection for printer or stick, USB connection for PC, and RS 232 interface for easy transfer of measured values to PCs
- Measured values can be transferred to all MSWindows® programs (e.g. Microsoft Excel®) via the MarCom software (optional)
- Various accessories available upon request

Technical Data

| LINEAR 100 | |
|--|-----------------------|
| Direct measuring range [mm] | 50 |
| Measuring range for outer measurement [mm] | 0 to 100 |
| Measuring range for inner measurement [mm] | 15 to 100 |
| Measuring uncertainty MPE_{E1} (L in mm) [μm] | $\leq (0,7 + L/1000)$ |

Accessories

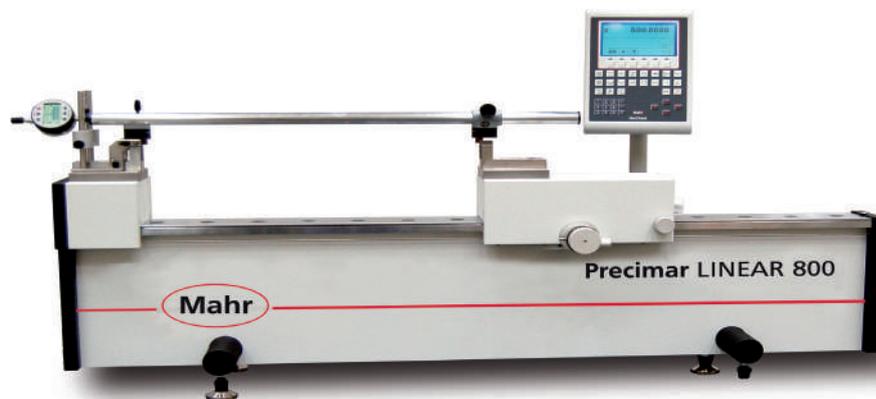

- Outer measurement set (assorted measuring anvils)
- Inner measurement set (probe pair starting from 6 mm, floating plate, etc.)
- Centering tip mount set
- Support plate for cylindrical workpieces
- Foot switch, data cable, stand for display unit
- Outside and inside probes with M2.5 bore for gear measuring balls
- MarCom software for transferring measured values to MSWindows® programs

Applications

- Quick and easy high precision outer and inner measurements
- Outer diameter measurements (bolts, turned parts, etc.)
- Inner diameter measurements (bores, rings, etc.)
- 2 ball dimension checks on outer and inner gears

For more information, please visit our website: www.mahr.com

Precimar Linear Serie. Setting Instrument

LINEAR length measuring instruments from Mahr are ideal for use as a setting and adjusting instrument close to the production area. They offer precision setting of inside and outside comparative measuring instruments, inside micrometers, 2 point bore gages, dial comparator snap gages and many other measuring instruments.

As an infinitely adjustable dimensional standard, the LINEAR is a cost-effective alternative to setting gages, adjustment rings and gage blocks.

Key advantages include the ease of handling, short set-up time and ability to set any dimension whatsoever. A switchable measuring force regulator, for both outside and inside measurements, delivers user-independent measuring results.

Technical Data

| | LINEAR 800 | LINEAR 1200 | LINEAR 2000 |
|--|-----------------------|-----------------------|-----------------------|
| Measuring range for outer measurement [mm] | 0 to 815 | 0 to 1215 | 0 to 2015 |
| Measuring range for inner measurement [mm] | 40 to 855 | 40 to 1255 | 40 to 2055 |
| Measuring uncertainty MPE_{E1} (L in mm) [μm] | $\leq (0,7 + L/1000)$ | $\leq (0,7 + L/1000)$ | $\leq (0,7 + L/1000)$ |
| Repeatability [μm] | ≤ 0.5 | ≤ 0.5 | ≤ 0.5 |
| Device length [mm] | 1250 | 1650 | 2450 |
| Mass [kg] | approx. 155 | approx. 210 | approx. 320 |

Accessories

- Testing setups for outside micrometers
- Clamping devices for 2 point bore gages for universal measuring table
- Support for large, 2 point bore gages and their accurate positioning and setup on the LINEAR
- Adjustable height support for setting up large bore gages
- Support plates for rings > 200 mm
- Holding device for long measuring equipment
- Attachment for dial comparator snap gages
- Height measuring system for universal measuring table
- Additional support table for long measuring objects
- Measuring anvils with $\varnothing 20$ mm balls; with ball-ended gage blocks; with $\varnothing 15$ mm and $\varnothing 7.5$ mm spindles
- Caliper, bore gages, plug-on heads, clamping elements
- Testing setups for depth gages
- Support for inside micrometers
- Temperature compensation

Applications

- Setting universal probes, e.g. Multimar 844 T
- Setting 2 point bore gages, e.g. Intramess 844 N
- Setting dial comparator snap gages, e.g. MaraMeter 840 F
- Checking and setting outer micrometers
- Checking adjustment dimensions, rods etc.
- Checking calipers
- Checking and setting inside micrometers
- Measuring cylindrical parts
- Measuring inner dimensions and bores, etc.

- The base bar is made from steel, providing the same thermal behavior as the setting and measuring objects

- Precision ground and lapped guide rail, non-rusting
- Glued on steel scale
- Easy to operate
- Precision adjustable to $1/10 \mu\text{m}$
- Measured values displayed with MarCheck

- Display unit with extensive measuring functions, USB connection for printer or stick and USB connection and RS 232 interface for transfer to PC

- Factory calibration or DAkkS/DKD calibration can be additionally offered for this measuring station.

For more information, please visit our website: www.mahr.com

Precimar ULM-E. Calibration Measuring Instruments

ULM-E universal length measuring comparator instruments are mounted on highly homogeneous rigid granite in a horizontal configuration.

X-axis measuring system:

Heidenhain incremental, precision length measuring system, 100 mm long

Z-axis measuring system:

RENISHAW incremental, precision length measuring system, 80 mm long

- High measuring accuracy
- 100% compliant with Ernst Abbe's comparator principle
- Manual operation of measuring spindle
- Air bearings for smooth manual positioning of measuring element and counter bearing (not ULM 300-E)
- Object table height adjustment via pushbuttons (also positioning of predefined increments)
- Computer provided temperature measurement with 2 or 3 sensors
- Computer-aided correction of systematic instrument errors (CAA)
- Computer-aided instrument zero point stabilizing
- Computer-aided correction of temperature and measuring force influences
- Constant measuring force over the entire measuring spindle setting range
- Large object table with precision guidance in the Z direction and a loading capacity of 25 kg
- Automatic reversing point detection with static and dynamic adoption of measuring values
- Inner thread measurement supported by automatic Z positioning
- Highly flexible in application range
- Mahr 828 WIN measuring and evaluation software runs under MS Windows
- Optional use of measuring axis extensions

Technical Data

| | ULM 300-E | ULM 600-E | ULM 1000-E | ULM 1500-E |
|--|-----------------------|-----------------------------------|-----------------------------------|-----------------------------------|
| Direct measuring range [mm] | 100 | 100 | 100 | 100 |
| Measuring range for outer measurement [mm] | 0 to 305 | 0 to 640 | 0 to 1060 | 0 to 1560 |

| Measuring uncertainty MPE_{E1} (L in mm) [µm] | ≤ (0,09+L/2000) | ≤ (0,09+L/2000) or ≤ (0,3+L/1500) | ≤ (0,09+L/2000) or ≤ (0,3+L/1500) | ≤ (0,09+L/2000) or ≤ (0,3+L/1500) |
| Repeatability [µm] | ≤ 0.05 | ≤ 0.05 or 0.1 | ≤ 0.05 or 0.1 | ≤ 0.05 or 0.1 |
| Measuring forces [N] | 0.2 ; 1.0 to 4.5 ; 11 | 0.2 ; 1.0 to 4.5 ; 11 | 0.2 ; 1.0 to 4.5 ; 11 | 0.2 ; 1.0 to 4.5 ; 11 |
| Device length [mm] | 685 | 1080 | 1500 | 2000 |
| Mass [kg] | 110 | 160 | 215 | 280 |

Accessories

Large number of accessory kits and modular components for completing a wide variety of measuring tasks, including the measurement of:

- Thread gages
- Taper gages
- Conical thread gages
- Gears
- Factory calibration or DAkkS/DKD calibration can be additionally offered for this measuring station.

Applications

Calibration of:

- Plain plug gages and gage rings
- Setting gage rings
- Snap gages
- Spherical gage blocks, internal micrometers
- Gage blocks
- Thread gages
- Taper thread gages
- Gear gages
- Taper gages
- Dial indicators
- Dial comparators
- 2 point bore gages
- Outside micrometers
- 2 point inside micrometers

For more information, please visit our website: www.mahr.com

Precimar ULM S-E. Calibration Measuring Instruments

Large universal length measuring instruments with large direct measuring range are mounted on highly homogeneous rigid granite in a horizontal configuration.

X-axis measuring system:

- Heidenhain incremental, precision length measuring system, 100 mm long in measuring element

- Heidenhain incremental incident light measuring systems covering the entire length of the base bed and to its right and left

Z-axis measuring system: RENISHAW incremental, precision length measuring system, 80 mm long

- Combined measuring instrument for ultra accurate measurements in the range to 100 mm and for measurements in the standard accuracy range

- Accurate throughout the entire movement range of the measuring element and counter bearing

- Recommended for measurements of larger measuring objects, but also suitable for measurements of smaller measuring objects

- Manual operation of measuring spindle

- Air bearings for smooth manual positioning of measuring element and counter bearing

- Object height adjustment via push-buttons (also positioning of predefined increment)

- Computer provided temperature measurement with 3 sensors

- Computer-aided instrument zero point stabilizing and correction of systematic instrument errors (CAA)

- Constant measuring force over the entire measuring spindle setting range

- Computer-aided correction of temperature and measuring force influences

- Large object table with precision guidance in the Z direction and a loading capacity of 25 kg

- Mahr 828 WIN measuring and evaluation software runs under MS Windows®

- Optional use of measuring axis extensions

- Inner thread measurement supported by automatic Z positioning

Technical Data

| | ULM 520 S-E | ULM 1000 S-E |
|---|--|--|
| Direct measuring range [mm] | Outer measurement: 0 to 520 Inner measurement: 0.5 to 365 | Outer measurement: 0 to 1025 Inner measurement: 0,5 to 870 |

- 2 point inside micrometers

For more information, please visit our website: www.mahr.com

Precimar ULM L-E. Calibration Measuring Instruments

Universal length measuring instruments with laser measuring system. Comparator with horizontal base bed (highly homogeneous, rigid granite)
 X-axis measuring system: interferential laser measuring system, 525 or 1115 mm long
 Z-axis measuring system: RENISHAW incremental, precision length measuring system, 80 mm long

- High-end length measuring instrument with large direct measuring range
- 100% compliant with Ernst Abbe's comparator principle
- Manual operation of measuring spindle
- Air bearings for smooth manual positioning of measuring element (with laser reflector) and counter element
- Object table height adjustment via pushbuttons (also positioning of predefined increment)
- Laser correction in respect of environmental influences: temperature, air pressure (optionally also humidity)
- Separate laser generator outside the measuring instrument, fed via optical cable, and laser beam cover
- Computer-aided instrument zero point stabilizing and correction of systematic instrument errors (CAA)
- Online temperature measurement and computer-aided correction of temperature and measuring force influences
- Constant measuring force over the entire measuring spindle setting range
- Large object table with precision guidance in the Z-direction and a loading capacity of 25 kg
- Automatic reversing point detection with static and dynamic adoption of measuring values
- Highly flexible within the application range (can be used for measuring both miniature and large measuring objects)
- Mahr 828 WIN measuring and evaluation software and MS Windows
- Inner thread measurement supported by automatic Z positioning

Technical Data

| | ULM 800 L-E | ULM 1500 L-E |
|---|-----------------------|-----------------------|
| Direct measuring range [mm] | 0 to 525 | 0 to 1115 |
| Measuring range for outer measurement [mm] | 0 to 830 | 0 to 1620 |
| Measuring range for inner measurement [mm] | 0.5 to 670 | 0.5 to 1465 |
| Measuring uncertainty MPE_{E1} (L in mm) [μm] | $\leq (0,1+L/2000)$ | $\leq (0,1+L/2000)$ |
| Repeatability [μm] | $\leq 0,05$ | $\leq 0,05$ |
| Measuring forces [N] | 0.2 ; 1.0 to 4.5 ; 11 | 0.2 ; 1.0 to 4.5 ; 11 |
| Device length [mm] | 1500 | 2300 |
| Mass [kg] | 220 | 325 |

Accessories

Large number of accessory kits and modular components for solving a wide variety of measuring tasks, including the measurement of:

- Thread gages
- Taper gages
- Conical thread gages
- Gears
- Factory calibration or DAkkS/DKD calibration can be additionally offered for this measuring station.

Applications

Calibration of

- Plain plug gages and gage rings
- Setting gage rings
- Snap gages
- Spherical gage blocks, internal micrometers
- Gage blocks
- Thread gages

- Taper thread gages
- Gear gages
- Taper gages
- Dial indicators
- Dial comparators
- 2 point bore gages
- Outside micrometers
- 2 point inside micrometers

For more information, please visit our website: www.mahr.com

Precimar PLM 600-E. Precision Length Measuring Machine

The PLM 600-E precision length measuring machine is an Abbe compliant comparator mounted on highly homogeneous rigid granite in a horizontal configuration

- Sensitive adjustment in 5 axes
- Object table with a loading capacity of 35 kg
- PC-based, multi-axis machine control, including PC workstation and 828 WIN Free measurement basic software
- Simple operating procedure by means of measuring force adjusted and joystick controlled measuring slides with progressive deflection characteristic and automatic contact detection
- Automatic detection of outside and inside measurements and computer-aided search for reversal points
- The motorized measuring slide allows for high travel speeds.
- The CNC controlled vertical and cross adjustment of the universal measuring table facilitates highly efficient measuring
- The latest machine control system (MarEcon) Recording, processing, logging and transfer of measurement data via powerful software and menu driven controls
- Software compensation of thermal dimensional deviations
- Very easy to set the measuring force using the software
- Aerostatic guides for all slides mounted on the machine bed ensure low measurement uncertainties
- Electronic generation of measuring force and automatic contacting
- Subjective influences largely eliminated and unintended collisions with the testpiece avoided.
- Automatic bore and inner thread measurement
- Automatic and manual Y adjustments are possible
- A factory calibration or DAkkS/DKD calibration is available for the Precimar PLM 600-E

Technical Data

| | |
|--|-------------------------|
| Direct measuring range [mm] | 200 |
| Measuring range for outer measurement [mm] | 0 to 600 |
| Measuring range for inner measurement [mm] | 0,5 to 445 |
| Measuring uncertainty MPE_{E_1} (L in mm) [μm] | $\leq (0,085 + L/1500)$ |
| Position deviation / error limit (L in mm) [μm] * | $\leq (0.07 + L/2000)$ |
| Repeatability [μm] | ≤ 0.05 |
| Measuring forces [N] | 0 to 13.9 |
| Device length [mm] | 1660 |
| Mass [kg] | 480 |

* Proof can be carried out at Göttingen if required

Accessories

Large number of accessory kits and modular components for completing a wide variety of measuring tasks, including the measurement of:

- Thread gages
- Conical thread gages
- Gears
- Thread pitches

Applications

Calibration of:

- Plain plug gages and gage rings
- Setting gage rings
- Snap gages
- Spherical gage blocks, internal micrometers
- Gage blocks
- Thread gages
- Taper thread gages
- Gear gages
- Dial indicators
- Dial comparators
- 2 point bore gages
- Outside micrometers
- 2 point inside micrometers
- Precision length measurement

For more information, please visit our website: www.mahr.com

Precimar 828 CiM 1000. Precision Length Measuring Machine

The 828 CiM precision length measuring machine is an Abbe compliant comparator mounted on highly homogeneous rigid granite in a horizontal configuration

- Electronically controlled measuring force generation
- Motorized measuring spindle control with joystick and automatic contacting
- Air bearings for smooth positioning of measuring slide and counter bearing
- Sensitive adjustment in 5 axes, and object table with a loading capacity of 25 kg
- Motorized object table height adjustment via joystick or CNC
- Maximum measuring accuracy
- Fast and reliable measurement
- Exceptionally low length measuring uncertainty for precision parts and gage monitoring
- Compliant with Ernst Abbe's comparator principle
- Online temperature monitoring
- Software-supported measuring force generation, especially advantageous for thin-walled workpieces and gages
- Semi-automatic bore and inner thread measurement
- Measuring and evaluation software runs under MS Windows, 828 WIN
- Patented measuring procedure
- Aerostatic guides for all slides mounted on the machine bed ensure extremely low measuring uncertainties
- Movable measuring spindle mount via a spring parallelogram free from play and friction
- Electronic measuring force adjustment and automatic contacting — largely eliminating subjective influences and avoiding unintended collisions with the testpiece

Technical Data

| 828 CiM 1000 | |
|--|-------------------------|
| Direct measuring range [mm] | 300 |
| Measuring range for outer measurement [mm] | 0 to 1000 |
| Measuring range for inner measurement [mm] | 0.5 to 845 |
| Measuring uncertainty MPE_{E1} (L in mm) [μm] | $\leq (0,055 + L/1500)$ |
| Position deviation / error limit (L in mm) [μm] * | $\leq (0,04 + L/2000)$ |
| Repeatability [μm] | $\leq 0,03$ |
| Measuring forces [N] | 0 to 13.9 |
| Device length [mm] | 2500 |
| Mass [kg] | 840 |

* Proof can be carried out at Göttingen if required

Accessories

Large number of accessory kits and modular components for completing a wide variety of measuring tasks, including the measurement of:

- Thread gages
- Conical thread gages
- Gears
- Thread pitches
- Factory calibration or DAkkS/DKD calibration can be additionally offered for this measuring station.

Applications

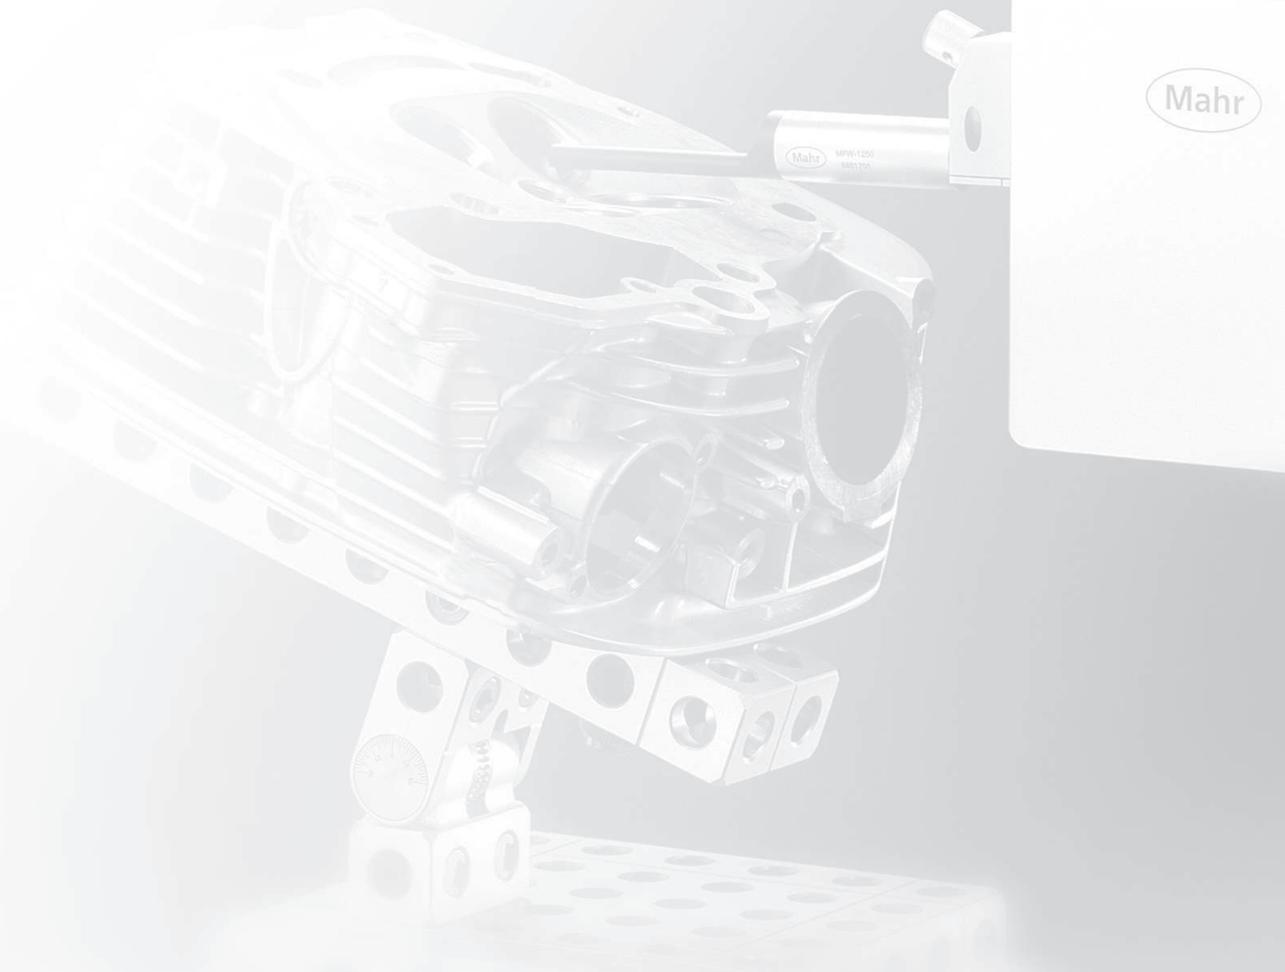

Calibration of:

- Plain plug gages and gage rings
- Setting gage rings
- Snap gages
- Spherical gage blocks, internal micrometers
- Gage blocks
- Thread gages

- Taper thread gages
- Gear gages
- Dial indicators
- Dial comparators
- 2 point bore gages
- Outside micrometers
- 2 point inside micrometers
- Precision length measurement

FROM THE THUMBNAIL TEST TO MARSURF.

Wherever surface structures influence the function, processing or appearance of components or products, careful testing is essential. But how can surfaces be tested? At the start of the 20th Century, experts still had to test by eye and touch. A practiced eye could detect features in the μm range, and even the much maligned thumbnail test delivered perfectly acceptable results. Currently however, we live in an age of exchangeable parts, fits and internationalization, where subjective tests like this are no longer adequate. Today, Computer aided measuring instruments provide objective data. Measurement and evaluation have become considerably easier. For decades, Mahr has been a worldwide pioneer in this area, as demonstrated by the company's numerous innovations and patented solutions in the field of roughness metrology. The interplay between the stylus, drive and measuring setup plays a key role in influencing the quality of surface measurement tasks. This is where Mahr's core expertise comes in, as demonstrated by the company's numerous innovations and patented solutions. Over time, we have succeeded in perfecting the stylus method which is now widespread throughout the world. But we can also meet the latest requirements for non-contact measurements, for example for extremely soft materials or the need for extremely short measurement times. Thanks to various optical sensors, MarSurf also meets these requirements. Top quality, the highest level of competence and perfect know how - all of this is provided by MarSurf surface metrology from Mahr.

MarSurf. Surface Metrology System for all your industrial requirements

THE RIGHT SOLUTION FOR EVERY TASK

Integrated calibration standard

No external calibration standard necessary (patent pending). More secure standardized measurements.

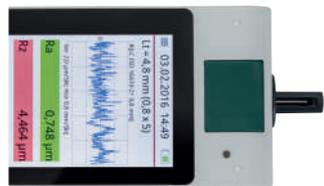

A standard probe is integrated into MARSurf M 300 to check the default button – you can be sure that your results are correctly.

MarSurf PS 10

Probe with removable pick-up protection

Standardize Measuring, 2 µm diamond stylus tip, Measuring force 0,7 mN. Probe with open blade for various measurement tasks are available.

Bluetooth-Technology

Cable-free connection between evaluation unit and drive unit!

A further advantage is the connection of several drive units to only one evaluation unit.

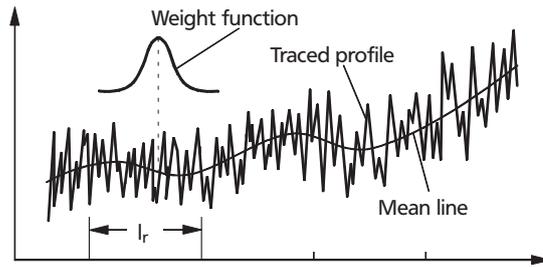

MarSurf M 300 C

Automatic choice of cut off ...

...and tracing length ensures the right evaluation (also for unskilled workers)

Profil filters separate into long wave and short wave components. The λ_c profile filter separates the roughness profile from long wave components (e. g. waviness). **R-profile** (roughness profile) represents the deviations of the primary profile from the mean line of the λ_c profile filter. When presenting the roughness profile, the mean line is the zero line.

Choice of Wavelength

EN ISO 4288, ASME B46.1

| Periodic profiles | Non periodic profiles | Cut off wave-length | Single/ Total measuring range |
|-------------------|-------------------------|-------------------------|-------------------------------------|
| R_{sm} (mm) | R_z (μm) | R_a (μm) | λ_c (mm) / l_r / l_n (mm) |
| > 0,013 to 0,04 | to 0,1 | to 0,02 | 0,08 / 0,4 |
| > 0,04 to 0,13 | > 0,1 to 0,5 | > 0,02 to 0,1 | 0,25 / 1,25 |
| > 0,13 to 0,4 | > 0,5 to 10 | > 0,1 to 2 | 0,8 / 4 |
| > 0,4 to 1,3 | > 10 to 50 | > 2 to 10 | 2,5 / 12,5 |
| > 1,3 to 4 | > 50 to 200 | > 10 to 80 | 8 / 40 |

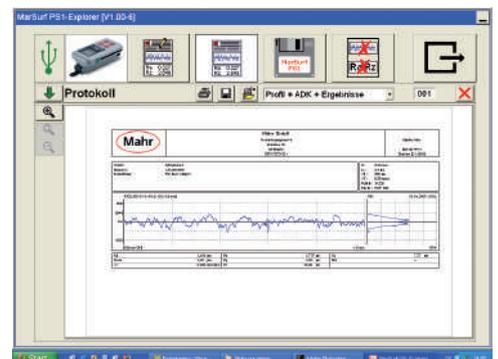

MarSurf M 300

Integrated Memory

Large memory to store the results and profiles

The Software „MarSurf M 300 Explorer“ can be used to secure and document your measuring results and profiles (simply use Drag & Drop)

Overhead Measuring

Mobile Roughness Measuring Instrument MarSurf Pocket Surf IV

Application:

A pocket-sized economically priced, completely portable instrument which performs traceable surface roughness measurements on a wide variety of surfaces; can be used confidently in production, on the shop floor and in the laboratory.

Technical Data

| Order no. | 2191800 | | 2191802 | |
|--|--------------------------|--|--|--|
| Product type | Pocket Surf IV | | | |
| Parameters | Ra, Ry, Rmax, Rz | | | |
| Stylus | 10 µm / .0004" | | 5 µm / .0002" | |
| Data interface: | RS232C, USB | | | |
| Rechargeable batteries | Battery, 9V | | | |
| H x W x D | mm | 140 x 76 x 6,35 mm | | |
| Weight | kg | 1.03 | | |
| Measuring principle | Skid probe system | | | |
| Probe | Piezoelectric skid probe | | | |
| Measuring range | mm | Ra –6.35 µm / 250 Ry, Rmax, Rz –25.3 µm / 999 µin | Ra –6,35 µm / 250 Ry, Rmax, Rz –25,3 µm / 999 µin | |
| Profile resolution | 0,01 µm / 1 µin | | | |
| Number n of sampling length according to ISO/JIS | Selected: 1 –5 | | | |
| Measuring force | N | 15 mN | | |

- Durable cast aluminum housing to provide years of accurate and reliable surface finish gaging
- Can be used to measure any one of four, selectable, parameters: Ra, Rmax/Ry, Rz
- Review any of the parameters after the measurement is complete
- Selectable traverse length 1, 3 or 5 cut-offs of 0.8 mm/0.030"
- Operates in any position – horizontal, vertical, and upside down
- Four switchable probe positions – axial (folded) or at 90°, 180° or 270°
- Even difficult-to-reach surfaces such as inside and outside diameters are accessible
- MarConnect data output for easy SPC processing that is compatible with the most common data processing systems
- Easy-to-read LCD readout presents the measured roughness value, in micro inches or micro-meters, within half a second after the surface is traversed
- Out-of-range (high or low) and "low battery" signals are displayed
- Improved digital calibration process eliminates scandrivers and potentiometers to simplify and enhance the calibration process
- Improved battery life with easy to replace standard 9V battery

Mobile Roughness Measuring Instrument MarSurf PS 10

Application:

- For shafts and housing components
- For large machines
- For large workpieces
- For milled and turned parts
- For ground and honed workpieces
- On the production line or directly on the machine; ideal for rapid testing of the surface roughness of a workpiece in or on the machine.

| Evaluation lenth ln according to ISO/JIS | 1.25 mm, 4.0 mm, 12.5 mm | |
| Measuring force | N | 0.75 mN |

„sMAHRtSurf“ - Simple, smart and mobile

- Compact roughness measuring instrument for mobile use
- Simple and intuitive to use: As easy to use as a smart phone
- Large, illuminated 4.3" TFT touch display
- Adjustable display
- Start button also serves as the Home button for direct access to the start screen
- Data backup as TXT, X3P or PDF file
- Creation of completed PDF measuring records in the measuring device
- Customer-specific comments for the PDF measuring record are entered directly into the MarSurf PS 10
- Power supply independent operation: Over 1200 measurements without having to recharge the instrument
- An all in one solution. Small and lightweight (approx. 500 g)
- Instrument flexibility: Removable drive unit
- All the measuring positions you need: horizontal, vertical, upside down
- 31 surface parameters offer the same range of functions as a laboratory instrument.
- Error free operation thanks to an integrated, removable roughness standard
- Quick access to your frequently used functions via the Favorites list in the display
- Very short activation time: results available within seconds
- Automatic cutoff selection, so even non-specialists can be sure of getting the correct measuring results
- NEW: Additional version with transverse drive unit MarSurf PS 10 C2 available (article number 6910235)
- **Scope of delivery:**
 - MarSurf PS 10 unit
 - Drive unit (detachable)
 - 1 standard probe conforming to standards
 - Built-in rechargeable battery
 - Roughness standard integrated into housing (detachable), including Mahr calibration certificate
 - Probe protection
 - Charger / 3 adapters
 - Operating instructions
 - Carry case with shoulder strap
 - USB cable
 - Extension cable for drive unit (length 1.2 m)
 - Height adjustment (integrated)
- **Software:** MarCom Professional free download: www.mahr.com/marcom (only for Mahr data cables and wireless systems with USB and RS232 interface)

Mobile Roughness Measuring Instrument MarSurf M 300

Application:

- For shafts and housing components
- For large scale machines
- For large workpieces
- For milling and turning parts
- For use on grinding and honing components
- On the production line, or directly upon a machine, ideal for rapid testing of the surface roughness of a workpiece in or on a machine.

- MarSurf 300, the first portable roughness measuring unit with the option of wireless (Bluetooth) connection between the evaluation unit and drive unit.
- Bluetooth wireless connection
- Easy to use, with high-resolution color display and ATM-style user guidance
- Integrated standard in drive unit
- Large measuring range, 350 μm
- Automatic profile detection and corresponding selection of filter and traversing length conforming to standards
- Integrated memory for the results of up to 40,000 measurements and 30 profiles
- 16 languages (including 3 Asian languages)
- Integrated thermal graphics printer with high print quality
- Print the R-profile via the thermal graphics printer
- Log printed either by pressing a button or automatically
- Data transfer of results and profiles via USB interface to your PC
- Evaluation of most common parameters as well as characteristic curves, parameter lists (e.g. material ratio curve)
- Integrated memory for results and profiles
- Tolerance monitoring
- Printing of R profile (ISO/ASME/JIS), P profile (MOTIF), material ratio curve, measuring record
- Setting of asymmetric intersection lines for peak count calculation
- Measuring units ($\mu\text{m}/\mu\text{in}$) and standards (ISO/JIS/ASME/MOTIF) are selectable
- Individual sampling lengths and short cutoff can be selected
- Lock for instrument settings
- Built-in rechargeable battery with power management
- AC adapter with interchangeable international plug adapters
- Date and time of measurement
- Suitable for use with stationary measuring station
- For use with PHT probe range
- MarSurf PS1/M300 Explorer software for recording measurements
- **Supplied with**
- Evaluation unit M 300 drive unit RD 18 with integrated roughness standard
- Standard pick-up PHT 6–350/2 μm (conforming to standards)
- Power source with 3 adapters
- Height adjustment accessory
- Pick-up protection
- Pick-up protection with prismatic underside end face V-block
- 2 usb cables
- 1 roll of thermal paper
- Shoulder strap
- Carrying case
- Mahr calibration certificate
- Operating instructions

Mobile Roughness Measuring Instrument MarSurf M 300 C

Application:

- For shafts and housing components
- For large scale machines
- For large workpieces
- For milling and turning parts
- For use on grinding and honing components
- On the production line or directly on the machine; ideal for rapid testing of the surface roughness of a workpiece in or on a machine.

Technical Data

| Order no. | 6910431 | |
|--|---|---|
| Product type | M 300 C | |
| Parameters | Ra, Rq, Rz (Ry (JIS) is equivalent to Rz), Rz (JIS), Rmax, Rp, RpA (ASME), Rpm (ASME), Rpk, Rk, Rvk, Mr1, Mr2, A1, A2, Vo, Rt, R3z, RPC, Rmr (tp (JIS, ASME) is equivalent to Rmr), RSm, RSk, S, CR, CF, CL, R, Ar, Rx, Rv, W | |
| Horizontal scale | dep. on cutoff | |
| Log contents | R-profile, MRK, P-profile (MOTIF), results | |
| Stylus | 2 µm | |
| LC Display | high resolution color display, 3.5", 320 x 240 pixel | |
| Printing | automatic/manual record with time | |
| Printer | Thermal printer, 384 points/horizontal line, 20 characters/line | |
| Printing speed | approx. 6 lines/second corresponds to approx. 25 mm/s (1 in/s) | |
| Thermopaper | Ø 40.0 mm – 1.0 mm, width 57.5 mm – 0.5 mm, coated | |
| Calibration function | dynamic | |
| Storage capacity | internal memory for max. 40000 results, max. 30 profiles | |
| Password protection | yes | |
| Lock for device settings | yes | |
| Languages: | German, English, French, Italian, Japanese, Korean, Spanish, Dutch, Chinese, Polish, Czech, Portuguese, Russian, Swedish, Hungarian, Turkish | |
| Power Management | yes | |
| Interfaces | drive unit, mains adaptor, USB, MarConnect | |
| Data interface: | RS232C, Digimatic, USB, USB A | |
| Relative humidity | 30 % to 85 % | |
| System of protection | M 300 = IP 42, RD 18 = IP 40 | |
| Operating temp. range | +5 °C to +40 °C | |
| Temperature range for storage | –15 °C to +55 °C | |
| Power supplied | NiMH battery, capacity: approx. 500 measurements (dep. on number and length of record printouts) | |
| Rechargeable batteries | NiMH battery, capacity: approx. 500 measurements | |
| Wide range power supply | plug-in power pack with three mains plugs, for input voltages from 90 V to 264 V | |
| (L x W x H) for Drive unit | 139 x 26 mm | |
| (L x W x H) for Measuring instrument | 190 x 140 x 75 mm | |
| Weight | kg | 4,1 |
| Measuring principle | stylus method | |
| Probe | Inductive skidded probe | |
| Measuring range | mm | 350 µm, 180 µm, 90 µm (automatic switching) |
| Profile resolution | 8 nm | |
| Filter according to ISO/JIS | Gauß-Filter, Ls-Filter | |
| Cutoff lc according to ISO/JIS | 0,25 mm, 0,8 mm, 2,5 mm, automatic | |
| Number n of sampling length according to ISO/JIS | selectable: 1–5 | |
| Short stroke under ISO/JIS | selectable | |
| Traversing length Lt according ISO/JIS | 1,75 mm, 17,5 mm, 5,6 mm, automatic | |
| Traversing length according ISO 12085 (MOTIF) | 1 mm, 2 mm, 4 mm, 8 mm, 12 mm, 16 mm | |
| Evaluation length ln according to ISO/JIS | 1.25 mm, 4 mm, 12.5 mm | |
| Contacting speeds | 0.5 mm/s | |
| Measuring force | N | 0,7 mN |
| Weight Drive unit | approx. 300 g | |
| Weight Measuring instrument | approx. 1 kg | |

- Bright, illuminated color display
- Automatic selection of filter and traversing length conforming to standards
- Integrated thermal graphics printer of high print quality
- Print the r-profile via the thermal graphics printer
- Log printed either by pressing a button or automatically
- Data transfer of results and profiles via usb-interface to your Pc
- Evaluation of most common parameters conforming to standards and in accordance to iso/Jis as well as characteristic curves, parameter lists (e.g. material ratio curve)
- Printing of R profile (iso/asme/Jis), P profile (motif), material ratio curve, measuring record
- Measuring units (µm/µinch) and standards (iso/Jis/asme/motif) are selectable
- Tolerance monitoring
- Integrated memory for results of up to 40000 measurements and 30 profiles
- Setting of asymmetric intersection lines for peak count calculation
- Individual sampling lengths and short cutoff can be selected
- Key pad lock and/or password protection for instrument settings
- Built-in rechargeable battery with power management
- Integrated roughness standard for the standard pick-up PHT 6–350
- Dynamic calibration function
- Date and/or time of measurement
- MarSurf PS1/M300 Explorer Software for recording measurements
- **Supplied with**
 - Evaluation unit M 300 C
 - Cylindrical drive unit RD18 C
 - Handheld v
 - Block with height adjustable feet
 - Standard pick-up PHT 6–350/2µm (conforming to standards)
 - Roughness standard PRN 10 with Mahr calibration certificate
 - 1 roll of thermal paper
 - Pick-up protection
 - 8 mm mounting clamp for the drive unit
 - Power source with 3 adapters
 - 1 x usb cable (for connection to a PC)
 - Shoulder strap
 - Carrying case
 - Operating instructions

MarSurf. Surface Metrology

PORTABLE SURFACE ROUGHNESS MEASUREMENT

**PORTABLE AND STATIONARY SURFACE MEASUREMENT
FOR ROUGHNESS DEPTH AND CONTOURS**

MarSurf M 400. Mobile Surface Measuring Instrument

MarSurf M 400. The best of the mobile devices

Both in the measuring room and increasingly also in the production area, there is a need for surface evaluations requiring skidless tracing.

This generally requires more highly skilled operators, more time and more adjustment work.

Within the "mobile surface metrology" range, MarSurf M 400 provides the necessary range of functions, while at the same time being quick and easy to use.

- Mobile and stationary measuring instrument
- Roughness and waviness measurements
- Traversing lengths up to 26 mm
- Over 50 R, W and P surface parameters
- Automatic choice of cut-off and traversing length in accordance with international standards
- Dynamic calibration function
- Cable and Bluetooth connection between drive unit and evaluation instrument (4 m)
- Magnetic probe holder (breakaway probe) BFW 250
- Motorized probe zero setting (max. 7.5 mm)

Supplied with:

- MarSurf M 400 evaluation instrument
- MarSurf SD 26 drive unit including BFW 250 probe system
- Standard probe arm (6852403)
- 1 roll of thermal paper
- Wide-range power supply unit with 3 adapters
- 2 x USB cables (for connecting to the PC and the M 400)
- Operating instructions
- Case

BFW probe system with magnetic probe arm holder

Technical Data

| | |
|---|--|
| Measuring principle | Stylus method |
| Probe | BFW skidless system |
| Measuring range | +/-250 µm (up to +/-750 µm with 3x probe arm length) |
| Profile resolution | Measuring range +/-250 µm: 8 nm Measuring range +/-25 µm: 0.8 nm |
| Filter according to ISO/JIS | Gaussian filter as per ISO 11562 Filter as per ISO 13565 |
| Cutoff l_c according to ISO/JIS | 0,25 mm, 0,8 mm, 2,5 mm, automatical, variable |
| Number n of sampling length according to ISO/JIS | 1-5 |
| Contacting speeds | 0,2 mm/s; 1,0 mm/s |
| Measuring force | 0,7 mN |
| Surface parameters | Over 50 surface parameters for R, P and W profiles according to current ISO/JIS or MOTIF standards (ISO 12085) |

Accessories

Measuring stand

- ST-D, ST-F and ST-G
- Holder on measuring stand

Other accessories

- CT 120 XY table, parallel vise, V-block
- Assorted probe arms for the BFW probe system

Applications

Machine building

Bearings, shafts, racks, valves

Automotive industry

Steering, brake system, gearbox, crankshaft, camshaft, cylinder head, cylinder block, turbocharger

Steel industry

Measurement of sheet metal surfaces
Measurement of roller surface

Medicine

Surface roughness measurement for hip and knee endoprostheses

Aerospace

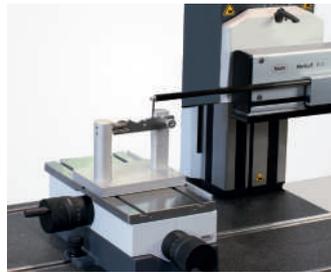

Turbine components

MarSurf. PC-based Stationary Surface Measuring Stations

Versatile And Powerful In Measuring Rooms And Laboratories

In surface measurement a distinction is made between mobile instruments, stationary workshop instruments and PC-based surface measuring instruments. This last group represent the cutting edge in surface measurement and evaluation. They satisfy all the requirements of a modern PC-based measuring and evaluation system. International standards, versatile evaluation methods, comprehensive documentation, large storage capacity, data export/import and networking with other systems have now become essential features of a PC-based system. Extensive QA procedures guarantee the highest quality and stability of software and hardware.

MarSurf XR 1. Roughness Measuring Station

MarSurf XR 1. The ideal instrument for a low-cost introduction to user-friendly surface metrology.

The PC-based instrument delivers all common surface parameters and profiles in accordance with international standards, both in the measuring room and in production. MarSurf XR 1 from Mahr stands for innovative roughness evaluation software.

- Over 80 surface parameters for R, P and W profiles according to current ISO/JIS or MOTIF standards (ISO 12085)
- Bandpass filter Ls in accordance with current standard; Ls can also be switched off or varied as required.
- Comprehensive measuring records
- Teach-in methods for the rapid creation of Quick & Easy measuring programs
- Automatic functions for choosing cut-off and traversing length in accordance with international standards (patented)
- Support for various calibration methods (static and dynamic) by specifying the Ra or Rz parameter
- Adjustable maintenance and calibration intervals
- Multiple measuring station configurations for custom applications
- Range of options provide system flexibility
- Various user levels protect the device against misuse and prevent unauthorized use

Drive units and probe options:

- Skidded or skidless tracing
- MarSurf RD 18 or MarSurf SD 26 drive units

Supplied with:

- MarSurf XR 1, XR 1 software, Mahr license key with standard license
- Drive unit adapter
- All-in-one PC optional
- MarSurf SD 26 and/or RD 18 drive unit set including probe system
- MFW 250 B probe system set
- MarSurf ST-G measuring stand
- CT 120 XY table

Technical Data

| | |
|---|---|
| Measuring principle | Stylus method |
| Probe | BFW skidless system with MarSurf SD 26 drive unit and/or PHT skidded system with MarSurf RD 18 drive unit |
| Measuring range | +/-250 µm (up to +/-750 µm with 3x probe arm length) applies to BFW system 350 µm applies to PHT probe system |
| Filter according to ISO/JIS | Gaussian filter as per ISO 11562 Filter as per ISO 16610-21 / ISO 16610-31 |
| Number n of sampling length according to ISO/JIS | 1 to 50 (default: 5) |
| Traversing lengths | MarSurf GD 26 / SD 26: Automatic; 0.56 mm*; 1.75 mm; 5.6 mm; 17.5 mm, 56 mm, Measurement up to stop, variable * Traversing length dependent on drive unit RD 18: Automatic; 1.75 mm; 5.6 mm; 17.5 mm |
| Measuring force | 0.7 mN |
| Surface parameters | Over 80 surface parameters for R, P and W profiles according to current ISO/JIS or MOTIF standards (ISO 12085) |

Accessories

General software options:

- Dominant waviness option (Wdc) for MarWin
- ISO 13565-3 surface parameters option
- QS-STAT / QS-STAT Plus option
- Profile processing option
- User defined parameters between operator and authorized personnel
- Contour 1 for MarSurf XR 1 / XR 20 option (in conjunction with MarSurf SD 26 drive unit)
- All options on one MLK

Software options:

- Expanded evaluation option
- Multiple measurement option
- Expanded measuring record option
- Script program integration option
- Digital I/O set option

For more information, please visit our website: www.mahr.com

Applications

Machine building

Bearings, shafts, racks, valves, various components from the engineering and precision engineering industry

Automotive industry

Steering, brake system, gearbox, crankshaft, camshaft, cylinder head, cylinder block, turbocharger

Medicine

Surface roughness measurement for hip and knee endoprostheses

Aerospace

Turbine components

Optics

MarSurf XR 20 with GD 25. Roughness Measuring Station

MarSurf XR 20, the perfect introduction to top-class surface metrology

The PC-based instrument delivers all common surface parameters and profiles in accordance with international standards, both in the measuring room and in production. The powerful MarSurf XR 20 combines decades of experience in surface metrology with innovative technology, easy-to-read icons and user-friendly operator assistance.

- Over 100 surface parameters available for R, P and W profiles in accordance with ISO / JIS, ASME or MOTIF (ISO 12085)
- Tolerance monitoring and statistics for all surface parameters
- Teach-in methods for the rapid creation of Quick & Easy measuring programs
- Comprehensive measuring records
- Automatic functions for choosing filter and traversing length in accordance with international standards
- Support for various calibration methods (static/dynamic) by specifying the Ra or Rz parameter
- Adjustable maintenance and calibration intervals
- Simulation mode for rapid familiarization with operating principle
- Multiple measuring station configurations for custom applications

Supplied with:

- MarSurf XR 20 including PC, Mid-Range Standard, XR 20 software, Mahr license key
- TFT monitor
- MarSurf GD 25 drive unit
- MFW 250 B probe system set
- MarSurf ST-G measuring stand
- PGN 3 calibration standard
- MCP 23 manual control panel
- CT 120 XY table

Technical Data

| | |
|---|--|
| Measuring principle | Stylus method |
| Probe | R probe, MFW 250 B |
| Measuring range | MFW 250: $\pm 25 \mu\text{m}$, $\pm 250 \mu\text{m}$, (up to $\pm 750 \mu\text{m}$); $\pm 1000 \mu\text{in}$, $\pm 10,000 \mu\text{in}$ (up to $\pm 30,000 \mu\text{in}$) |
| Filter according to ISO/JIS | Gaussian filter as per ISO 11562, filter as per ISO 16610-21/ISO 16610-31 |
| Number n of sampling length according to ISO/JIS | 1 to 50 (default: 5) |
| Traversing lengths | Automatic; 0.56 mm; 1.75 mm; 5.6 mm; 17.5 mm, 56 mm*, Measurement up to stop, variable * Traversing length dependent on drive unit |
| Surface parameters | Over 100 surface parameters for R, P and W profiles according to current ISO/JIS or MOTIF standards (ISO 12085) |

Accessories

- Parallel vise
- V-block

General software options:

- Dominant waviness option (WDc) for MarWin
- ISO 13565-3 surface parameters option
- QS-STAT / QS-STAT Plus option
- Profile processing option
- User defined parameters option
- Contour 1 for MarSurf XR 1 / XR 20 options
- All options on one MLK (Mahr license key)

Applications

Machine building

Bearings, threads, threaded rods, ball screws, shafts, racks, valves

Automotive industry

Steering, brake system, gearbox, crankshaft, camshaft, cylinder head, cylinder block, turbocharger

Medicine

MarSurf XR 20 with GD 120. Roughness Measuring Station

MarSurf XR 20, the introduction to surface metrology

- PC based instrument delivers all common surface parameters and profiles in accordance with international standards (both in measuring room and in production)
- Combines decades of experience in surface metrology with innovative technology
 - Easy to read icons
 - User friendly operator assistance
- A sampling length of up to 120 mm is possible in conjunction with the GD 120 drive unit
 - In addition to surface roughness evaluations, profile and waviness evaluations can also be performed in this way
- Over 100 surface parameters available for R, P and W profiles in accordance with ISO / JIS, ASME or MOTIF (ISO 12085)
- Tolerance monitoring and statistics for all surface parameters
- Teach-in methods for the rapid creation of Quick & Easy measuring programs
- Comprehensive measuring records
- Automatic functions for choosing filter and traversing length in accordance with international standards
- Support for various calibration methods (static/dynamic) by specifying the Ra or Rz parameter
- Adjustable maintenance and calibration intervals
- Simulation mode for rapid familiarization with operating principle
- Multiple measuring station configurations for custom applications

Supplied with:

- MarSurf XR 20 including PC, Mid-Range Standard, XR 20 software, Mahr license key
- TFT monitor
- MarSurf GD 120 drive unit
- MFW 250 B probe system set
- MarSurf ST 500 measuring stand
- PGN-3 calibration standard
- MCP 23 manual control panel
- CT 300 XY table

Technical Data

| | |
|---|--|
| Measuring principle | Stylus method |
| Probe | R probe, MFW 250 B |
| Measuring range | MFW 250: $\pm 25 \mu\text{m}$, $\pm 250 \mu\text{m}$, (up to $\pm 750 \mu\text{m}$); $\pm 1000 \mu\text{in}$, $\pm 10,000 \mu\text{in}$ (up to $\pm 30,000 \mu\text{in}$) |
| Filter according to ISO/JIS | Gaussian filter as per ISO 11562, filter as per ISO 16610-21/ISO 16610-31 |
| Number n of sampling length according to ISO/JIS | 1 to 50 (default: 5) |
| Traversing lengths | Automatic; 0.56 mm; 1.75 mm; 5.6 mm; 17.5 mm, 56 mm*, Measurement up to stop, variable * Traversing length dependent on drive unit |
| Surface parameters | Over 100 surface parameters for R, P and W profiles according to current ISO/JIS or MOTIF standards (ISO 12085) |

Accessories

Optional:

- MarSurf ST 750 measuring stand
 - Manual control panel with joystick and display
 - Parallel vise
 - V-block
 - Equipment table
 - Vibration dampening system
 - Measuring cabinet
- ### General software options:
- Dominant waviness option (Wdc) for MarWin
 - ISO 13565-3 surface parameters option
 - QS-STAT / QS-STAT Plus option
 - Profile processing option
 - User defined parameters option
 - Contour 1 for MarSurf XR 1 / XR 20 options
 - Topography option

Applications

Machine building

Bearings, threads, threaded rods, ball screws, shafts, racks, valves

Automotive industry

Steering, brake system, gearbox, crankshaft, camshaft, cylinder head, cylinder block, turbocharger

Medicine

Surface roughness measurement for hip and knee endoprostheses

Aerospace

Turbine components

MarSurf XC 2 with CD 120. Contour Measuring Station

Your entry into precision contour measurement

- The quick, simple and inexpensive 2D contour measuring system satisfies all demands in terms of accuracy and range of evaluation criteria
- Consistently delivers safe and reliable results
- Parameters that are dependent on datum elements are recalculated as soon as a datum element is changed
- Password protected user access prevents improper use
- Outstanding calibration processes, including geometry calibration, measuring force calibration, compensation, etc.
- Sturdy, rigid probes
- Reliable drive unit
- Automatic lowering and raising of the probe arm at individually adjustable speeds
- Patented probe arm attachment for collision protection

Supplied with:

- MarSurf XC 2 including PC, Mid-Range Standard, MarSurf XC 2 software, Mahr license key
- TFT monitor
- MarSurf CD 120 drive unit
- MarSurf ST 500 measuring stand (including holder)
- Calibration set
- MCP 23 manual control panel
- CT 120 XY table including rotary adjustment

Technical Data

| | |
|-------------------------|---|
| Measuring range | (in Z) 50 mm |
| Traversing lengths | 0.2 mm to 120 mm |
| Measuring force | 1 mN to 120 mN |
| Sampling angle | on smooth surfaces, depending on deflection: trailing edges up to 88°, leading edges up to 77° |
| Contacting speed (in Z) | 0.1 to 1 mm/s |
| Resolution | In Z, relative to stylus tip: 0.38 µm (350 mm probe arm) / 0.19 µm (175 mm probe arm) In Z, relative to measuring system: 0.04 µm |
| Guide deviation | < 1 µm (over 120 mm) |
| Measuring speed | 0.2 mm/s to 4 mm/s |
| Positioning speed | In X and return speed: 0.2 to 8 mm/s In Z: 0.2 to 10 mm/s |
| Probe arm length | 175 mm, 350 mm |
| Tip radius | 25 µm |

Accessories

Optional:

- MarSurf ST 750 measuring stand
- Manual control panel with joystick and display MCP 21
- Parallel vise, V-block
- Equipment table

Software options:

- DXF import option
- Tangential elements option
- Thread evaluation option
- Chamfer option
- QS-STAT / QS-STAT Plus option
- Topography option

For more information, please visit our website: www.mahr.com

Applications

Machine building

Bearings, threads, threaded rods, ball screws, shafts, racks

Measurement close to the production area
Contour measurement in semi-automated operation

Automotive industry

Steering, brake system, gearbox, crankshaft, camshaft, cylinder head

Medicine

Contour measurement for hip and knee endoprostheses
Contour measurement for medical screws
Contour measurement for dental implants

MarSurf XC 20 with PCV 200. Contour Measuring Station

The international benchmark for contour measurement

The MarSurf XC 20 is recognized as the ultimate in contour evaluation. What started some 30 years ago with the Konturograph - consisting of a drive unit and X-/Y-recorders — has developed into a top-quality contour measuring system using cutting-edge technology. The finely tuned device configuration offers superb performance standards. The drive unit and the measuring stand are controlled and positioned via the reliable measuring and evaluation software.

- User prompts can be displayed
- Interactive control elements support evaluations and automatic routines
- Measurement of upper and lower contours with a twin-stylus probe; a relative evaluation of the two contours is also possible
- Profile section images with evaluation of different parameters for each section
- Segmented measurement is possible across obstacles such as bores or steep sides
- Import and export of DXF files supported for setpoint/actual value comparison
- PCV 200 drive unit with patented probe arm magnetic attachment for reproducible probe arm change
- Patented probe system for measuring station flexibility
- Manually variable tracing forces also support flexibility
- Synthetic creation of nominal profiles from straight lines and circle arcs
- Easy comparison of nominal and actual profiles
 - Different tolerances can be selected by within a profile

Supplied with:

- MarSurf XC 20 including PC, Mid-Range Standard including XC 20 software, Mahr license key
- TFT monitor
- MarSurf PCV 200 drive unit
- MarSurf ST 500 measuring stand (including holder)
- Calibration set
- MCP 23 manual control panel
- CT 300 XY table

Technical Data

| | |
|--------------------------------|---|
| Measuring range | (in Z) 50 mm |
| Traversing lengths | 0.2 mm to 200 mm |
| Measuring force | 1 mN to 120 mN, below and above (can be set in MarSurf XC 20) |
| Sampling angle | on smooth surfaces, depending on deflection: trailing edges up to 88°, leading edges up to 77° |
| Contacting speed (in Z) | 0.1 to 1 mm/s |
| Resolution | In Z, relative to stylus tip: 0.38 µm (350 mm probe arm) / 0.19 µm (175 mm probe arm) In Z, relative to measuring system: 0.04 µm |
| Guide deviation | < 1 µm (over 200 mm) |
| Measuring speed | 0.2 mm/s to 4 mm/s |
| Positioning speed | In X and return speed: 0.2 to 8 mm/s In Z: 0.2 to 10 mm/s |
| Probe arm length | 175 mm, 350 mm |
| Tip radius | 25 µm |

Accessories

Optional:

- MarSurf ST 750 measuring stand
- Manual control panel with joystick and display MCP 21
- Parallel vise, V-block
- Equipment table

Software options:

- Thread evaluation option
- Chamfer option
- QS-STAT / QS-STAT Plus option
- Topography option

Applications

Machine building

Bearings, threads, threaded rods, ball screws, shafts, racks

Measurement close to the production area
Contour measurement in semi-automated operation

Automotive industry

Steering, brake system, gearbox, crankshaft, camshaft, cylinder head

Medicine

Contour measurement for hip and knee endoprostheses
Contour measurement for medical screws
Contour measurement for dental implants

For more information, please visit our website: www.mahr.com

MarSurf XCR 20. Roughness and Contour Measuring Station

Technical Data

| Roughness | XR 20 with GD 25 |
|--|--|
| Measuring principle | Stylus method |
| Probe | R probe, MFW 250 B |
| Measuring range | MFW 250: $\pm 25 \mu\text{m}$, $\pm 250 \mu\text{m}$, (up to $\pm 750 \mu\text{m}$); $\pm 1000 \mu\text{in}$, $\pm 10,000 \mu\text{in}$ (up to $\pm 30,000 \mu\text{in}$) |
| Filter according to ISO/JIS | Gaussian filter as per ISO 11562, filter as per ISO 16610–21/OSO 16610–31 |
| Number n of sampling length according to ISO/JIS | 1 to 50 (default: 5) |
| Traversing lengths | Automatic; 0.56 mm; 1.75 mm; 5.6 mm; 17.5 mm, 56 mm*, Measurement up to stop, variable * Traversing length dependent on drive unit |
| Surface parameters | Over 100 surface parameters for R, P and W profiles according to current ISO/JIS or MOTIF standards (ISO 12085) |

| Contour | XC 20 with PCV 200 |
|-------------------------|---|
| Measuring range | (in Z) 50 mm |
| Traversing lengths | 0.2 mm to 200 mm |
| Measuring force | 1 mN to 120 mN, below and above (can be set in MarSurf XC 20) |
| Sampling angle | on smooth surfaces, depending on deflection: trailing edges up to 88°, leading edges up to 77° |
| Contacting speed (in Z) | 0.1 to 1 mm/s |
| Resolution | In Z, relative to stylus tip: $0.38 \mu\text{m}$ (350 mm probe arm) / $0.19 \mu\text{m}$ (175 mm probe arm) In Z, relative to measuring system: $0.04 \mu\text{m}$ |
| Guide deviation | $< 1 \mu\text{m}$ (over 200 mm) |
| Measuring speed | 0.2 mm/s to 4 mm/s |
| Positioning speed | In X and return speed: 0.2 to 8 mm/s In Z: 0.2 to 10 mm/s |
| Probe arm length | 175 mm, 350 mm |
| Tip radius | $25 \mu\text{m}$ |

Accessories

Optional:

- MarSurf ST 750 measuring stand
- Parallel vise
- Equipment table

Software options:

- Profile processing option

- Dominant waviness option
- User defined parameters
- Topography option
- QS-STAT / QS-STAT Plus option
- Thread evaluation option

Applications

Machine building

Bearings, threads, threaded rods, ball screws, shafts, racks, valves

Automotive industry

Steering, brake system, gearbox, crankshaft, camshaft, cylinder head, cylinder block, turbocharger

Medicine

Contour and surface roughness measurement for hip and knee endoprostheses, contour measurement for medical screws, contour and surface roughness measurement for dental implants

Aerospace

Turbine components

Roughness and contour measurement at a measuring station with MarSurf XCR 20

This combined measuring station allows both surface roughness and contour measurements to be performed at a single measuring station.

Depending on the measuring task, either the GD 25 drive unit for surface roughness measurements or the PCV drive unit for contour measurements can be activated. The two measuring systems are fixed to the measuring stand by means of a combi holder.

- Space-saving design: the two drive units can be adapted by means of the corresponding combi holder to MarSurf ST 500 or ST 750 measuring stands
- Roughness and contour evaluation from a single measurement
- High precision contour and roughness evaluation for components requiring a long stroke and very high resolution with the MarSurf LD 130 / LD 260 measuring system
- Quick changeover between roughness and contour measurement by switching within the software platform and swapping mechanical components such as the drive unit and probe

Options:

- MarSurf PCV 200 contour drive unit
- MarSurf GD 25 roughness drive unit

Supplied with:

- MarSurf XCR 20 including PC, MidRange Standard, MarSurf XCR 20 software, Mahr license key
- TFT monitor
- MarSurf PCV 200 / MarSurf GD 25 drive unit
- MarSurf ST 500 measuring stand (including combi holder)
- Calibration set, PGN–3
- MCP 21 manual control panel
- CT 300 XY table

For more information, please visit our website: www.mahr.com

MarSurf LD 130 / LD 260. Combined Contour and Surface Measuring Station

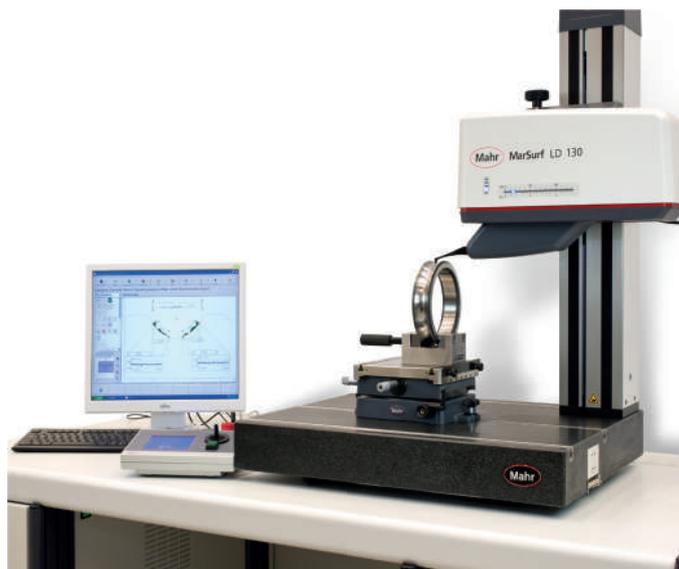

MarSurf LD 130 / LD 260. A step into a new dimension

Combined contour and roughness measurements in just one step come courtesy of proven cutting-edge technology from Mahr metrology. The MarSurf LD 130 and MarSurf LD 260 measuring stations have been systematically developed to draw on the experience from the first generation of equipment.

- Roughness and contour in just one step
- High measuring and positioning speed reduces measuring times
- Innovative probe system removal
- Quick and reliable probe arm exchange with simultaneous probe arm detection by magnetic bracket
- Long measuring length up to 260 mm (MarSurf LD 260) with a measuring stroke of 13 mm (100 mm probe arm length) or 26 mm (200 mm probe arm length)
- Modular construction for ease of maintenance

Supplied with:

- MarSurf XCR 20 including MidRange LD, MarSurf XCR 20 software, Mahr license key
- TFT monitor
- MCP 21 manual control panel
- MarSurf LD 130 or LD 260 drive unit including LP D 14–10–2/60, LP D 14–10–500 probe system and probe arms
- Calibration standard for contour 1, accuracy class 1
- MarSurf ST 500 CNC measuring stand with 700 mm x 550 mm HG granite plate, including control module
- Dampening element set
- CT 300 XY table

Technical Data

| | |
|---------------------------|--|
| Measuring range | 13 mm (100 mm probe arm length) 26 mm (200 mm probe arm length) |
| Traversing lengths | 0.1 mm – 130 mm or 260 mm |
| Measuring force | 0.5 mN to 30 mN, software-adjustable |
| Resolution | 0.8 nm |
| Measuring speed | 0.02 mm/s to 10 mm/s; for roughness measurements 0.1 mm/s to 0.5 mm/s is recommended |
| Positioning speed | 0.02 mm/s to 200 mm/s |

Accessories

- ST 750 measuring stand
- Parallel vise
- V-block, equipment table
- Measuring cabinet
- Extensive range of probe arms

Software options:

- Profile processing option
- Dominant waviness option (Wdc) for MarWin
- ISO 13565–3 surface parameters option
- User defined parameters option (also requires the parameter or work by the application engineering team)
- Topography option (MarWin MarSurf XT only)
- MarSurf XT option with MfM / MfM plus
- Thread evaluation option
- Double stylus option for MarSurf LD 120 / MarWin
- Chamfer evaluation option (in accordance with Bosch standard)
- QS-STAT / QS-STAT Plus option
- Digital I/O set option

Applications

Machine building

Roller bearings, threads, threaded rods, ball screws, shafts, racks, ball heads, valves

Measurement close to the production area

Contour and surface roughness measurement in semi-automatic and fully automatic operation

Automotive industry

Engine parts including cylinder block, cylinder head, crankshaft, camshaft, valves, steering, gearbox, injection systems, turbocharger

Medicine

Contour and surface roughness measurement for hip and knee endoprostheses
Contour measurement for medical screws
Contour and surface roughness measurement for dental implants

Optics

Contour and surface roughness measurement of aspherical lenses

For more information, please visit our website: www.mahr.com

MarSurf CNC modular

MarSurf CNC modular. CNC measuring stations based on standard components

A standard surface measuring station can be expanded into a user-friendly, semi-automatic CNC measuring station by adding auxiliary table axes and a measuring cabinet (optional)

- Plug-and-play configuration of the control unit
- Easy to operate MarSurf software measuring wizard
- Clever universal concept for work-piece holder and clamp
- Minimal training required

Supplied with:

- MarSurf XR 20 measuring station with GD 120
- alternatively: MarSurf XC 20 measuring station with PCV
- alternatively: MarSurf LD 130 / LD 260 measuring station
- Including MidRange CNC controller
- MarSurf ST 500 / 750 CNC measuring stand
- MCP 21 manual control panel

Optional table axes

- T1S-L linear axis 200 mm
- T1S-R rotation axis
- T3S-LLR 3 table axes comprising 2 linear and one rotation axis

Optional measuring cabinet

Technical Data

| | |
|--|--|
| | <p>T1S-L Linear axis Complete with control module for MidRange CNC Displacement path 200 mm Dimensions 510 mm x 200 mm x 200 mm Bearing strength 50 kg</p> |
| | <p>T1S-R Rotation axis Complete with standard support plate and control module for MidRange CNC For use as a TA or TC axis Dimensions 270 mm x 200 mm x 210 mm Bearing strength 30 kg</p> |
| | <p>T3S-LLR 3 axis combination Complete with standard support plate and control module for MidRange CNC Multiaxis, monolithic structure comprising axes TX-TY-TC Bearing strength 30 kg</p> |

Accessories

- Table plate with clamping sphere adapter and universal clamping plate
- Standard measuring station upgraded to MarSurf CNC modular

Applications

Measurement close to the production area

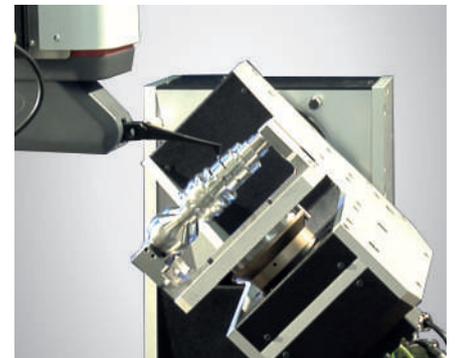

- Pallet measurement
- Topography measurement
- Multiple measuring points on one part without reclamping
- Automatic X-axis alignment
- Universal measuring station for a wide variety of measuring tasks
- Automatic zenith search

For more information, please visit our website: www.mahr.com

MarSurf CNC premium

- **MarSurf CNC premium**
- The MarSurf CNC concept is a high-quality solution for surface roughness and contour measurement in fully automatic manufacturing processes. Mahr has set standards worldwide with this measuring station concept.
- Complex measuring tasks can be performed fully automatically, without operator influence, reliably and with complete control.
- In conjunction with the probe arm changer, fully automatic procedures can be performed without operator influence with manual probe arm replacement, even in complex, multifaceted measuring tasks.
- A coordinated range of components, comprising motorized table and auxiliary axes along with tried-and-tested drive units and probe systems, forms the ideal basis for a perfect solution.
- The MarWin software platform from Mahr is a sophisticated, modular, cross-product control and evaluation system offering the necessary flexibility and process reliability for CNC operation in particular.
- **Probe arm changer TWE:**
- Up to 10 different probe arms from the LD system can be changed fully automatically.

Applications

- Automotive industry
- Injection system components
- Engine parts
- Cylinder head
- Cylinder block
- Crankshaft
- Camshaft
- Connecting rod
- Automatic gearbox
- Rack/steering nut
- Brake system components

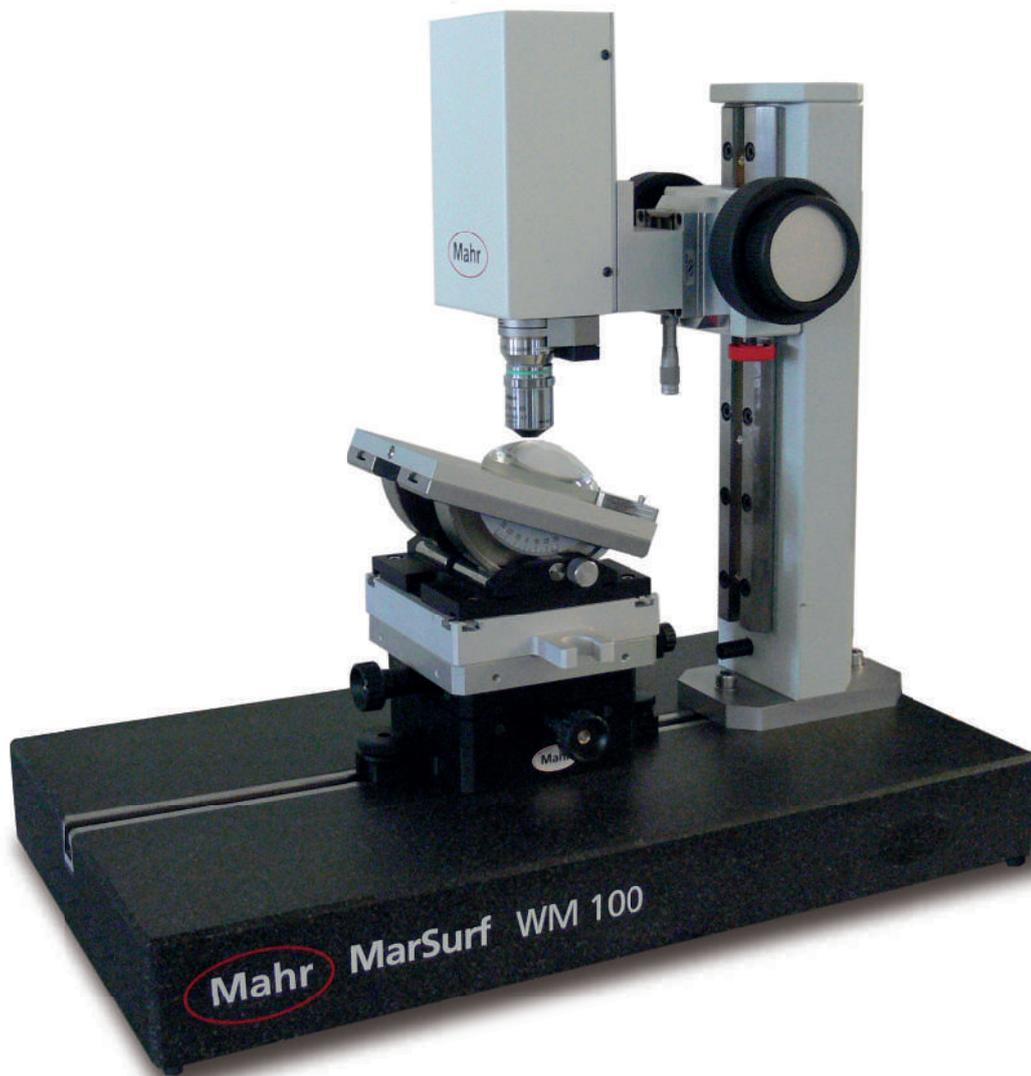

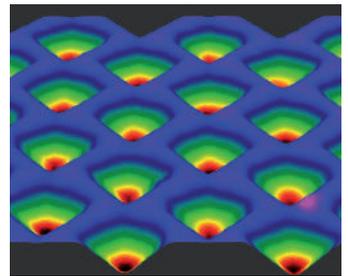

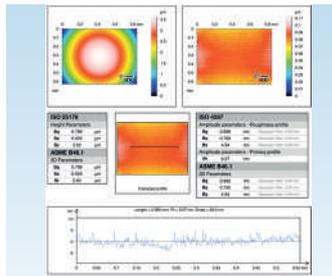

For more information, please visit our website: www.mahr.com

MarSurf. Optical Measuring Technology from Mahr

3D measuring Systems for Surface Analyses and Component Geometries

Optical measurement has become increasingly important in recent years. There are many benefits associated with optical testing of workpieces:

- No damage to or deformation of soft or fluid surfaces
- No wear on stylus tips
- Time savings through comprehensive measurement and also evaluation of new standardized surface parameters
- Statistically reliable results for heterogeneous surfaces with no clearly defined machining directions
- Fast and complete measurement of component geometries With Mahr on your side you can be sure of finding the right measurement solution. Decades of experience with both tactile and optical sensor systems give you the assurance of obtaining reliable results with appropriate equipment.

MarSurf CWM 100

- **MarSurf CWM 100**, a precision, computer-controlled optical measuring instrument with sub-nanometer resolution. This combined 3D measuring system comprises a confocal microscope and white light interferometer.
- Highest precision with sub-nanometer resolution
- Universal suitability for technical, optical and reflective surfaces. Also for surfaces of printed circuit boards and semiconductor products as well as biological tissues
- 2D surface analysis and measuring evaluations
- Topographic 3D surface analysis and measuring evaluations
- Intelligent measuring strategies - fast measurements – short measuring times
- Microscope image field sizes, easily expandable by fully automatic stitching
- Automatic table or object positioning: 100 mm x 100 mm, longer distances on request
- A wide range of lenses allows for an ideal adaptation to the measurement object
- Solid construction with granite base plate and granite column for the best possible vibration damping
- Professional evaluation software based on MountainsMap ©

Supplied with:

- Sensor system, comprising:
 - Confocal microscope KFM with 6x nosepiece
 - Camera, 780 x 580 pixels, up to 48 images/s (standard version)
 - 100 mm CNC-controlled Z-axis with integrated Heidenhain glass scale
 - One operating software with WLI and confocal software modules
- Granite base frame and column with sensor system and CNC-controlled object table
- CNC-controlled motorized Z-axis and XY table for probe positioning and image field merging
- Lenses (optional):
 - 4x to 150x (confocal microscope)
 - 2.5x to 100x (white light interferometer)

Technical Data

| | |
|----------------------------|---|
| Measuring principle | By interferometer, by white light interferometer and confocal Light source (KFM and WLI): LED, 505 nm |
| Measuring range | Sensor unit can be moved 100 mm in Z, CNC controlled Object table can be moved 100 mm in X and Y, CNC controlled Interferometer, white light interferometer: Measuring range (WLI): More as 4 mm (Standard mode), more as 20 mm in extended mode Confocal microscope: Measuring range (KFM): Up to 10 mm (depending on resolution in Z and lens) |

Accessories

CT 120 two axis tilting table

Setting table angle +/-30°

Standards set

Confocal microscope:
KFM objective lenses 10x0.5; 20x0.75; 50x0.6 with 11 mm gap between object table and workpiece; 50x0.8; 100x0.9

White light interferometer:
WLI objective lenses 2.5x0.075; 5x0.13; 10x0.3; 20x0.4; 50x0.55; 100x0.7

Applications

Machine building

All types of metal surfaces (ground, rolled, etc.), also laser structured surfaces, ceramic and plastic surfaces, mold surfaces

Medicine

Metal, ceramic and plastic surfaces of implants, prostheses and instruments

Electronics

Surface analysis of coatings, measurement and analysis of electronic and semi-conductor components

Optics

Form and roughness analysis of various optical components (all materials)

For more information, please visit our website: www.mahr.com

MarSurf WM 100

Technical Data

| WM 100 | |
|----------------------------|--|
| Measuring principle | By interferometer, by white light interferometer Light source (WLI): LED, 505 nm |
| Measuring range | Sensor unit can be moved manually over 200 mm in Z Object table can be moved manually in X and Y Interferometer, white light interferometer: Measuring range (WLI): Up to 100 µm (vertical). More on request. |

- MarSurf WM 100, a 3D white light interferometer measuring system. This precision optical measuring instrument has sub-nanometer resolution and measuring accuracy.
 - Maximum precision with sub-nanometer resolution and measuring accuracy
 - Suitable for all optical and reflective surfaces, fine technical surfaces and surfaces of circuit boards, semiconductor products and biological tissue
 - 2D surface analysis and measurement evaluations
 - Topographical 3D surface analysis and measurement evaluations
 - Fast measurements #96 short measuring times
 - Manual table and object positioning in up to 4 axes
 - Wide choice of lenses for perfect adjustment to the measuring object
 - Sturdy design with granite base plate
 - Professional evaluation software based on MountainsMap®
- Supplied with:**
- Sensor system, comprising:
 - WLI sensor head
 - Camera, 768 x 582 pixels, up to 48 f/s
 - 100 µm piezo drive z-measuring head
 - WLI software module, operating software
 - Granite base and column with manual positioning of sensor system
 - Manual XY object table for probe positioning
 - 20x0.4 DI lens (white light interferometer)

Applications

Machine building

All types of fine metal surfaces (ground, rolled, etc.), also laser structured surfaces, fine ceramic and plastic surfaces, mold surfaces

Medicine

Metal, ceramic and plastic surfaces of implants, prostheses and instruments

Electronics

Surface analysis of coatings, measurement and analysis of electronic and semi-conductor components

Optics

Roughness analysis of various optical components (all materials)

For more information, please visit our website: www.mahr.com

MarSurf Topografie-Software XT 20, MfM, MfM plus

Surface structures that are functionally relevant can often only be assessed and evaluated when depicted as a 3D topography.

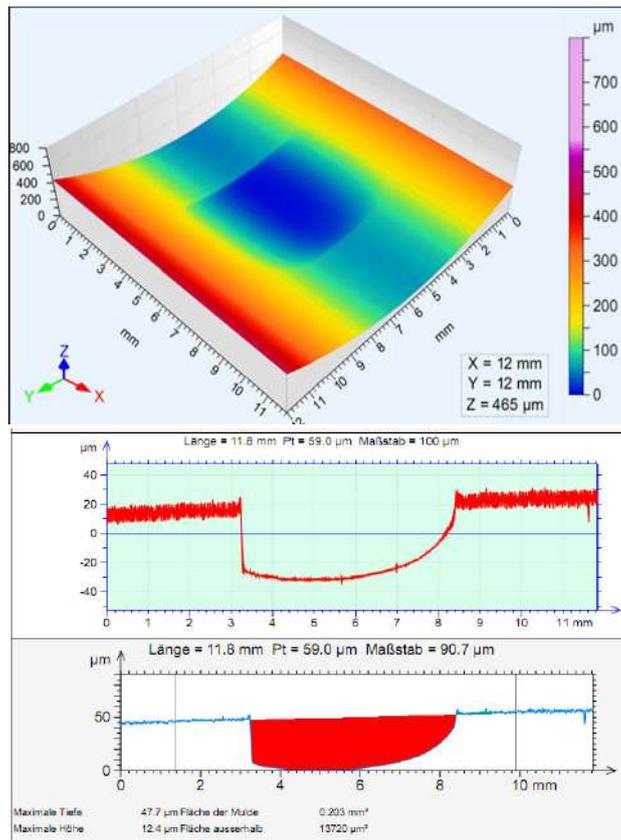

With the surface evaluation options MarSurf XT 20, MarSurf MfM and MfM plus you receive optimally tailored topography packages that can be used with tactile as well as optical metrology.

Readily available depiction types:

- 2D depiction of tracing section
- 3D topographical image
- false color depiction
- photorealistic depiction and much more

Enable a comprehensive and clear evaluation of the surface structure.

For topographical evaluation, wear testing is also required, not only 2D parameter but also 3D height parameter and volume parameters are needed to reliably analyze wear.

The essential evaluation features of the software MarSurf MfM and MfM plus

MarSurf MfM

Basis

- Documentation
- 8 languages
- Tolerances

Depiction and evaluation

- Photosimulation
- False color view
- 3D view
- Abbott-Firestone curve
- 3D basic parameter

Evaluation

- Include / exclude zones
- Zoom, symmetries, rotations
- Surface subtraction
- Repair surface
- Merge surfaces

MarSurf MfM plus

Basis

- Documentation
- 8 languages
- Tolerances

Depiction and evaluation

- Photosimulation
- False color view
- 3D view
- Abbott-Firestone curve
- 3D basic parameter

Evaluation

- Include / exclude zones
- Zoom, symmetries, rotations
- Surface subtraction
- Repair surface
- Merge surfaces
- FFT
- Auto correlation
- Intercorrelation
- Special filter methods
- 3D advanced parameters
- 3D motif evaluation
- Peak count distribution
- Spectral analysis
- Island volume

WE BELIEVE THAT FORM DEVIATION IS NOT A MATTER OF PERCEPTION. THAT IS WHY WE HAVE MARFORM.

The latest information about MARFORM products is available on our website:
www.mahr.com, web code 20570, 20575, 21052

The error-free functioning and durability of a workpiece is determined not only by its dimensions but above all by its shape. Requirements are rising all the time, whether in terms of roundness, flatness, straightness, coaxiality or run-out -- especially in the case of rotationally symmetrical workpieces. These can only be reliably tested and fulfilled with high-precision, specially optimized form testers. From fuel injection systems to microelectronics, precision engineering to medical technology: the key functional parts are becoming ever smaller and more precise. In order for manufacturing processes to abide by the specified tolerances, measurement uncertainty must be kept as low as possible. MarForm helps you to cut process costs, yet without driving up testing costs – MarForm has the perfect combination for every need by means of stable, innovative instruments offering a high degree of automation, flexibility and accuracy.

MarForm. Formtester for a Wide Variety of Applications

In many aspects of our daily lives we put our faith in the reliable operation of technical components. From the ABS brakes, fuel injection system and gearbox in our car to our PC hard drive, from the compressor in the air conditioning system to the blades on our razor, not to mention the landing flaps on airplanes. The smooth interaction between moving parts is critical to their error-free function and durability. To guarantee this level of performance, rotationally symmetrical workpieces are manufactured under strict specifications for the permissible deviation from the ideal form. These tolerances can only be reliably tested with high-precision, specially optimized form testers. MarForm helps you to cut process costs, yet without driving up testing costs .

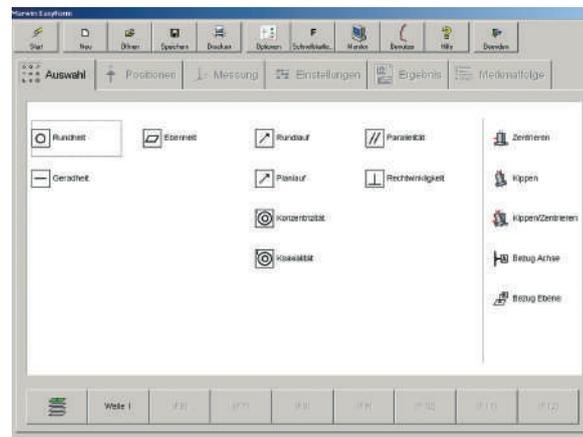

MarForm MMQ 100. Compact Form Measuring Machine

The MarForm MMQ 100 form tester is the ideal solution for simple yet precise measuring tasks.

- Fast and accurate measuring results
- Mechanical bearings for reliability
- Large measuring volume
- Low weight and compact size for greater mobility
- Fast, computer-aided workpiece alignment
- Centering and tilting knobs for coarse and fine adjustment
- Universal and reliable
- Workshop compatible, as no compressed air connection required
- Touchscreen design eliminates the need for a keyboard or mouse
- Digital encoders in Z and X transfer the measuring position directly to the software

Applications:

- Roundness
- Radial run-out
- Axial run-out
- Concentricity / Coaxiality
- Flatness (from a circular trace) (1)
- Straightness (from circular traces) (1)
- Parallelism (from circular traces) (1)
- Perpendicularity (from a circular trace) (1)
- Fourier analysis (waviness analysis)

Options:

- AdvancedForm
- Mahr QE QS-STAT data export

Versions

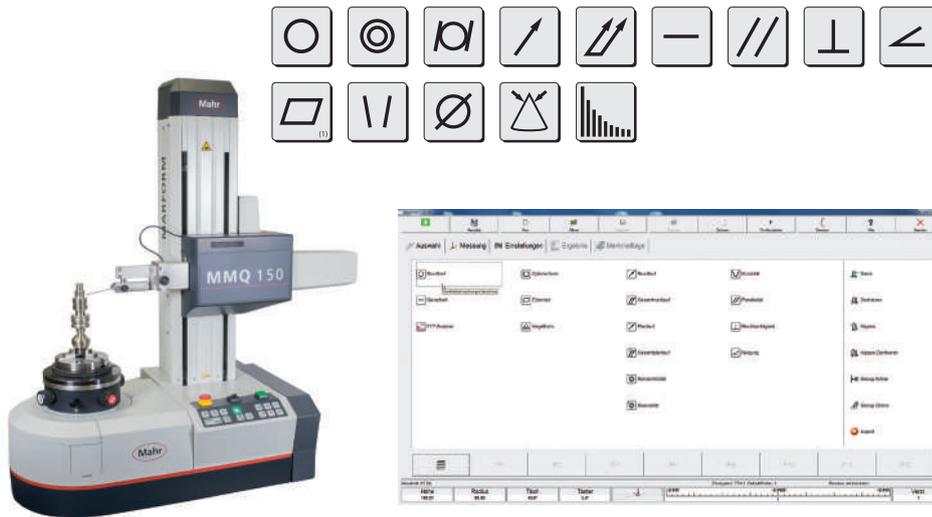

MMQ 100 with EasyForm is a powerful PC based evaluation system running under Windows® 7. It offers meaningful color reports with user friendly software for evaluating form and position tolerances (DIN ISO 1101): roundness, roundness within sections, radial runout, axial runout, concentricity, coaxiality, flatness⁽¹⁾, straightness⁽¹⁾, parallelism⁽¹⁾, perpendicularity⁽¹⁾.

The MMQ 100 measuring station with EasyForm comes as a complete system. The MMQ100 consists of the following:

- MarForm MMQ 100, with
 - Digital encoders in X/Z
 - T20W probe
 - MarWin EasyForm software
 - MarWin PC with WIN 7 operating system
 - 24" TFT monitor
 - Touch sensitive touch screen monitor (optional)

For more information, please visit our website: www.mahr.com

MarForm MMQ 150. Compact Form Measuring Machines

MarForm MMQ 150 - The entry into the world of cylindricity metrology, the MMQ 150 is an automatic measuring machine for the testing of form and location tolerances:

- Use in production or measuring room
- Fast and easy operation
- Measuring accuracy, optimized for cylindricity tolerances
- Reduces number of rejected parts, saves time, lowers production costs
- Maintenance-free, high-precision mechanical bearings

Applications:

- Roundness
- Concentricity / Coaxiality
- Cylindricity
- Radial run-out
- Axial run-out
- Total radial run-out (from circular traces) (1)
- Straightness
- Parallelism
- Perpendicularity (from a circular trace) (1)
- Angularity
- Flatness (from a circular trace) (1)
- Conicity
- Taper
- Fourier analysis (waviness analysis)

Options:

- Rim chuck Ø 100 mm
- Various additional clamps
- Optional commutator analysis
- Optional vibrational velocity analysis
- Upgrade to MarWin AdvancedForm
- 22" touch screen instead of 24" monitor
- Probe arms of various lengths and with various stylus ball geometries
- Various double probe arms
- Various calibration standards
- Various equipment tables, some with vibration compensation

Versions

The MMQ 150 measuring station consists of the following components:

- MarForm MMQ 150 form tester
- T20W length measuring probe with probe arm
- EasyForm Software for measuring and operating
- MarWin PC, Windows 7 operating system
- 24" monitor
- Color inkjet printer
- Connecting cable

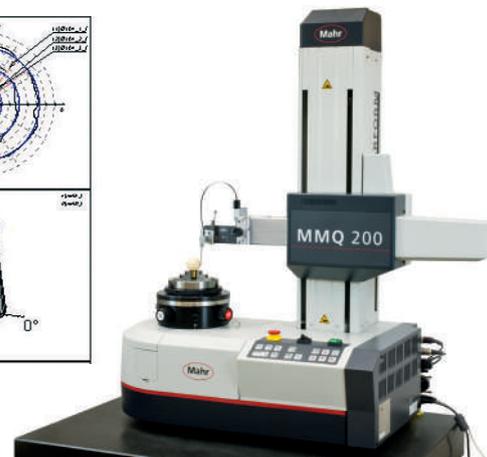

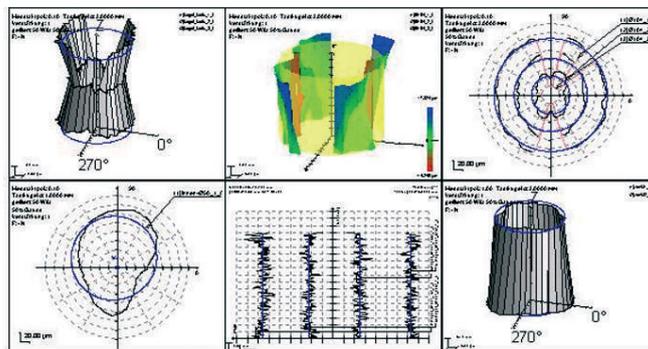

For more information, please visit our website: www.mahr.com

Marform MMQ 200. Compact Form Measuring Machine

The MMQ 200 is the compact form measuring machine for manufacturing workshops and inspection rooms.

- Proof of form and position deviations as per DIN/ISO 1101
- Fully automatic measuring sequences
- Precision roundness measuring axis (C)
- Motorized vertical measuring axis (Z)
- Motorized horizontal positioning axis (X)
- Manual centering and tilting table
- T20W manual length measuring probe or
- T7W motorized probe
- Ergonomic control panel, can also be used to start selected measuring programs (P1, P2, P3)

Applications:

- Roundness
- Concentricity / Coaxiality
- Cylindricity
- Radial run-out
- Axial run-out
- Total radial run-out (from circular traces) (1)
- Straightness
- Parallelism
- Perpendicularity (from a circular trace) (1)
- Angularity
- Flatness (from a circular trace) (1)
- Conicity
- Taper
- Fourier analysis (waviness analysis)

Options:

- 22" touchscreen TFT monitor instead of the 24" standard TFT
- Roughness measurement and evaluation with MMQ 200/T7W
- AdvancedForm software, diameter evaluation
- Various clamps
- Probe arms of various lengths and with various stylus ball geometries
- Various double probe arms
- Various calibration standards

Versions

The MarForm MMQ 200 is available in two versions: As a measuring station with the universal measuring probe T20W and as a measuring station with the motorized measuring probe T7W, which takes automation another step forward with its unique motorization. The MMQ 200 is operated with the EasyForm software. It is controlled by means of touchscreen technology, which also makes operation with the mouse exceptionally easy.

Form measuring station with T20W (order no. 9999485)

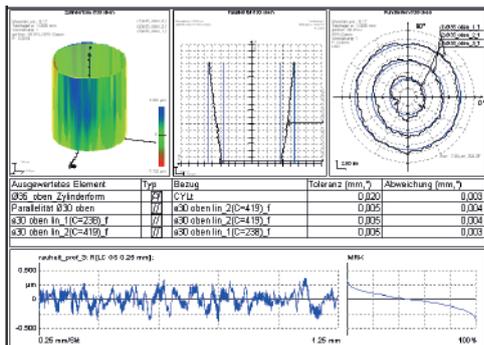

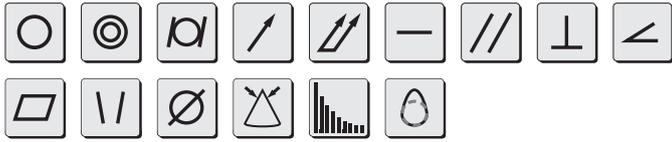

- MarForm MMQ 200 form tester
- T20W length measuring probe, manual, with probe arm
- EasyForm Software for measuring and operating
- Intel class PC, Windows 7 Ultimate 64 bit
- 24" TFT monitor
- Color inkjet printer with cable
- Rim chuck Ø 100 mm

Form measuring station with T7W (order no. 9999486)

- MarForm MMQ 200 form tester
- T7W length measuring probe with probe arm
- EasyForm Software for measuring and operating
- Intel class PC, Windows 7 Ultimate 64 bit
- 24" TFT monitor
- Color inkjet printer with cable
- Rim chuck Ø 100 mm

For more information, please visit our website: www.mahr.com

Marform MMQ 400. Universal Form Measuring Machine

MarForm MMQ 400 is suitable for universal use for extensive workpiece evaluation according to DIN ISO 1101.

High precision measuring axes in Z and X make every form measuring task possible. MarForm MMQ 400 is available in different versions for:

- High precision workpieces
- Unusually long workpieces
- Large and heavy workpieces
- Use in production or in the precision measuring room

Different modules are available with which the MarForm MMQ 400 can optimally be prepared for your requirements:

- Motorized or manual centering and tilting table
- Vertical axis (Z) with 900 mm, 500 mm or 350 mm measuring length
- Horizontal axis (X) with 180 mm or 280 mm measuring length and with digital linear scales in the X and Z axes; high probe position accuracy for measurements requiring high reproducibility.
- Manual or fully automatic probe with short measuring circuit, high linearity, low measuring force.
- Path control for the fast measuring of a nominal contour

Applications:

- Roundness
- Concentricity / Coaxiality
- Cylindricity
- Radial run-out
- Axial run-out
- Total run-out
- Straightness
- Parallelism
- Perpendicularity
- Angularity
- Flatness
- Conicity
- Diameter (optional)
- Taper
- Fourier analysis (waviness analysis)
- Cam profile (optional)

Options:

- Roughness measurement
- Switch between form probe with ruby ball and roughness probe PHT 6-350
- Piston testing with MarWin evaluation software
- Shaft twist testing and analysis with MarWin
- Cam profile testing
- Bar-to-bar variation analysis at commutators
- Contour measurement and evaluation
- Path control (MCPC)
- Shape evaluation
- Vibrational velocity analysis
- Dominant roundness waviness (MBN 10455)

For more information, please visit our website: www.mahr.com

Marform MMQ 400. Universal Form Measuring Machine

Versionen

The **MarForm MMQ 400-2** is available in five versions which are designed to meet your requirements and solve any of your measuring tasks.

- Motorized or manual centering and tilting table
- Vertical axis (Z) with measuring length of either 500 mm (19.67 in) or 900 mm (35.4 in) and horizontal axis (X) with measuring length of 280 mm (11.02 in) or
- Vertical axis (Z) with measuring length of 350 mm (13.78 in) and horizontal axis (X) with measuring length of 180 mm (7.09 in)
- With digital position decoders in the linear axes X and Z for best reproducibility of measurements.

Your **MarForm MMQ 400-2** is available as a semi-automated measuring station with manual centering and tilting table or as a fully automated measuring station which, in conjunction with a motorized centering and tilting table and T7W probe, is perfect for the high precision testing of your parts without any operator intervention.

The **T7W** probe is fitted with a motor-driven rotational axis. This makes it possible to move the probe arm in steps of less than one degree to the required contacting position. Measurements can be performed on the generating surfaces and end faces. As a zero position probe, the **T7W** can also switch automatically between internal and external measurements or between end face measurements from above and below without operator intervention. Fully automatic measurement processes on complex workpieces can be carried out without operator intervention too.

The probe arms of the **T7W** are exchangeable. Its motor-driven rotational axis enables the construction of "multi-point probe arm units" - i.e. probe arm units with a variety of contacting elements - making it possible to switch between different stylus ball geometries within a single measurement run.

MarForm. Reference Machines for Form and Position Tolerances Our Most Accurate Form Measuring Machines

Precision form measurement cuts costs! MarForm is the name of our ultra-accurate form measuring system. These systems are used wherever information is required about the geometry of workpieces with very strict tolerances. ISO 1101 describes roundness, cylindricity, straightness, parallelism, etc., as form and position deviations. These features are monitored by form testers. The high accuracy of form measuring instruments can save you money, because you can maintain the necessary tolerance margins for your production. MarForm is a precision roundness and concentricity measuring machine.

MarForm MFU 100. Reference Form Measuring Station

Applications

- Checking product parts for form and position features
- Roundness, Concentricity / Coaxiality, Cylindricity, Radial run-out, Axial run-out, Total run-out, Straightness, Parallelism, Perpendicularity, Angularity, Flatness, Conicity, Diameter, Taper, Fourier analysis (waviness analysis), Line profile, Surface profile, Cam profile
- Recording of all profiles as high precision 3D coordinates with real-time spatial compensation of geometric deviations
- Perfect scanning of surfaces, roughness evaluation
- Scanning and evaluation of contours and shapes

Reference form measuring station in a new dimension.

The journey from high precision measuring axes to competent measurements is often a long one that the MFU 100 has mastered completely. Only the MFU 100 has integrated reference elements for the real-time spatial compensation of geometric deviations, recording all profiles as high-precision 3D coordinates. For decades

MarForm measuring machines have been recognized for their accuracy and stability. The new MarForm MFU 100 was developed with the claim of testing the shape and position features of product parts in a one liter measuring volume close to the production area and at a reasonable cost. In so doing, it has taken our long experience into a new dimension.

MarForm MFU 100 is a precision reference form measuring center which with its exceptionally low measurement uncertainty increases the tolerance margin for your production processes, thereby lowering production costs.

- Circular roundness measuring axis (C)
- Motorized centering and tilting table (X, Y, A, B)
- Vertical straightness measuring axis (Z)
- Horizontal straightness measuring axis (X)
- Tangential multifunction axis (Y)
- Motorized length measuring probe T7W
- MarWin evaluation software for form and position features

All axes are coordinated to ensure maximum measuring reliability. The horizontal X-axis extends beyond the center of the workpiece, allowing „true parallelism“ to be checked free from other measuring influences. The tangential Y-axis is an innovative new feature. This additional motorized axis, which is new to conventional form testers helps to locate the zenith of miniature workpiece geometries without operator influence. The actual precision measurement can then be started in exactly the right place. This significantly increases process accuracy.

The Y-axis is used together with the vertical Z-axis and the horizontal X-axis to determine the workpiece diameter. This allows tolerances to be checked in the sub-nanometer range by the maximum material principle, in accordance with standards, for the very first time and at a very reasonable price.

High-resolution digital scales in conjunction with the machine electronics provide a level of positioning accuracy which allows even miniature part geometries to be tested. MarForm MFU 100 is also suitable for error-free scanning of surfaces.

The MarWin software package offers the full range of functions of a modern measuring and evaluating application including user friendly records and electronic documentation in the company network.

The rigorous separation of control and evaluation functions ensures that MarForm MFU 100 is future-proof and expandable. New language versions, special evaluations and new standards are easy to incorporate. The MFU 100 is also ready for the addition of future sensor systems.

In short: MarForm MFU 100 brings form measuring machines for inspection rooms and production areas into a new dimension.

MarForm MFU 110 with optional optical sensor which is interchangeable with T7W (motorized)

For more information, please visit our website: www.mahr.com

MarForm MFK 500. Reference Form Measuring Station

Reference form measuring center for laboratory and measuring room, with a large measuring volume for heavy workpieces
The benchmark form measuring centers for laboratories and measuring rooms.

MFK form measuring center for comprehensive workpiece assessment.
MFK form tester - ideal for testing engine blocks, cylinder heads, gear cases, hydraulic elements, crankshafts and camshafts. Generously sized, optimized design for high measuring accuracy throughout the machine. Long measuring and travel paths for easy, safe workpiece changing.

MarForm MFK 600 or MFK 500, built from individual coordinated components, offer flexibility and adaptability for a range of measuring tasks.

The form tester is based on a non-warping granite base, which is set up so that it is isolated from vibrations. Its high precision horizontal surface forms the datum plane for the measuring setup. The workpiece holder table supports and guides heavy workpieces by means of air bearings on the granite surface.

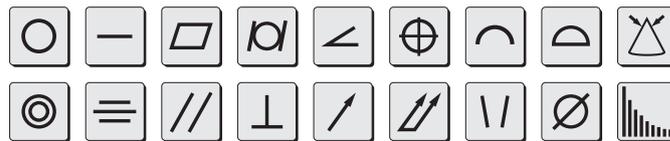

- Universal form measuring station with a large measuring volume for heavy workpieces
- MFK 600 with 5 measuring and set-up axes for measuring form elements and determining positions
- MFK 500 with 3 measuring and 4 set-up axes for measuring form elements
- Rotating measuring probes and automatic workpiece positioning make it easy to use and quick to set up
- Air bearings for low maintenance and continuous loading
- Collision-protected probe systems for diverse measuring tasks
- Large workpiece holder surface for large individual workpieces or workpiece pallets
- Roundness measuring device with automatic adjustment to the workpiece diameter, even with eccentric positioning
- Straightness measurements in 3 main coordinate directions
- Workpiece assessment as per ISO 1101
- Testing in machine and workpiece coordinates in accordance with production specifications
- Full evaluation of form and position features as well as diameter and position values
- Extensive accessories and choice of measuring probes for optimized performance of all measuring tasks
- Ready for use and easily expandable with additional movement axes for turning workpieces during a program sequence. In this way the most complex measuring tasks on V-engine blocks for example can be carried out without operator intervention

Roundness measuring device

In addition to the measuring spindle (C-axis), the roundness measuring device also includes an axis for automatically adjusting the measuring probe to the workpiece diameter (X-axis). In roundness measurements the X-axis adjusts the measuring probe to the workpiece shape, even with eccentric deviations which are bigger than the measuring probe range.

Straightness measuring device

The vertical straightness measuring device (Z-axis) guides the roundness measuring device on a granite surface. On the MFK 600 the accuracies of the horizontal straightness measuring device (Tx- and Ty-axis) are independent of the size, form and weight of the workpiece because the guides are separated from the air bearings. The MFK 500 offers the Tx-/Ty-axes of the motorized centering and tilting table as motorized positioning axes. Set-up axes (Ta and Tb) are integrated into the workpiece holder table and can automatically align workpieces mechanically in the machine volume.

Measurement performance

Automatic set-up functions integrated into measuring sequences allow for continuous operation. Measuring value processing in parallel with measuring value recording shortens the measuring time. A full range of accessories is available for the form measuring station to extend the possible applications.

Options:

- Additional movement axes for turning workpieces during a program sequence

Applications

Checking of form and position features:

- Roundness, Straightness, Flatness, Cylindricity, Angularity, Position, Line profile, Surface profile, Taper, Concentricity / Coaxiality, Symmetry, Parallelism, Perpendicularity, Radial run-out, Axial run-out, Total run-out, Conicity, Diameter, Fourier analysis (waviness analysis)

Testing of:

- Engine blocks
- Cylinder heads
- Gear cases
- Hydraulic elements
- Crankshafts and camshafts

MarForm MFU 200 Aspheric 3D. Precision 3D Measuring Station

Mahr developed the MarForm MFU 200 Aspheric 3D to enable optical components to be tested in 2D / 3D quickly and close to the production area. MarForm measuring machines have been recognized for decades for their accuracy and stability. With the MarForm MFU 200 Aspheric 3D this experience has now been made available to the optical industry.

Accuracy

The MarForm MFU 200 Aspheric 3D is a precision measuring instrument which with its very low measurement uncertainty is ideally suited to your process optimization requirements.

Measuring principle

The MarForm MFU 200 Aspheric 3D measures the topography of optical components. Of course, a quick 2D measurement can also be recorded with a profile across the zenith of the lens. For 3D measurements two linear profiles offset by 90° are first measured across the zenith of the lens in a single sequence. Then multiple concentric polar profiles are recorded by rotating the C-axis. These measuring points are used to generate a topography. Interrupted surfaces can be measured with the fully positionable probe arm.

Using the measuring station in a vibration-cushioned cabinet keeps external interference such as vibration and dirt away from the measuring objects.

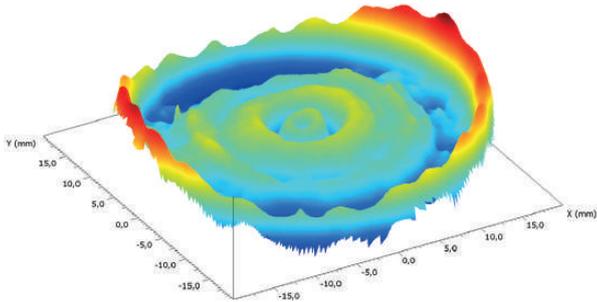

Measuring procedure

Before starting the measurement, choose the nominal form type and set the parameters for the expected reference lens. In the next step the measuring data is recorded and compared with the nominal data for the lens. The RMS value, PV value and slope error are shown as parameters.

In the software the individual parameters for the aspheres, such as the radius of curvature R_0 , conical constant k and the aspheric coefficients A_i , can be adjusted to the measuring results when adjusting the nominal asphere to the fit asphere.

The differential topography between the measured values and the nominal lens is displayed as a color-coded line chart. The 2D profiles and the differential topography can then be exported in known formats for correction for the machine tool.

In addition to measuring spheres and aspheres as described above, other rotationally symmetrical objects can also be measured and evaluated using the nominal form as a conical profile or Sagitta of a 3D scatter plot.

$$z(h) = \frac{\frac{h^2}{R_0}}{1 + \sqrt{1 - (1+k)\left(\frac{h}{R_0}\right)^2}} + \sum_{n=2}^5 A_{2n} \cdot h^{2n}$$

For more information, please visit our website: www.mahr.com

MarForm Software MarWin

MarWin gives you full control over your form measuring station. You can position, align, measure and document at the click of a mouse #96 and the graphical user interface keeps you fully informed at all times.

Functions can be selected with the mouse from pull-down menus in menu bars, just as in other Windows® applications.

AdvancedForm lets you stay in control of the form measuring station at all times. You can track the profile shape while it is being measured, and intervene if you wish. The controls can be adapted to individual requirements. Whether you are carrying out a quick individual measurement, starting a program sequence on a series component or converting a complex measuring task into a measuring program: AdvancedForm offers the ideal operating strategy for every task. As tasks can differ so greatly, there is no one operating strategy that is perfect for every application.

That is why AdvancedForm offers a variety of operating strategies:

- Favorite measuring runs for measurement using an existing measuring program
- Quick&Easy for fast measurement; obtain a measuring result quickly, with minimal effort
- Teach-in programming for creating, modifying and running a measuring program, with lots of different possibilities
- MarEdit (optional)

the operating level for application engineers and trained specialists for solving challenging tasks. AdvancedForm shows you all necessary measuring and evaluation parameters in a clearly laid-out display. For many parameters there are default settings, which for most measuring tasks you can simply confirm. Of course you can also adjust individual parameters to the specific task.

Many functions, such as printing results, loading measuring programs or editing a program step, can be selected simply by clicking an icon.

The powerful teach-in programming feature of AdvancedForm allows you to create measuring programs for frequently measured workpieces. It can also be used to create measuring runs containing special positioning movements, measurements, evaluations and displays.

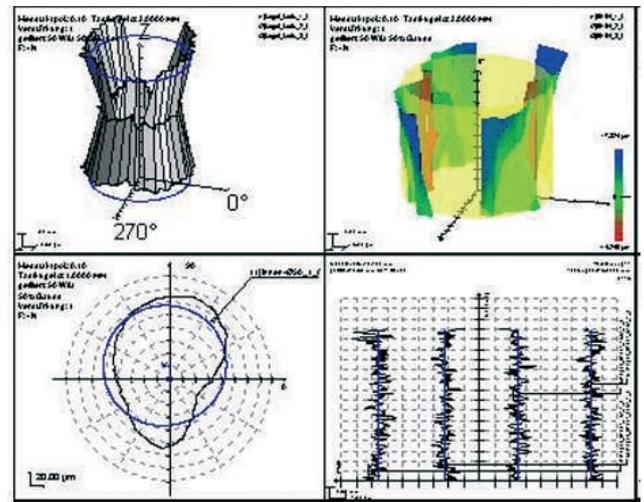

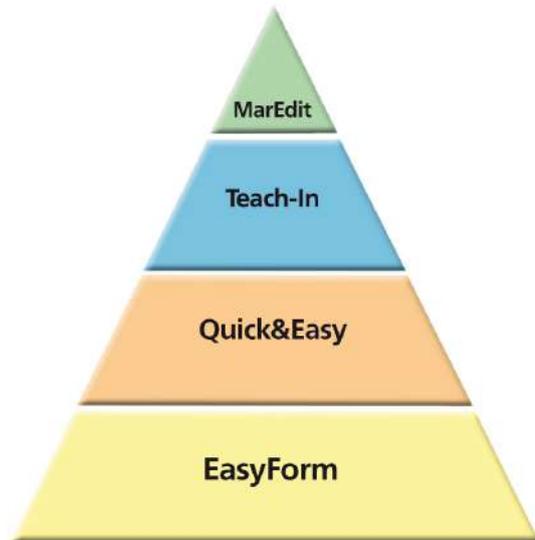

With teach-in programming, simply click on an icon, e.g. for measuring and evaluating a run, and a window opens in which you can describe the feature in more detail (e.g. radial or axial runout, datum, code name, tolerance, etc.). The number and type of measurements (true measurement or reevaluation of already measured profiles) are also specified in this window. Separate windows can be opened for editing measuring, evaluation and display parameters. In many cases, however, this is unnecessary, as default values are already entered which can be used for many measuring tasks. If different settings are required for specific measuring tasks, then the clear window layout will quickly take you to the right place, allowing you to optimize the settings in a flash.

The design of a measuring record can be changed down to the smallest detail: The colors of the profile, reference and limits can be chosen individually; the scaling (in μm per graduation) and the type of graphic (polar or linear, centered or uncentered) as well as many other display parameters can be adjusted to suit.

Measuring programs for frequently measured series components can be saved and reopened and started as a measuring run (see above) at any time.

Meaningful graphical profile displays, with several profiles in one graphic if required, displayed in different colors and in various ways, are immediately available on the generously sized color screen. If you are interested in exact numerical values, you can choose to display the results as a table.

AdvancedForm displays standardized measurements and evaluations in a clear and meaningful format. Interactive design options are created in real-time with a 3D preview.

INNOVATIVE MEASURING TECHNOLOGY INCREASES YOUR GEAR TOOTH QUALITY. THAT IS WHY WE HAVE MARGEAR.

The latest information about MARGEAR products
is available on our website:

www.mahr.com, web code 157

Maximum precision in manufacturing is an important basis for the success of a business. MarGear gear measuring technology allows you to carry out your measuring tasks on gears and gear cutting tools quickly, simply and accurately, in just one measuring process. The flexible systems — with or without mechanical alignment and reclamping, and with a combination of gear measuring technology and form and position evaluation — create the best possible conditions for gaining and retaining a competitive edge. By fully integrating measuring technology into production, you can achieve a closed quality control loop in gear manufacturing.

MarGear. Gear Measuring Technology from Experienced Specialists

Modern Solutions for Gear Measurement

The flexible and extremely accurate GMX range of measuring instruments offers a perfect combination of gear measuring instrument and form tester in a single system. From highly specialized gear analyses to fully integrated series measurement, MarGear is the ideal solution at every level of modern gear manufacturing.

MarGear GMX 275 C. Universal Gear Measuring Center

Fully automatic precision testing of gears and gear cutting tools up to an outer diameter of 275 mm.

The ideal solution for both universal and specialist gear manufacturing.

System solutions provide the ultimate in flexibility and availability within a modern gear wheel component production facility. MarGear GMX, a networked variant for use close to the production area, offers fast and efficient analysis of possible gear deviations.

This allows for a direct assessment of the deviation and an automatically generated machine error correction.

Gear and form measurements carried out on a single measuring instrument.

High precision 3D scanning sensor combined with directly driven C axis for accuracy and efficiency..

Control unit:

4 axis Power PC Control unit:

Options:

- Tailstock up to clamping length 700 mm
- Active damping system

Technical Data

| | |
|--|---|
| Measuring path (mm), X axis | 180 |
| Measuring path (mm), Y axis | 150 |
| Measuring path (mm), Z axis | 320 |
| Diameter max.* [mm] | 275 |
| Length | 1560 |
| Width | 600 |
| Height | 1787 |
| Mass [kg] | 700 |
| Max. workpiece weight [kg] | 60 (80 on request) |
| Accuracy | Accuracy class I for gear measurements in accordance with VDI/VDE 2612/2613 Group 1 at 20°C ± 2°C |
| Axial runout deviation (µm+µm/mm measuring radius) | 0.11 µm + 0.0008 µm/mm |
| Radial runout deviation (µm in table height) | ≤ 0.11 µm |

* max. diameter of cylindrical gears

Accessories

- Probe arm changer (5 boxes)
- Active vibration damping system
- Revolving counter tip

Applications

Fully automatic testing of:

- Straight and helical toothed cylindrical gears
- Spiral and hypoid bevel gears
- Crown gears
- Cylindrical worms
- Conical and asymmetrical cylindrical gears
- Segment gears
- Shaving cutters
- Hobs
- Cutting wheels
- Synchronous gears
- Beveloid gears
- 3D geometries, form and position measurements, diameters, distances
- Special gear cutting tools on request

MarGear GMX 600. Universal Measuring Center for Gear, Form and Dimension Testing

The successful combination of gear and form measurement in one clamping saves additional investment, maintenance costs and time.

Full functionality as a form tester up to an outer diameter of 600 mm.

The **MarGear GMX 600**, as a complete solution, can also be used for measuring crankshafts, camshafts and pistons.

High precision, fully automatic testing of gears and gear cutting tools. Also serves as an integrated formtester system solution.

High precision 3D scanning sensor combined with directly driven C axis for accuracy and efficiency.

Control unit:
5 axis Power PC Control unit: with fully automatic swivelling probe head.

Options:

- Active damping system
- Centering and tilting table (CNC)
- Centering and tilting table (CNC-XXL)

Technical Data

| | |
|--|---|
| Measuring path (mm), X axis | 300 |

MarGear. MarGear GMX W series

Opening up a new dimension

The W series extends the MarWin platform to Mahr gear measurement

- MarEcon Control unit: with tracking mode
- Gear testing software runs under MarWin
- Intuitive GDE interface for gear data
- MarForm Advanced and Professional
- Easy program creation in Teach-In mode
- Integration of data matrix code scanners
- Uninterrupted movements
- High precision target positioning
- 3D visualization of gear geometry

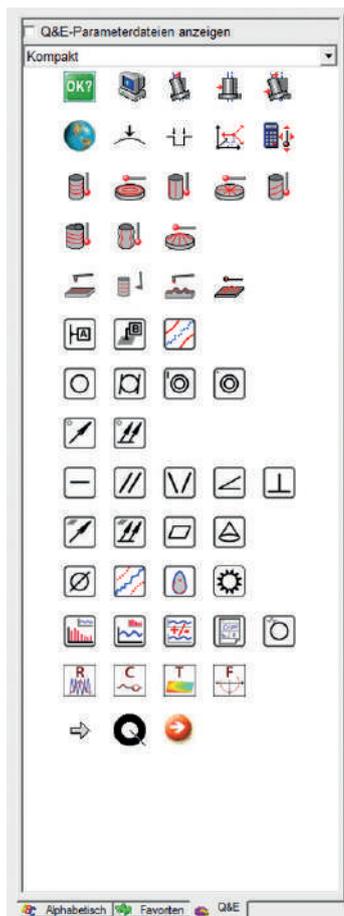

In addition to simple controls, the new software offers users a variety of interfaces to simplify automation of the measuring procedure. When you import gear data, in GDE format for example, the software creates a 3D model of the gear for visual inspection and checks the tooth geometry for plausibility. This further reduces the possibility of operator errors.

Software highlights

The intuitive 'QE Cylindrical Gear' user interface provides a number of interfaces for importing and exporting data.

Using the QEP interface (Quick&Easy profile), you can archive profile and results data relating to a gear measurement in MarWin format and then reload it subsequently for evaluation.

The new 'QE Cylindrical Gear' module is the latest measuring module to be added to the MarWin platform. Q&E modules from the MarWin system can be linked together quickly and easily to create a complete program for a transmission shaft, for example.

MarGear GMX 275 W. Universal Gear Measuring Center

Precision, fully automatic testing of gears and gear cutting tools up to an outer diameter of 275 mm.

The ideal solution for both universal and specialist gear manufacturing.

System solutions provide the ultimate in flexibility and availability within a modern gear wheel component production facility. MarGear GMX, a networked variant for use close to the production area, offers fast and efficient analysis of possible gear deviations.

This allows for a direct assessment of the deviation and an automatically generated machine error correction.

Gear and form measurements carried out on a single measuring instrument.

High precision 3D scanning sensor combined with directly driven C axis for accuracy and efficiency.

Control unit:
4 axis Power PC Control unit:

Technical Data

| GMX 275 W | |
|--|---|
| Measuring path (mm), X axis | 180 |
| Measuring path (mm), Y axis | 150 |
| Measuring path (mm), Z axis | 320 |
| Diameter max.* [mm] | 275 |
| Length | 1560 |
| Width | 600 |
| Height | 1787 |
| Mass [kg] | 700 |
| Max. workpiece weight [kg] | 60 (80 on request) |
| Accuracy | Accuracy class I for gear measurements in accordance with VDI/VDE 2612/2613 Group 1 at 20°C ± 2°C |
| Axial runout deviation (µm+µm/mm measuring radius) | 0.11 µm + 0.0008 µm/mm |
| Radial runout deviation (µm in table height) | ≤ 0.11 µm |

* max. diameter of cylindrical gears

Accessories

- Active vibration damping system
- Revolving counter tip
- Data matrix scanner
- Chuck 70 mm
- Chuck 200 mm
- Drive pin set
- Tailstock 450 mm or 700 mm

Applications

- Basic measuring station with AdvancedForm software
- Suitable for use as a gear measuring station with QE Cylindrical Gear

For more information, please visit our website: www.mahr.com

MarGear GMX 400 W. Universal Gear Measuring Center

Precision, fully automatic testing of gears and gear cutting tools up to an outer diameter of 400 mm.

Combining gear measuring tasks with various form and position features has never been easier.

With over 6000 units sold, the MarWin environment is a clear and simple way of creating complete programs in Teach-In mode. This improves programming efficiency and reduces the possibility of incorrect use.

Proven GMX realtime machine error correction is also used for positioning movements with the new MarEcon Control unit; guarantees maximum speed and precision throughout the entire measuring and movement sequence.

Gear, form and dimension measurements are performed on one measuring instrument.

High precision 3D scanning sensor combined with directly driven C-axis for accuracy and speed

Control unit:
4 axis Control unit:

Technical Data

| GMX 400 W | |
|--|---|
| Measuring path (mm), X axis | 200 |
| Measuring path (mm), Y axis | 200 |

| Accuracy | Accuracy class I for gear measurements in accordance with VDI/VDE 2612/2613 Group 1 at 20°C ± 2°C |
| Axial runout deviation ($\mu\text{m} + \mu\text{m}/\text{mm}$ measuring radius) | 0.11 μm + 0.0008 $\mu\text{m}/\text{mm}$ |
| Radial runout deviation (μm in table height) | $\leq 0.11 \mu\text{m}$ |

* max. diameter of cylindrical gears

Accessories

- Probe arm changer (5 boxes)
- Active vibration damping system
- Revolving counter tip

Applications

Fully automatic testing of:

- Straight and helical toothed cylindrical gears
- Conical and asymmetrical cylindrical gears
- Segment gears
- 3D surfaces, diameters, distances, cone angles
- Form and position measurements
- GDE
- Data export

For more information, please visit our website: www.mahr.com

MarGear GMX 400 ZLW. Universal Gear Measuring Center

Precision, fully automatic testing of gears and gear cutting tools up to an outer diameter of 400 mm.

The ideal solution for both universal and specialist gear manufacturing.

System solutions provide the ultimate in flexibility and availability within a modern gear wheel component production facility. MarGear GMX, a networked variant for use close to the production area, offers fast and efficient analysis of possible gear deviations.

This allows for a direct assessment of the deviation and an automatically generated machine error correction.

Gear and form measurements carried out on a single measuring instrument.

High precision 3D scanning sensor combined with directly driven C axis for accuracy and efficiency.

Control unit:
4 axis Power PC Control unit:

Extended Z measuring range for measuring long drive shafts up to 650 mm.

Technical Data

| GMX 400 ZLW | |
|--|---|
| Measuring path (mm), X axis | 200 |

* max. diameter of cylindrical gears

Accessories

- Active vibration damping system
- Revolving counter tip
- Data matrix scanner
- Chuck 70 mm
- Chuck 200 mm
- Drive pin set

Applications

Fully automatic testing of:

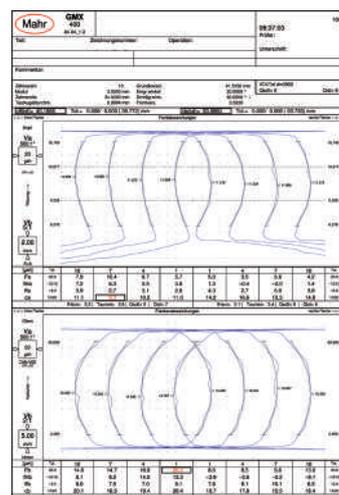

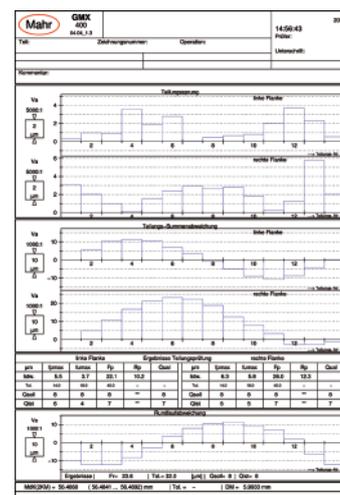

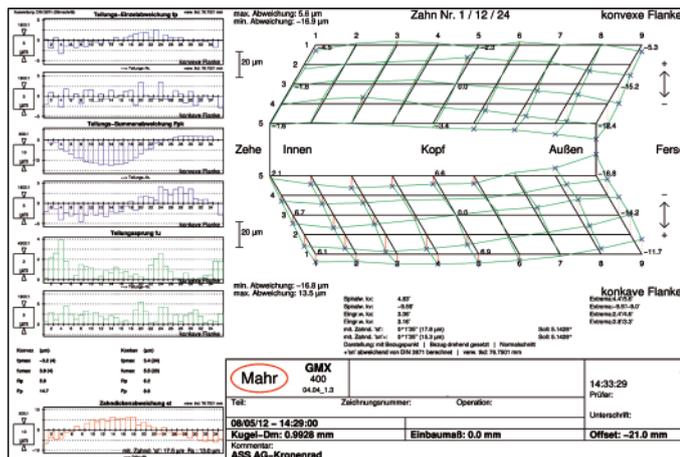

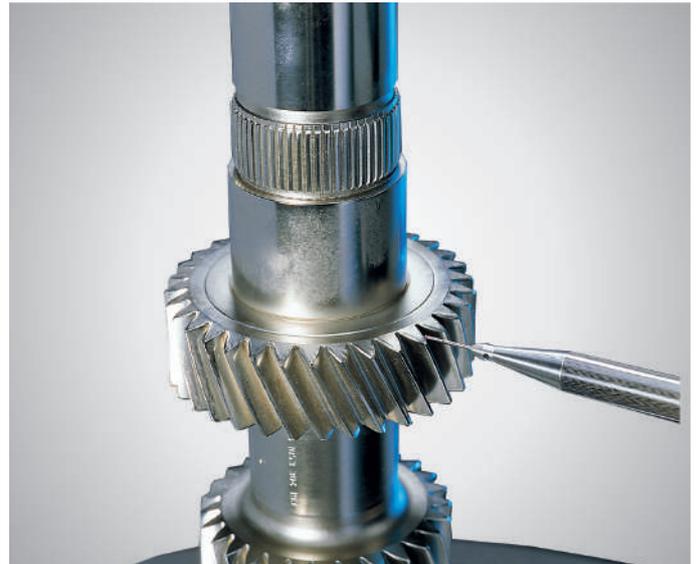

- Straight and helical toothed cylindrical gears
- Spiral and hypoid bevel gears
- Crown gears
- Cylindrical worms
- Conical and asymmetrical cylindrical gears
- Segment gears
- Shaving cutters
- Hobs
- Cutting wheels
- Synchronous gears
- Beveloid gears
- 3D geometries, form and position measurements, diameters, distances
- Special gear cutting tools on request

For more information, please visit our website: www.mahr.com

MarGear. Software Solutions

MarGear software solutions for the following measuring tasks:

- Form, position and dimension
- Cylindrical gear
- Bevel gear
- Gear cutting tools
- Synchronous gears
- Polar contours

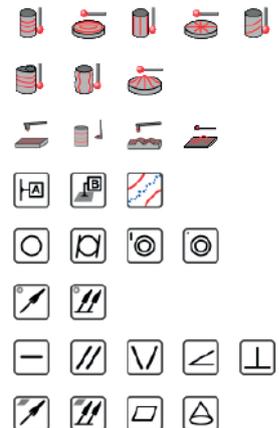

PROGRAM

MAIN PROGRAM

- QE AXIAL RUN_OUT
- QE CYLINDRICITY
- QE CYLINDRICAL GEAR
- QE DIAMETER
- QE FLATNESS
- QE PERPENDICULARITY

MAXIMUM MEASUREMENT ACCURACY IN PRECISION LENS PRODUCTION.

MAROPTO

The latest information about MAROPTO products is available on our website:

www.mahr.com, web code 21872

The role of dimensional metrology is expanding at a dramatic rate, in parallel with innovations in manufacturing processes. Given the ever more stringent accuracy requirements and falling cycle times in production (grinding, polishing etc.), rapid measurement directly at the manufacturing machine is absolutely essential. Measurement at the point of origin of the product, with rapid feedback to the manufacturing process to avoid waste. Flexible MarOpto measuring technology from Mahr is the right solution for quick and accurate measurement in production.

MAROPTO. MEASURING INSTRUMENTS FOR THE OPTICAL INDUSTRY

MarOpto. Fizeau Interferometers

Versatile and powerful in measuring rooms and production

MarOpto Fizeau interferometers are powerful interferometers that enable the non-contact measurement of flat or spherical surfaces and transmitted wavefront of optical components and assemblies. This makes them ideal for measuring optical components such as flats, prisms, lenses or precision workpieces such as bearings, sealing surfaces and polished ceramics.

Measurements can be performed using simple basic visual fringe inspection, IntelliPhase static spatial carrier analysis, or phase-modulated interferogram analysis. The MarOpto Fizeau interferometers offer flexibility and excellent performance for handling today's industrial applications.

MarOpto FI 1040 Z. Fizeau interferometer

Full featured 40 mm Fizeau interferometer for flat or spherical surfaces

The MarOpto FI 1040 Z is a full-featured interferometer that can provide non-contact measurements of flat or spherical surfaces and transmitted wavefront of optical components and assemblies. The MarOpto FI 1040 Z is therefore ideal for measuring optical components such as flats, prisms, lenses or precision metal parts such as bearings, sealing surfaces and polished ceramics. Measurements can be made using simple basic visual fringe inspection, IntelliPhase static spatial carrier analysis, or phase-modulated interferogram analysis. The MarOpto FI 1040 Z offers flexibility and unprecedented performance to handle today's industrial applications.

- 6x zoom for workpieces as small as 1.5 mm in diameter
- 3 modes of interferogram analysis: Phase shifting, IntelliPhase – static spatial carrier analysis, or fringe tracing (automated or manual)
- Small size allows easy integration into OEM systems
- Compact, rugged design
- Transmission spheres from F / 0.7 to F / 6.0

Applications

- Transmission and surface testing of small optics
- Measurements on optics, machined parts, ceramics, semiconductors, and wafers
- Integrated radius of curvature measurements

For more information, please visit our website: www.mahr.com

MarOpto FI 1100 Z. Fizeau interferometer

High accuracy measurement capability with unsurpassed flexibility and versatility

The MarOpto FI 1100 Z provides non-contact measurements of flat or spherical surfaces along with transmitted wavefront measurements of optical components and assemblies. Measurements may be made using basic visual fringe inspection, static fringe analysis, or phase-modulated interferogram analysis. The well-established IntelliWave™ software offers superior measurement and analysis capability. The MarOpto FI 1100 Z provides the versatility and reliability to handle today's advanced applications at unrivalled value for money.

- Total USB connectivity option (laptop or desktop) with 1k x 1k true spatial resolution
- Excellent versatility, stability and repeatability
- 1x to 6x zoom, focus and attenuation controls
- Vibration-insensitivity can be accomplished via Mahr's IntelliPhase™ static spatial carrier acquisition and analysis software
- Compact, lightweight and rugged design
- Compatible with all industry standard 4" (100mm) reference optics and accessories.
- High-accuracy measurements at an affordable price
- Configurations include horizontal, vertical look up and vertical look down. Optional workstations for flats and for radius of curvature measurements.

Applications

- Measurement of flat, concave or convex surfaces
- Prism, corner cube, wedge angle and homogeneity measurements
- Measurement of machined, ceramic, and wafer surfaces
- Wavefront analysis of optical systems & components
- Integration into OEM systems

For more information, please visit our website: www.mahr.com

MarOpto FI 3100 VB. Fizeau interferometer

Simultaneous phase-shifting for vibration-insensitive measurements in production

The MarOpto FI 3100 VB simultaneous phase-shifting Fizeau interferometer is a real-time, high-speed, truly vibration-insensitive metrology instrument with shutter speeds as fast as 10 μ s. Ideally suited for shop/production floors, the MarOpto FI 3100 VB offers unsurpassed measurement accuracy, stability and repeatability. Mahr's new SPARC technology ensures measurement errors of less than \pm 1/50 with no vibration isolation.

- Absolute vibration insensitivity
- Common path Fizeau geometry
- Can measure surfaces with 0.1% to 100% reflectivity
- 10 μ s exposure times
- 1k x 1k resolution
- Compatible with all industry standard 4" (100mm) reference optics and accessories.

Applications

- Measurements of flat, concave and convex surfaces of any size
- Measurements over long distances, including in vacuum chambers
- In-situ measurements of optical, machined and wafer surfaces
- Dynamic measurements for thermodynamic events, moving objects, etc.
- Characterization & removal of birefringence effects

For more information, please visit our website: www.mahr.com

MarSurf LD 130 / 260 Aspheric 2D and 3D. Asphere measuring station

MarSurf LD 130 / LD 260. A step into a new dimension

MarSurf LD 130 / 260 Aspheric is a high-precision 2D / 3D surface measuring station for characterizing contour and roughness on optical components.

Checks the topography in the first machining operations

- Early detection of deviations, thus avoiding costly reworking.
- Differential profile output in machine-readable format for controlling the machine tool.

Increased flexibility

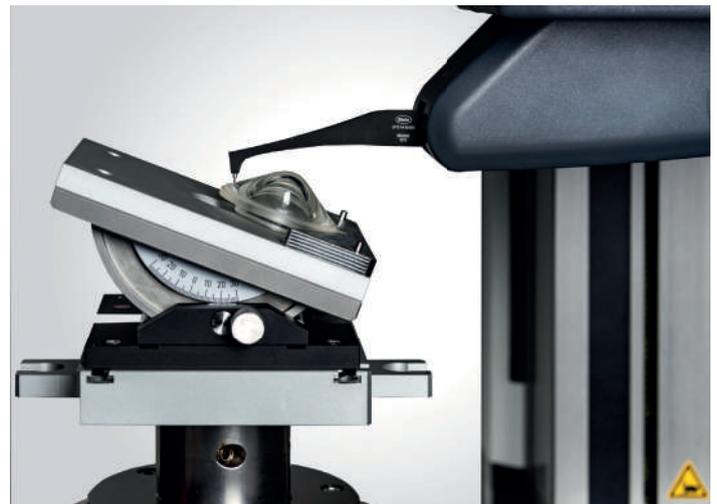

- Different types of rotationally symmetrical aspheres can be measured with one measuring system. No additional investment required.
- Large measuring range up to **260 mm** (up to 400 mm with the stitching option)
- Maximum measuring speed and dynamics (up to **10 mm/s** for large lenses / up to 0.02 mm/s for microlenses)
- Fully positionable stylus tip.

Bionic-style LP D probe arm

- Improved probe system dynamics thanks to increased rigidity and attenuation as well as a lower moment of inertia:
 - optimized overall design of the probe system
 - innovative choice of materials
- Probe arm with integrated chip for:
 - detecting and identifying the probe arm,
 - checking that the probe arm is inserted correctly,
 - providing information from probe arm.

Your results will be right

- The high-precision MarSurf LD 130 / 260 is the basis for the accurate measurement of your workpieces. The vertical resolution of 0.8 nm and form deviations of < 100 nm guarantee the exact reproduction of your asphere.
- Probe arm change with no need to recalibrate.
- Lenses with steep sides can be measured.

For more information, please visit our website: www.mahr.com

MarForm MFU 200 Aspheric 3D. Precision 3D measuring station

Mahr developed the **MarForm MFU 200 Aspheric 3D** to enable optical components to be tested in 2D / 3D quickly and close to the production area. MarForm measuring machines have been recognized for decades for their accuracy and stability. With the **MarForm MFU 200 Aspheric 3D** this experience has now been made available to the optical industry.

Accuracy

The **MarForm MFU 200 Aspheric 3D** is a precision measuring instrument which with its very low measurement uncertainty is ideally suited to your process optimization requirements.

Measuring principle

The **MarForm MFU 200 Aspheric 3D** measures the topography of optical components. Of course, a quick 2D measurement can also be recorded with a profile across the zenith of the lens. For 3D measurements two linear profiles offset by 90° are first measured across the zenith of the lens in a single sequence. Then multiple concentric polar profiles are recorded by rotating the C-axis. These measuring points are used to generate a topography. Interrupted surfaces can be measured with the fully positionable probe arm. Using the measuring station in a vibration-cushioned cabinet keeps external interference such as vibration and dirt away from the measuring objects.

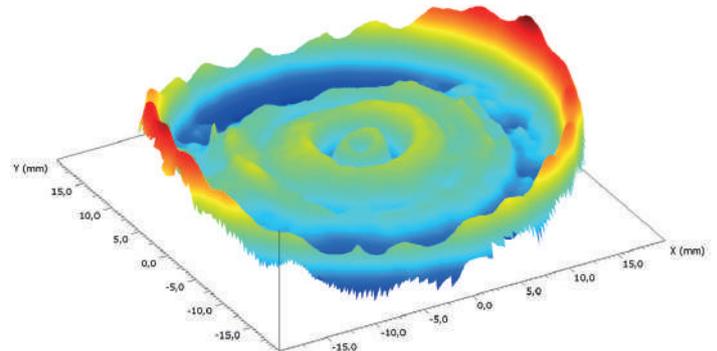

Measuring procedure

Before starting the measurement, choose the nominal form type and set the parameters for the expected reference lens. In the next step the measuring data is recorded and compared with the nominal data for the lens.

The RMS value, PV value and slope error are shown as parameters. In the software the individual parameters for the aspheres, such as the radius of curvature R_0 , conical constant k and the aspheric coefficients A_i , can be adjusted to the measuring results when adjusting the nominal asphere to the fit asphere.

The differential topography between the measured values and the nominal lens is displayed as a color-coded line chart. The 2D profiles and the differential topography can then be exported in known formats for correction for the machine tool.

In addition to measuring spheres and aspheres as described above, other rotationally symmetrical objects can also be measured and evaluated using the nominal form as a conical profile or Sagitta description of a 3D scatter plot.

$$z(h) = \frac{h^2}{R_0 \sqrt{1 + \sqrt{1 - (1+k) \left(\frac{h}{R_0}\right)^2}}} + \sum_{n=2}^5 A_{2n} \cdot h^{2n}$$

For more information, please visit our website: www.mahr.com

THE SECOND DIMENSION IN MEASURING TECHNOLOGY. YOUR ENTRY INTO OPTICAL MEASURING TECHNOLOGY.

Quality control is in a state of transition throughout the manufacturing industry. The pressure is on to measure workpieces more quickly, more accurately and also more cheaply. This is where measuring microscopes from Mahr come into their own. These instruments can be used for monitoring distances from bores and checking the shape, angle or radii of workpieces. Mahr's instruments can also be used for the contactless measurement of miniature components or inspecting and measuring circuit board traces, quickly and close to the production area. Measuring microscopes are utilized in a wide range of business sectors and industries. These sectors include machine building, electrical engineering, plastics industry, medical technology, food and pharmaceuticals industries, and even forensic laboratories. Testing and calibration laboratories, research establishments and educational institutions also rely on Mahr measuring microscopes to achieve accurate measuring results at an affordable cost.

Illuminated magnifier MarVision 130 LR

Application:

Viewing aids for visual checks, adjustments, miniature assembly work, precision work of all types

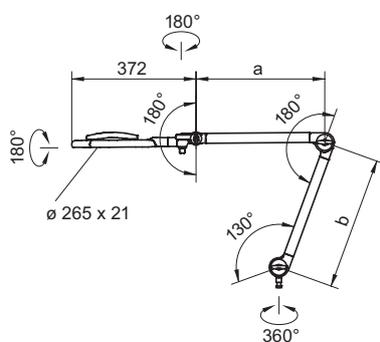

- 3D joint enables the lamp head to be positioned in all planes
- Wide operating range because of movable head joints
- Fully scratch resistant glass magnifier
- Sturdy aluminum and high performance plastic
- Light can be dimmed
- Large field of vision for distortion free viewing
- Maintenance free, LED life up to 50,000 h
- Excellent color reproduction
- Intensity 6000 lx with just 14 W
- 40% energy savings as comparison to conventional magnifier lamps
- **Scope of delivery:** Table mount, Magnifier cover, Instruction manual

Illuminated Magnifier MarVision 130 WR

- Aid for visual spot checks, adjustments, assembly of small parts and all types of precision work
- Illumination head with swiveling arm must be used either with Table base 130 t or Table clamp 130 kl
- 3D joint illumination head can be positioned at any level
- Spring relieved joints for easy positioning over a large scale action range without any readjustments
- Large diameter, cut glass lens with sharpness to the edge provides distortion free magnification
- Lens diameter 120 mm with double magnification; Fluorescent tubes provide a bright, almost shadow free illumination of objects and working area
- Low energy consumption due to energy saving lamp
- Not for sale in North America (230 Volts only)
- **Scope of delivery:** Instruction manual, without table clamp and fastenings

Application:

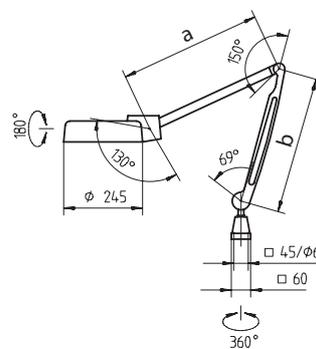

For checking sunken surfaces, e.g. bores, internal threads, etc.

Workshop Measuring Microscope MarVision MM 200

Application:

- For measuring distances and angles (with the ocular head 200 w) for example: punched and flexible parts, plastic components, as well as electronic circuit boards

- High quality optics for light intensive and sharp 3D images
- Zoom lens with continuous variable magnification and/or fixed lens
- Focusing with an ergonomic hand wheel, mounted either side, ideal for either a left or right handed operator
- Prism head tilted to 45°; with dioptric adjustment
- LED ring light, dimmable
- LED back light, dimmable
- Robust cast stand
- Stable XY table precision mounted
- **Data interface:** RS232C, USB
- **Scope of delivery:** ocular 10x with cross line reticules, 2 digital micrometer heads, 50 mm, Instruction manual

| 4246070 | Protective cover for MM200 | |
| 4305122 | Data Connection Cable RS232C (2 m) | 800 EWr |
| 4305121 | 800 EWu Data Connection Cable USB (2 m) incl. Software MarCom Std. | 800 EWu |
| 4102212 | Software interface | MarCom Prof. 5.1 |
| 4245053 | Cold light source 100 –120V | 200 fs |

Workshop Measuring Microscope MarVision MM 220

Application:

- For measuring distances (QC 100); bore holes and angles and determination of geometric elements (points, lines, circles, distances, intersections, etc.) (QC 200) for example: punched and flexible parts, plastic components as well as electronic circuit boards

Measuring Microscope

- High quality optics for light intensive and sharp images
- Zoom lens with continuous variable magnification
- Focusing with an ergonomic hand wheel, can be mounted either side, ideal for either a left or right handed operator
- Prism head tilted to 45° with dioptic adjustment
- LED ring light, dimmable
- LED back light, dimmable
- Robust cast stand
- Stable XY table precision mounted
- Quick and fine adjustment of all axes
- Excellent accuracy and reliability due to the optical incremental measuring system

Operating and Display Unit QC 100

- Large, high contrast backlit graphic LCD display
- Displays for X and Y axis

Operating and Display Unit QC 200

- Large, high contrast backlit graphic LCD display
- Measurement and evaluation functions for points, lines, circles, angles, distances and intersecting straight lines
- 'Magic' function is a time saving feature that automatically recognizes the geometric pattern of data points
- Simply create a measuring program with the Teach-In mode
- Easy program sequence due to on screen graphic guidance
- Operator prompts are available in several languages
- RS232 interface for processing measured data
- **Data interface:** RS232C, USB
- **Scope of delivery:** standard stop bar 220 as, operating and display unit QC 100 or operating and display unit QC 200, Instruction manual

Measuring microscope

- Integrated color camera
- Zoom lens, optionally motorized
- LED ring light: 1 ring and 4 segments, individually switchable and dimmable
- LED transmitted light: dimmable
- Solid granite base
- Sturdy steel XY table, precision-mounted
- Quick and fine adjustment of axes
- Optical incremental measuring system for outstanding accuracy and reliability
- Laser pointer for position finding
- **Control and display unit with M3 software and touchscreen PC**
- 23" touchscreen with keyboard and mouse
- Windows 10 Pro operating system, further software can be installed
- Operation via the Multi-Touch screen or with a mouse/keyboard
- Large video screen
- Reference/actual evaluation with tolerances
- Record output with company logo
- Graphical display with dimensioning
- Automatic edge detection, even on low contrast parts
- Stitching
- Statistics
- **Scope of delivery:** M3 software with touchscreen PC, standard stop bar 220 as, Instruction manual, Calibration certificate

MarVision QM 300

- **Measuring microscope**
- Fixed telecentric lens
- Integrated USB color camera
- LED ring light: switchable and dimmable
- LED transmitted light: switchable and dimmable
- Measuring table with height adjustment
- **Control and display unit with M3 software and touchscreen PC**
- Large, high contrast color LCD display with backlight
- 4 display modes: Video live image, digital display, element display and tolerance display
- Automatic part detection
- Automatic measurement of all features of a part within the image field
- Comparison of measurement with the CAD drawing via DXF function
- Measuring and evaluation functions for point, straight line, circle, angle, distance, intersection point
- "Magic" function for automatic geometry recognition from the measured measuring points
- Teach-in methods for easy measuring program creation
- Trouble-free program sequence with graphical route guidance
- Lighting control
- Multilingual user guidance
- RS232 interface for measuring data processing
- USB printer port
- USB stick connection
- Updateable via USB stick for a future-proof system
- **Scope of delivery:** M3 software with touchscreen PC, Instruction manual

MAXIMUM MEASUREMENT ACCURACY IN MANUFACTURING. MAHR SHAFT MEASURING TECHNOLOGY

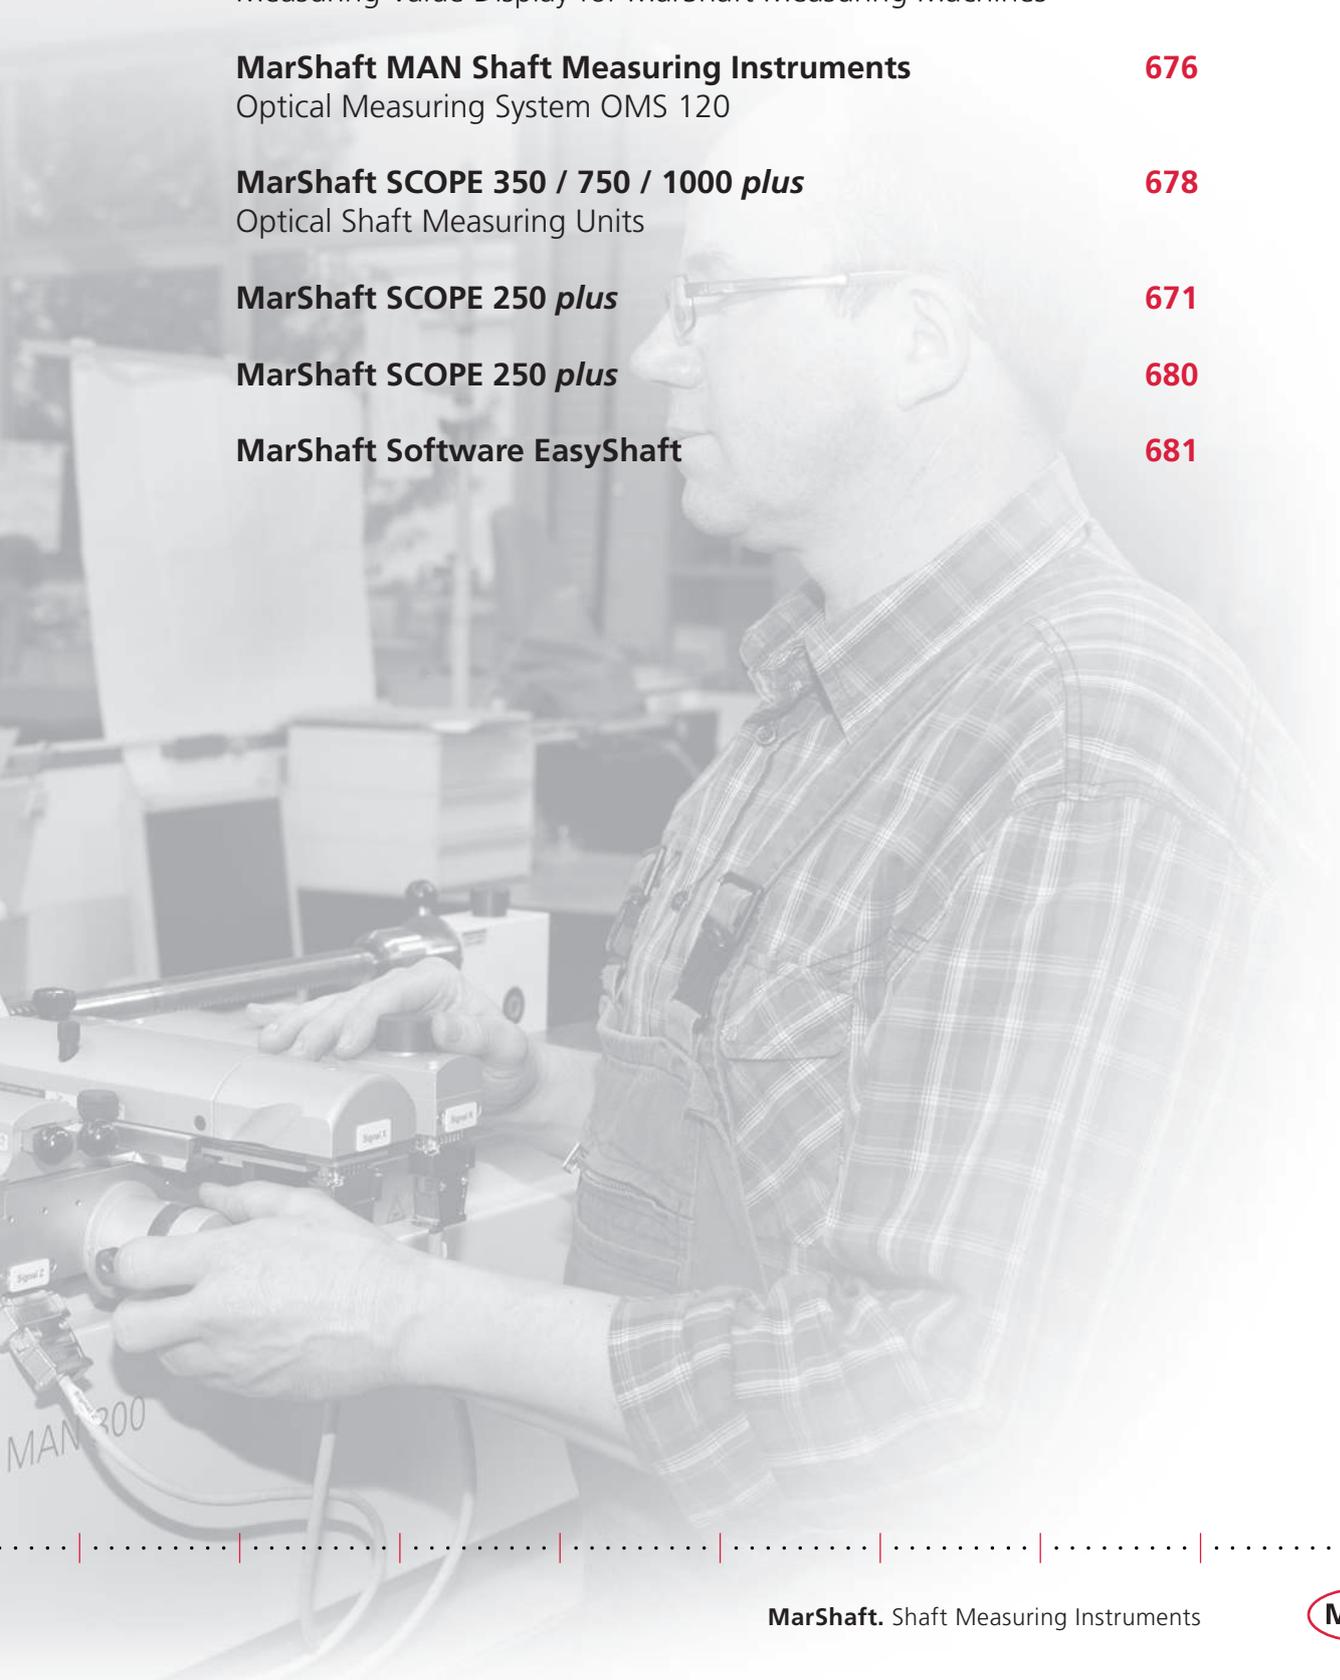

The latest information about MARSHAFT products is available on our website:
www.mahr.com, WebCode 11935

The role of dimensional metrology is expanding at a dramatic rate, in parallel with innovations in manufacturing processes. Given the ever more stringent accuracy requirements and falling cycle times in production (turning, milling, grinding, etc.), rapid measurement directly at the manufacturing machine is absolutely essential. Measurement at the point of origin of the product, with rapid feedback to the manufacturing process to avoid waste. Flexible MarShaft shaft measuring technology from Mahr is the right solution for quick and accurate measurement in production.

MarShaft. Measurement of Shaft-Type Parts in Production.

MarShaft shaft measuring instruments are mostly used in production. However, with their high measuring accuracy they can also be used in measuring laboratories. The instruments are available in various sizes, and their modular design allows them to be optimized to individual measuring tasks. Inline measurement directly in the manufacturing process saves the time and expense of measurements in the measuring room and increases productivity.

MarShaft MAN. Manual Tactile Shaft Measuring Machine

MarShaft MAN is a universal, modular shaft measuring instrument for the fast and flexible measurement of shaft-type testpieces.

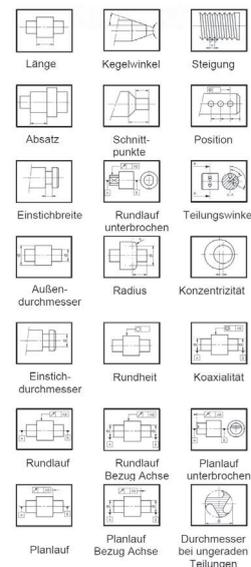

Precision workpieces can be produced cost-effectively and to a high level of quality across all manufacturing stages — from cutting to length through to hard finishing — if the individual process steps are kept consistently stable. That is exactly where production-floor characteristics testing with MarShaft MAN comes in. Short feedback times on reaching the tolerance limits and seamless documentation of all functional data relating to the component soon pay off.

The MarShaft MAN shaft measuring center is the right solution for your quality control.

The MarShaft MAN shaft measuring center is available in a number of different instrument sizes (workpiece lengths up to 400 mm / 800 mm / 1200 mm / 1600 mm / 2000 mm / 2400 mm, diameters from 120 mm to 220 mm) and its modular design allows it to be adapted to individual measuring tasks. The measuring modules (e.g. diameter, length, roundness module) can be arranged in any order or can easily be added at a later date.

Advantages at a glance:

- No operator influence
- Highly accurate measuring results
- Excellent repeatability
- Measuring system for all typical measuring tasks, including: Length, diameter, radial run-out, axial run-out, recess width, cone angle, roundness, coaxiality, concentricity and much more
- Automatic measuring force application to avoid operator influence
- Good workshop compatibility for direct use in production
- User-friendly MarCheck evaluation computer (2 models)

Technical Data

MarShaft MAN, length and diameter measurement, MarCheck II measuring computer

| | |
|-----------------------------------|--|
| Measuring range length (Z) (mm) | 400 / 800 / 1200 / 1600 / 2000 / 2400 |
| Measuring range diameter (X) (mm) | 120 or 220 |
| Workpiece weight (max.) in kg | 20 / 60 |
| Length/diameter resolution (mm) | 0,0001 |
| Angle resolution (°) | 0,001 |
| Length error limit (Z) (µm) | (3 + L/100) µm, L (length) in mm |
| Diameter error limit (X) (µm) | (0.8 + L/100) µm, L (length) in mm |
| Drive | manual |
| Lens | Optical measuring system (OMS) with matrix camera and software |

Applications

Typical workpieces:

Crankshaft, camshaft, gear shaft, rack, axle journal, hollow shaft, drive shaft, piston

Typical measuring tasks:

Length, diameter, radial run-out/axial run-out

Other measuring tasks:

Distance, recess width, depth, increment, recess diameter, roundness, taper, angle, radius, intersection point, position of cross-holes, and much more

MarShaft MAN with MarCheck.

Measuring Value Display for MAN Shaft Measuring Machines

MarCheck is a new compact measuring and evaluating unit for the manual measuring machine MarShaft MAN and is characterized by its ease of handling and high performance scope. The user requires only very little training, thus the unit can be immediately implemented, saving time and costs.

The large, clear, LCD monochrome display (240 x 160 dots) can display up to three measuring channels simultaneously. Activation of the individual measuring channels on the display takes place automatically when measuring with the corresponding measuring axis. The measuring direction is shown. The MarCheck has three measuring channels for two linear measuring axes (Z and X) and one rotary measuring axis (C), which can be reconfigured to a linear measuring axis (R) if needed. For runout and roundness measurements, the precision measuring spindle (C axis) is controlled by MarCheck and automatically switched on or off.

Technical Data

| MarShaft MAN with MarCheck, measured value display for MAN shaft measuring instruments | |
|--|---|
| Resolution per measuring channel can be independently set | 0.0001 mm; 0.001 mm; 0.01 mm 0.00001 inch; 0.0001 inch; 0.001 inch 0.001° decimal; ° min, sec |
| Incremental inputs | T1; T2; T3 (sin/cos 1 Vss) 15 pin. Sub D |
| Interface data | 1x RS 232; 1x USB 2.0 type A, 1x USB 2.0 type B |
| Grating constant | selectable; 2 µm; 4 µm; 10 µm; 20 µm; 40 µm |
| Max. permissible travel speed | 0.2 m/s when G = 2 µm 0.4 m/s when G = 4 µm 1 m/s when G = 10 µm 2 m/s when G = 20 µm for MarShaft MAN 4 m/s when G = 40 µm |
| Input signal - cutoff frequency | <100 kHz at sin/cos 1 Vss |
| Frequency check response threshold | 100 |
| Measuring units | mm / inch selectable in MENU |
| Standard languages | German; English; French Additional languages can be installed via USB interface and an external PC |

Performance features

- Large, clear, backlit LCD monochrome display (240 x 160 points)
- 3 measuring channels (Z axis, X axis, and C/R axis)
- Digit size approx. 13 mm
- 1 USB interface max. 3GB USB stick
- 1 USB interface for PC (selectable RS232 interface, evaluation of data in Excel or MarCom software) or software installation (update)
- Connection of a ink jet printer possible
- Measurement of roundness and runout takes place with the DMS 120, no additional R axis required
- Automatic acquisition of measuring values after having reach the measuring force the user has set
- Automatic acquisition of the calibration values from the individual measuring modules

Measuring and programming functions

- Evaluation of diameter, length dimensions, distances, taper, symmetry, distance between centers, roundness, axial runout, radial runout, concentricity, workpiece axis reference calculation, maximum/minimum function, preset function for reference points outside of the workpiece.
- Teach-in programming, data can be saved in MarCheck, external PC or USB stick, printing with external printer, up to 40 measuring programs can be saved.
- Q-DAS interface for the evaluation of machine capability testing in Q-DAS Software®

For more information, please visit our website: www.mahr.com

MarShaft MAN Shaft Measuring Instruments. OMS 120 Optical Measuring System

In conjunction with the evaluation software, the optical measuring system OMS 120 can be used to measure geometry elements which cannot be contacted or evaluated with the available contacting measuring probes of MarShaft MAN. The operating concept is optimized for use directly on the production line and can be used without any knowledge of metrology whatsoever. The testpiece contour is mapped on the camera chip using the shadow image method and displayed on the monitor. High-quality, telecentric optical components are used for precision mapping. To this end the corresponding testpiece contour is positioned only roughly in the camera's image field. There is no need for precision adjustment in the Z or X direction. The software has quick measuring functions which automatically evaluate the relevant feature results for the current measuring task.

Quick measuring functions

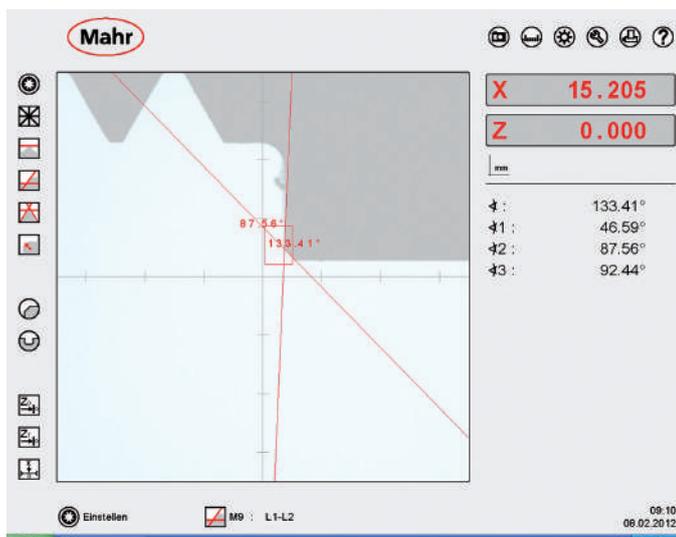

- Recess
- Chamfer
- Radius
- Straight line
- Intersection point line-line A quick measuring function analyses multiple feature results at the same time. The relevant results can be selected for recording or for data transfer. Most shaft measuring tasks can be performed in a quick and user-friendly manner using these functions.

A whole range of manual analysis functions are available for measuring tasks which are not covered by the quick measuring functions.

Technical data

Traverse path in X-direction: 120 mm
Measurement resolution: 0.001 mm

MarShaft SCOPE 350 / 700 / 1000 plus

Tactile measuring unit with y-measuring axis 60 mm

The MarShaft SCOPE plus is a universal, fully automatic optical shaft measuring system for testing rotationally symmetrical workpieces.

The MarShaft SCOPE plus has a highly accurate roundness measuring axis (C), a vertical measuring axis (Z) and a horizontal measuring axis (X).

A tactile measuring system with an inductive measuring probe is available as an option, for measuring radial and axial run-out or straightness, for example. The measuring device is calibrated to the optical measuring system, so it can perform tactile and optical measuring tasks in combination.

The new MarWin EasyShaft software provides a high level of flexibility and exceptionally user-friendly operation.

The measuring sequences are carried out fully automatically, free from operator influences.

The MarShaft SCOPE plus is suitable for use in both the harsh workshop environment and in the inspection room. Zoom functions allow the smallest details to be measured, which with conventional measuring methods are difficult if not impossible to test.

Technical Data

| Freestanding model | |
|-----------------------------------|--|
| Measuring range length (Z) (mm) | 350 / 750 / 1000 |
| Measuring range diameter (X) (mm) | 80 or 120 |
| Workpiece weight (max.) in kg | 15 (optional 30) |
| Length/diameter resolution (mm) | 0.01 to 0.0001 |
| Angle resolution (°) | 0.01 to 0.0001 |
| Length error limit (Z) (µm) | (2 + L/125) L in mm (2 σ at 20 °C ± 1 °C on reference standard) |
| Diameter error limit (X) (µm) | (1,0 + L/125) L in mm (2 σ at 20 °C ± 1 °C on reference standard) |
| Drive | Servo motors |
| Lens | Telecentric precision lens High-resolution CCD array |

Applications

Typical workpieces

- Turned parts
- Tripods
- Transmission shaft
- Rack
- Axle journal
- Hollow shaft
- Drive shaft
- Piston
- Camshaft
- Turbocharger shafts
- Bone screws
- Worm gears
- Balance shafts
- Hydraulic parts
- Valves (diesel engine)
- Injection valves and much more

- Automatic measuring procedure
- Matrix camera, 1280 x 1024 pixels
- User-friendly touchscreen operation
- One measuring instrument for multiple measuring tasks
- Good workshop compatibility
- MarWin EasyShaft software provides a high level of flexibility and user-friendly operation

Options:

- Tactile measuring unit for measuring radial run-out and axial run-out
- Temperature compensation
- Thread measurement
- Turbocharger shaft measurement
- Camshaft measurement
- Piston measurement
- Manual control panel
- MarWin Professional Shaft - software

For more information, please visit our website: www.mahr.com

MarShaft. Scope 600 plus 3D

Mahr is pleased to provide a new measurement method for the special camshaft application using the new MarShaft SCOPE 600 plus 3D: A combination of optical and touch sensors allow for a first ever functionally complete 3D Inspection of the workpiece. Due to this market need Mahr further developed our highly anticipated and received MarShaft SCOPE 750 plus System. The advanced System now utilizes a new 2D Touch Probe, a motorized tailstock and a calibration for the linear axes. A Matrix camera optically measures characteristics such as diameters, lengths, radii, geometries, location characteristics, cam angle or cam lift in seconds. The additional 2D Sensor detects features that are not optically measurable: concave cam shapes, axial run out on large shoulders, reference elements in the axial direction such as blind holes. For this system, the tactile and optical systems are aligned/adjusted to exist within one measuring coordinate system. This unit operates in conjunction with the MarWin software platform, thus providing full 3D functionality. Features:

- Complete measuring of camshafts, including cam angle and all cam profiles
- Measurement of contours
- No use of radial drivers
- Direct measurement of reference (2 flat, blind borehole or keyway)
- Measurement of keyway grooves
- Measurement of blind boreholes
- 100% 3D function with the new 2D probesystem 1320-2
- Additional Y- measuring axis
- Special calibration of the linear axis (Z-X-Y)
- MarShaf Professional Software
- Manual panel

Options:

- Barcode-Scanner
- Signal light (red, yellow, green)
- Coated tip (no driver required)
- Vibration isolation system
- Temperature compensation
- Thread Measurement
- Turbocharger shaft measurement

Technical Data

| MarShaft SCOPE 600 plus 3D | |
|-----------------------------------|---|
| Measuring range length (Z) (mm) | 600 |
| Measuring range diameter (X) (mm) | 120 |
| Workpiece weight (max.) in kg | 15 |
| Length/diameter resolution (mm) | 0.01 to 0.0001 |
| Angle resolution (°) | 0.01 to 0.0001 |
| Length error limit (Z) (µm) | (2,0 + L/125) L in mm (at 20 °C ± 1 °C on reference standard) |
| Diameter error limit (X) (µm) | (1,0 + L/125) L in mm (at 20 °C ± 1 °C on reference standard) |
| Drive | Servo motors |
| Lens | Telecentric precision lens High-resolution CCD array |

Applications

- Complete measurement of camshafts

Typical workpieces

- Camshaft
- Eccentric shafts
- Shafts with keyways or blind boreholes

For more information, please visit our website: www.mahr.com

MarShaft SCOPE 250 plus

The role of dimensional metrology is expanding at a dramatic rate, in parallel with innovations in manufacturing processes. Given the ever more stringent accuracy requirements and falling cycle times in production (turning, milling, grinding, etc.), rapid measurement directly at the manufacturing machine is absolutely essential. Measurement at the point of origin of the product, with rapid feedback to the manufacturing process to avoid waste. Mahr's flexible MarShaft SCOPE 250 plus shaft measuring machine offers the right measuring solution for the fast, precise and fully automatic measurement of rotationally symmetrical workpieces in production.

The MarShaft SCOPE 250 plus has a high precision roundness measuring axis (C) and a vertical measuring axis (Z) with a measuring range of 250 mm. At its heart is the state-of-the-art, high-resolution CMOS matrix camera (live image) with an image field of 1088 x 2048 mm. The extremely high image acquisition rate of over 120 images per second keeps measuring times to a minimum. Zoom functions allow the smallest details to be measured, which with conventional measuring methods are difficult if not impossible to test.

Technical Data

| MarShaft SCOPE 250 plus | |
|-----------------------------------|---|
| Measuring range length (Z) (mm) | 250 |
| Measuring range diameter (X) (mm) | 40 |
| Length/diameter resolution (mm) | 0.01...0.0001 |
| Angle resolution (°) | 0.01...0.0001 |
| Length error limit (Z) (µm) | $\leq (3.0+I/125) I$ in mm |
| Diameter error limit (X) (µm) | $\leq (1.5+I/40) I$ in mm |
| Lens | Telecentric precision optics High-resolution CMOS camera |

Applications

Typical workpieces

- Turned parts
- Journals
- Hollow shafts
- Drive shafts
- Turbocharger shafts
- Bone screws
- Balance shafts
- Hydraulic parts
- Valves (gasoline engine)
- Injection valves and many more

Performance features at a glance:

- New, high-resolution CMOS matrix camera with a 40 mm live image field allows fast scanning with over 120 images per second
- High accuracy for diameter and length measurement
- Extremely fast measuring times thanks to high measuring speeds of up to 200 mm/s
- By using Mahr's MarWin software platform, you can benefit from our decades of experience in length, shape, position and contour measurement
- Affordable entry-level price into the small optical shaft measuring machine segment

For more information, please visit our website: www.mahr.com

MarWin Software EasyShaft

MarWin EasyShaft software is the measuring, control and evaluation system for the MarShaft SCOPE plus. It offers precision measurement of diameters, lengths, contour features and form and position tolerances in accordance with standards, along with many new evaluation and documentation options, all with a well-laid-out, intuitive user interface. The software runs entirely under the familiar Windows® operating system. The user interface is compatible with other Windows® applications, reducing the familiarization time substantially. All Windows®-compatible printers can be used for record output.

Performance features at a glance:

- The familiar Windows® user interface makes for a short learning curve
- The user interface is used as standard across all Mahr products (e.g. EasyForm or Contour 1)
- Clear, windows-based layout
- User-friendly, 100% touchscreen functionality
- Predefined macros for easy programming (e.g. diameter measurement at a mouse click)
- Many functions can be selected directly via meaningful icons
- Touchscreen-controllable machine axes
- The live image from the matrix camera is permanently displayed during measurement, i.e. direct visual assessment of the workpiece condition (e.g. soiling) even during measurement
- For individual and series measurements: the ideal operating strategy for every task
- User-friendly, state-of-the-art measuring program management
- Time-optimized measuring program sequence (shortest measuring times)
- Meaningful measuring records — in black-and-white or color — output to all Windows® printers
- Future-proof investment, runs under Windows 7 Ultimate
- Optional data export to statistics programs extends the range of functions of the EasyShaft software

EasyShaft program window

The EasyShaft software gives you full control over the MarShaft SCOPE. The touchscreen gives you direct access to positioning, programming, measurement and documentation. The excellent, simple user interface helps you keep track of everything you need to know.

Many functions, such as loading measuring results or adding feature measurements, can be selected simply by clicking an icon.

EasyShaft commands

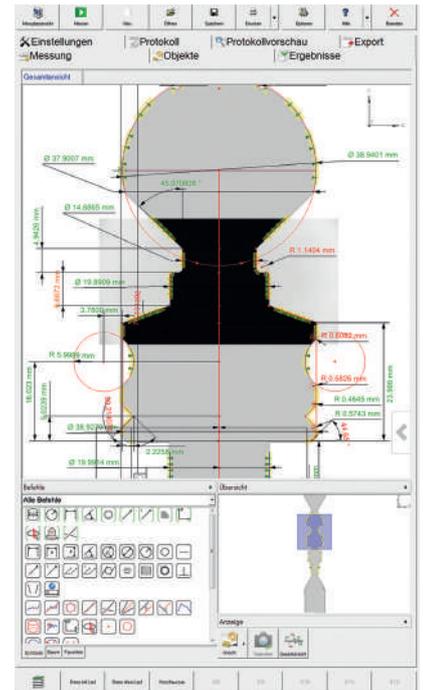

The clearly laid-out command bar contains all the commands required for measuring and evaluating features.

- Macros (composed sequences of evaluation actions, e.g. diameter, radius, distance or angle)
- Features which can be calculated (e.g. direct distance, distance in X and Z, angle, angle sector, radius, roundness, straightness, radial run-out, axial run-out, cylindricity, symmetry)
- Substitute elements which can be calculated (e.g. point, line, circle, point on straight line, intersection point, symmetry straight line, parallel straight line, extreme point, C-reference)

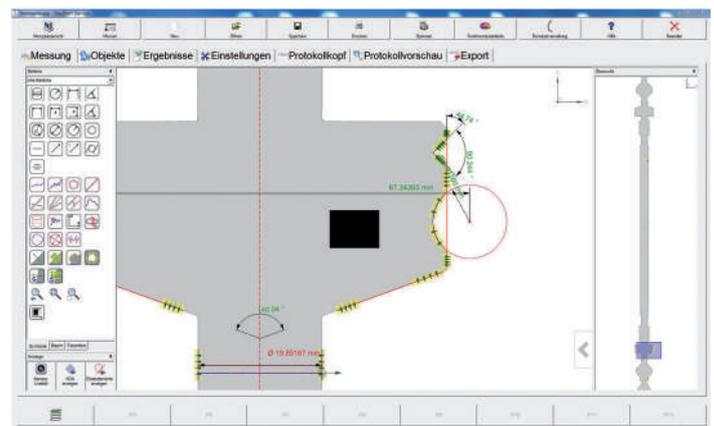

Display palette (touchscreen control of machine axes)

- Used to show or hide the display palette
- Used to select the zoom range
- Joystick for the C-axis
- Joystick for the X- and Z-axis
- Zoom in incrementally
- Zoom in or out continuously
- Zoom out incrementally

DIMENSIONAL MEASURING TECHNOLOGY FOR PRODUCTION

MAHR CUSTOMER SOLUTIONS

The latest information about MARSOLUTION customer solutions can be found on our website:
www.mahr.com, WebCode 14520

The design and manufacture of high-precision and reliable workpiece-specific gages requires immense measuring experience and expertise. State-of-the-art Millimeter length measuring components produce reliable measuring equipment for a wide range of workpiece geometries with varying levels of automation. Our range of products and services covers all the necessary project steps right up to ready-to-use handover of the measuring equipment: Development, design, production, installation, commissioning and training.

MarSolution. Measuring Devices Based on Millimar Standard Elements

Millimar standard elements can be used for the flexible design and cost-effective realization of multi-gage measuring devices for a wide range of workpieces, e.g. rotationally symmetrical and non-rotationally symmetrical parts. Rotationally symmetrical workpieces can be mounted between centering tips or on prismatic supports, whereas non-rotationally symmetrical workpieces require a special holder. The extensive range of standard elements includes, for example, vertical and horizontal measuring stands, holders, coordinate measuring tables, block elements, spring parallelograms, swivel elements and a range of measuring anvils.

MarSolution. Measuring Devices Based on Millimar Standard Elements

Versatile

The versatility of the Millimar standard elements means that the right solution can be provided, whatever the measurement task at hand.

Whether outer, inner or length measurements, the Millimar standard elements can be adapted to the most diverse test requirements, even with awkward to reach workpiece geometries.

Thanks to the compact design of the anvils, a large number of measuring points can be inspected within a small area of the testpiece.

The pneumatic lifting mechanisms integrated in the measuring elements simplify the job of moving the testpiece into the measuring position and reduce wear to the measuring anvils.

Flexible

The modular concept using Millimar standard elements throughout the whole system and a generous amount of travel in the measuring anvils (up to 20 mm) allow a high degree of flexibility in terms of the variety of testpieces that can be accommodated.

Precise

The Millimar standard elements are specially designed for use in the workshop and are manufactured using a rigorous process. This guarantees that the measuring devices give stable and reliable measurements.

For example, using measuring anvils fitted with two ball-bearing guides for supporting the moving part, it is possible to achieve measurement repeatability in the μm range if this is required due to the tolerances of the feature being measured.

Reliable

All components are long-lasting and low-maintenance thanks to the use of rust-proof materials and the selection of appropriate heat treatments. The use of lifting mechanisms to minimize the effects of friction on the measuring anvils when the workpiece is inserted, further reduces component wear.

Economical

Our systems can either be constructed by the customer from standard catalog elements, or alternatively we can provide turn-key solutions. Whichever option you choose, you can be sure that you are purchasing a system that is tailored to your specific requirements on the most favorable of terms.

Below are just a few examples of the many factors that contribute to the cost effectiveness of the Millimar standard elements:

- Standard elements can be reused: Once manufacture of a particular type of workpiece has ceased, all standard elements used in the test equipment can be reused to create new test equipment for a different type of workpiece.
- A choice of different mechanisms for guiding the moving part of the measuring anvils according to the accuracy requirements of the measuring task (optimal value for money).
- Reduction in development and implementation time.
- Availability of devices: Our standard elements are manufactured under standard production conditions and are always available off the shelf and ready to use.

MarSolution. Standardized Measuring Devices

Mahr's "MarSolution" product group offers special customized solutions in dimensional measuring technology – semi and fully automatic measuring systems that work directly in production. Mahr uses its tried and tested standard components (Millimar measuring interface, probes and standard elements) to provide reliable and accurate measuring technology. Always the right solution for your task. Mahr offers solutions for various sectors and industries.

Vertical measuring device with pivoting workpiece holder between centers

These measuring devices allow inspection of diameter, length, and radial and axial run-out for rotationally symmetrical parts. With manual or automatic swivel workpiece holder between centers.

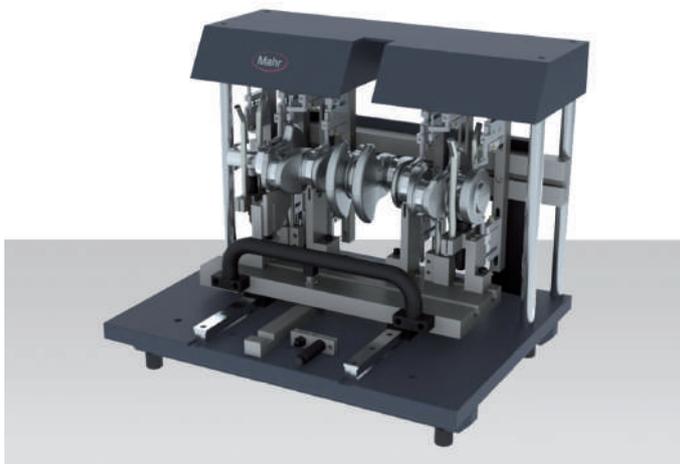

Motorized rotation also allows the option of dynamic workpiece measurement.

Measuring device with rotary table

Measuring devices with rotary table allow combined external and internal measurements and automatic radial and axial run-out testing.

This measuring device can also be motorized to enable dynamic measurements.

Horizontal measuring device

Workpiece holder on vees or between centers, including workpiece loading table.

The horizontal measuring devices allow workpieces to be held on vee supports or between centers. This system is particularly suitable for heavy workpieces.

The workpiece can be inserted in the workpiece holder outside of the actual measuring station.

For more information, please visit our website: www.mahr.com

MarSolution. Customer-specific Measuring Devices

RPM series - commutator shaft measuring device

The RPM measuring device is a simple and accurate solution for measuring diameters, roundness, radial runout and bar-to-bar height, for example, of the commutator shaft or precision shaft in the electric motor.

The RPM offers the following benefits:

- Simple operation for efficient measuring
- Fast measurements
- Powerful functional analysis using the D1200X software

TC series - housing measuring device

These measuring devices can be used to measure various types of housing, for example turbochargers, pumps, electric motors, housing. The measuring device is available as a standalone solution for close-to-production use or as an integrated version for 100% production control.

CR 240A: Automated measuring devices for connecting rods

Simple measuring devices can be used to control various work sequences. Automatic solutions can perform all the measuring tasks for the final inspection.

For example, the CR 240A measuring station can measure the usual dimensional features on a connecting rod and also offers the following functions:

- Interchangeable measuring heads with pneumatic plug gages and Millimar P2004 inductive probe
- Laser engraving of connecting rods, the complete housing protects against laser beams
- Camera for check reading
- Precise weighing system
- D1200X measuring software with clear and simple user guide
- Measurement results can be evaluated online to allow tool adjustments, statistical analysis, etc.

For more information, please visit our website: www.mahr.com

MarSolution. Customer-specific Measuring Devices

Dynamic measurements of the inner diameter of cylinder bores and wall thicknesses

The cylinder liner measuring machine is a standalone version for automatically measuring the inner diameter of bores and the wall thickness of a diesel cylinder liner.

A handling device allows fully automatic loading and unloading. The measuring machine is directly integrated in the production line. The cycle time for a complete measurement is less than 2 seconds.

The measuring instrument consists of three stations:

- The first station is the charging station where the temperature of the socket is measured.
- At the second station the inner diameter of the bore is measured using a pneumatic plug gage. The second station also contains the diameter setting master for the pneumatic plug gage; the plug gage is automatically calibrated at regular intervals. This process guarantees maximum measuring accuracy and stability of the measuring results, even in the harshest of manufacturing environments.
- At the third station a tactile measurement determines the wall thickness of the socket. The probes are automatically positioned at the relevant measuring points after loading. The wall thickness measurement takes just seconds. The probes are parked before the socket is removed from the measuring device to minimize wear to the contacting measuring elements.

Dynamic measuring of deformations in half-bearings

Type 2152447 is an automatic standalone measuring instrument for measuring dimensional changes caused by pressure to half-bearings (e.g. for connecting rods).

The half-bearing is automatically conveyed into the measuring machine and inserted into the relevant test chamber (semicircular holder), secured at one side, and a defined pressure is applied to the other free side (e.g. according to the operating mode of the subsequent motor assembly). A tactile probe system simultaneously measures the dimensional change circumferential to the half-bearing. After the measurement, the half-bearing is removed by the handling device.

To ensure measuring accuracy throughout the process, the measuring device is automatically calibrated at regular intervals using a setting master.

The entire process is computer-controlled with user-definable force parameters. Measuring records and databases can be created.

Measuring device for checking diameters on large rings

Large rings (e.g. bearing rings) are subject to the most stringent tolerances. Checking these requires flexible measuring equipment that can cover a range of inner and outer diameters.

The measuring device for large rings means that inner and outer diameters can be measured with just one device.

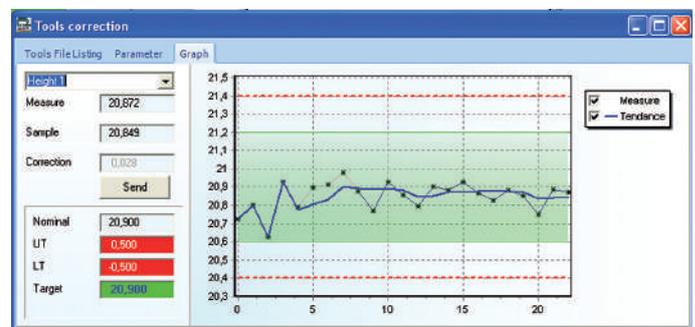

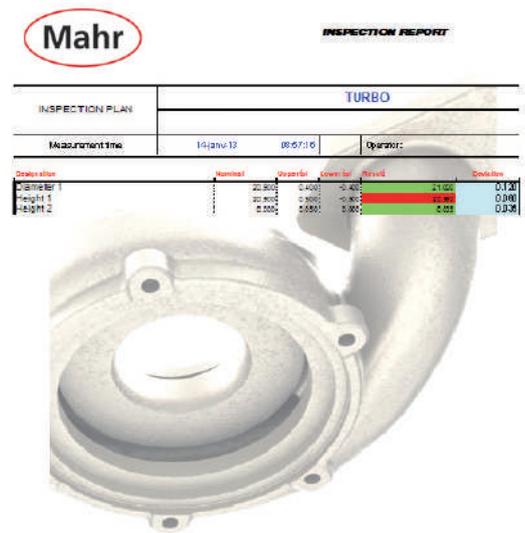

It can measure inner diameters from 63.5 mm up to maximum 825 mm and outer diameters from 76.2 mm up to maximum 831 mm.

For more information, please visit our website: www.mahr.com

MarSolution. D1200X Software

- Windows®-based software
- Microsoft ACCESS® database
- Password protected menus and access privileges
- Non-restrictive formula editor
- Easy-to-program test plans - simply fill in the on-screen forms
- User-programmable calculation formula
- Quick-select options for displaying measurements performed
- Simple sensor adjustment using an on-screen assistant
- Storage of calibration history
- Measurement value display (numeric and bar graph views)
- Storage of measurements (manual or automatic)
- Sensor workspace monitoring with alarm output
- Statistical analysis of measurement results, with visualization using histograms and SPC control charts
- Automatic calibration requests defined by hours and number of measurements
- Comments can be added to faulty measurement values to indicate the cause
- Statistical analyses
- Tests to determine normal distribution
- Integrated measuring system analysis (R&R) and gage capability
- Data export module supporting numerous formats
- QDAS, SUMEQ, SESAME, QUASAR and other interfaces supported
- Option to use I/O port for automatic control
- Can be used in automatic production lines with dialog control

MORE THAN JUST PRODUCTS

SERVICES FROM MAHR

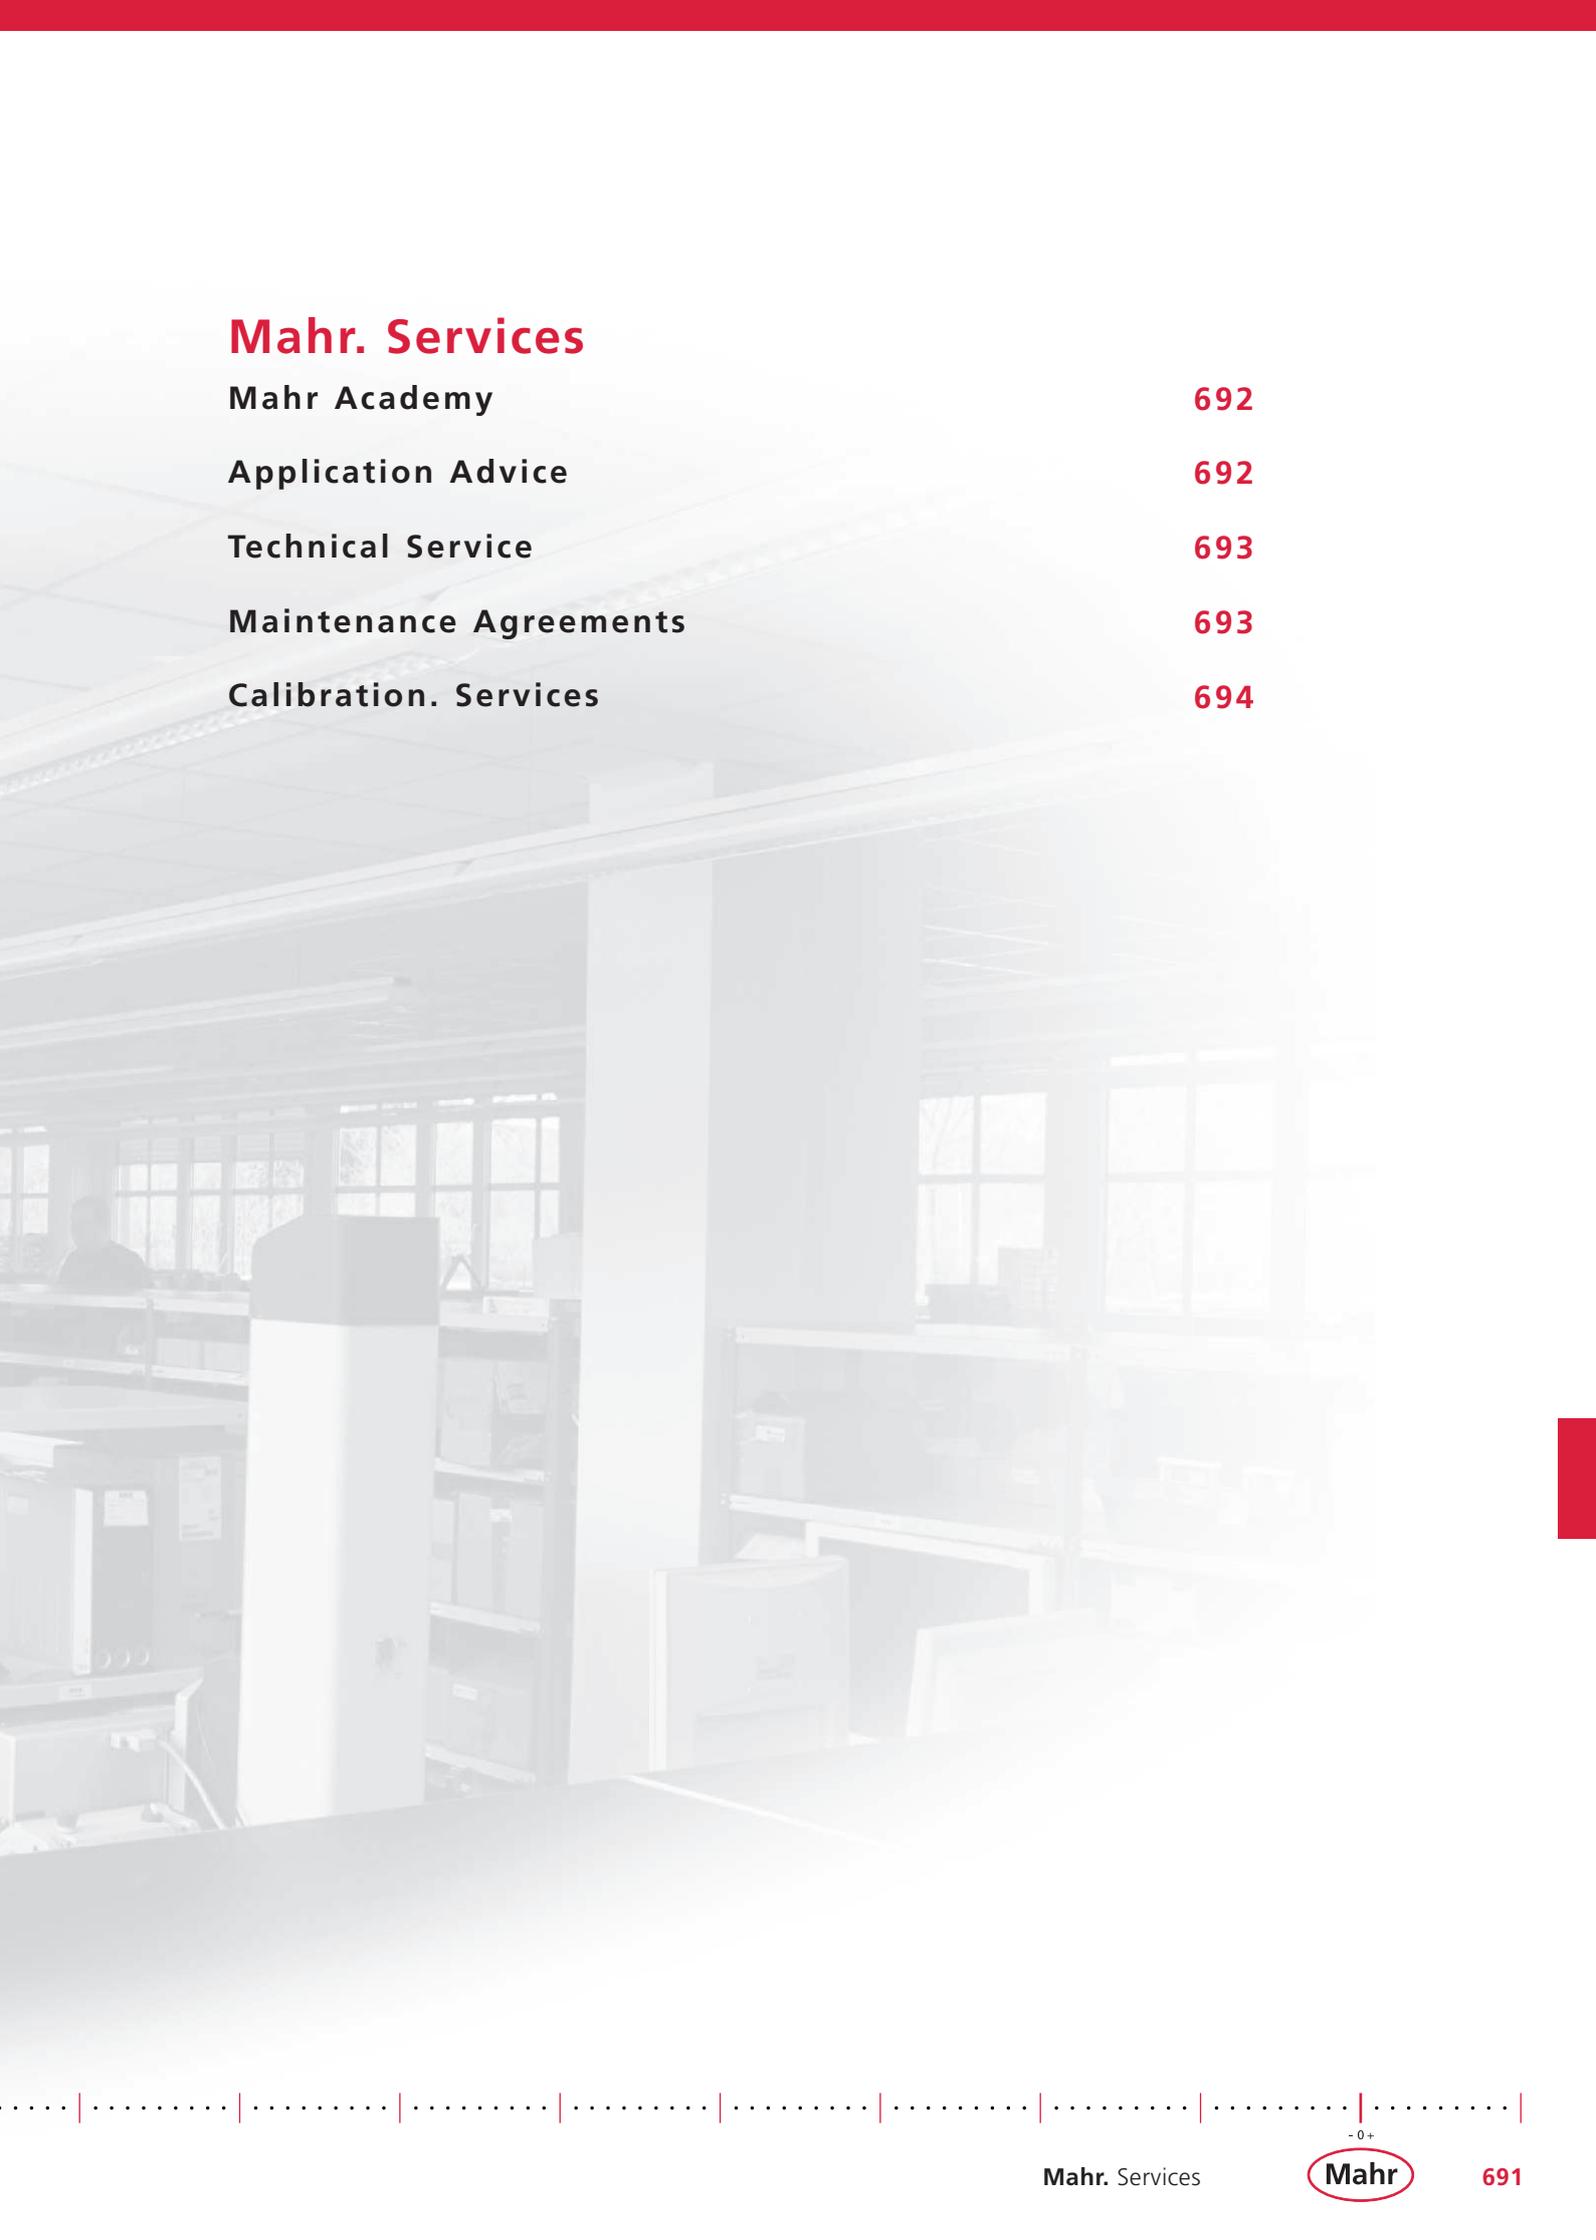

News about MAHR
You can find your nearest SERVICE CENTER
on our website:
www.mahr.com, WebCode 14801

In addition to its many branches and agencies, Mahr also has a worldwide service network. To find the appropriate contact, visit the Mahr's website at **www.mahr.com** or refer to the back page of this catalog. Besides product related services, additional services are also available from various Mahr sites, reflecting the available experience and expertise in each case. We are happy to help with all your metrology questions, no matter how specific.

Mahr. Services

| | |
|-------------------------------|------------|

| Application Advice | 692 |
| Technical Service | 693 |
| Maintenance Agreements | 693 |
| Calibration. Services | 694 |

Mahr Academy

The **Mahr Academy** offers application specific product training courses and basic technical seminars. These programs can be held at fixed venues on predetermined dates, or arranged internally within your company. The subjects offered are relevant to all employees who work either directly or indirectly on production tasks. The courses are beneficial to new employees on the shop floor, in the inspection room and in the design department. They are equally valuable to employees who are looking to expand their knowledge.

MahrExpert seminars stand for:

- Trainers with practical experience
- Training concepts based on proven educational techniques
- Extensive, always up-to-date training documents
- Expert advice on all questions relating to the improved quality of technical products

We offer the following seminars:

- Product training at three levels (easy, advanced, professional)
- Basic training and seminars (on length metrology, surface metrology, form measurement, gear and coordinate metrology, AUKOM 1 Basic)
- Professional training to become an authorized measuring instrument representative and gage monitoring, measurement uncertainty, measuring instrument capability and process capability (organized and run in cooperation with the Technical Academy Wuppertal TAW/AfQ)

Application Advice

Do you need help with designing solutions for metrological tasks? Do you need to create measuring programs for complex workpieces? Do your users need some basic product training?

Take advantage of the services offered by our application engineering specialists, with their extensive knowledge and many years of experience in dimensional metrology.

The terms **Precimar**, **MarForm**, **MarSurf**, **Millimar** and **MarShaft** represent core skills in the fields of length metrology, form, contour and roughness metrology and shaft metrology. Our application engineering and technical service specialists also offer:

- Sample measurements
- Help with commissioning equipment
- Program creation
- Product training
- Measuring equipment capability testing
- User training

For more information, please visit our website: www.mahr.com

Technical Service

Mahr quality guidelines set high standards in which **Mahr measuring instruments** are developed and manufactured, using the very latest technology available. This guarantees that consistently, all **Mahr measuring instruments** are of the highest quality.

To assure that your machine/measuring station receives the best possible care, Mahr operates an efficient worldwide service organization. The **Mahr Service Organization**, run by trained specialists, is equipped with cutting edge tools and instruments, many of which have been specially developed, and stocks an extensive range of spare parts.

Mahr works according to progressive, tried-and-tested guidelines and offers a range of complementary services. To ensure the best results from your **Mahr measuring equipment** at all times, we recommend you use only the services offered by the **Mahr Service Organization**. This is the only way of ensuring that only **original Mahr spare parts** and servicing procedures are used, reflecting the stringent **Mahr quality standard**.

Visit Mahr's website at www.mahr.com to find your nearest **Mahr Service Center**.

Maintenance for Measuring Systems

The **operational availability** of your measuring equipment is very important. To ensure smooth operation over many years, Mahr recommends your equipment be **regularly inspected**. Regular inspection of your measuring equipment results in **considerable advantages**:

- Unexpected equipment failures are prevented
- Wear parts are exchanged in reasonable time and within the framework of the agreed service intervals
- Keeps your equipment running at peak performance, including incorporation of future product improvements
- Provides the best conditions for your quality assurance system
- With a service agreement you minimize operation costs and optimally retain the value of your machine. Preventative maintenance can be planned and leads to an undisturbed operation of production
- Maximal operational readiness by the setting of all mechanisms, pneumatic and electronic functions as well as the examination of software used
- Complete, intensive examination is conducted only by Mahr specialists
- Calibration certificates are issued
- Early detection of trouble due to wear leads to a decrease in idle time and ensuing costs

Calibration Services Measuring Systems

Mahr runs **laboratories** for **various instruments** and **instrument sizes** in the field of **length metrology**. These ensure high dimensional accuracy and **very low measurement uncertainties**. In principle, **all measuring equipment** can be calibrated. We provide the following core services::

- Gage calibration (length) *
- Parallel gage blocks *
- Setting rings / setting plug gages / setting disks / pin gages *
- Geometry and roughness standards *
- Optical flats
- Inductive probes with / without display unit *
- Thread plug gages / thread ring gages *
- Incremental probes *
- Vertical length measuring units / height measuring units *
- Calipers / outside micrometers *
- Dial gages / dial comparators / dial test indicators *
- Setting standards *

- Magnification standards (flicks) *
- Contour standards *
- Stylus instruments / roughness measuring units *
- Testing cylinders / cylinder squares *
- Roundness standards *
- Length measuring units *
- Multi-shaft standards *
- Dial comparator and dial gage testers *
- Super fine roughness standards *
- Custom objects on request

* Calibrations with officially recognized calibration certificates that comply with national and international standards, e.g., DAkkS/DKD (German Calibration Service).

Calibration Services Measuring Systems

Deutsche
Akkreditierungsstelle
D-K-15074-01-00

DAKkS/DKD (German Calibration Service) is a signatory of the multilateral agreement by the European cooperation for Accreditation (**EA**) and the International Laboratory Accreditation Cooperation (**ILAC**) concerning the mutual recognition of calibration certificates.

Your **Mahr contact** will provide you with information on national and international recognition, e.g., as part of the multilateral agreements www.european-accreditation.org and www.ilac.org

Mahr Inc. offers an inspection and recalibration program for dimensional standards, and calibration and certification services for a wide range of gages. ISO/IEC 17025 Accreditation defines general requirements for the competence of testing and calibration laboratories.

NVLAP[®] National Voluntary Laboratory Accreditation Program

CALIBRATION LABORATORIES

NVLAP LAB CODE 200605-0
